Proceedings in the United States Circuit Court of Appeals are included in Vol. 3-A

UNITED STATES OF AMERICA,
DISTRICT OF DELAWARE, } *ss.:*

BE IT REMEMBERED, that at a District Court of the United States for the District of Delaware, begun and held at the United States Court House and Post Office Building, in the City of Wilmington, in said District of Delaware, at the time and place required by law, among other, the following proceedings were had, to wit:

NATIONAL BISCUIT COMPANY,
Plaintiff,
v.
KELLOGG COMPANY,
Defendant.

No. 980. IN EQUITY.

DOCKET ENTRIES.

June 11, 1932. Bill of complaint filed; same day subpœna issued, returnable July 1, 1932.

June 17, 1932. Marshal returns on subpœna, "Served", &c.; same day writ filed.

June 29, 1932. Defendant appears by E. Ennalls Berl, Esqr., its solicitor; same day præcipe filed.

June 30, 1932. Stipulation filed; same day order extending time for filing answer until August 1, 1932; same day order filed.

Aug. 3, 1932. Stipulation filed; same day order extending time for filing answer until

	August 10, 1932; same day order filed.
Aug. 8, 1932.	Answer filed.
Aug. 30, 1932.	Plaintiff's reply to defendant's affirmative defense, filed.
Oct. 29, 1932.	Stipulation filed; same day order extending time for taking depositions, &c.; same day order filed.
Dec. 14, 1932.	Stipulation filed; same day order extending time for taking depositions, &c.; same day order filed.
Dec. 15, 1932.	Stipulation filed.
Dec. 27, 1932.	Order granting leave to file plaintiff's interrogatories; same day order and interrogatories filed. (Exit copy to defendant's attorneys.)
May 22, 1933.	Defendant's answers to plaintiff's interrogatories, filed.
May 22, 23, 24, 25, 26, 31, 1933.	Trial.
June 1, 2, 1933.	Trial.
June 2, 1933.	Depositions on behalf of plaintiff and defendant (in 10 volumes) filed.
June 2, 1933.	Record of proceedings at trial, filed.
Aug. 1, 1933.	Plaintiff's requests for findings of fact and conclusions of law, filed.
Sept. 30, 1933.	Defendant's requests for findings of fact and conclusions of law, filed.
Oct. 31, 1933.	Hearing on pleadings and proofs.

Nov. 1, 1933. Hearing on pleadings and proofs.

Jan. 11, 1935. Opinion of court filed.

Jan. 22, 1935. Final decree dismissing bill of complaint, with costs against the plaintiff; same day decree filed.

Feb. 12, 1935. Plaintiff's petition for appeal with assignments of error, filed; same day order allowing appeal, bond in the sum of $500.; same day order filed.

Feb. 20, 1935. Plaintiff's præcipe of lodgment of condensed statement of the evidence, with four volumes, filed.

Feb. 20, 1935. Notice to defendant's solicitor of lodgment of condensed statement of testimony, filed.

Feb. 20, 1935. Plaintiff's præcipe for transcript of record with acceptance of service by solicitor for defendant endorsed thereon, filed.

Feb. 22, 1935. Order approving bond on appeal in the sum of $500, with American Surety Company of New York, as surety; same day bond filed.

Feb. 22, 1935. Citation issued.

Mar. 2, 1935. Citation with acceptance of service by solicitor for appellee endorsed thereon, filed.

Apr. 23, 1935. Præcipe of defendant-appellee for inclusion of additional matter in transcript on appeal, filed.

Apr. 23, 1935. Stipulation with condensed narrative statement of evidence, filed; same day order approving record, &c.; same day order filed.

Apr. 23, 1935. Stipulation filed; same day order for withdrawal of physical exhibits, &c.; same day order filed.

BILL OF COMPLAINT.

(Filed June 11, 1932.)

IN THE DISTRICT COURT OF THE UNITED STATES,
FOR THE DISTRICT OF DELAWARE.

NATIONAL BISCUIT COMPANY,
Plaintiff,
v.
KELLOGG COMPANY,
Defendant.

No. 980. IN EQUITY.

Plaintiff, National Biscuit Company, for its bill of complaint against defendant, Kellogg Company, alleges:

1. That plaintiff, National Biscuit Company, is a corporation organized and existing under and by virtue of the laws of the State of New Jersey, a citizen and inhabitant of said State and has one of its manufacturing plants and a place of business at the City of Niagara Falls in the State of New York, and that defendant, Kellogg Company, is a corporation organized and existing under and by virtue of the laws of the State of Delaware, a citizen and inhabitant of said State and has a manufacturing plant at Battle Creek, County of Calhoun and State of Michigan.

2. That this action is between citizens of different states for unfair competition in trade in which the amount involved, exclusive of interest and costs, exceeds the sum or value of three thousand dollars ($3000).

3. That Cereal Machine Company was duly incorporated under the laws of the State of Colorado on

June 8, 1893; that it was engaged in the manufacture and sale of a whole wheat biscuit, an edible product; that Henry D. Perky was the founder of the business of said Cereal Machine Company and was president of said Cereal Machine Company; that on or about the seventeenth day of May, 1900, the name of said Cereal Machine Company was, pursuant to the laws of the State of Colorado, duly changed to Shredded Wheat Company; that in the year 1900 The Natural Food Company, a corporation, was duly organized under the laws of the State of New York; that in the year 1900 said The Natural Food Company acquired, succeeded to and thereafter continued until in the year 1930 the said business theretofore conducted by said Colorado corporation under the successive names Cereal Machine Company and Shredded Wheat Company; that on or about the fifteenth day of May, 1908, the name of said The Natural Food Company, was, pursuant to the laws of the State of New York, duly changed to The Shredded Wheat Company; that in the year 1898 plaintiff, National Biscuit Company, a corporation, was duly organized under the laws of the State of New Jersey and since its incorporation plaintiff has been and now is engaged in the manufacture and sale of edible products; that in the year 1930 plaintiff, National Biscuit Company, acquired and succeeded to the whole of the going business, trade-marks and property of said The Shredded Wheat Company, a New York corporation; that since plaintiff acquired and succeeded to the said going business of said The Shredded Wheat Company it has continued and is now continuing to conduct the same; that the said business which plaintiff acquired in the year 1930 and which it has been and now is continuing has been carried on as the "Shredded Wheat Division" of plaintiff and that the said going business which plaintiff acquired, continued and is now contin-

ning was begun in the year 1893 and has been carried on continuously since that time.

4. That plaintiff's said predecessors and plaintiff have manufactured and sold to the public from the time of the beginning of plaintiff's predecessors' operations in 1893 to the present time a whole wheat biscuit; that the same has always been made from whole wheat of the highest grade and quality and has always been made with great skill and care so as to retain the body and substance of the wheat in said biscuit, and was and is made in buildings and structures especially designed for the purpose and built at great expense and by mechanism also especially designed and with particular regard to purity and cleanliness, and in such manner that said whole wheat biscuit passes directly from the factory to the customer without opportunity for contamination by odors or any foreign substance; and that during all of said period plaintiff and its said predecessors have spent large sums of money in scientific investigation for the purpose of continually maintaining, improving and perfecting the method of manufacture and the quality of said product.

5. That at all times since 1901 plaintiff's predecessor and plaintiff have had a plant at Niagara Falls, New York, where said biscuit has been and is being made; that said plant at Niagara Falls, New York, has been open to the public and the complete process of the manufacture of said biscuit has been disclosed to the public; that in order to assure a complete inspection, plaintiff's said predecessor and plaintiff have employed guides at said plant at Niagara Falls, New York, and said guides conduct all visitors throughout said plant and explain in detail the various processes of manufacture, and that said plant is visited and inspected by many thousand persons annually.

6. That from the beginning of the manufacture of whole wheat biscuit by plaintiff's said predecessors and continuously until the present time, plaintiff's said predecessors and plaintiff have manufactured said whole wheat biscuit for sale and consumption, without material alteration or change, in a distinctive and peculiar shape and appearance; that said biscuit has been produced and baked so as always to present an appearance at once recognized and readily distinguishable from any other forms of food product ever before manufactured either from wheat or any other article; that the whole wheat biscuit of plaintiff is composed and built up solely of filaments of wheat, and is fashioned in a distinctive form, it being substantially rectangular and having rounded top and bottom surfaces and sharply severed ends and having the filaments of which it is composed arranged substantially parallel and its entire surface being browned by baking and rendered crisp and palatable as to its component parts.

7. That continuously during the past thirty-nine years, plaintiff's said predecessors and plaintiff have formed and baked said whole wheat biscuit product in the form and condition above stated, and said biscuit became known during said period of years to the general public by reason of the particular and distinctive shape, appearance and structure of the individual biscuit as above described, and also by reason of the care, skill and uniform high quality in manufacture; that for many years past said whole wheat biscuit has come to have and now has a special and secondary significance and meaning to the public by reason of the facts above set forth, and thus to mean and signify only the said biscuit of the manufacture and sale of plaintiff; that even when displayed separate and apart from plaintiff's carton and advertising matter and standing alone without other means of identification, plaintiff's

said biscuit has come to have with the general public the meaning and significance of the product and output only of plaintiff.

8. That continuously during the past thirty-nine years said biscuit of plaintiff has been associated by the public with plaintiff's said predecessors and plaintiff as sole source of manufacture, by its particular form and appearance and by the particular words and terms "Shredded Whole Wheat Biscuit," or "Shredded Wheat Biscuit," or "Shredded Wheat," the said words and terms having been originally adopted and used by plaintiff's predecessors as fanciful and distinctive designations identifying the said particular product of their origin; that plaintiff's said predecessor, The Shredded Wheat Company, a New York corporation, registered in the United States Patent Office on the fifteenth day of January, 1924, the said trade-mark consisting of the words "Shredded Wheat"; that said trade-mark registration bears No. 178,725 and is for biscuit or crackers; that said The Shredded Wheat Company also caused to be registered in the United States Patent Office on the twenty-fifth day of May, 1926, the trade-mark consisting of the words "Shredded Wheat"; that said trade-mark registration bears No. 213,456 and is for biscuits, crackers and cereal foods cooked or prepared for consumption; that no other person, firm, corporation or association has the right to use said trade-mark, consisting of the words "Shredded Wheat," in the United States for said products; that in the year 1909 plaintiff's said predecessor, The Shredded Wheat Company, a New York corporation, adopted and continued to use in its advertisements and upon packages containing said biscuit, the trade-mark consisting of a view of said whole wheat biscuit, a saucer or dish and a spoon placed within the saucer or dish, the biscuit being partly im-

mersed in cream; that said trade-mark was duly registered in the United States Patent Office on the thirtieth day of January, 1912, and bears registration No. 85,186; that said trade-mark registration No. 85,186 was duly renewed on or about October 20, 1931, for a further period of twenty (20) years from the thirtieth day of January, 1932; that in the year 1909 plaintiff's said predecessor, The Shredded Wheat Company, also adopted and used upon packages containing said biscuit the trade-mark consisting of a cut or representation of two said shredded wheat biscuit, and a saucer or dish, the said biscuit being placed therein and partly immersed in cream or milk; that said trade-mark was duly registered in the United States Patent Office on the seventeenth day of August, 1926, and bears registration No. 216,593 for biscuits, crackers and cereal foods cooked or prepared for consumption; that no other person, firm, corporation or association other than plaintiff has the right to use said trade-marks in the United States; that said trade-marks have been used upon packages containing said biscuit and in advertisements of said biscuit for many years and they were not abandoned by plaintiff's said predecessors or plaintiff; that plaintiff adopted and continued and is now using upon packages in which its said biscuit is packed a cut or figure of said biscuit; that said words, terms and trade-marks have been so associated with plaintiff's product that they have been and are indicative of source or origin continuously during said entire period from their adoption to the present time; that said words, terms and trade-marks so associated have grown to be the trade-marks and trade names of plaintiff for its said product and are the symbol of its good will and its commercial signature; that the said words, terms and trade-marks have for many years been indicative of the intrinsic worth and high quality of plaintiff's said biscuit product as a pure and

wholesome food for human consumption; that said words, terms and trade-marks taken singly or together have only the meaning in the public mind throughout the United States and in foreign countries and are applied to only one specific thing by the general public, to wit, the said well known and specific article of food manufactured and marketed for so many years by plaintiff's said predecessors and plaintiff; that said words, terms and trade-marks taken singly or together do not apply to, nor are they used in respect of, any other article or thing whatsoever, either in respect of a food for human consumption or otherwise, except for defendant's unlawful acts as hereinafter referred to; the said words, terms and trade-marks taken together have no meaning whatsoever in the public mind except in their association with the said biscuit of plaintiff and plaintiff as the sole source of manufacture; and that in consequence said words, terms and trade-marks, in association with the said whole wheat biscuit of plaintiff in their distinctive and well known form and appearance, have long since acquired a secondary meaning and special significance in respect of source or origin for the said product of plaintiff.

9. That the volume of sales of plaintiff's said biscuit during the early years immediately following its introduction into the market, was relatively small; that sales of said biscuit have increased and grown until 1,089,396,432 of said biscuit were sold in the calendar year 1928; that in the calendar years succeeding the year 1928 the manufacture and sale of said biscuit has closely approximated the said figure for the calendar year 1928; and that said product now goes into the homes as a food product of more than twenty-five million families annually.

10. That the growth of the business of plaintiff and its said predecessors in the marketing of said bis-

cuit product, has been largely a matter of education and a gradual appreciation by the public of said food product of plaintiff; that said product was an entirely new product, the merits of which were not initially understood or appreciated by the public; that the great value of said product was explained and made known to the public through continuous years of expensive advertising and house to house canvassing, in order to demonstrate and convince it that plaintiff's said biscuit product was of great dietetic and food value, free from all adulterations, nutritious in body and substance and without opportunity of adulterations and contaminations in its manufacture.

11. That for very many years past plaintiff's said predecessors and plaintiff have continuously associated with said biscuit product the said words and terms "Shredded Whole Wheat Biscuit," "Shredded Wheat Biscuit" and "Shredded Wheat," a cut, representation or picture of plaintiff's said distinctive form of biscuit and a cut, representation or picture of said biscuit placed in a saucer and partly immersed in cream, in order more closely to associate said words and terms in the minds of members of the public with the actual biscuit when out of the carton and with plaintiff as the source or origin; that for more than thirty-nine years past plaintiff and its said predecessors have advertised and made known their said biscuit product together with said words and terms through a wide variety of mediums known to the advertising trade, such as letter heads, billboards, newspapers, magazines, booklets, pamphlets, circulars, menu cards, public exhibits, free samples, lectures, house to house canvassing, etc.; that during the many years of the manufacture and marketing of said biscuit, plaintiff's said predecessors and plaintiff have expended many millions of dollars in said advertising and education of the public, and the

economies of large production effected by reason of the increased volume of sales due to such advertising and educational work have benefited the purchasing public.

12. That a large percentage of the stores and restaurants which purchase plaintiff's said biscuit product and vend the same to their customers separate the same from the cartons or containers in which they are packed by plaintiff and display the same in windows, glass globes and other transparent containers, and in bowls, dishes and saucers without any mark of identification thereon or associated therewith, and that when so separated, displayed and exhibited, the public by reason of said continuous and extensive advertising and education by plaintiff, always and immediately recognize said biscuit product as "Shredded Whole Wheat Biscuit," "Shredded Wheat Biscuit" and "Shredded Wheat," the product of plaintiff alone; that vast numbers of plaintiff's said biscuit are individually served in restaurants, hotels, boarding houses, homes, etc., to the ultimate consumer without any mark of identification thereon or associated therewith; that said biscuit associated with said words and terms mean to such ultimate consumer only the biscuit of plaintiff, by reason of their well known distinctive form, shape, color, structure, substance, quality and general appearance and character; and that at all times when the ultimate consumers order "Shredded Whole Wheat Biscuit," "Shredded Wheat Biscuit" or "Shredded Wheat," they intend and for many years have intended the well known biscuit product of plaintiff and no other article.

13. That through the many years of use of the said biscuit of plaintiff, obtained by consumers upon their request by the words and symbols above stated, the public has developed a confidence in the composition, quality, purity and food value of plaintiff's prod-

uct the sale of which has increased in large proportions until in the year 1928, 1,089,396,432 of said biscuit were made and sold; that the long association of said words, terms and symbol with said biscuit of plaintiff and plaintiff as the source of production, has developed in the public mind a continual guaranty of quality and food value in respect of plaintiff's product; that the terms "Shredded Whole Wheat Biscuit," "Shredded Wheat Biscuit" and "Shredded Wheat" and said symbols mean to the public the said familiar product of plaintiff alone, and not a product of similar appearance of the manufacture and sale of any other person, firm, corporation or association; that the public has developed the habit and custom of purchasing and consuming the biscuit of plaintiff because of its source or origin; that the supply to a purchaser of any product having a similar appearance but coming from a different source, upon his order or any of said words and terms above stated, constitutes deception upon him; that such other product being unknown to a purchaser, it would not be the article of food that he had intended to receive and would be as different from his conception as though of entirely different appearance and identified by different characterizations; that as said biscuit is manufactured food for human consumption, its origin is of infinitely more interest and consequence to the public than would be the origin of some article for manual use, the fitness of which may be judged by inspection; and that the chemical and dietetic effect of a food is not determined by its appearance but its content, and the public relies upon the skill and honesty of the maker and desires such product because of confidence in knowledge of its source, and for that reason accepts the appearance of the shredded wheat biscuit and the said distinguishing words, names and marks as guaranteed of its source, purity and wholesomeness.

14. That during said period of thirty-nine years prior to the conduct of the defendant herein presented, no person, firm, corporation or association has engaged in the manufacture and sale of a whole wheat biscuit made in the shape, form, color, structure and appearance of plaintiff's product, except that in 1915 Ross Food Company, a New York corporation, did for a short time engage in the manufacture of a biscuit, called "Ross' Whole Wheat Biscuit"; that the same was made in imitation of plaintiff's product and was of somewhat similar appearance; that plaintiff at said time instituted a suit in equity in the District Court of the United States for the District of Connecticut against The Humphrey-Cornell Company, a wholesale grocery company distributing the biscuit of said Ross Food Company, together with said Ross Food Company and certain of the individuals who had organized said Ross Food Company; that in said suit an injunction was issued by said District Court restraining the defendants therein from manufacturing and selling said product unless each biscuit was specially marked so as to indicate distinctively and effectively that the same was made by defendants therein and not by plaintiff, and the decree of said District Court as to injunction, with certain modifications, was affirmed by the United States Circuit Court of Appeals for the Second Circuit. The decision of the said District Court in said suit is reported in 244 Fed. Rep. 509 and the decision of the United States Circuit Court of Appeals for the Second Circuit on appeal in said suit is reported in 250 Fed. Rep. 960.

15. That long subsequent to the marketing of plaintiff's said whole wheat biscuit and the adoption and use by plaintiff of the said words, terms and symbols or marks defendant herein began the manufacture of a whole wheat product which it designated and

named in display type upon its cartons and containers "Shredded Whole Wheat Biscuit" and said product so designated has been offered for sale and sold by defendant and advertised to the purchasing public by defendant and retailers engaged in the sale of defendant's product to the purchasing public; that subsequently the defendant began and now is engaged in making and selling whole wheat biscuit simulating the whole wheat biscuit of plaintiff in particular and distinctive shape, appearance and structure and has packaged the same in packages or cartons upon which is displayed the representation of said biscuit placed in a saucer in imitation and simulation of the trade mark of plaintiff consisting of the representation of the genuine biscuit of plaintiff placed in a dish or saucer that; defendant has used in its advertisements of its said biscuit made in imitation of plaintiff's genuine biscuit, made in particular and distinctive shape, appearance and structure a cut, picture or representation of a biscuit in association with the word "Shredded"; and that defendant and retailers of defendant's said imitation whole wheat biscuit have advertised in newspapers defendant's said biscuits as "Shredded Wheat" and have embodied in some of such advertisements the well-known trade name "Shredded Wheat" of plaintiff for plaintiff's said whole wheat biscuits, a representation of biscuits placed in a saucer, to wit, in many newspapers among those published as follows:

The Greensboro Record, Greensboro, North Carolina, March 25, 1932;

Danville Commercial News, Danville, Illinois, April 22, 1932;

Minneapolis Journal, Minneapolis, Minnesota, April 15, 1932;

Evening World-Herald, Omaha, Nebraska, April 8, 1932;

Bulletin of Merchandising and Sales Promotion, Bridgeport, Connecticut, March 21, 1932;

Wausau Herald, Wausau, Wisconsin, April 1, 1932;

that the manufacture and marketing of said products by defendant in imitation of the genuine biscuit of plaintiff of distinctive and peculiar shape and appearance and the use of the word "Shredded" in connec-

tion with the said products, the use of a cut or picture of said biscuit alone or in association with the word "Shredded" and the representation of said biscuits placed in a dish or saucer occurred without the consent of plaintiff and in derogation and violation of its rights.

16. That said product of the defendant is not the biscuit manufactured and produced by plaintiff for so many years and which the public has always associated with the words and terms "Shredded Whole Wheat Biscuit" or "Shredded Wheat Biscuit" or "Shredded Wheat" or by said symbols or marks, but said biscuit manufactured by the defendant is an imitation in appearance of the product manufactured by plaintiff in that it closely simulates the same in height, measurements in circumference, color, structure and formation, differing in appearance only in that it is somewhat shorter on the fragile ends and is devised to appear like the genuine but contains less wheat; and that the purpose and effect of defendant in manufacturing and marketing said article designated as "Shredded" whole wheat biscuit, is so to take advantage of and to appropriate to itself the good-will and trade names of plaintiff established through years of effort and at tremendous financial expenditure for advertising and in educating the public, as well as the recognized reputation of plaintiff as the source or origin of a unique product of the highest quality and so made as to insure the highest degree of purity and wholesomeness.

17. That prior to undertaking the manufacture of said biscuit in imitation of plaintiff's product, defendant manufactured and sold a whole wheat biscuit of a different type, style and appearance under the name of "Kellogg's Toasted Whole Wheat Biscuit"; that plaintiff is informed and believes and therefore alleges that the manufacture and sale of said toasted whole wheat

biscuit was not financially successful and was discontinued; that thereafter defendant manufactured and marketed a biscuit more in semblance of plaintiff's product than defendant's said "Toasted Whole Wheat Biscuit," although not as close an imitation as the product now complained of, under the name of "Shredded Whole Wheat Biscuit"; that plaintiff protested against the marketing of said biscuit and the use of said words and terms "Shredded Whole Wheat Biscuit" appropriated for it, immediately upon learning of the same and the marketing of said product was discontinued by defendant; that more recently, defendant continuing to seek to take advantage of the success of plaintiff's said product, has engaged in the manufacture and marketing of the product complained of in imitation of that of plaintiff, and has employed with it words, terms and trade marks which have always been associated only with plaintiff's products, and is attempting to occupy the same market and sell its product to the same purchasers and consumers as have in the past purchased the said biscuit of plaintiff.

18. That said conduct of defendant conveys to the public a false impression as to the origin of the biscuit produced by it; that the public is deceived by the similarity in appearance of the biscuit of defendant made in imitation of the said biscuit of plaintiff, the designation "Shredded" Whole Wheat Biscuit, "Shredded" wheat, the cut or picture of said biscuit in association with the word "Shredded" and the cut of said biscuit placed in a saucer; that the public desiring the said well-known product of plaintiff by reason of its confidence therein, upon ordering the same by the words and terms long associated with it, will, without the test or trial to which a new food of another manufacture is customarily subjected, unwittingly accept the unknown imitation in place of the genuine; that the defendant

thereby benefits and will continue to benefit unlawfully by reason of its improper appropriation of the words, marks, terms and appearance associated with plaintiff's biscuit and in proportion to the success of that unlawful appropriation enjoy unjustly benefits of the good-will of plaintiff; and that in the event that defendant is permitted to violate the public confidence through the substitution of its said imitation biscuit and to appropriate for its product the distinctive form and appearance of plaintiff's said biscuit and also the terms and trade marks herein complained of, other manufacturers by like practices may do the same and while maintaining the imitative appearance of plaintiff's said biscuit, progressively lower the standard of quality and purity and thereby destroy the public confidence in the product of plaintiff and the good-will of plaintiff built up at great expense over a period of thirty-nine years of faithful effort to maintain the high quality and food value of said product which the public has always associated with plaintiff's said predecessors and plaintiff as sole source of origin.

19. That vast quantities of the biscuit manufactured by plaintiff reach consumers in restaurants, hotels, boarding houses, and homes outside of and independently of packages, and without any identifying mark other than the form, shape, color and appearance of the biscuit, all of which features the public has long since come to associate solely with the biscuits manufactured by plaintiff's predecessors and plaintiff; that the biscuits of defendant reach consumers in restaurants, hotels, boarding houses and homes outside of and independently of the packages; that the manufacture and sale by defendant of its biscuit made in imitation of the well-known biscuit of plaintiff, without means thereon of identification of the source or origin facilitates the palming and passing off of defendant's said

biscuit as and for the said well-known biscuit of the manufacture and sale of plaintiff by proprietors of restaurants, hotels, boarding houses and other establishments when individual biscuits are served independently of the carton all with the danger that the public confidence in plaintiff will be undermined and its demand for plaintiff's said biscuit will diminish, all with great loss and injury to plaintiff.

20. That in many instances and recently actual deception and deceit has been practiced upon the public; that upon request of dealers and ultimate consumers who have sought to obtain said "Shredded Whole Wheat Biscuit," or "Shredded Wheat Biscuit," or "Shredded Wheat," of plaintiff the product of defendant has been palmed off and sold in the place and stead of the genuine biscuit known to the public and of which plaintiff and its said predecessors have always been the sole source of supply, all in unfair and unlawful competition with plaintiff and to its great loss and damage.

21. That in order further to facilitate the process of appropriating the good-will of plaintiff and in palming off the product of the defendant upon order for the biscuit of plaintiff, defendant has imitated on its cartons and packages the substance of the advice and directions to consumers that have always appeared upon the cartons and containers of plaintiff and that defendant's said biscuits are sold in the market at a less price than that of plaintiff.

22. That defendant for a number of years past has marketed certain breakfast foods other than the biscuit above complained of, and has competed with plaintiff in its sale to the same general class of consumers; that plaintiff is apprehensive that defendant, if not restrained by this Court, will proceed to flood

the market with a progressively poorer quality of imitation biscuit and maintain in respect of such imitation the appearance of plaintiff's biscuit and appropriate therefor said words, terms and trade-marks now associated in the mind of the public with plaintiff's product alone, and thereby, through a progressive campaign of substitution and deceit of the public, occasion increased confusion and a growing distrust of the product of plaintiff, and through accumulation thereof effect ruin of plaintiff's good-will and high standing and increase the public demand for the other different breakfast foods now being marketed by defendant.

23. That the full value of plaintiff's said equitable rights in the said words and terms "Shredded Whole Wheat Biscuit", "Shredded Wheat Biscuit" and "Shredded Wheat", the particular and distinctive shape, appearance and structure of said biscuit, the said trade-marks "Shredded Wheat", the representation of said biscuit and the cut or picture of said biscuit placed in a dish or saucer in connection with plaintiff's said Shredded Whole Wheat Biscuit exceeds the sum or value of $5,000,000 and that the said acts of the defendant, unless restrained, will destroy the value of plaintiff's rights in and to said property.

24. That the acts of the defendant herein complained of were knowingly and intentionally committed, are contrary to equity and good conscience, a fraud upon the public and constitute unfair competition in trade with plaintiff and a fraudulent invasion of and violation of plaintiff's rights; and that said acts of defendant are calculated to deceive purchasers, and necessarily enable and promote false, fraudulent and unfair competition in business and false, fraudulent and unfair appropriation and use of the words, terms

and symbols so appropriated by defendant as aforesaid, and the fraudulent and unlawful sale and substitution by unscrupulous persons of the product of defendant for the genuine biscuit of plaintiff.

25. That, upon information and belief, the said unlawful, wrongful and fraudulent acts of defendant have caused damage to plaintiff in at least the sum of $250,000 but as to the exact amount plaintiff cannot set forth and prays discovery.

26. Plaintiff alleges that it can have no adequate relief against the defendant for its said acts of unfair competition in trade with plaintiff except in this a court of equity.

Wherefore plaintiff prays:

1. That the defendant be required to appear and answer unto this bill of complaint but not under oath, answer under oath being hereby waived.

2. That this Court enter a decree holding that plaintiff's said predecessors were the first to use and that plaintiff is vested with the exclusive right in and to the whole wheat biscuit made in said particular and distinctive shape, appearance and structure, in and to the name "Shredded" and "Shredded Wheat" in connection with said whole wheat biscuit, in and to the representation or picture of said whole wheat biscuit made in said particular and distinctive shape, appearance and structure, and in and to the representation of said biscuit of particular and distinctive shape, appearance or structure placed in a saucer or dish.

3. That an injunction, both provisional during the pendency of this suit and perpetual, be issued out of

and under the seal of this Court, directed to defendant, its officers, agents, attorneys, workmen, employees, its successors or assigns, and all others acting by or under its direction or authority, restraining and enjoining it and them, and each of them, from, directly or indirectly, manufacturing or selling whole wheat biscuit made in imitation and simulation of the said whole wheat biscuit of the manufacture and sale of plaintiff, of particular and distinctive shape, appearance and structure: from employing upon cartons, in advertisements or otherwise the name "Shredded" in connection with said biscuit; from employing in advertisements or upon cartons containing said biscuit a cut or picture of said biscuit of particular and distinctive shape, appearance and structure, either alone or in association with the word "Shredded"; from using or employing on packages or in advertisements or otherwise the trade-mark consisting of the words "Shredded Wheat", or any simulation thereof; from using or employing on packages or in advertisements or otherwise the trade-mark consisting of the representation of said biscuit of particular and distinctive shape, appearance or structure placed in a saucer or dish, or any simulation thereof and from aiding, assisting or inducing others to advertise, sell, pass or palm off the whole wheat biscuit of the manufacture and sale of defendant as and for the whole wheat biscuit of the manufacture and sale of plaintiff.

4. That an accounting be awarded to plaintiff against defendant of defendant's profits, gains and advantages and the damages suffered by plaintiff by reason of defendant's said acts of unfair competition in trade with plaintiff.

5. For costs of this suit.

6. For such other and further relief as the circumstances of the case may require.

NATIONAL BISCUIT COMPANY,
By (Sgd.) C. F. BLISS,
Vice President.

(Sgd.) ALEXANDER L. NICHOLS,
(Sgd.) HUGH M. MORRIS,

Notary Public, New York County.
County Clerk's No. 177, Reg. No. 3C178.
Term expires March 30, 1933.

ANSWER.

(Filed August 8, 1932.)

Defendant, Kellogg Company, for its answer to the bill of complaint herein, alleges:

That defendant is not advised save by the bill of complaint as to the matters alleged in paragraphs 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, and 26 of the bill of complaint and therefore denies the same, and each of the same, leaving plaintiff strictly to its proofs, and defendant specifically denies that it has been guilty of any unlawful, wrongful or fraudulent acts as charged in the complaint, and defendant generally denies the allegations of the complaint, and each of them, except as to such facts as are hereinafter specifically alleged and admitted.

Affirmative Defense.

For an affirmative defense to the alleged cause of action set forth in the bill of complaint, defendant alleges:

1. That defendant, Kellogg Company, is a corporation organized and existing under and by virtue of the laws of the State of Delaware, a citizen and an inhabitant of said State and has a manufacturing plant at Battle Creek, County of Calhoun and State of Michigan, and that plaintiff, National Biscuit Company, is a corporation organized and existing under the laws of the State of New Jersey, with a regularly established manufacturing plant and place of business at New York City in the Southern District of the State of New York and another factory at Niagara Falls in the State of New York.

2. That, on information and belief, Cereal Machine Company was duly incorporated under the laws

of the State of Colorado on June 8, 1893; that it was engaged in the manufacture and sale of a shredded whole wheat biscuit, an edible product; that Henry D. Perky was the founder of the business of said Cereal Machine Company and was president of said Cereal Machine Company; that on or about the seventeenth day of May, 1900, the name of said Cereal Machine Company was, pursuant to the laws of the State of Colorado, duly changed to Shredded Wheat Company; that in the year 1900 The Natural Food Company, a corporation, was duly organized under the laws of the State of New York; that in the year 1900 said The Natural Food Company acquired, succeeded to and thereafter continued until in the year 1930 the said business theretofore conducted by said Colorado corporation under the successive names Cereal Machine Company and Shredded Wheat Company; that on or about the fifteenth day of May, 1908, the name of said The Natural Food Company was, pursuant to the laws of the State of New York, duly changed to The Shredded Wheat Company; that in the year 1898, plaintiff National Biscuit Company, a corporation, was duly organized under the laws of the State of New Jersey and since its incorporation said plaintiff has been and now is engaged in the manufacture and sale throughout the several States of edible products; that in the year 1930 plaintiff, said National Biscuit Company, acquired and succeeded to the whole of the going business, alleged trade-marks and property of said The Shredded Wheat Company, a New York corporation; that since said plaintiff acquired and succeeded to the said going business of said The Shredded Wheat Company, it has continued and is now continuing to conduct the same throughout the several States and with foreign nations; that the said business which plaintiff acquired in the year 1930 and which it has

been and now is continuing has been carried on as the "Shredded Wheat Division" of plaintiff through direct sales offices and places of business of defendant located in various of the several states.

3. That plaintiff's said predecessors and plaintiff have been and are engaged in the manufacture of the familiar article of food known as shredded whole wheat biscuit or shredded wheat, the product having been formerly made under a series of patents of which the original and basic is for a product and a process. This patent was granted to said Henry D. Perky, the original promoter of the enterprise, in October, 1895, No. 548,086, and disclosed a process of boiling the original whole wheat berry, partially drying it, and then forcing it between compression rollers, one or both of which had peripheral grooves, which mashed the several parts of the berry into a heterogeneous soft paste. This paste was then forced out through combs or scrapers, so as to emerge in thin filaments or shreds. The patent states that the wheat in this form is ready for food, though it may be baked in various ways.

4. That in the actual manufacture of the shredded whole wheat biscuit, the pulpous shreds or filaments which proceed from the combs, as described in the said Perky product patent, are carried off upon a web or endless belt, and are built up by a succession of layers until a strand of the desired thickness is secured. This strand is cut at given intervals by knives or otherwise, thus making the longer edges of the biscuit, which through the pressure of the knives are matted or pressed together. The biscuits are then cooked in an oven which raises the top, except at the longer edges, which have been matted together, separating the shreds, and making more obvious the interstitial tex-

ture of the whole. The baking also browns the top and hardens the biscuit by drying; the color depends upon the manipulation of the heat and somewhat varies with the operator.

5. That in September of the same year, said Perky took out a design patent No. 24,688, dated September 17, 1895, for a term of fourteen years upon a biscuit, shown in the accompanying drawings and rectangular in plan view; the longer axis being about twice the shorter. The end view or section on the shorter axis was ovoid; the bottom or base of the biscuit being flatter than the top. The design also displayed the rough or filamented texture of the biscuit. It described as the leading feature of the design "a fibrous interstitial appearance, showing superimposed layers or irregular interlacing threads or filaments," in such wise that the threads are visible from the surface through the outer layers. This design resulted necessarily from the actual process of manufacture above described.

6. That the plaintiff's predecessor, the Cereal Machine Company, of Colorado, began the manufacture of this product in 1895, and the sale thereof by plaintiff and its said predecessors has been since continued.

7. That up until the year 1915 and later, plaintiff's predecessors carried, printed prominently upon the packages of their said shredded wheat, the following notice:

"September 17, 1895, Patented October 15, 1895.

This food, the process of making it, and special machinery for its manufacture, are under the protection of the United States Government by virtue of many patents, as follows:

[illegible], August 1, 1893
[illegible], May 29, 1894
[illegible], June 26, 1894

683100, September 24, 1901
684789, October 22, 1901
683101, September 24, 1901
678127, July 9, 1901
667892, February 12, 1901
678625, July 16, 1901
681656, August 27, 1901
713793, November 18, 1902
746145, December 8, 1903
770159, September 14, 1904
797604, August 22, 1905
785554, March 21, 1905."

8. That the basic patents relating to shredded wheat, namely, the Perky patents No. 548,086 and [illegible] granted on October 15, 1895, expired by limitation on October 15, 1912, and that all subsequent patents claimed by plaintiff's predecessor and listed on its food packages, as above set forth, have long since expired by limitation and the subject matter thereof has fallen into the public domain.

9. That in some of said patents, as well as some of the trade-mark registrations of plaintiff's predecessors and in the advertisements of plaintiff's predecessors during the life of said patents, the words "shredded wheat" and "shredded whole wheat biscuit" were used by the patentee, Perky, and by plaintiff's predecessors, and by the Patent Office as designative of the distinctive type of shredded biscuit or wheat product disclosed in the various shredded wheat patents, and that the Court of Appeals of the District of Columbia in a suit or judicial proceeding to which plaintiff's predecessor,

was a party held and determined that the words "shredded wheat" and "shredded whole wheat biscuit" were merely descriptive of the shredded wheat product as produced by said Perky and his machines for shredding wheat, and that said words are in fact and in law merely and purely descriptive of the product.

10. That the said patents of plaintiff's predecessors as hereinbefore listed gave to plaintiff's said predecessors a substantial monopoly in the products and processes covered thereby and that the words "shredded wheat" and/or "shredded whole wheat biscuit" came actually to indicate the class and type of product made by plaintiff's said predecessors and to constitute the true and generic description of said product then and still known as "shredded wheat" and/or "shredded whole wheat biscuit," and were used in that sense by plaintiff's predecessors and others.

11. That all of said patents on shredded wheat have long since expired as aforesaid, and that upon their expiration the right to use said processes and machinery and to make said formerly patented article as shown in the design patent aforesaid and to use said generic and strictly descriptive words "shredded wheat" and/or "shredded whole wheat biscuit" and to illustrate and describe the product itself, passed to the public with the dedication resulting from the expiration of said patents, whereupon the public acquired thereafter, and for all time, the right to make the product "shredded wheat" and/or "shredded whole wheat biscuit" and to use said generic and strictly descriptive term in all its forms and with the fullest liberty by affixing such name to the containers of the product, by referring to it in advertisements, by picturing it and the shredded wheat product itself in illustrations or

putting the product itself on display subject only to the condition, bearing equally upon all competitors, that the generic or descriptive name must not be so used as to deceive the public, or to deprive others of their lawful rights; subject also to the right of all new manufacturers to advise the public that the product formerly made only by the patentees, is subsequently being made lawfully by other manufacturers; subject also to the right of a new manufacturer of the old patent-expired product to be protected from oppression, confusion, deception or monopoly practices deliberately fostered or directed against it by the former owners of the expired patent monopoly; and subject finally to the condition that the new maker of the patent-expired product shall not be burdened with any competitive restrictions, to which the former patent-expired maker is unwilling or unable to submit, and which will be equivalent to the destruction of the right of free competition of the newcomer in the field.

12. That for many years since the expiration of the shredded wheat patents defendant has endeavored fairly and in good faith to exercise its lawful right to enter into the manufacture of shredded wheat and the sale thereof throughout the several states but that throughout said efforts it has been impeded, injured, oppressed and held back by the avowed claims of plaintiff and its predecessors in and to a complete and perpetual monopoly, in commerce among the several states, in and to the name "shredded wheat," the form, size and style of the biscuit itself, the claimed exclusive right to use the word "shredded" as a trade-mark and even in the explanatory matter on the carton and, finally, the claimed exclusive right to illustrate or represent the biscuit, and defendant alleges that these efforts of plaintiff and its predecessors constitute a direct violation of sections 1 and 2, and particularly

section 2, of the Sherman Anti-Trust Act, U. S. Code, Title 1, Chap. 1, Sections 1 and 2, Act of July 2, 1890, c. 647, 26 Stat. 209.

13. That defendant's efforts to enter into free and fair competition in the manufacture and sale of shredded wheat have been continuously exerted since a period long prior to January, 1923; that defendant has prepared for the manufacture and has manufactured and sold to the public, except so far as its business has been interfered with and impeded by the unlawful acts of plaintiff, a shredded whole wheat biscuit; that the same has always been made from whole wheat of the highest grade and quality and has always been made with great skill and care so as to retain the body and substance of the wheat in said biscuit, and was and is made in buildings and structures specially designed for the purpose and built at great expense and by mechanism also especially designed with particular regard to purity and cleanliness, and in such manner that said shredded whole wheat biscuit passes directly from the factory to the consumer free from contamination by human touch or by odors or any foreign substance; and that during all of said period defendant and its predecessor Kellogg Toasted Corn Flake Company have spent large sums of money in scientific investigation for the purpose of continually maintaining and improving and perfecting the method of manufacture and quality of said biscuit, and that defendant has applied for and secured patents covering new and improved machinery for the manufacture of such shredded wheat biscuit, and has expended large sums of money in all its efforts as above set forth, and in advertising its own special proprietary brands known as Kellogg's Whole Wheat Biscuit and Kellogg's Shredded Whole Wheat Biscuit.

14. That the general shape or design of shredded whole wheat biscuit is an unavoidable result of the process of manufacture of the biscuit as hereinbefore set forth but that defendant for the purpose of imparting a distinctive size and appearance to its biscuit and of improving its qualities, appearance and taste, materially shortened its biscuit as compared with the previously patented biscuit of plaintiff and also caused its biscuit to be toasted or baked on both its bottom and its top as compared with plaintiff's biscuit which is baked only on top, and caused its biscuit to be rounded on the bottom as well as the top as compared with plaintiff's biscuit with its flattened bottom, and defendant also used materially finer shreds in its biscuit, and defendant also enclosed its biscuit in its standard and individual sized cartons, for all of which reasons defendant's biscuit is and was distinctive and readily distinguishable from any other biscuit on the market, until plaintiff, some years after defendant had adopted its peculiar size of biscuit, first began to market a biscuit substantially indistinguishable in size, length and shape from defendant's biscuit, as will hereafter appear.

15. That for the purpose of further distinguishing its biscuits as of its special production, defendant has at all times packed its biscuit in distinctively colored and distinctively shaped cartons prominently marked with the green and red colors which are well known to the trade and the public as associated with defendant's Kellogg's Toasted Corn Flakes and other known cereal products; that said cartons are marked with and dominated by defendant's well known trade-mark Kellogg's and are incapable of being confused with the cartons of any competitor; that defendant's said shredded whole wheat biscuit are packed 15 biscuits to defendant's standard carton with a total net weight of 12½

ounces, and two biscuits to the "individual" or restaurant size of trade-marked cartons.

16. That for the twofold purpose of enabling defendant to distribute its biscuit to consumers in distinctive form, and of also enabling the restaurant and hotel trade to supply customers with individual orders of defendant's biscuit in distinctive cartons, defendant puts up its shredded whole wheat biscuit in what are known to the trade as "individual cartons" as aforesaid, the same being miniature cartons of short length capable of holding only two of defendant's biscuit, and that defendant at all times has actively pushed the distribution and sale of these individual size and distinctively trade-marked cartons, not only by distributing them in very large amounts to individual consumers as samples but also by selling them to the restaurant and hotel trade for direct service to customers in the carton.

17. That the physical characteristics and the toasting or baking and other processes to which shredded wheat biscuit are subjected during their production are such that no practical method of individually and physically marking the biscuit itself has been discovered although many experiments have been undertaken with that end in view and that no method of individually identifying shredded wheat biscuit outside the regular carton (except by shortening the biscuit and/or by double toasting and/or by enclosing two biscuits in an individual size carton), without subjecting defendant's product to a commercial handicap which is equivalent to destruction of defendant's right of free competition with plaintiff, is known to defendant, and that no such method of individually identifying shredded wheat biscuit (except by using individual cartons and making a shorter biscuit, double

toasted as aforesaid) without destruction of the right of free competition, has been suggested by plaintiff to defendant although defendant has requested plaintiff to disclose such a method if it knows one, and defendant has offered to agree with plaintiff to go as far as plaintiff is willing or able to go in so identifying its biscuit outside the carton; and that defendant at all times desires that its biscuit shall go to the final consumer in the restaurant and hotel trade in its individual cartons, and exerts itself in every known way to achieve that end.

18. That defendant fosters and encourages in every way the sale of its distinctive sized and double toasted biscuits in the individual carton containing two biscuits and that plaintiff also offers and supplies its single-toasted, longer biscuit to the trade in individual sized cartons each containing two biscuits, presumably as a means of making unnecessary the servicing of its product outside of its carton and as the only practical means it has been able to devise for bringing its biscuit to the restaurant or hotel consumer in its Niagara Falls carton.

19. That defendant has expended large sums of money in advertising, sampling and distributing its Kellogg's Whole Wheat Biscuit in large and "individual" sized cartons to the trade and to consumers throughout the United States, and that said distinctive size of defendant's double-or-top-and-bottom-toasted biscuit and said distinctive cartons of individual and of standard size, carrying prominently displayed thereon defendant's said exclusive trade name Kellogg's, and said extensive advertising and sampling of defendant's shredded wheat to consumers and the trade throughout the several States, have all had the effect of informing and notifying the trade and the

public alike that shredded whole wheat biscuit are now and for some years past have been obtainable from different and competitive sources of manufacture, and defendant alleges that no consumer of average intelligence would or has confused defendant's regular or individual cartons or defendant's advertisements, or defendant's distinctively shortened and double toasted shredded wheat biscuit with any other cartons, advertisements or shredded wheat biscuit coming from any other source of manufacture, until plaintiff recently began to market a short shredded wheat biscuit obviously copied after defendant's product and substantially indistinguishable therefrom.

20. That at all times since 1910 defendant's predecessor and defendant have had a plant at Battle Creek, Michigan, where said biscuit has been and is being made; that said plant at Battle Creek, Michigan, has been open to the public and the complete process of the manufacture of said biscuit has been disclosed to the public; that in order to assure a complete inspection, defendant's said predecessor and defendant have employed guides at said plant at Battle Creek, Michigan, and said guides conduct all visitors throughout said plant and explain in detail the various processes of manufacture, and that said plant is visited and inspected by many thousand persons annually.

21. That defendant and its said predecessor continuously from 1905 to the present date has been one of the largest producers and distributors among the several states of prepared cereal foods in package form and that defendant's well-known products such as Kellogg's Corn Flakes, Kellogg's Pep Bran Flakes, Kellogg's All Bran, Kellogg's Wheat Krumbles, Kellogg's Rice Krispies, Kellogg's Kaffee Hag Coffee and other Kellogg products have caused defendant to

be well and favorably known throughout the entire grocery trade of the country as one of the largest and best known producers of cereal food products, and that the introduction upon the general grocery market throughout the several States by defendant of its Kellogg's Whole Wheat Biscuit of distinctive size and toasted both on the bottom and the top and marketed in distinctively shaped and specially colored Kellogg's packages of miniature and standard size, and defendant's wide sampling of its shredded wheat product to consumers and its extensive advertising of its whole wheat biscuit, have had the effect of notifying and educating the trade and consumers alike, that shredded wheat biscuit are now being made and extensively marketed by defendant in full, fair and open competition with other sources of production.

22. That from about the year 1918 or 1919 until about the year 1922, defendant's predecessor put up its shredded whole wheat biscuit in cartons bearing prominently displayed on the front and rear face thereof:

Kellogg's
SHREDDED
WHOLE WHEAT
BISCUIT

THE ORIGINAL HAS THIS SIGNATURE

W. K. Kellogg

KELLOGG TOASTED CORN FLAKE CO.
BATTLE CREEK, MICH., and TORONTO, CANADA

Net Weight 12 ounces

23. That from about February, 1927 to about July, 1930, defendant put up its shredded whole wheat biscuit in cartons bearing prominently marked on the front and rear faces thereof:

Kellogg's
SHREDDED
WHOLE WHEAT
BISCUIT

HELP YOURSELF TO HEALTH

W. K. Kellogg
KELLOGG COMPANY
BATTLE CREEK, MICHIGAN

Davenport, Iowa London, England London, Canada
Sydney, Australia

NET WEIGHT 9 OUNCES

24. That from about July 1930, to the present date, defendant has put up its shredded whole wheat biscuit in cartons carrying prominently on one face thereof the words:

Kellogg's
WHOLE WHEAT
BISCUIT

(with picture of two shredded wheat in a dish of cream)

CERTIFIED
for
FOOD VALUE

15 biscuits 12½ ounces

and on the other face thereof

Kellogg's
WHOLE WHEAT
BISCUIT

(with picture of two shredded wheat in a dish of cream)

CERTIFIED
for
FOOD VALUE

MADE OF DELICIOUSLY FLAVORED WHOLE WHEAT SHREDS,
DOUBLE TOASTED.

25. That from about July, 1930, until the present date, defendant has continued to put up its shredded whole wheat biscuit in cartons marked prominently on the face and rear thereof as "Kellogg's Shredded Whole Wheat Biscuit, W. K. Kellogg, Kellogg Company, Battle Creek, Michigan," and that defendant from March, 1928 to July, 1930, as far as possible in the face of plaintiff's illegal monopoly practices, distributed its "Kellogg's Shredded Whole Wheat Biscuit" throughout the channels of trade among the several States, but that from approximately July, 1930, until the present date, defendant by reason of the unlawful monopoly, threats, claims and practices of the plaintiff, as hereinafter set forth, has marketed its said "Kellogg's Shredded Whole Wheat Biscuit" in said "Kellogg's Shredded Whole Wheat Biscuit" cartons only in a small way and solely for the purpose of asserting and maintaining its lawful right to market its said biscuit among the several States under said name "Kellogg's Shredded Whole Wheat Biscuit" until it could be freed from the unlawful threats and monopolistic claims, demands and practices of the plaintiff and be enabled to resume the sale thereof on a regular commercial scale.

26. That notwithstanding defendant's rights and its persistent efforts to engage in fair and lawful competition in the sale of its distinctively sized, top-and-bottom toasted biscuit in its regular and individually sized and distinctively colored and trade-marked cartons, plaintiff has persistently, unfairly and unlawfully acted and contrived to prevent defendant from making or selling its biscuit and to intimidate and coerce the trade and others so as to cause them to refuse to buy, handle or sell defendant's biscuit for fear of being sued or otherwise prosecuted by plaintiff.

27. That plaintiff and its said predecessors, long after the expiration of the patents aforesaid of its predecessors, has acted in every way to assert and maintain a complete but unlawful monopoly in shredded wheat among the several States, embracing and including therein:

1. the exclusive right to make and vend throughout the several States, wheat biscuit made in the aforesaid particular, and allegedly distinctive shape, appearance and structure as disclosed and claimed in said expired Perky patents as aforesaid.

2. the exclusive right in and to the names "Shredded" and "Shredded Wheat" in connection with said shredded whole wheat biscuit throughout the United States and among the several States.

3. the exclusive right in and to the representation or picture of said shredded whole wheat biscuit made in said allegedly distinctive shape, appearance and structure throughout the several States.

4. the exclusive right in and to the r presentation of said shredded wheat biscuit of allegedly particular and distinctive shape, appearance or structure placed in a dish throughout the several States.

28. That the creation and maintenance by plaintiff throughout the trade within the several States, of a monopoly of the nature above outlined constitutes a bar to the lawful entry into said trade of other manufacturers as competitors of plaintiff, in that said monopoly and its enforcement acts to deter and has the effect of deterring defendant from making said patented shredded wheat biscuit or from calling it by its

true and descriptive name, or from making true and exact pictures of it alone or in a plate, and it also deters the trade and consumers from buying, handling or selling defendant's product, and generally throws over defendant's business and customers, a paralysis of threat, coercion, intimidation and unfair competition.

29. That the methods devised and pursued by plaintiff and its predecessors for setting up and maintaining this complete and unlawful monopoly in a patent-expired product, and in its pictorial representation have been to claim the before-described wide and exclusive rights and to threaten the trade into refusing to handle or into boycotting defendant's competing product; and that in pursuance of said unlawful monopoly, plaintiff has made unlawful registrations in the Patent Office of the name "Shredded Wheat" as an exclusive trade mark not susceptible of lawful use by others in any way whatever; and plaintiff has repeatedly warned and threatened defendant with litigation in advance of its entry into the field in a fair and lawful way; and has brought suit against defendant and permitted it to drag untried, while spreading all kinds of threatening propaganda by word of mouth and otherwise against defendant throughout the trade to convince the dealers and consumers that defendant's goods are outlaw products of a spurious nature and that it is dangerous to carry them, push their sale or consume them.

30. That plaintiff has registered in the United Patent Office and elsewhere as its exclusive trademark the words "Shredded Wheat," as shown by the following trademark registrations in the United States Patent Office:

1. Certificate No. 178,725 (Act of March 19, 1920), issued January 15, 1924, claiming as a trademark the words "Shredded Wheat" and stating

that "The trademark has been continuously used and applied to said goods in applicant's business since January first, 1894."

2. Certificate No. 89071 issued November 5, 1912 "for shredded wheat in class 46, Foods and ingredients of foods" covering a picture of a food factory and stating that "no claim is made herein to the words 'The Home of Shredded Wheat'."

3. Certificate No. 85,186 issued January 30, 1912, illustrating a plate and spoon and stating "no claim being made to the representation of a shredded wheat biscuit."

4. Certificate No. 216,593, issued August 17, 1926, illustrating a plate of shredded wheat.

5. Certificate No. 213,456, issued May 25, 1926, on the words "Shredded Wheat" claimed as an exclusive trademark used since January 1, 1894. Copies of said registrations are attached hereto.

30-a. That said registrations and each of them are void, unlawful, against public policy, monopolistic, fraudulent, in view of previous denial of registration, unfair, oppressive of defendant and others, a burden upon interstate commerce, and an unlawful restriction upon the rights of defendant and others.

31. That plaintiff and its predecessors, by threats and notices and by claims of exclusive and other rights and by threats of litigation and other acts of coercion, and by changing its corporate name, on May 15, 1908, from The Natural Food Company to the Shredded Wheat Company, has endeavored to deter defendant and others from entering into competition with plaintiff at a time both before and after plaintiff regarded said competition as prospective or tentative rather than actual.

32. That about 1921 defendant started manufacturing its short-sized shredded whole wheat biscuit and had invested large sums of money in the machinery for producing the same and that in or about February, 1922, plaintiff's predecessor notified defendant of their claimed exclusive rights in and to shredded wheat biscuit of the form, size, and style manufactured by them and of the name shredded wheat, and by reason of this notice and of the threats and coercive measures employed by plaintiff, defendant was forced, against its will, to cease to market its shredded wheat biscuit and did so cease.

33. That defendant continued to be restrained by said unlawful threats of plaintiff until about the year 1927 when defendant again prepared actively to enter the market as manufacturer of its distinctively sized biscuit in cartons, distinctively colored and trade-marked, and that in or about the month of February, 1927, defendant introduced its said product upon the market in full, free and fair competition with plaintiff.

34. That in or about April, 1927, plaintiff again threatened defendant and its trade customers with litigation and other coercive measures on account of its manufacture of patent-expired shredded wheat; that defendant refused longer to be deterred by these threats; that plaintiff thereupon, in or about the early part of 1928, instituted suit against certain of defendant's customers in the United States District Court for the District of Connecticut; and that upon the institution of such action, plaintiff instigated and fostered throughout the press of the country a series of newspaper and magazine attacks upon defendant, designed to create and actually creating the impression that defendant's distinctive sized, top-and-bottom toasted and distinctively cartoned shredded wheat biscuit was an outlaw product and that penalties would be incurred

by all of those who bought, sold or otherwise dealt in and with the same; that plaintiff's agents and salesmen thereupon began and continued to defame, slander and attack defendant and its said distinctive shredded wheat biscuit in the market and to threaten and coerce defendant's dealers and the trade with litigation and other oppressive and monopoly methods.

34-a. That plaintiff failed and neglected to bring said suit to trial although the cause had been long at issue and that in or about the month of July, 1930, as the result of the threatening and damaging acts and monopoly claims and trade oppressions of plaintiff and its agent as aforesaid, and on account of the resulting trade resistance to the marketing and sale of defendant's said shredded wheat biscuits as directly resulting from and produced by plaintiff's said threats and other wrongful acts as aforesaid, defendant, under force of said threats and monopoly acts, and without prejudice to its rights in the matter, changed the name of its shredded wheat biscuit from "Kellogg's Shredded Whole Wheat Biscuit" to "Kellogg's Whole Wheat Biscuit" and defendant, since July, 1930, has continued to market its product as "Kellogg's Whole Wheat Biscuit" while continuing to sell its "Kellogg Shredded Whole Wheat Biscuit" only in such nominal amounts as would serve to assert, protect and reserve its right to market its product as shredded wheat.

35. That plaintiff thereupon dismissed, without prejudice, the suit theretofore pending in Connecticut against certain defendants who had purchased and resold defendant's shredded wheat product, and that defendant had not appeared in or become a party to said suit, the court having no jurisdiction over defendant therein.

36. That in or about the Spring of 1932 plaintiff, in pursuance of its said attempt unlawfully to monopo-

lize interstate commerce in shredded wheat biscuits and to oppress and injure defendant, produced and began to sell and market a new size of biscuit, which, on information and belief, was designed by plaintiff to be substantially indistinguishable from defendant's regular size of biscuit and is in fact substantially indistinguishable in size from defendant's said biscuit, and that plaintiff, by this act, sought purposely to wipe out and in fact did wipe out the theretofore existing clear and substantial size distinction between defendant's and plaintiff's biscuit, and plaintiff thus purposely, maliciously and in pursuance of its scheme of unlawful monopoly, oppression and unfair competition placed into the channels of trade a shredded wheat biscuit designed by plaintiff to be, and capable of being, unfairly substituted by designing persons for defendant's biscuit by removing the same from their cartons.

37. That in further pursuance of said illegal attempt to monopolize interstate commerce in shredded wheat and to oppress defendant, plaintiff has recently employed as its sales manager in charge of sales of shredded wheat a former general sales manager of defendant's at the time of the former litigation aforesaid, and that at or about the time of plaintiff's said employment of defendant's former general sales manager, and of plaintiff's putting out of a biscuit approximately equal to defendant's biscuit in size, plaintiff instituted this new suit in equity against defendant in the U. S. District Court for the District of Delaware, setting up the monopoly claims as aforesaid and at the same time renewing in the trade its unfair, slanderous, threatening and coercive attacks upon defendant, its shredded wheat product and its dealers, and that said attacks upon its shredded wheat product and dealers therein have since continued and have been and are damaging to defendant, its reputation and business.

38. That by reason of the unlawful acts of plaintiff as aforesaid defendant has been unlawfully damaged in an amount in excess of one million dollars.

WHEREFORE defendant prays that the bill of complaint may be dismissed with costs to defendant to be taxed.

KELLOGG COMPANY,

My commission expires December 3, 1933.

PLAINTIFF'S REPLY TO DEFENDANT'S AFFIRMATIVE DEFENSE.

(Filed August 30, 1932.)

Reply of plaintiff, National Biscuit Company, to the affirmative defense of defendant, Kellogg Company.

1. Plaintiff admits the allegations contained in paragraph numbered "1" of defendant's answer.

2. Plaintiff admits the allegations contained in paragraph numbered "2" of defendant's answer.

3. Plaintiff, for reply to the allegations contained in paragraph numbered "3" of defendant's answer, admits that its predecessors and it have been and are engaged in the manufacture and sale of a whole wheat biscuit; that its said biscuit has been known as "Shredded Whole Wheat" and "Shredded Wheat"; that Letters Patent of the United States No. 548,086 was granted in October, 1895, to Henry D. Perky; that said Letters Patent No. 548,086 was the property of plaintiff's predecessors, Cereal Machine Company, a Colorado corporation (the name of which was duly changed to Shredded Wheat Company) and The Natural Food Company, a New York corporation (the name of which was duly changed to The Shredded Wheat Company); that said Henry D. Perky was the original promoter of the said enterprise and that it was heretofore conducted by plaintiff's predecessors and is now being conducted by plaintiff, but it denies the conclusions and any other allegations contained therein.

4. Plaintiff denies the allegations contained in paragraph numbered "4" of defendant's answer in the manner and form pleaded, and alleges that its

predecessors were vested with title to Perky United States Patent No. 548,086 and that the process for manufacture thereunder was as disclosed in said letters patent, a copy of which is attached hereto.

5. Plaintiff, for reply to the allegations contained in paragraph numbered "5" of defendant's answer, admits that design Letters Patent of the United States No. 24,668 was issued on September 17, 1895 on the invention of and to Henry D. Perky, but it denies that the design of the biscuit shown in said patent resulted necessarily from the process of manufacture.

6. Plaintiff, for reply to the allegations contained in paragraph numbered "6" of defendant's answer, admits the allegations contained therein except as to the year and avers that the business of said Cereal Machine Company in the manufacture and sale of said product was begun in the year 1893.

7. Plaintiff, for reply to paragraph numbered "7" of defendant's answer, admits the allegations contained therein, except that the numbers of the following letters patent recited therein are incorrect: 571,285, 884,788, 681,656, 713,793, and alleges that the correct numbers of said letters patent are 571,235, 684,788, 681,655 and 713,795, respectively.

8. Plaintiff, for reply to paragraph numbered "8" of defendant's answer, admits that Letters Patent of the United States identified therein No. 548,086 and No. 548,087, have expired; that the terms of all of the other letters patent set forth in paragraph numbered "7" of defendant's answer have also expired but it is not informed and therefore denies the conclusion that the subject matter thereof has fallen into the public domain and alleges that because of the

long and continued manufacture and sale of plaintiff's said whole wheat biscuit which has been carried on continuously since the year 1893, and which was carried on without material alteration or change in distinctive and peculiar shape and appearance and without competition with other manufacturers prior to and from and after the expiration of the letters patent enumerated in paragraph numbered "7" of defendant's answer and because, since the expiration of each of said letters patent, the public has continued and now continues to associate the said biscuit of plaintiff of distinctive and peculiar shape and appearance as of the origin, manufacture and sale of plaintiff, plaintiff is vested with the exclusive right to manufacture and sell its said whole wheat biscuit made in said distinctive and peculiar shape and appearance.

9. Plaintiff, for reply to the allegations contained in paragraph numbered "9" of defendant's answer, denies the allegations contained therein that in letters patent, trade-mark registrations and advertisements of plaintiff's predecessors, during the terms of the letters patent enumerated in paragraph numbered "7" of defendant's answer, the words "Shredded Wheat" and "Shredded Wholé Wheat Biscuit" were used by said Henry D. Perky and by plaintiff's predecessors as designative of plaintiff's said shredded whole wheat biscuit; denies the other allegations contained therein but admits that the United States Patent Office and the Court of Appeals of the District of Columbia in a suit in which plaintiff's predecessor was a party made a ruling that the words "Shredded Whole Wheat" were descriptive of the shredded whole wheat biscuit produced by plaintiff's predecessor; and alleges that plaintiff's predecessor and plaintiff have continued to use the words and terms "Shredded Whole Wheat Biscuit", "Shredded Wheat Biscuit"

and "Whole Wheat" in connection with and to designate the origin of the said biscuit of distinctive and peculiar shape and appearance from and after the expiration of the letters patent identified in paragraph numbered "7" of defendant's answer and that the use of the said words and terms by plaintiff's predecessors and plaintiff has been exclusive except for the use thereof or parts thereof by defendant in unfair and wrongful competition with plaintiff and that the origin of plaintiff's said biscuit is known to the trade and public by said words or terms.

10. Plaintiff, for reply to the allegations contained in paragraph numbered "10" of defendant's answer, admits that the letters patent of plaintiff's predecessors enumerated in paragraph numbered "7" of defendant's answer gave to plaintiff's said predecessors a substantial monopoly in the apparatus, products and processes covered thereby and that the words "Shredded Wheat" and/or "Shredded Whole Wheat Biscuit" came actually to indicate the class and type of product made by plaintiff's said predecessors but it denies that said terms "Shredded Wheat" and/or "Shredded Whole Wheat Biscuit" constitute the true and generic description of said product or that said words were used in that sense by plaintiff's predecessors and others, but alleges that said terms "Shredded Wheat" and "Shredded Whole Wheat Biscuit" were and are now employed by plaintiff and are known to and by the public as the marks or indicia of origin of the said whole wheat biscuit of plaintiff of distinctive and peculiar shape and appearance.

11. Plaintiff, for reply to the allegations contained in paragraph numbered "11" of defendant's answer, admits that all of the letters patent identified in paragraph numbered "7" of defendant's answer have expired but it denies each and every of the other

allegations contained therein and alleges that by reason of the long and continued use of the terms "Shredded Wheat" and "Shredded Whole Wheat Biscuit" and continuation thereof, subsequent to the expiration of the said letters patent identified in paragraph numbered "7" of defendant's answer, to identify and designate the said whole wheat biscuit of plaintiff's predecessors and plaintiff made in distinctive and peculiar shape and appearance, without competition with any other manufacturer or manufacturers, have been employed to designate plaintiff as the source or origin of the said biscuit of distinctive and peculiar shape and appearance and that the public knows and understands the said terms as indicating the origin in plaintiff of plaintiff's said biscuit.

12. Plaintiff, on information and belief, denies each and every of the allegations contained in paragraph numbered "12" of defendant's answer.

13. Plaintiff, for reply to the allegations contained in paragraph numbered "13" of defendant's answer, denies, on information and belief, that "defendant's efforts to enter into free and fair competition in the manufacture and sale of shredded wheat have been continuously exerted since a period long prior to January, 1923"; admits that defendant has prepared for the manufacture and has manufactured and sold to the public a shredded whole wheat biscuit but it denies that it (plaintiff) has by unlawful act or otherwise interfered with and impeded the business of defendant; admits that defendant has advertised its whole wheat biscuit as "Kellogg's Whole Wheat Biscuit" and "Kellogg's Shredded Whole Wheat Biscuit" but it has no knowledge of the other allegations contained in said paragraph of defendant's answer and therefore denies the same.

14. Plaintiff, for reply to the allegations contained in paragraph numbered "14" of defendant's answer, denies that the general shape or design of the shredded whole wheat biscuit is an inevitable result of the process of manufacture of the biscuit, but plaintiff is not informed as to the other allegations contained in said paragraph of the answer of defendant and therefore denies the same.

15. Plaintiff, for reply to the allegations contained in paragraph numbered "15" of defendant's answer, admits that defendant's whole wheat biscuit are packed fifteen biscuit in a carton with a total net weight of 12½ ounces and two biscuit to the "individual" or so-called restaurant size; but plaintiff is not informed as to the other allegations contained in said paragraph of defendant's answer and therefore denies the same.

16. Plaintiff, for reply to the allegations contained in paragraph numbered "16" of defendant's answer, admits that defendant has packaged its whole wheat biscuit in so-called individual cartons containing two biscuit in each but it has no information as to the other allegations contained in said paragraph and therefore denies the same and alleges that from in and prior to the year 1910 and continuously thereafter plaintiff's predecessor and plaintiff have and are now packaging their said whole wheat biscuit in so-called individual cartons containing two biscuit in each.

17. Plaintiff denies each and every of the allegations contained in paragraph numbered "17" of defendant's answer and alleges that any person, firm or corporation desiring to manufacture a whole wheat biscuit could produce the same in form and appearance readily and easily distinguishable from the biscuit of the manufacture of plaintiff's predecessors and plain-

tiff of distinctive and peculiar shape and appearance and could, if desired, suitably mark the said biscuit to designate the origin of manufacture thereof.

18. Plaintiff, for reply to the allegations contained in paragraph numbered "18" of the answer of defendant, admits that defendant encourages the sale of its biscuit in individual cartons and that plaintiff in the conduct of its business encourages the sale of its said biscuit in individual cartons but denies each and every of the other allegations contained therein.

19. Plaintiff is without knowledge as to the allegations contained in paragraph numbered "19" of defendant's answer and therefore denies the same.

20. Plaintiff, on information and belief, admits that defendant has a plant at Battle Creek, Michigan, but it is without knowledge as to the other allegations contained in paragraph numbered "20" of defendant's answer and therefore denies the same.

21. Plaintiff, for reply to the allegations contained in paragraph numbered "21" of defendant's answer admits that defendant has been a producer and distributor of products identified therein but it is not informed that plaintiff is one of the largest producers of such products and therefore denies the same and it denies each and every of the other allegations contained in the said paragraph of defendant's answer.

22. Plaintiff, for reply to the allegations contained in paragraph numbered "22" of defendant's answer, admits that defendant's predecessor put up shredded whole wheat biscuit in cartons bearing the marking set forth in said paragraph of defendant's answer but it alleges that the use of the words or terms "Shredded" and "Shredded Whole Wheat" upon its cartons containing said product was a palpable violation and invasion of plaintiff's rights in and to the

words "Shredded" and "Shredded Whole Wheat" for shredded whole wheat made and formed in said biscuit form, and that defendant discontinued the use thereof upon notice from plaintiff's predecessor of defendant's invasion of the rights of plaintiff's predecessor.

23. Plaintiff, for reply to the allegations contained in paragraph numbered "23" of defendant's answer admits that defendant put up shredded whole wheat biscuit in cartons bearing the marking set forth in the said paragraph of defendant's answer but plaintiff alleges that the use of the words or terms "Shredded" and "Shredded Whole Wheat" thereon was a palpable violation and invasion of the rights of plaintiff in and to the said words or terms for shredded whole wheat made and formed in said biscuit form, and that defendant discontinued the same after receipt of notice from plaintiff's predecessor of defendant's invasion of the rights of plaintiff's predecessor.

24. Plaintiff, for reply to the allegations contained in paragraph numbered "24" of defendant's answer, admits that defendant put up shredded whole wheat biscuit in cartons bearing the marking stated therein but it alleges that the use of the indicia or term "Whole Wheat" in association with the picture of two said shredded wheat biscuit in a dish of cream by defendant were so employed by defendant in violation of the rights of plaintiff which are complained of in this suit.

25. Plaintiff, for reply to the allegations contained in paragraph numbered "25" of defendant's answer, admits that defendant, from and after July, 1930, put up, and is now putting up a shredded whole wheat biscuit in cartons and that marked prominently on the face and rear of its cartons are the words "Shredded Whole Wheat Biscuit"; that from March, 1928, to July, 1930, defendant distributed a shredded whole wheat

biscuit in the channels of trade among the several States of the United States packed in cartons on which were marked, on the face and rear thereof, the words "Shredded Whole Wheat Biscuit" and that, from approximately, July, 1930, and continuously and at this time, defendant is manufacturing and selling a shredded whole wheat biscuit which it packs in cartons and marks with the words "Shredded Whole Wheat Biscuit" but plaintiff denies each and every of the other allegations contained in the said paragraph of defendant's answer, and alleges that defendant employs upon the cartons in which its said biscuit are packed the word "shredded" and the word "shreds."

26. Plaintiff denies each and every of the allegations contained in paragraph numbered "26" of defendant's answer.

27. Plaintiff, for reply to the allegations contained in paragraph numbered "27" of defendant's answer, denies that it has acted to assert and maintain its rights in an unlawful manner as an "unlawful monopoly" and the conclusion that plaintiff's said biscuit of distinctive and peculiar shape and appearance was "disclosed and claimed in said expired Perky patents as aforesaid" but it admits each and every of the other allegations contained in the said paragraph of defendant's answer.

28. Plaintiff denies each and every of the allegations contained in paragraph "28" of defendant's answer.

29. Plaintiff denies each and every of the allegations contained in paragraph numbered "29" of defendant's answer.

30. Plaintiff admits each and every of the allegations contained in paragraph numbered "30" of defendant's answer.

31. Plaintiff denies each and every of the allegations contained in paragraph numbered "30a" of defendant's answer.

32. Plaintiff denies each and every of the allegations contained in paragraph numbered "31" of defendant's answer but alleges that it does by this cause endeavor to restrain defendant from its wrongful invasion of its established rights.

33. Plaintiff, for reply to the allegations contained in paragraph numbered "32" of defendant's answer, admits that in or about 1921 defendant started manufacturing a shredded wheat biscuit; that in or about February, 1922, plaintiff's predecessor notified defendant of its exclusive rights in and to the shredded wheat biscuit of the form, size and style manufactured by it and of the name "Shredded Wheat," and that by reason of said notice defendant ceased to market said shredded wheat biscuit but plaintiff denies each and every of the other allegations contained in said paragraph of defendant's answer.

34. Plaintiff, for reply to the allegations contained in paragraph numbered "33" of defendant's answer, admits that from about the year 1922 until the year 1927 defendant did not market a whole wheat biscuit but that in the year 1927 defendant began to market a whole wheat biscuit but plaintiff denies each and every of the other allegations contained in said paragraph of defendant's answer.

35. Plaintiff, for reply to the allegations contained in paragraph numbered "34" of defendant's answer, admits that in or about the early part of 1928 its predecessor instituted a suit against defendant and certain of defendant's customers in the District Court of the United States for the District of Connecticut to restrain unfair competition in the marketing of defendant's

whole wheat biscuit but plaintiff denies each and every of the other allegations contained in said paragraph numbered "34" of defendant's answer.

36. Plaintiff, for reply to the allegations contained in paragraph numbered "34a" of defendant's answer, admits that the said suit referred to in paragraph "34" of defendant's answer was not tried on final hearing; that defendant changed the name of its shredded wheat biscuit from "Kellogg's Shredded Whole Wheat Biscuit to "Kellogg's Whole Wheat Biscuit"; that since July, 1930, defendant has continued to market its product as "Kellogg's Whole Wheat Biscuit" and "Kellogg's Shredded Whole Wheat Biscuit" but it denies each and every of the other allegations contained in said paragraph numbered "34a" of defendant's answer, and alleges that defendant did not wholly cease or desist the use of the word "Shredded" or "shreds" in connection with the sale of its said whole wheat biscuit.

37. Plaintiff, for reply to the allegations contained in paragraph numbered "35" of defendant's answer, admits that the said suit referred to in paragraph numbered "34" of defendant's answer was dismissed, without prejudice; that said suit was brought against defendant herein and other defendants who purchased and resold defendant's shredded whole wheat biscuit; that defendant in this case was named as a party defendant in said suit, and took charge of the defense of the said suit by counsel of its selection; that said suit was discontinued without prejudice on written stipulation providing that should plaintiff or its successors desire or find it necessary to sue again upon the same cause of action or to bring any other litigation involving the same or related subject matter against defendants in said case or their successors, representatives, agents or privies the proceedings, order, testimony or

depositions taken therein may be used to the same extent and for the same purpose as though the same had been taken, had or done in such further litigation; and that defendant was a party to and duly signed the said stipulation.

38. Plaintiff denies each and every of the allegations contained in paragraph numbered "36" of defendant's answer and alleges that since on or about the year 1932 plaintiff has manufactured and marketed a shredded whole wheat biscuit which is smaller in size than its said whole wheat biscuit of distinctive and peculiar shape and appearance, and that the said smaller biscuit of the manufacture and sale of plaintiff's predecessor and plaintiff was made in the same distinctive and peculiar shape and appearance as the said larger biscuit of plaintiff's predecessors and plaintiff.

39. Plaintiff denies the allegations contained in paragraph numbered "37" of defendant's answer except that it admits the institution of this suit and alleges that defendant's former general sales manager referred to in the said paragraph of defendant's answer was employed by plaintiff's predecessor from on or about July, 1900, until in or about December, 1910; that, on information and belief, defendant induced its said former general sales manager to leave the employ of plaintiff's predecessor and to accept employment with defendant; that said former general sales manager of defendant was employed by defendant from in or about December, 1910, to in or about November, 1928; that in or about November, 1928, defendant discharged its said former general sales manager; that thereafter, defendant's said former sales manager was employed by others in no manner related or connected with plaintiff and that thereafter, in or about the month of April, 1932, defendant's said former sales manager became and now is employed by plaintiff.

40. Plaintiff denies the allegations contained in paragraph numbered "38" of defendant's answer.

UNITED STATES PATENT OFFICE.

HENRY D. PERKY, OF DENVER, COLORADO.

BREAD AND METHOD OF PREPARING SAME.

SPECIFICATION forming part of Letters Patent No. 548,066, dated October 15, 1895.

Application filed March 15, 1894. Serial No. 503,777. (No specimens.)

To all whom it may concern:

Be it known that I, HENRY D. PERKY, a citizen of the United States, and a resident of Denver, in the county of Arapahoe and State of Colorado, have invented a certain new and useful Article of Food or Bread and the Preparation of the Same; and I do declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled in the art to which it appertains to make and use the same.

An object of the invention is the production of an article of food or bread, consisting of externally-rough porous threads or filaments of wheat or similar grain, having the outer nutrition bran and gluten of the entire berry visibly mingled with the interior starchy portion thereof and adapted by their composition of entire grain-berries and their rough and porous thread-like or shred-like form to constitute, without other shortening or aeration, bread of especially light and wholesome character.

A further object of the invention consists in the novel art or method of preparing the grain or berry and reducing it to form without taking from the grain any of the beneficial qualities provided by nature and presenting the same in convenient form for service as a superior article of food without the aid of experts or skilled labor now required to produce palatable bread.

The usual methods practiced in the manufacture of flour and the resultant bread therefrom are such as to detract from the natural and healthful properties possessed by the grain in its original state. The addition of shortening, yeast, baking-powder, alum, or other foreign ingredients to render the bread light is also detrimental, and the entire method consumes a large amount of time and labor.

According to the improved method which I am now about to describe, the wheat is taken in the whole or berry form, and after being cleaned and thoroughly washed is boiled until corked, without destroying the whole or individual form of the berry. The time of boiling is usually about one hour. This opens and adherent extraneous matter. It also destroys all insect life and removes the traces thereof. Before removal from the boiler the grain is seasoned with salt. The wheat, still in berry form, is, nevertheless, just after the boiling quite soft and its interior or starchy portion especially is watery. It can be easily mashed between the finger and thumb and is not in condition for proper compression until its inner and outer portions are brought more upon an equality in point of consistence. To this end the grain, being removed from the boiler, is allowed to dry for some hours—from twelve to twenty hours being usually sufficient—until the interior of the berry has, from the loss of some of its water, become more consistent. The grain should be constantly stirred or agitated during this part of the process to hasten the drying-out action and to prevent incipient fermentation. I prefer, therefore, to dry out the grain in rotating wire-cloth barrels or cage-tumblers. The berries should now have sufficient interior consistence to enable their outer and interior portions to be effectively incorporated with each other, such incorporation being accomplished by passing the grain between compression-rollers, one or both of which is provided with a series of fine circumferential grooves whereby the berries are mashed and their outer bran-coats, gluten layers, and starchy interior portion thoroughly incorporated together and forced into the grooves of the roller or rollers, whence the resultant food is discharged, by means of a comb or scraper, in the form of long fine filaments or threads of porous character and having a rough exterior admirably adapted to cause them to adhere together when being massed to form loaves or biscuit. The sinuous form and rough or jagged exterior shape of the filaments is designed also to provide small interstices throughout the mass, whereby the bread is thoroughly aerated and made very light.

The food as discharged from the rolls is ready for use without further cooking, or it can be shaped for baking in various ways. The food presented is pure wheat and all the parts of the berry are given to the consumer in [illegible] form. No chemical change is

HENRY D. PERKY, OF DENVER, COLORADO.

BREAD AND METHOD OF PREPARING SAME.

SPECIFICATION forming part of Letters Patent No. 548,088, dated October 15, 1895.

Application filed March 18, 1894. Serial No. 503,777. (No specimens.)

To all whom it may concern:

Be it known that I, HENRY D. PERKY, a citizen of the United States, and a resident of Denver, in the county of Arapahoe and State of Colorado, have invented a certain new and useful Article of Food or Bread and the Preparation of the Same; and I do declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled in the art to which it appertains to make and use the same.

An object of the invention is the production of an article of food or bread, consisting of externally-rough porous threads or filaments of wheat or similar grain, having the outer nutrition bran and gluten of the entire berry visibly mingled with the interior starchy portion thereof and adapted by their composition of entire grain-berries and their rough and porous thread-like or shred-like form to constitute, without other shortening or aeration, bread of especially light and wholesome character.

A further object of the invention consists in the novel art or method of preparing the grain or berry and reducing it to form without taking from the grain any of the beneficial qualities provided by nature and presenting the same in convenient form for service as a superior article of food without the aid of expert or skilled labor now required to produce palatable bread.

The usual methods practiced in the manufacture of flour and the resultant bread therefrom are such as to detract from the natural and healthful properties possessed by the grain in its original state. The addition of shortening, yeast, baking-powder, alum, or other foreign ingredients to render the bread light is also detrimental, and the entire method consumes a large amount of time and labor.

According to the improved method which I am now about to describe, the wheat is taken in the whole or berry form, and after being cleaned and thoroughly washed is boiled until cooked, without destroying the whole or individual form of the berry. The time of boiling is usually about one hour. This operation, in addition to cooking the grains, removes from them the outer siliceous coating and adherent extraneous matter. It also destroys all insect life and removes the traces thereof. Before removal from the boiler the grain is seasoned with salt. The wheat, still in berry form, is, nevertheless, just after the boiling quite soft and its interior or starchy portion especially is watery. It can be easily mashed between the finger and thumb and is not in condition for proper compression until its inner and outer portions are brought more upon an equality in point of consistence. To this end the grain, being removed from the boiler, is allowed to dry for some hours—from twelve to twenty hours being usually sufficient—until the interior of the berry has, from the loss of some of its water, become more consistent. The grain should be constantly stirred or agitated during this part of the process to hasten the drying-out action and to prevent incipient fermentation. I prefer, therefore, to dry out the grain in rotating wire-cloth barrels or cage-tumblers. The berries should now have sufficient interior consistence to enable their outer and interior portions to be effectively incorporated with each other, such incorporation being accomplished by passing the grain between compression-rollers, one or both of which is provided with a series of fine circumferential grooves whereby the berries are mashed and their outer bran-coats, gluten layers, and starchy interior portion thoroughly incorporated together and forced into the grooves of the roller or rollers, whence the resultant food is discharged, by means of a comb or scraper, in the form of long fine filaments or threads of porous character and having a rough exterior admirably adapted to cause them to adhere together when being massed to form loaves or biscuit. The sinuous form and rough or jagged exterior shape of the filaments is designed also to provide small interstices throughout the mass, whereby the bread is thoroughly aerated and made very light.

The food as discharged from the rolls is ready for use without further cooking, or it can be shaped for baking in various ways. The food presented is pure wheat and all the parts of the berry are given to the consumer in attractive form. No chemical change is set up therein by the use of ferments or other

foreign ingredients, and the percentage of water in the food is much less than in ordinary bread.

The article as produced is a food or bread composed of superposed or massed layers or deposits of dry, externally rough, porous, sinuous threads or filaments of cooked whole wheat containing intermixed the bran, starch, and gluten of the entire berry, and which is absolutely free from leavening or raising material or their products.

The fine thread-like character of the component filaments of the bread and their disposition therein renders it tender, so that shortening is not required. All the nutritious and beneficial qualities of the berry are preserved in this admirable article of food, while its form gives it tenderness and lightness without the admixture of foreign ingredients.

Having described this invention, what I claim, and desire to secure by Letters Patent, is—

1. A food or bread composed of superposed or massed layers or deposits of dry, externally rough, porous, sinuous threads or filaments of cooked whole wheat containing intermixed the bran, starch, and gluten of the entire berry, and which is absolutely free from leavening or raising material, or their products.

2. The process of reducing cereals for food, consisting, first, in cooking the grain with wait, after it has been thoroughly cleaned, without destroying the whole berry form, second, partially drying the grain with constant agitation until its interior and exterior portions are of substantially the same consistency, and finally, compressing the grain to intimately commingle the outer or bran coats, gluten layers, and starchy, interior portions in the form of porous, rough filaments or threads, substantially as described.

In testimony whereof I affix my signature in the presence of two witnesses.

HENRY D. PERKY.

Witnesses:
J. M. STANLEY,
HARRY C. JAMES.

Certificate to Letters Patent No. 548,086.

It is hereby certified that in Letters Patent No. 548,086, granted October 15, 1895, upon the application of Henry D. Perky, of Denver, Colorado, for an improvement in "Bread and Methods of Preparing Same," an error appears in the printed specification requiring correction, viz: In line 47, page 1, the word "corked" should read cooked; and that the said Letters Patent should be read with this correction therein that the same may conform to the record of the case in the Patent Office.

Signed, countersigned, and sealed this 29th day of October, A. D. 1895.

[SEAL.]

JNO. M. REYNOLDS,
Assistant Secretary of the Interior.

Countersigned:
S. T. FISHER,
Acting Commissioner of Patents.

PLAINTIFF'S INTERROGATORIES AND DEFENDANT'S ANSWERS THERETO.

(Interrogatories Filed December 27, 1932.)

(Answers Filed May 22, 1933.)

Interrogatory No. 1. When did defendant or its decessor, if any, first begin the manufacture and e in the United States of a whole wheat edible prod-

Answer: Year 1912.

Interrogatory No. 2. State when the manufacture, e and distribution in commerce in the United States he whole wheat product, inquired about in interrog- ry numbered "1," was discontinued.

Answer: Year 1920.

Interrogatory No. 3. Did defendant or its prede- or cook the whole wheat used in the edible product erred to in defendant's answer to interrogatory bered "1"?

Answer: Yes.

Interrogatory No. 4. Did defendant or its prede- or before or after cooking the whole wheat edible duct referred to in defendant's answer to interrog- y numbered "1" add any ingredient whatsoever eto?

Answer: Yes.

Interrogatory No. 5. If the answer to interroga- numbered "4" is "yes", state what such added edient or ingredients was or were added and at t stage of the preparation or making of such prod- such ingredient or ingredients was or were added.

Answer: Ingredients added—sugar, salt and water d at time of cooking. In war time, by requirement ood Administration, corn flour and rye were sub- ted for a portion of the wheat.

Interrogatory No. 6. State the form, state or condition of the whole wheat at the time of beginning the operation of baking the whole wheat product inquired about in interrogatory numbered "1".

Answer: In the form of unbaked, flavored shredded whole wheat biscuit.

Interrogatory No. 7. State whether or not defendant has in its possession or under its control a specimen or specimens of said whole wheat product, inquired about in interrogatory numbered "1", and, if so, state where the same may be examined by plaintiff's representatives or its counsel.

Answer: Have none of the flavored biscuit.

Interrogatory No. 8. State whether or not defendant or its predecessor, if any, advertised to the trade or public in the United States in letters, circulars, newspapers, trade or other publications, the whole wheat product inquired about in interrogatory numbered "1" and, if so, state the name or names and place or places of publication of any such publication or publications and the time or approximate time when any such advertisements were published.

Answer: Yes.

Christian Herald, April 23, 1913;
Home Life, April, 1913;
Cosmopolitan, July, 1913;
Good Housekeeping, April, 1913;
Collier's, July, 1913;
Smart Styles, November 1, 1913;
Collier's, May, 1914;
Popular Mechanics, August, 1913;
Munsey's, May, 1913.

Interrogatory No. 9. State whether or not defendant has in its possession or under its control a cut, picture, description, drawing or other representation or copy of any circular or other advertisement of the

whole wheat product, inquired about in interrogatory numbered "1" and, if so, produce the same and state where plaintiff's representatives or counsel may examine the same.

Answer: Yes—can be seen at office of Kellogg Company, Battle Creek, Michigan, on notice.

Interrogatory No. 10. If the answer to interrogatory numbered "9" is in the negative, state whether or not defendant knows whether any cut, picture, drawing or other representation of such whole wheat product or any advertisement thereof is extant, and where the same is located and who possesses the same.

Answer: Answered under No. "9".

Interrogatory No. 11. State whether or not defendant manufactured, sold and distributed in commerce in the United States whole wheat biscuit which was packaged in cartons or containers marked "Shredded Whole Wheat Biscuit"?

Answer: Yes, except that the cartons described the product as "Kellogg's" shredded whole wheat biscuit.

Interrogatory No. 12. If the answer to interrogatory numbered "11" is in the affirmative, state when defendant began the manufacture, sale and distribution in commerce in the United States of said whole wheat biscuit.

Answer: Early in 1922.

Interrogatory No. 13. If the answer to interrogatory numbered "11" is in the affirmative, state when defendant discontinued the manufacture, sale and distribution of such whole wheat biscuit.

Answer: October, 1922.

Interrogatory No. 14. If the answer to interrogatory numbered "11" is in the affirmative, state whether defendant has in its possession or under its control a specimen or specimens of said whole wheat biscuit and, if so, state where the same may be examined by plaintiff's representatives or counsel.

Answer: Yes, can be seen at office of Kellogg Company, Battle Creek, Michigan, on notice.

Interrogatory No. 15. If the answer to interrogatory numbered "11" is in the affirmative, state whether defendant has in its possession or under its control cartons for or a cut, picture, drawing or other representation, circular, description or advertisement of said whole wheat biscuit, and, if so, produce the same and state where plaintiff's representatives or counsel may examine the same.

Answer: Yes, can be seen at office of Kellogg Company, Battle Creek, Michigan, on notice.

Interrogatory No. 16. If the answer to interrogatory numbered "15" is in the negative, state whether or not defendant knows whether any cartons for or cut, picture, drawing or other representation of said whole wheat biscuit or circular, description or advertisement thereof are extant and if so whether it knows where the same are located and who possesses the same.

Answer: Answered under No. "15".

Interrogatory No. 17. Did defendant or its predecessor cook the whole wheat used in the whole wheat biscuit referred to in defendant's answers to interrogatories numbered "11" to "16", both inclusive?

Answer: Yes.

Interrogatory No. 18. Did defendant or its predecessor before or after cooking the whole wheat referred to in defendant's answers to interrogatories numbered "11" to "16", both inclusive, add any ingredient whatsoever thereto?

Answer: No—cooked only in water.

Interrogatory No. 19. If the answer to interrogatory numbered "18" is "yes", state what such added ingredient or ingredients was or were and at what stage of the preparation or making of such whole wheat such ingredient or ingredients was or were added.

Answer: See answer to No. "18".

Interrogatory No. 20. State whether or not defendant manufactured, sold and distributed in commerce in the United States whole wheat biscuit of the size, shape and design of the whole wheat biscuit contained in the carton or package which is presented herewith and marked "Plaintiff's Exhibit 1".

Answer: Defendant manufactured, sold and distributed in commerce in the United States shredded whole wheat biscuit of the size, shape and design of the biscuit contained in cartons like that identified as "Plaintiff's Exhibit 1", which exhibit appears to be one of defendant's cartons.

Interrogatory No. 21. State whether or not the whole wheat biscuit contained in said carton marked "Plaintiff's Exhibit 1" is the whole wheat biscuit of the manufacture and sale of defendant and whether the said carton or package containing the same is that of defendant and is the same as cartons in which defendant packaged and distributed in commerce in the United States said whole wheat biscuit.

Answer: See answer to Q. "20".

Interrogatory No. 22. If the answers to interrogatories numbered "20" and "21" are in the affirmative, state when defendant began the manufacture, sale and distribution in commerce in the United States of the said whole wheat biscuit.

Answer: In 1922, as to the biscuit referred to in answer to Q. "20", in cartons describing the product as Kellogg's shredded whole wheat biscuit. Kellogg's whole wheat biscuit cartons like "Plaintiff's Exhibit No. 1", first used by Kellogg Company, August, 1930. The said biscuit have been toasted top and bottom to a darker brown shade since 1927.

Interrogatory No. 23. If the answer to interrogatory numbered "20" is in the affirmative, state whether

or not defendant is now engaged in the manufacture, sale and distribution in commerce in the United States of the said whole wheat biscuit.

Answer: Yes, as explained in answer to No. "22".

Interrogatory No. 24. State when defendant began the use of the representation of two biscuit placed in a saucer as shown on the package or carton marked "Plaintiff's Exhibit 1", and whether it was employing the same upon its cartons containing said whole wheat biscuit at and prior to the filing of the bill of complaint in this cause.

Answer: Representation of two biscuits in a bowl as on carton marked "Plaintiff's Exhibit No. 1", first employed in August, 1930.

Interrogatory No. 25. State whether or not defendant has employed in its advertisements of or on its packages or cartons containing whole wheat biscuit the representation of the biscuit like the biscuit contained in "Plaintiff's Exhibit 1".

Answer: Yes.

Interrogatory No. 26. If the answer to interrogatory numbered "25" is in the affirmative, state when defendant began to employ the representation of a biscuit in its advertisements or upon its packages and whether it did so prior to the filing of the bill of complaint in this cause.

Answer: In 1912.

Interrogatory No. 27. State whether or not defendant has used or employed the name "Shredded" in its advertisements of its whole wheat biscuit like the whole wheat biscuit contained in "Plaintiff's Exhibit 1".

Answer: Defendant has employed the descriptive word "shredded" in its advertisements of the whole wheat biscuit referred to in the answer to Q. "20".

Interrogatory No. 28. If the answer to interrogatory numbered "27" is in the affirmative, state when

defendant began the use of the name "Shredded" in its advertisements of its said whole wheat biscuit and whether or not it did so prior to the filing of the bill of complaint in this cause.

Answer: Defendant first used the descriptive word "shredded" in its advertising of flavored shredded whole wheat biscuit in 1912 and of unflavored shredded whole wheat biscuit in 1922.

Interrogatory No. 29. State whether or not defendant has employed in connection with its advertisement of its said whole wheat biscuit inquired about in interrogatory numbered "20" a cut, representation or picture of a whole wheat biscuit in association with the name "Shredded" and, if so, state when defendant began to do so, whether or not it did so prior to the filing of the bill of complaint in this cause and produce true and correct copies of two or three such advertisements of defendant and state where they may be examined by plaintiff's representatives or counsel.

Answer: Defendant in 1922 began to use the descriptive word "shredded" in advertisements of its shredded whole wheat biscuit in association with a picture thereof. Specimens may be inspected at office of Kellogg Company in Battle Creek, Michigan, on notice.

Interrogatory No. 30. State whether or not defendant has employed the name "Shredded Wheat" in connection with its advertisements of its whole wheat biscuit inquired about in interrogatory numbered "20" and, if so, state whether it did so prior to the filing of the bill of complaint in this cause and produce copies or specimens of such advertisements.

Answer: Defendant at times in 1922 and at times during the period from 1927 to August, 1930, used in its advertisements the descriptive phrase "shredded whole wheat biscuit" coupled with the name Kellogg's, and defendant since August, 1930, in certain territories continuously used the phrase "Kellogg's shredded

whole wheat biscuit". It has not featured the descriptive phrase "shredded wheat" in connection with product marketed by it in cartons like "Plaintiff's Exhibit 1".

Interrogatory No. 31. State whether or not defendant's customers advertised to the public in the United States defendant's said whole wheat biscuit inquired about in interrogatory numbered "20" and, if so, whether or not any of defendant's customers for said whole wheat biscuit employed in their advertisements of defendant's said whole wheat product the name "Shredded Wheat" and, if so, whether such advertisements were published in the United States prior to the filing of the bill of complaint in this cause.

Answer: Tear sheets of dealer-advertising in files of Kellogg Company indicate that some grocers have referred to Kellogg's shredded whole wheat biscuit as "Kellogg's Shredded Wheat". Some of these dealer-advertisements are dated prior to the filing of the bill of complaint in this case. Defendant has no supervision or control over such dealer-advertisements.

Interrogatory No. 32. State whether or not defendant has in its possession or under its control any advertisements of its customers inquired about in interrogatory numbered "31" and, if so, produce the same and state where plaintiff's representatives or counsel may examine the same.

Answer: Defendant has in its possession dealer-advertisements which may be examined at defendant's office at Battle Creek, Michigan, on notice.

Interrogatory No. 33. State whether or not the whole wheat biscuit of the manufacture and sale of defendant in commerce in the United States, identified in interrogatories numbered "20" and "21" have been or are being sold to members of the public in the United States in restaurants, hotels and/or boarding houses

outside of and independent of the packages in which they are packaged when shipped by defendant.

Answer: For the restaurant and hotel trade defendant provi's individnal cartons containing two biscuit. Those cartons have the name Kellogg's prominently displayed thereon. Kellogg's distinctively sized and colored whole wheat biscuit referred to in the answers to interrogatories Nos. "20" and "22" are to the best of defendant's knowledge and belief sold to members of the public in the United States in restaurants, hotels, etc., packaged in the original distinctive Kellogg Company individual cartons in which they are packed when shipped. A scattering few restaurants may remove the biscuit from the carton before serving, but usually in presence of customer. The volume of defendant's business in individual sized cartons put up for restaurants and hotels, is from about two to three per cent. of its total measured in number of biscuits sold, and the percentage of restaurants which remove the biscuit from the carton when serving, as aforesaid, is estimated by defendant as not exceeding one per cent. of the total volume of defendant's individual carton business, making a proportion of approximately one to 5000 as applied to defendant's total volume of whole wheat biscuit business.

Interrogatory No. 34. If the answer to interrogatory numbered "33" is in the affirmative, state whether or not any identifying marks or indicia appear upon defendant's said whole wheat biscuit when sold to members of the public.

Answer: Defendant's biscuit are distinctively sized, shaped, colored and toasted top and bottom and were always clearly distinguishable both inside and outside of their cartons from plaintiff's product until plaintiff sought to neutralize or obliterate such size distinction by copying defendant's biscuit as to size

at a date long subsequent to defendant's adoption and use of its said distinctive small size of biscuit.

Interrogatory No. 35. Did defendant cook the whole wheat used in the whole wheat biscuit referred to in defendant's answer to interrogatory numbered "20"?

Answer: Defendant cooks the wheat used in all the shredded wheat biscuit made by it.

Interrogatory No. 36. Did defendant before or after cooking the whole wheat referred to in defendant's answer to interrogatory numbered "20" add any ingredient whatsoever thereto?

Answer: From 1922 to the present the wheat is cooked only in water. Disregarding such water no ingredients have been added.

Interrogatory No. 37. If the answer to interrogatory numbered "36" is "yes", state what such added ingredient or ingredients was or were and at what stage of the preparation or making of such whole wheat biscuit such ingredient or ingredients was or were added.

Answer: See answer to No. "36".

Interrogatory No. 38. State whether or not the carton which is presented herewith and marked "Plaintiff's Exhibit 2", is a specimen of cartons in which whole wheat biscuit were packaged and distributed in commerce in the United States by defendant.

Answer: Yes.

Interrogatory No. 39. If the answer to interrogatory numbered "38" is in the affirmative, state when defendant began to use cartons like "Plaintiff's Exhibit 2" for packaging its whole wheat biscuit.

Answer: Early part of 1927.

Interrogatory No. 40. State whether or not defendant is now using cartons like "Plaintiff's Exhibit 2" for packaging whole wheat biscuit of its manufacture and sale in commerce in the United States and, if

not, state when the use by defendant of cartons like "Plaintiff's Exhibit 2" was discontinued.

Answer: No. Use discontinued about February, 1928.

Interrogatory No. 41. State whether or not the whole wheat biscuit of the manufacture and sale of defendant packaged in cartons like "Plaintiff's Exhibit No. 2" are the same in design and appearance as the whole wheat biscuit contained in "Plaintiff's Exhibit 1", and if not, describe the design of such biscuit or produce a specimen, cut or other representation of the same and state where the same may be examined by plaintiff's representatives or counsel.

Answer: The shredded wheat biscuit packaged in cartons like "Plaintiff's Exhibit 2" were the same in design and appearance as those packaged in cartons like "Plaintiff's Exhibit 1".

Interrogatory No. 42. State whether or not the carton which is presented herewith and marked "Plaintiff's Exhibit 3", is a specimen of cartons in which whole wheat biscuit were packaged and distributed in commerce in the United States by defendant.

Answer: Yes.

Interrogatory No. 43. If the answer to interrogatory numbered "42" is in the affirmative, state when defendant began to use cartons like "Plaintiff's Exhibit 3" for packaging its whole wheat biscuit.

Answer: Defendant first began to use cartons identical with "Plaintiff's Exhibit No. 3" in the early part of 1928. Cartons of substantially the same style, design and size were used by the defendant for a short time during the year 1922.

Interrogatory No. 44. State whether or not defendant is now using cartons like "Plaintiff's Exhibit 3" for packaging whole wheat biscuit of its manufacture and sale in commerce in the United States and, if

not, state when the use by defendant of cartons like "Plaintiff's Exhibit 3" was discontinued.

Answer: Yes, with minor differences and in certain interstate markets only.

Interrogatory No. 45. State whether or not the whole wheat biscuit of the manufacture and sale in commerce in the United States of defendant packaged in cartons like "Plaintiff's Exhibit No. 3" are the same in design and appearance as the whole wheat biscuit contained in "Plaintiff's Exhibit 1" and if not, describe the design of such biscuit or produce a specimen or cut or other representation of the same and state where the same may be examined by plaintiff's representatives or counsel.

Answer: The shredded wheat biscuit made and packaged by defendant in cartons like "Plaintiff's Exhibit 3" were the same in design and appearance as those packaged in cartons like "Plaintiff's Exhibit 1".

Interrogatory No. 46. State whether or not the carton which is presented herewith and marked "Plaintiff's Exhibit 4", is a specimen of cartons in which whole wheat biscuit were packaged and distributed in commerce in the United States by defendant.

Answer: Yes.

Interrogatory No. 47. If the answer to interrogatory numbered "46" is in the affirmative, state when defendant began to use cartons like "Plaintiff's Exhibit 4" for packaging its whole wheat biscuit.

Answer: Defendant first began to use cartons like "Plaintiff's Exhibit No. 4" August, 1930.

Interrogatory No. 48. State whether or not defendant is now using cartons like "Plaintiff's Exhibit 4" for packaging whole wheat biscuit of its manufacture and sale in commerce in the United States and, if not, state when the use by defendant of cartons like "Plaintiff's Exhibit 4" was discontinued.

Answer: Cartons like "Plaintiff's Exhibit No. 4" discontinued September 4, 1932.

Interrogatory No. 49. State whether or not the whole wheat biscuit of the manufacture and sale of defendant in cartons like "Plaintiff's Exhibit 4" are the same in design and appearance as the whole wheat biscuit contained in "Plaintiff's Exhibit 1" and, if not, describe the design of such biscuit or produce a specimen, cut or other representation of the same and state where the same may be examined by plaintiff's representatives or counsel.

Answer: The shredded wheat biscuit made and packaged by defendant in cartons like "Plaintiff's Exhibit 4" were the same in design and appearance as those made by defendant and packaged in cartons like "Plaintiff's Exhibit 1."

Interrogatory No. 50. State whether or not the carton which is presented herewith and marked "Plaintiff's Exhibit 5," is a specimen of cartons in which whole wheat discuit were packaged and distributed in commerce in the United States by defendant.

Answer: Yes.

Interrogatory No. 51. If the answer to interrogatory number "50" is in the affirmative, state when defendant began to use cartons like "Plaintiff's Exhibit 5" for packaging its whole wheat biscuit.

Answer: Cartons like "Plaintiff's Exhibit No. 5" were first used by defendant September, 1932.

Interrogatory No. 52. State whether or not defendant is now using cartons like "Plaintiff's Exhibit 5" for packaging whole wheat biscuit of its manufacture and sale in commerce in the United States and, if not, state when the use of cartons like "Plaintiff's Exhibit 5" was discontinued.

Answer: Yes.

Interrogatory No. 53. State whether or not the whole wheat biscuit of the manufacture and sale of de-

fendant in cartons like "Plaintiff's Exhibit 5" are the same in design and appearance as the whole wheat biscuit contained in "Plaintiff's Exhibit 1" and, if not, describe the design of such biscuit or produce a specimen, cut or other representation of the same and state whether the same may be examined by plaintiff's representatives or counsel.

Answer: The shredded wheat biscuit made by defendant and sold in cartons like "Plaintiff's Exhibit 5" were the same in design and appearance as those sold in cartons like "Plaintiff's Exhibit 1."

Interrogatory No. 54. State when defendant began to embody on its cartons in which its whole wheat biscuit was packaged the following statement which appears upon "Plaintiff's Exhibit 1" and "Plaintiff's Exhibit 4":

> "This certified analysis made by the Medical Arts Laboratory of Philadelphia, indicates the splendid food value of Kellogg's Shredded WHOLE WHEAT Biscuit."

Answer: August, 1930.

Interrogatory No. 55. State when defendant began to use upon its cartons in which it packaged its whole wheat biscuit the following which appears upon "Plaintiff's Exhibit 4":

> "Kellogg's
> WHOLE
> WHEAT
> Biscuit
>
> are made of delicately flavored whole wheat shreds. These shredded biscuit are a new convenient size. Two just fit the cereal bowl."

Answer: September 28, 1931.

Interrogatory No. 56. State whether or not defendant is now using upon cartons in which it packages its whole wheat biscuit the statement quoted in interrogatory numbered "55" and, if not, when did defendant discontinue the use of the same upon its cartons.

Answer: The statement quoted in Interrogatory No. "55" was discontinued September, 1932.

Interrogatory No. 57. State whether and, if so, when, the use of the statement quoted in interrogatory numbered "54" was discontinued by defendant upon cartons in which defendant packaged its whole wheat biscuit.

Answer: Discontinued September, 1932.

Interrogatory No. 58. State when defendant began to use upon its cartons in which it packaged its whole wheat biscuit the following statement which appears upon "Plaintiff's Exhibit 5":

"Shredded Wheat in Its Most Delicious Form."

Answer: September 14, 1932. Used on one end panel only.

Interrogatory No. 59. State when defendant began to use upon its cartons in which it packaged its whole wheat biscuit the following statement which appears upon "Plaintiff's Exhibit 5":

"A shredded wheat product."

Answer: September 14, 1932. Used on one end panel only.

Interrogatory No. 60. State whether or not defendant has discontinued the use upon its cartons in which it packages its whole wheat biscuit of either or both the statements quoted in interrogatories numbered "58" and "59".

Answer: No.

Interrogatory No. 61. Did defendant cook the whole wheat used in the whole wheat biscuit packaged in cartons like Plaintiff's Exhibits 2, 3, 4 and 5?

Answer: Yes.

Interrogatory No. 62. Did defendant before or after cooking the whole wheat used in the whole wheat biscuit referred to in defendant's answer to interroga-

tory numbered "61" add any ingredient whatsoever thereto?

Answer: No. Cooked only in water.

Interrogatory No. 63. If the answer to interrogatory numbered "62" is "Yes," state what such added ingredient or ingredients was or were used and at what stage of the preparation or making of such whole wheat biscuit such ingredient or ingredients was or were added.

Answer: See answer to No. "62."

Interrogatory No. 64. If the answer to interrogatory numbered "62" is "yes," state whether or not the addition of such ingredient or ingredients to the whole wheat used in the said whole wheat biscuit has or have been discontinued, and, if so, state the date when the use of the same was discontinued.

Answer: See answer to No. "62."

Interrogatory No. 65. State whether or not the whole wheat biscuit made prior and subsequent to the filing of the bill of complaint in this suit contained any ingredient or ingredients other than those existent in the natural wheat.

Answer: The whole wheat biscuits made prior to the year 1920 contained the added ingredients sugar and salt, and during war time, corn flour and rye were substituted for a portion of the wheat. Since 1920, the whole wheat biscuits have been made from whole wheat without flavoring or other added ingredient.

Interrogatory No. 66. State whether or not the manufacture and sale in the United States of a whole wheat product or biscuit by defendant or its predecessor was interrupted or discontinued at any time or times after such manufacture and sale was first begun.

Answer: Yes.

Interrogatory No. 67. If the answer to interrogatory numbered "66" is "Yes," state the time when each

of such interruptions or discontinuances began and when it ended.

Answer: Manufacture of flavored shredded whole wheat biscuits was discontinued in 1920, and unflavored biscuit was made, and manufacture discontinued, in 1922 as before stated. Manufacture and sale of the unflavored biscuit was resumed in 1927, as aforesaid, and has since continued.

Interrogatory No. 68. State whether or not defendant has packaged its whole wheat biscuit in cartons or packages other than those identified in the foregoing interrogatories by Exhibits Numbered 1 to 5, both inclusive, and, if so, produce a specimen of each other carton in which defendant packaged its said whole wheat biscuit and state where the same may be examined by plaintiff's representatives or counsel.

Answer: Defendant's shredded whole wheat biscuit have been packed in cartons or packages other than those identified in the foregoing interrogatories by "Exhibits Nos. 1 to 5" both inclusive. Specimens of each of these other cartons are in the files of the Kellogg Company at Battle Creek, Michigan, and may be examined by plaintiff's counsel, on notice.

Interrogatory No. 69. State whether or not the attached copy of letter dated January 14, 1922, and marked "Plaintiff's Exhibit 6" is a true and correct copy of a letter written by Kellogg Toasted Corn Flake Co. of Battle Creek, Michigan.

Answer: "Plaintiff's Exhibit No. 6" does not give an addressee on the alleged copy of letter dated January 14, 1922; therefore, defendant is unable to state whether or not "Exhibit No. 6" is a true and correct copy of a letter written by Kellogg Toasted Corn Flake Company, Battle Creek, Michigan.

Interrogatory No. 70. State whether or not other letters of the same tenor and purport as "Plaintiff's Exhibit 6" were written by said Kellogg Toasted Corn

Flake Co. of Battle Creek, Michigan, at or about the time that "Plaintiff's Exhibit 6" was written or within a period of six months from the date of said exhibit, to other parties or concerns in the United States and, if so, produce the same and state where they may be examined by plaintiff's representatives or counsel.

Answer: Defendant's files do not indicate that any letters of the same tenor and purport as "Exhibit No. 6" were written by Kellogg Toasted Corn Flake Company at the dates mentioned.

Interrogatory No. 71. State whether or not the said Kellogg Toasted Corn Flake Company of Battle Creek, Michigan, is the predecessor of defendant in the conduct of the business in which defendant is engaged.

Answer: Kellogg Toasted Corn Flake Company of Battle Creek, Michigan, was the predecessor of the defendant in the conduct of the business in which the defendant is engaged.

Interrogatory No. 72. State when defendant succeeded to the business theretofore conducted by Kellogg's Toasted Corn Flake Company of Battle Creek, Michigan.

Answer: In the year 1922.

Interrogatory No. 73. State whether or not said Kellogg Toasted Corn Flake Company has discontinued the manufacture of its wheat biscuit by or before January 14, 1922.

Answer: Yes.

Interrogatory No. 74. State whether or not defendant has in its possession or under its control a specimen or specimens of said wheat biscuit referred to in "Plaintiff's Exhibit 6" and, if so, state where the same may be examined by plaintiff's representatives or counsel.

Answer: No.

Interrogatory No. 75. State whether or not defendant has in its possession or under its control a cut,

picture, description, drawing or other representation or copy of any circular or other advertisement of the wheat biscuit referred to in "Plaintiff's Exhibit 6" and, if so, produce the same and state where plaintiff's representatives or counsel may examine the same.

Answer: Defendant has a cut or picture or advertisement of the flavored shredded whole wheat biscuit made by defendant's predecessor, and same can be seen at defendant's office in Battle Creek, Michigan, on notice.

Interrogatory No. 76. State whether or not defendant has in its possession or under its control a carton in which the wheat biscuit referred to in "Plaintiff's Exhibit 6" was packaged and, if so, produce the same and state where plaintiff's representatives or its counsel may examine the same.

Answer: Defendant has in its possession a carton in which its predecessor's flavored shredded whole wheat biscuit was packaged prior to June 14, 1922. Same may be examined at the offices of Kellogg Company, Battle Creek, Michigan, on notice.

Interrogatory No. 77. State whether or not the attached copy of letter dated January 19, 1922, addressed to Kellogg Toasted Corn Flake Company and marked "Plaintiff's Exhibit 7" is a true and correct copy of a letter received by said Kellogg Toasted Corn Flake Company and, if so, state the date on which the said letter was received.

Answer: Yes—received about January 21, 1922.

Interrogatory No. 78. State whether or not the attached letter dated April 8, 1927, and marked "Plaintiff's Exhibit 8," is a true and correct copy of a letter addressed to defendant, Kellogg Company and whether the said letter was received by defendant, and, if so, state the date on which it was received.

Answer: Yes—received about April 10, 1927.

Interrogatory No. 79. State whether or not the attached copy of letter dated April 22, 1927, and marked "Plaintiff's Exhibit 9," is a true and correct copy of a letter written on behalf of defendant to Messrs. Breed, Abbott & Morgan, 32 Liberty Street, New York, N. Y., and whether or not the letter was mailed on or about the date that it bears.

Answer: Yes.

Interrogatory No. 80. State whether or not the attached copy of letter dated May 10, 1927, and marked "Plaintiff's Exhibit 10," addressed to W. H. Crichton Clarke, is a true and correct copy and state the date on which it was received.

Answer: Yes—received about May 11, 1927.

Interrogatory No. 81. State whether or not the attached copy of letter dated May 16, 1927, and marked "Plaintiff's Exhibit 11," addressed to Messrs. Breed, Abbott & Morgan, is a true and correct copy of said letter and whether or not it was sent on or about the date which it bears.

Answer: Yes.

Interrogatory No. 82. Attached hereto and marked Plaintiff's Exhibits 12-a to 12-pp, both inclusive, are advertisements of defendant's whole wheat biscuit. In connection with each advertisement, the publication in which it was published and the place and date of publication appear.

State with reference to each of said exhibit advertisements (a) whether or not it is an advertisement of defendant of its whole wheat biscuit and (b) whether the said advertisements were published in the newspapers at the places and on or about the dates appearing in connection with the said exhibit advertisements.

Answer: (a) Yes, with the qualification that in some of the exhibits advertisements of others appear. For example, one of the advertisements on "Exhibit 12-pp" is obviously that of plaintiff and another adver-

tisement, "Exhibit 12-u," refers to Kellogg's corn flakes. (b) Yes.

Interrogatory No. 83. If the answer to interrogatory numbered "82" is in the affirmative, state whether or not any or all of the said advertisements referred to in defendant's answer to interrogatory numbered "82" were published by defendant or by its direction or authority in newspapers, periodicals, trade or other publications, other than those recited in connection with interrogatory "82," and, if so, state the name of each of such publication, the places of publication of each and the particular exhibit advertisements among Exhibits 12-a to 12-pp which were so published in the United States.

Answer: Yes. List of papers, town and state and advertisements attached.

Interrogatory No. 84. State the full period (time when begun and when ended) during which each of the said exhibit advertisements referred to in defendant's answers to interrogatories numbered "82" and "83" were published by defendant in newspapers, periodicals, trade or other publications published in the United States.

Answer: From week of February 29, 1932, to week of September 12, 1932, over much of the country. In 1931 appeared throughout the year, but not at the same time in all sections of the country. Of course, none of the advertisements appeared in every issue of every paper.

Interrogatory No. 85. If the answers to interrogatories numbered "82" and "83" are in the negative, in whole or in part, state whether or not any or all of the said exhibit advertisements, identified in defendant's answers to interrogatories numbered "82" and "83" were published in the United States by an agent, agents or representatives of defendant and, if so, identify the particular advertisement or advertisements which was

or were published by an agent, agents or representatives of defendant, the publications in which published, the place and date of publication.

Answer: See answers to interrogatories "82" and "83."

Interrogatory No. 86. If the answer to interrogatory numbered "85" is in the affirmative, state whether or not defendant paid, in whole or in part, for the publication in the United States of any or all of said advertisements and, if so, state whether defendant paid the full amount of the cost of each of said advertisements or what proportion of the cost of publication thereof defendant paid.

Answer: Memorandum on "Plaintiff's Exhibits 12-a to 12-pp." All exhibits in this group cover regular copy prepared and released by defendant's agency to newspapers as part of newspaper campaign on the shredded wheat biscuit made by defendant, also paid for by defendant through its agency, except as follows:

Exhibit 12-y. This is a news story released by defendant's agency, but for which no payment was made by the defendant.

Exhibit 12-ii. In this exhibit the only copy and space paid for by the defendant is the advertisement with the heading "Certified for Food Value". All other mention of Kellogg's whole wheat biscuit in dealer-advertising was inserted and paid for by the dealer in whose copy such mention was made, with no allowance from defendant.

Exhibit 12-jj. The only copy and space paid for by the defendant is the advertising with the heading "Just Try This New Whole Wheat Biscuit". All other mention of Kellogg's whole wheat biscuit in dealer-advertising was inserted and paid for by the dealer in whose copy such mention was made, with no allowance by defendant.

Exhibit 12-mm. All advertising appearing in this publication is free—that is, the space is free to the advertisers of the Tulsa Tribune, in this publication which is distributed free among the retail trade.

Exhibit 12-nn. The only copy and space paid for by the defendant is the advertisement with the heading "Seeing is believing". All other mention of Kellogg's whole wheat biscuit in dealer-advertising was inserted and paid for by the dealer in whose copy such mention was made, with no allowance by defendant.

Exhibit 12-pp. The advertisement "A New Whole Wheat Biscuit" is an advertisement paid for by the defendant. The advertisement to the right obviously is an advertisement of the plaintiff.

Exhibit 12-g. Same comments as on "Exhibit No. 12-mm".

Exhibit 12-s. Same comments as on "Exhibit No. 12-mm".

Exhibit 12-u. Corn flakes advertisements.

"Plaintiff's Exhibit 12-d" indicates the Courier-Post to be a Philadelphia newspaper. This is incorrect. Courier-Post is published in Camden, New Jersey.

Interrogatory No. 87. If the answer to interrogatory numbered "85" is in the affirmative, state whether or not defendant or its duly authorized representative or representatives furnished any of the material comprised in any or all of the said exhibit advertisements identified in defendant's answers to interrogatories numbered "82" and "83" and, if so, state what portion or portions of each of said exhibit advertisements was or were furnished by defendant and to whom furnished.

Answer: Answer to this question was covered by information given in answer to Interrogatory No. "86".

Interrogatory No. 88. If the answer to interrogatory numbered "85" is in the negative, in whole or in part, state whether or not defendant approved advertisements of its agents or representatives of whole wheat biscuit and identify the particular advertisement or advertisements which were so approved by defendant.

Answer: Advertisements paid for by the defendant were approved by defendant or defendant's agencies. Advertisements paid for by grocers were not submitted to, prepared or approved by defendant.

Interrogatory No. 89. Attached hereto and marked Plaintiff's Exhibits 13-a to 13-c, both inclusive, are advertising panels or displays of defendant's whole wheat biscuit.

State with reference to the said exhibit advertising panels or displays whether or not each of them is an advertising panel or display of defendant, whether each of them was distributed in the United States, the period (when begun and when ended) during which each of them was distributed in the United States and whether or not they relate to the whole wheat biscuit of the manufacture and sale of defendant.

Answer: Defendant is unable to identify "Exhibit 13-a". It looks like main panel of a Kellogg carton "Exhibits Nos. 13-b and 13-c were dealer display window pieces and related to Kellogg's shredded whole wheat biscuit. "Exhibit 13-b" distributed among the retail trade from January, 1929 to September, 1930. "Exhibit 13-c" from March, 1929 to September, 1930.

Interrogatory No. 90. State the approximate number of each advertising panel or display referred to in defendant's answer to interrogatory numbered "89" which was made and distributed by defendant or under its direction or authority, in the United States, the particular state or states in which each of

them was distributed, and to whom (as a class) they were distributed and the use that was intended to be made thereof.

Answer: 35,000 of "Exhibit 13-b" and 15,000 "Exhibit 13-c". These advertising pieces distributed among the retail grocer trade to promote sale of defendant's product.

Interrogatory No. 91. State whether or not the said exhibit advertising panels or displays referred to in defendant's answer to interrogatory numbered "89" were prepared and distributed for the purposes of advertising to the public the whole wheat biscuit of the manufacture and sale of defendant.

Answer: Yes.

Interrogatory No. 92. Attached hereto and marked Plaintiff's Exhibits 14-a to 14-ee, both inclusive, are advertisements. In connection with such advertisements the publications in which they were published and the dates of the publications containing the same appear. Among the said exhibit advertisements some were not published in newspapers or other publications. The latter are marked Plaintiff's Exhibits 14-z to 14-ee, both inclusive.

State with reference to the said exhibit advertisements, Nos. 14-a to 14-ee whether or not each of the said parties, corporations or concerns named therein are customers of defendant for its whole wheat biscuit, whether or not the references to shredded whole wheat biscuit appearing therein are to the whole wheat biscuit of defendant, whether or not the said advertisements (Plaintiff's Exhibits 14-a to 14-y) were published in the newspapers shown in connection with said exhibit advertisements on or about the dates appearing in connection with the said exhibit advertisements and whether or not the advertisements, Plaintiff's Exhibits 14-z to 14-ee, were put out and distributed by the concerns and at the places indicated thereon.

Answer: Kellogg Company has no control over these dealer-advertisements referred to in this question, and has nothing to do whatsoever with the wording of advertisements, price, etc. Several of these exhibits do not show the name of the dealer releasing the copy. The package electros were furnished to the dealers by Kellogg Company.

Interrogatory No. 93. State whether or not defendant, its agent, agents, or representatives, paid, in whole or in part, for the advertisements comprised in Plaintiff's Exhibits 14-a to 14-y, referred to in interrogatory numbered "92."

Answer: The defendant, its agents or representatives did not pay in whole or in part for any of the advertisements comprised in "Plaintiff's Exhibits 14-A to 14-Y" referred to in Interrogatory No. "92". The package electros were, however, supplied by the defendant.

Interrogatory No. 94. State whether or not defendant, its agent, agents or representatives paid, in whole or in part, for the printing or distribution of the advertisements comprised in Plaintiff's Exhibits 14-z to 14-ee.

Answer: The defendant, its agents or representatives did not pay in whole or in part for the printing and distribution of the advertisements comprised in "Plaintiff's Exhibits 14-z to 14-ee".

Interrogatory No. 95. State whether or not defendant, its agent, agents or representatives furnished any of the material comprised in any or all of the said exhibit advertisements, Plaintiff's Exhibits 14-a to 14-ee, and if so, state what portion or portions thereof was or were furnished by defendant, its agent, agents or representatives, for each of said exhibits and to whom furnished.

Answer: The defendant, its agents or representatives did not furnish any of the material compris-

ing advertisements in "Plaintiff's Exhibits 14-a to 14-ee" with the exception of the package electros, which were sent either direct to the dealer or through newspapers carrying advertising schedules.

Interrogatory No. 96. State whether or not the defendant, its agent, agents or representatives approved any or all the advertisements comprised in Plaintiff's Exhibits 14-a to 14-ee as to defendant's shredded whole wheat biscuits before the same were published and/or distributed and, if so, state which of said advertisements were so approved.

Answer: No. The Kellogg Company has no control over this type of dealer-advertising. The copy is run arbitrarily by the dealer and is not prepared by, submitted to, or approved by defendant.

[Note: Answers to Interrogatories signed by "Ross T. Adams, Secretary," and verified by him May 4, 1933.]

Plaintiff's Exhibit 6.

KELLOGG TOASTED CORN FLAKE CO.
Battle Creek, Mich.

January 14, 1922.

Dear Sir:

We have your letter of January 7, making inquiry of our Wheat Biscuit.

We have discontinued the manufacture of this product at the present time, and so are unable to supply you. We suggest, however, that you offer your customers some Shredded Krumbles, when they ask for Wheat Biscuit. This is a fine whole wheatfood and of the same nature as the Biscuit except that it is not in Biscuit form.

Yours very truly,

KELLOGG TOASTED CORN FLAKE CO.
J. F. Eckert
District Sales Manager

Plaintiff's Exhibit 7.

THE SHREDDED WHEAT COMPANY

January 19th, 1922.

Kellogg Toasted Corn Flake Company,
Battle Creek,
Michigan.

Gentlemen:

We have heard in trade circles that your Company is contemplating placing on the market a whole wheat biscuit similar to the biscuit produced and sold by us for many years.

We also notice on the carton of Kellogg's Corn Flakes, a list of Kellogg's Ready to Eat Products, containing the item "Shredded Whole Wheat Biscuit."

As you know, our Company claims that it possesses certain rights in the use of the name "Shredded Wheat", together with the peculiar form, size and style of biscuit, which is universally recognized as a product of this Company.

Our object in writing you is to frankly inquire whether the information obtained by us in the trade is or is not correct. You will, of course, realize that if it is your intention to market a whole wheat biscuit, we would like to have you understand thoroughly the legal claims which we make before you incur any expense in manufacturing or marketing a biscuit which so nearly resembles our product as to be calculated to deceive the public.

Yours very truly,

THE SHREDDED WHEAT COMPANY

A. J. Porter
President

Plaintiff's Exhibit 8.

April 8, 1927.

Kellogg Company,
Battle Creek,
Michigan.

Dear Sirs:

Our attention has been called by our client, The Shredded Wheat Company, of Niagara Falls, N. Y., to the fact that you are now offering for sale a cereal food similating in appearance the product sold by our client for upwards of thirty years past, and offered

to the trade in cartons and cases inscribed "Shredded Whole Wheat Biscuit."

Some four or five years ago, you offered for sale a produce of a wholly different character and appearance, labelled "Shredded Whole Wheat Biscuit." At that time, immediately on learning that you were applying to that product the name "Shredded Whole Wheat Biscuit", we protested to you in writing, and the sale of this product was discontinued so shortly thereafter that we had no occasion to resort to the processes of law to enforce our client's rights.

Your re-entry into the use of the name "Shredded Whole Wheat Biscuit" and the use of that name in connection with a product similating in appearance the distinctive and widely known product of our client is unfair and unlawful, and we are instructed by our client to demand that you discontinue forthwith the sale of this product, and also to discontinue any and all use of the name "Shredded Whole Wheat Biscuit", or any name similar thereto, and that you furnish satisfactory assurance against any resumption of either of those practices. Should you fail to comply with this demand, our instructions are to proceed against you at once for an injunction against continuance of this unfair and unlawful practice and for an accounting of the damages sustained by our client.

Yours very truly,

BREED, ABBOTT & MORGAN

SF:EL

Plaintiff's Exhibit 9.

W. H. CRICHTON CLARKE
71 West 23rd Street
New York.

April 22nd, 1927.

Breed, Abbott & Morgan, Esqs.,
32 Liberty Street,
New York City.

REGISTERED MAIL

Gentlemen:

In further answer to your letter of April 8, 1927 I refer you to my letters to the Shredded Wheat Company dated January 25, 1922 and to the Canadian Shredded Wheat Company, Ltd. dated August 5, 1925.

Those letters represent the position to which the Kellogg Company has always adhered and will continue to adhere. We have marketed Kellogg's Shredded Wheat and Kellogg's Shredded Wheat Biscuit for many years and we propose to continue to do so. We decline to recognize in the Shredded Wheat Company any valid monopoly in the same Shredded Wheat for biscuit or other shredded products. We have never in any way simulated any packages or exclusive features of the Shredded Wheat Company.

We never took any goods off the market on the request, demand or notice of the Shredded Wheat Company but have always asserted our rights and exercised them, and we propose to continue in the future to exercise our rights freely and independently and without any reference to or recognition of any exclusive rights in the Shredded Wheat Company in or to the words Shredded Wheat.

We have always made our position perfectly clear to your client and it is rather late now for your client

to affect any misunderstanding of our attitude and rights and intentions.

We have exercised our right to apply the descriptive term "Shredded Wheat" to our products for some years. We answered your demands of some years back with a firm assertion and employment of our right. Your clients never had any lawful grounds on which to complain of our activities and it is too (w)
late not to attempt to revive a situation in which it was your client who backed down in the face of our asserted rights, intentions and activities, and who declined to take the prompt action which we so firmly challenged them at that time to take.

Yours very truly,
W. H. CRICHTON CLARKE

Plaintiff's Exhibit 10.

May 10, 1927.

W. H. Crichton Clarke, Esq.,
71 West 23rd Street,
New York City.

Dear Sir:

We acknowledge the receipt of your letter of April 22nd in which you assert the intention of your client to exercise what you term its rights, regardless of the rights of our client, The Shredded Wheat Company. We are replying to your letter solely because of the erroneous statement of facts it contains.

The Kellogg Company has not for a number of years, as you imply, marketed a whole wheat biscuit in the semblance of the product made by our client. Information has only recently come to us indicating that your client is now offering for sale, in a limited way, a biscuit which does resemble our client's product and is calculated to deceive the consumer.

A number of years ago, the Kellogg Company, or its predecessor, manufactured and sold for a time a product which it called "Kellogg's Toasted Wheat Biscuit." Thereafter the Kellogg Company commenced calling its product "Shredded Whole Wheat Biscuit." Upon this fact coming to the attention of The Shredded Wheat Company, it protested against the infringement of its rights in the use of this name.

You thereupon, in behalf of your client, wrote a letter asserting the invention of your client to proceed without regard to our client's rights, but your client advised the trade that it had discontinued the manufacture of this product, so that there was no occasion for The Shredded Wheat Company to take further action at at time.

Now, after a lapse of a considerable period of time, the Kellogg Company has changed the form of its product so as to closely imitate the biscuit of our client and is offering that product for sale under the name "Shredded Whole Wheat Biscuit."

Whatever may have been the intention of the Kellogg Company in the past, and there are indications of its desire to appropriate the good-will of The Shredded Wheat Company if this could be done with impunity, the tentative efforts made along these lines appear to have been abandoned following the protests made by our client notwithstanding the statement made in your letter that the rights of our client would be ignored.

If the Kellogg Company now persists in the unlawful practices to which we have called attention, we shall take such steps as may be proper to stop these practices.

Yours very truly,

BREED, ABBOTT & MORGAN

Plaintiff's Exhibit 11.

W. H. CRICHTON CLARKE
71 West 23rd Street
New York.

May 16th, 1927.

Breed, Abbott & Morgan, Esqs.,
32 Liberty Street,
New York City.

Gentlemen:

I have your letter of May 10th in the matter of the Shredded Wheat Company against the Kellogg Company.

I deny emphatically that the Kellogg Company has ever discontinued the manufacture of Shredded Wheat or Shredded Wheat Biscuit on account of any rights claimed by the Shredded Wheat Company. It has marketed these products in the past and intends to continue to market the same in the fugure.

There is only one law in this country and that law works for us as well as against us. My client, then known as Toasted Corn Flake Company once tried to stop the Quaker Oats Company from marketing Toasted Corn Flakes a formerly patented product as Shredded Wheat Biscuit is. The courts held those words to be descriptive although they are less so than the term Shredded Wheat is. We are willing to prove to you at any time you choose that the law of this country will protect us as certainly as it protected the Quaker Oats Company.

We have marketed Shredded Wheat Biscuit for years and we propose to continue our operations.

We courteously advised you of our operations and rights some years ago. You should have acted then. It is too late now to complain, although even then you had no lawful monopoly in the name or product.

I can only repeat that our position has been set forth in letters written to you in the past as well during the present correspondence.

We deny that you have any exclusive rights in the words Shredded Wheat or in the biscuit itself and we are proceeding now as we have in the past to exercise our own independent rights in the matter.

Yours very truly,

W. H. CRICHTON CLARKE

MANY FEATURES FOR NEW SHREDDED BISCUIT

Kellogg's WHOLE WHEAT Biscuit Set New Standard for This Type of Cereal

Local grocers are featuring a new shredded biscuit developed by the Kellogg Company of Battle Creek, Michigan, which is a decided improvement in many ways. The improved Kellogg biscuit is "pressure-cooked" by a special process that retains the complete food value of the whole wheat. At the same time, delightful flavor is baked in.

Other improvements are a biscuit of more convenient, economical size. Two of these new biscuits just fit the cereal bowl. You get 15 to the package instead of the usual dozen. And every biscuit is toasted a rich golden brown on both top and bottom—not just one side. This makes them exceptionally crisp.

These new biscuits have been analyzed by the Medical Arts Laboratory of Philadelphia and found to be so rich in food value that every package is certified. Any mother can now be certain her family is getting a well-balanced food with these new Kellogg biscuits.

Kellogg's WHOLE WHEAT Biscuits are tasty for breakfast, lunch, children's suppers. Enjoy cool with fruits or sweetened with honey—in addition to the milk or cream.

You can identify these new biscuits by the name, Kellogg's, and the familiar red-and-green package. Made by Kellogg in Battle Creek.

NEW SHREDDED BISCUIT MORE ECONOMICAL

Just One of the Improvements Developed for Kellogg's WHOLE WHEAT Biscuits

When the Kellogg Company were perfecting their new shredded biscuit, they decided that one of the improvements would be in the size of the biscuit. Kellogg's WHOLE WHEAT Biscuits are a new convenient size. Two are just right for a [illegible] in the cereal bowl without crumbling. Also you get 15 to the package, instead of the usual dozen.

The new Kellogg biscuits have a most delicious taste and crispness. They are "pressure-cooked"—a special process that *bakes in* the rich flavor. And every biscuit is double toasted—browned on both top and bottom.

Of even greater interest is the fact that Kellogg's WHOLE WHEAT Biscuits are so rich in food value that every package is certified by the Medical Arts Laboratory of Philadelphia. "Pressure-cooking" retains all the food value of the whole wheat, as well as making the biscuit easier to digest.

You'll find these new shredded biscuits a very welcome improvement. Delightful served with hot or cold milk or cream—fruits or honey added—for breakfast, lunch the children's supper.

Grocers say that sales are steadily increasing. Identify this improved cereal by the familiar red-and-green Kellogg's package. Made by Kellogg in Battle Creek.

NEW SHREDDED BISCUIT TOASTED ON BOTH SIDES

Extra Crispness Just One of Many Improvements Developed for Kellogg's WHOLE WHEAT Biscuit

LIMA-DTD

In line with its policy of constant improvement, the Kellogg Company some time ago introduced a new shredded whole wheat biscuit which offers several outstanding improvements in this type of cereal.

The new Kellogg biscuit is "pressure-cooked" by a special process that retains the full food value of the whole wheat. At the same time it produces a delicious mellow flavor and makes the biscuit very easy to digest.

The biscuits are also much crisper and crunchier, for they are toasted on both top and bottom—not just one side. Incidentally they are also a new, convenient size to fit the cereal bowl without crumbling. And you get 15 to the package instead of the usual dozen.

As evidence of the high food value of the Kellogg biscuit, the Medical Arts Laboratory of Philadelphia made a careful analysis and certify every package.

Grocers say Kellogg's WHOLE WHEAT Biscuits are winning wide favor. Healthful and delightful for any meal. Especially good with hot milk. Identify this improved food product by the name Kellogg's and the familiar red-and-green package. Made by Kellogg in Battle Creek.

NEW SHREDDED BISCUIT EXTRA GOOD WITH HOT MILK

Kellogg's WHOLE WHEAT Biscuits Offer Many Improvements

Kellogg's WHOLE WHEAT Biscuits are especially delightful with hot milk. And many mothers are taking advantage of this in serving a healthful and most convenient breakfast treat these cold mornings.

Before the new Kellogg's WHOLE WHEAT Biscuit was introduced, the Kellogg Company submitted it to the Medical Arts Laboratory of Philadelphia, which found it so rich in food value that every package now carries a certificate.

This means that mothers can now know definitely that their children are getting a well-balanced food whenever they serve the new Kellogg biscuit—extra rich in minerals, vitamins, proteins.

Kellogg's WHOLE WHEAT Biscuits are "pressure-cooked" by a special process that *bakes* in the delicious flavor. At the same time, it retains all the valuable food elements of the whole wheat.

The biscuits are much crisper and tastier because they are toasted a tempting brown on both top and bottom—not just one side. They are baked in a more convenient, economical size. Two biscuits just fit the cereal bowl—and you get 15 to the package.

Identify this improved cereal by the red-and-green package. Made by Kellogg in Battle Creek.

Plaintiff's Exhibit No. 12-x.

(LINCOLN, NEBRASKA),

NEW SHREDDED BISCUIT CERTIFIED FOR FOOD VALUE

Philadelphia Laboratory Certifies the Improved Kellogg's WHOLE WHEAT Biscuit

One of the greatest tributes to quality ever paid a food product is the fact that the Medical Arts Laboratory of Philadelphia now certifies every package of the new, improved Kellogg's WHOLE WHEAT Biscuit for food value.

These delicious biscuits are unusually rich in proteins, minerals, vitamins and other important food elements. One reason for this, is the fact that the biscuits are "pressure-cooked"—a process that retains all the food value of the whole wheat. "Pressure-cooking" also bakes in a rich, tempting flavor that every one praises.

The new Kellogg biscuit has many welcome features. It is toasted brown on both top and bottom—not just one side. It is made in a new, convenient size. Two biscuits just fit the cereal bowl; and you get 15 to the package—which means added economy.

Served with hot or cold milk or cream, fruit or honey added—Kellogg's WHOLE WHEAT Biscuits are delightful and wholesome for breakfast, lunch, children's suppers. Easy to digest and very nourishing.

Local grocers report that this improved shredded biscuit is meeting with hearty acceptance. It may be identified by the familiar red-and-green Kellogg's package. Made by Kellogg in Battle Creek.

CERTIFIES THE NEW SHREDDED BISCUIT

Philadelphia Laboratory Rates Kellogg's Whole Wheat Very Rich in Food Value

One of the reasons for the popularity of the new Kellogg's Whole-Wheat Biscuits is the food value of this tasty ready-to-eat cereal. The improved Kellogg's biscuit is "pressure-cooked" by a special process that bakes in delicious flavor and retains all the food elements of the whole wheat. As a result, the Medical Arts Laboratory of Philadelphia, after careful analysis, now certifies every package for food value.

The new Kellogg biscuit also offers several other distinct improvements. The biscuits are a many convenient, economical size. Two just fit the cereal bowl—and you get 18 to the package instead of the usual dozen.

And every biscuit is toasted a golden, rich brown on both top and bottom—not just one side. This makes it crisper and tastier than ever before. Also, "pressure-cooking" and "double toasting" make Kellogg's Whole Wheat Biscuits easier to digest.

The new Kellogg's biscuit is delicious with hot or cold milk or cream; extra appetizing with the addition of fruits or honey. Local grocers are featuring this improved ready-to-eat cer-

GROCERS DISPLAYING NEW IMPROVED SHREDDED BISCUIT

Kellogg's WHOLE WHEAT Biscuit Making Hit with Housewives

One of the biggest improvements in cereals for many years is the new Kellogg's WHOLE WHEAT Biscuit. Grocers say that it is gaining in popularity every day.

The new Kellogg biscuit is "pressure-cooked" by a special process that bakes in the rich flavor and retains all the food value of the whole wheat. It makes the biscuit easier to digest, as well.

Kellogg's WHOLE WHEAT Biscuits are also toasted golden-brown on both top and bottom—not just one side. This makes them wonderfully crisp and crunchy. They are also a more convenient, economical size. Two biscuits just fit the cereal bowl—and you get 15 to the package, instead of the usual dozen.

Of special interest is the fact that the Kellogg biscuit is certified for food value by the Medical Arts Laboratory of Philadelphia, whose statement appears on every package.

Kellogg's WHOLE WHEAT Biscuits are proving a boon to mothers, because of their outstanding deliciousness and health value. A tasty treat for breakfast, lunch, children's suppers. Delightful with hot or cold milk or cream, fruits or honey. Sold by grocers in the red-and-green package. Made by Kellogg in Battle Creek.

NEW SHREDDED BISCUITS OFFER MANY ADVANTAGES

Local Grocers Say Customers Delighted with Kellogg's WHOLE WHEAT Biscuit

Grocers are now featuring a new shredded biscuit which offers many new features. Kellogg's WHOLE WHEAT Biscuits are "pressure-cooked" by a special process that retains the complete food value of the whole wheat. At the same time, delightful flavor is *baked in*.

These new biscuits have been analyzed by the Medical Arts Laboratory of Philadelphia and found to be so rich in food value that every package is certified. Any mother can now be certain her family is getting a well-balanced and tempting dish whenever she serves these new Kellogg biscuits with either hot or cold milk or cream.

Other improvements are a biscuit of more convenient, economical size. Two of these new biscuits just fit the cereal bowl. You also get 15 to the package instead of the usual dozen. And every biscuit is toasted a rich golden brown on both top and bottom — not just one side. This makes them exceptionally crisp and appetizing.

Kellogg's WHOLE WHEAT Biscuits are tasty for breakfast, lunch, children's suppers. Extra good with fruits or sweetened with honey.

You can identify these new biscuits by the name, Kellogg's, and the red-and-green package. Made by Kellogg in Battle Creek.

Here's the New Kellogg WHOLE WHEAT Bis

HELP YOURSELF TO HEALTH IN THIS NEW WAY

Nearly every person today knows that vitamins and mineral salts are most important elements in our diets. But, unless one has been specially trained, there is not sufficient knowledge of the means to insure an adequate supply of them in our food.

How delightful and how helpful, then, it is, to find that the problem has been solved—the whole matter made easy by Kellogg in Battle Creek—world's largest manufacturer of ready-to-eat cereals.

For now there is a cereal that contains Vitamins A, B, C, D.....a delicious dish that contains iron salts, copper salts, calcium salts, and phosphorous salts ... and is absolutely certified for its food value. Kellogg's Whole Wheat Biscuit!

For feeding the children, this delightful cereal is very helpful. For it enables you to make sure that your child is receiving Vitamin A to increase his resistance to disease and particularly to colds; Vitamin B to help his growth; Vitamin C for his nervous system, and Vitamin D—the "sunshine vitamin"—to aid him in developing strong, straight bones and fine teeth.

And, in addition, it furnishes iron for red blood and rosy cheeks, calcium so necessary to bone growth and the formation of the teeth, copper that helps the iron along, and phosphorous, which also enters very prominently into the formation of bone structure.

And for grown-ups who want to stay young in health, this is a really healthful and at the same time delightful dish. Two of them toasted biscuits just fit the bowl. They are extra crisp and delicious because they are toasted on both sides.

Just try this new WHOLE WHEAT BISCUIT (SHREDDED)

Different in size ... different in crispness ... different in flavor!

YOU get a lot of new features in Kellogg's WHOLE WHEAT Biscuit. They're made of delicious wheat shreds — just packed with flavor.

Every biscuit is toasted on the *bottom* as well as the *top* — crisper than ever.

Kellogg's WHOLE WHEAT Biscuit are a new, convenient size too — just the *right* size to fit your cereal bowl. Fifteen biscuits to the package.

And here's the biggest point of all. Every package of Kellogg's WHOLE WHEAT Biscuit is *certified for food value*. For these tempting biscuits are made by a special process that guards practically all the elements of the rich, whole wheat.

Each time you eat Kellogg's WHOLE WHEAT Biscuit, you get calcium and phosphorus for teeth and bones. Iron and copper for red blood. Vitamins for health ... as well as many other vital food elements.

Served with milk or cream, two of these tempting biscuits supply more than a third of the average person's daily mineral requirements.

Served with milk or cream, two of these tempting biscuits supply more than a third of the average person's daily mineral requirements.

Order a package of Kellogg's WHOLE WHEAT Biscuit from your grocer. Made by Kellogg in Battle Creek.

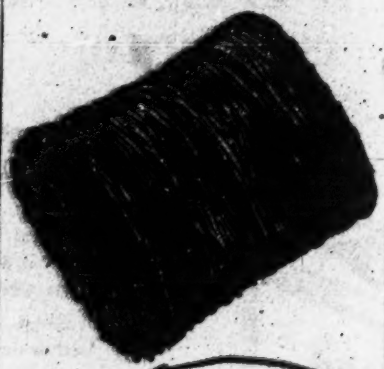
★ *Each package of Kellogg's WHOLE WHEAT Biscuit is certified for food value. Look for the analysis on the side panel. Each biscuit contains 10 important mineral salts. A bowl of milk and two biscuits will supply about half your daily requirement of calcium . . . half the phosphorus you need . . . nearly a fourth the iron, as well as many other food elements, including the vitamins A, B, C, D, E, G. IMPORTANT: Cereal is accepted, edible . . .*

Kellogg's
WHOLE WHEAT

Plaintiff's Exhibit No. 12-ll.

"THE JANESVILLE DAILY GAZETTE"
(Janesville, Wisconsin),
May 19, 1931.

Deliciously Improved by Kellogg



HERE'S a new shredded biscuit you'll want to try. Wonderfully improved in taste and size. Made of delicately flavored whole-wheat shreds.

The biscuits are a new convenient size. Two just fit the cereal bowl. *Double toasted.* Crunchy-crisp top and bottom. 15 biscuits to the red-and-green package.

Ask your grocer for Kellogg's WHOLE WHEAT Biscuit. Made by Kellogg in Battle Creek.

Check Whole Wheat Biscuit for Food Value

Two Whole Wheat Biscuits With Milk Supply Six Vitamins

Ten different mineral salts and six vitamines in a single dish of cereal and cream is the latest achievement of scientific food planning at the Kellogg company plant. Kellogg's Whole Wheat Biscuits, the manufactured product of this careful planning, are certified by the Medical Arts Laboratory of Philadelphia for their high food value.

Two biscuits with milk or cream supply about half of the average person's daily requirements of both calcium and phosphorous, and one-fourth the iron necessary, as well as many other minerals.

INTERESTING PROCESS

The analysis of the Philadelphia laboratory reveals in Whole Wheat Biscuits, served with milk or cream, vitamins A, B, C, D, E, and G. The biscuits themselves are a good source of vitamin G.

Made from whole wheat, the biscuits are the product of a most interesting process of manufacture. Having been thoroughly cleaned, the wheat is cooked in rotary steam cookers, after which it is tempered. It is then fed through several mills with grooved rollers, which form the fine shreds seen in the finished product. Machines shape the biscuits and drop them onto trays, which are then passed through the ovens, double-toasting the biscuits and giving them a rich, golden brown color on both sides. An evaporator reduces the moisture content to between 1 and 2 per cent, thus insuring the crispness of the biscuits. A steady stream of trays moves from the evaporator to the packing machines where the biscuits are placed in cartons, 15 in each package. A recently developed corrugated strip, designed to minimize breakage in shipment is placed between each layer of biscuits.

The delicious flavor of Kellogg's Whole Wheat Biscuits gives them a tremendous appeal aside from their food value.

They supply energy, build up the [illegible], bones and teeth, as well as [illegible] the entire system.

Skates to Meet

Jack Rikard, a Londoner from Winnipeg, N. C., figured to attend the Detroit convention hotel week, but he has an overstem to timber driving, swimmin and walking. He has skated all the way, a distance of 1,500 miles, spending 54 days and eight nights on wheels. He wore out three pairs of shoes but says he gained 10 pounds.

Civil War Veterans Elect New Officers

(By the Associated Press)

DES MOINES, Ia. Sept. 18.—Emanuel P. Town, of Philadelphia, Pa., yesterday was elected commander-in-chief of the Grand Army of the Republic at the close of the 63d annual encampment.

The Rev. Frank Heston, of Knightsville, Ind., was elected commander-in-chief of the Sons of Union Veterans.

William L. Anderson of Boston was elected senior vice commander and W. D. Manger, of Des Moines, junior vice commander.

Death Sentence for Mutineers

(By the Associated Press)

SANTIAGO, Chile, Sept. 18.—Six leaders of the recent naval mutiny in Chile were condemned to death yesterday by a court martial. Two others were sentenced to prison for life and four received prison terms of fifteen years. Ten year sentences were imposed upon two of the defendants.

It is claimed that free speech is not allowed in this country, and they say at least prove that the dogs are not allowed to bark in some neighborhoods.

Business Men Will Sponsor Auction Sale

Bartlesville's chamber of commerce has decided to discontinue its sponsorship of the monthly sale day in the city and the regular sale on next Monday will be in charge of the Washington County Business Men's association. The association however has not decided definitely whether or not it will conduct more than the one sale. A committee from the board of directors will assume responsibility of the sale and investigate its possibilities. If this committee reports to the organization favorably, the association will probably continue the monthly sales and if not Monday's sale will probably be the last.

A casualty at Bedford, South Africa, is roasting a puppy and a lamb.

Surprised Captain Miller

When Captain and Mrs. Dave Miller returned to their home overlooking on North Osage avenue last night following their open air meeting in the business section they found a crowd of friends had gathered for a surprise party in honor of Captain Miller's birthday. There were games and an informal good time for the remainder of the evening.

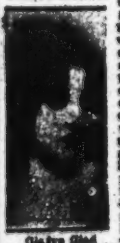
Great Care In Plastic

By GLADYS GLAD

"America's Most Famous Beauty"

MOST PEOPLE have the idea that plastic surgery is strictly an invention of the present age. But people who harbor this notion are several centuries out of the way of being correct. For facial surgery was practiced even as far back as the 24th century. In the middle ages, when dueling was an common, there were a good many hot-headed gentlemen who had themselves patched up by this means. One lad who lost his nose in a duel had a new one made for himself out of a flap taken from the upper arm.



Gladys Glad

It was mostly nose operations that were required in that age of fisticuffs and duels. And it is nose operations that seem to interest people the most even today. Not operations to restore noses that have been lost, of course. But operations to reshape noses that are instinctively termed.

Plastic surgery has advanced in such an extent in the past number of years that there are very few nasal defects that cannot be remedied. Such noses, bent, broken, bumped noses and hideous noses can all be transformed into shapely pleasing facial appendages through the administrations of a skilled surgeon.

The operation to transform an extremely crooked nose into a straight and more classically formed one is considered the easiest of the nose operations by most surgeons. In this operation, a wedge is cut out of the partition between the nostrils, and the two sides are then brought together and stitched. This draws the point of the nose back and downward, and gives the nose a far more pleasing shape.

The operation to correct a hooked nose is more complicated, and demands far more skill. Sometimes it requires the removal of cartilage, so that the point of the nose may be more pleasingly formed.

In the case of a humped nose, the skin is usually divided and the hump removed with a delicate chisel. The incision is then stitched, and the nose assumes pleasingly straight and well-formed.

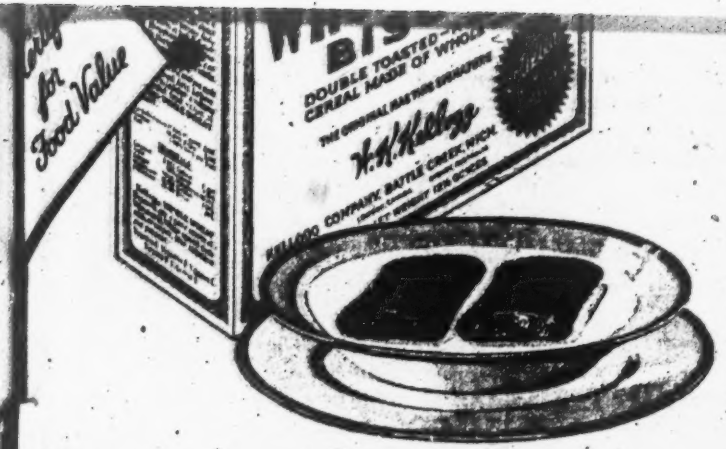
A bulbous nose is usually the most distressing. But it can be remedied by the transplantation of small pieces of bone, and can be made to present a most normal appearance.

Such operations, however, to be successful must be performed by a skilled surgeon only. Never permit a surgeon of questionable reputation to attempt such an operation on your nose. For an untrained sur-

Jews Will Observe Yom Kippur Sunday

Jews in every part of the world who last week celebrated the Jewish New Year, will begin to observe Yom Kippur, the day of atonement, at sunset Sunday evening. The day is the most sacred in the year and is marked by prayer and fasting.

The Day of Atonement climaxes a ten-day period of self-searching penitence. Traditionally Yom Kippur is looked upon as that day upon which God seals the fate of every human being. The Jew seeks



★ *Each package of Kellogg's* WHOLE WHEAT *Biscuit is certified for food value. Look for the analysis on the side panel. Each biscuit contains 10 important mineral salts. A bowl of milk and two biscuits will supply about half your daily requirement of calcium . . . half the phosphorus you need . . . nearly a fourth the iron, as well as many other food elements, including the vitamins A, B, C, D, E, G. IMPORTANT: Copper is present, which makes the iron suits all the more assimilable. Recent scientific research indicates that copper is necessary to prevent anemia.*

Biscuits are made by a special process that guards practically all the elements of the rich whole wheat.

Each time you eat Kellogg's WHOLE WHEAT Biscuit, you get calcium and phosphorus for teeth and bones. Iron and copper for red blood. Vitamins for health . . . as well as many other vital food elements.

Served with milk or cream, two of these tempting biscuits supply more than a third of the average person's daily mineral requirements.

Order a package of Kellogg's WHOLE WHEAT Biscuit from your grocer. Made by Kellogg in Battle Creek.

A new
WHOLE WHEAT
Biscuit
(shredded)

KELLOGG'S WHOLE WHEAT Biscuit are made of delicious shreds of whole wheat. They have a rich flavor that you'll delight in. And many other improvements. Every biscuit is toasted top and bottom — extra crisp on both sides.

Kellogg's WHOLE WHEAT Biscuit are a convenient size—two just fit the cereal bowl. And you get 15 biscuits in every red-and-green package.

Order these different biscuits from your grocer. Made by Kellogg in Battle Creek.

Donald's home life is pleasant and cheerful, a product of good management and of the harmony which exists between [illegible]. It is no [illegible] stands [illegible] his feet, greets the [illegible] a smile and every new [illegible]ience with eager interest.

Such a background is the birthright of every child. With good health and a fine, sensible home back of him, he can start without handicaps to make the acquaintance of the larger world outside his home.

He is ready to make friends. His pleasant personality and engaging eagerness send him off on the right foot. He is all set to meet the world and enjoy it.

The child whose home conditions

OPINION OF THE COURT.

(Filed January 11, 1935.)

IN THE DISTRICT COURT OF THE UNITED STATES,
FOR THE DISTRICT OF DELAWARE.

NATIONAL BISCUIT COMPANY,
Plaintiff,
v.
KELLOGG COMPANY,
Defendant.
No. 980. IN EQUITY.

This is a suit in equity by National Biscuit Company, a New Jersey corporation, against Kellogg Company, a Delaware corporation. The bill charges unfair competition. It avers that plaintiff is vested with the exclusive right to whole wheat biscuit made in a particular and distinctive shape, appearance and structure; to the name "Shredded" and "Shredded Wheat" in connection with whole wheat biscuit; and to the representation or picture of whole wheat biscuit made in a particular and distinctive shape, appearance and structure generally and shown in a saucer or dish. Plaintiff prays the court to enjoin defendant "from, directly or indirectly, manufacturing or selling whole wheat biscuit made in imitation and simulation of the said whole wheat biscuit of the manufacture and sale of plaintiff, of particular and distinctive shape, appearance and structure; from employing upon cartons, in advertisements or otherwise the name 'Shredded' in connection with said biscuit; from employing in advertisements or upon cartons containing said biscuit a cut

Throughout these patents the word "shredded" is used repeatedly and always as descriptive of the product.

The Perky basic patent No. 548,086, covering both plaintiff's product and process relating to shredded wheat, was granted on October 15, 1895. All subsequent patents claimed by plaintiff and listed on its food packages, as above set forth, have long since expired by limitation, and the subject matter thereof has fallen into the public domain.

The product made by plaintiff is wheat formed into filaments and baked into the form of a pillow shaped loaf. The basic patent discloses a process of boiling the original whole wheat berry, partially drying it and then forcing it between compression rollers one or both of which has peripheral grooves which mash the several parts of the berry into a soft paste. This paste is then forced out by means of combs or scrapers, so as to emerge in thin filaments or shreds. The shreds or fila

ents which proceed from the combs are carried off upon an endless belt and are built up by a succession of layers until a band of the desired thickness is secured. This band is cut into biscuit lengths by knives, leaving the biscuits pressed together at the two ends. The biscuits are then cooked in an oven which raises the top, except at the ends, separating the shreds and making more obvious the interstitial texture of the whole. This patent expired by limitation October 15, 1912.

On September 17, 1895 Perky took out a design patent No. 24,688 upon a biscuit shown in accompanying drawings. One drawing showed a biscuit in plan view. The other drawing showed an end view. This patent would expire by limitation September 17, 1909. In 1908 Judge Kohlsaat declared this design patent invalid upon proof that Perky in his application swore falsely that the design had not been in public use more than two years. Natural Food Company v. Henry P. Bulkley, et al. No. 28,530 N. Dist. Ill., East. Div. Instead of removing notice of the Perky design patent from the carton or otherwise notifying the public it was no longer claiming protection under the patent, plaintiff continued for seven years thereafter to warn the public not to make the biscuit as it was under the protection of the government by virtue of this design patent. By its professions and conduct plaintiff secured a monopoly not for fourteen years but actually for twenty years.

In 1905 plaintiff filed an application for the registration of the words "Shredded Whole Wheat" as a trade-mark under the so called "ten year clause" found in the Act of February 20, 1905 (33 Stat. 724, Chap. 592). William E. Williams filed notice of opposition. The proceeding was carried through the patent office to the Court of Appeals of the District of Columbia. The court found that early in 1894 Williams built a machine

"the function of which was to convert the whole grains of wheat into shreds". The court held:

> "Since these words [Shredded Whole Wheat] accurately and aptly describe an article of food, which according to the testimony has been produced by Williams and others for more than ten years, it follows that they are descriptive within the meaning of the Statute, and that they cannot be appropriated as a trade-mark by appellant unless it has been the exclusive user of the words during the ten years' period. . . . No claim is made of any attempt on the part of Williams to deceive the public, or that the product of his machines is not in fact as much entitled to be called shredded whole wheat as is the product of appellant's machines. That he did not use the words as a trade-mark, but merely in a descriptive sense is of no moment. He in common with all other manufacturers of shredded whole wheat had the same right to properly designate their product as did The Natural Food Company [the plaintiff here]. The fact that the Patent Office for more than ten years has been granting patents for machines for converting cereals into shreds adds cogency to the contention that the words 'Shredded Whole Wheat' properly describe the product of Williams' machines."
>
> . . . . . .
>
> "Moreover, it is open to question whether appellant in fact used these words as a trade-mark until after the enactment of the "ten years clause' in 1905. The carton used by appellant prior to 1905 contains the figure of a woman holding a torch and a sheaf of wheat. The word 'trade-mark' appears immediately under this figure, indicating quite clearly that The Natural Food Company [the plaintiff here] claimed the figure as its trade-mark and not the words 'Shredded Whole Wheat' which were apparently then used to merely describe the contents of the package." Natural Food Co. v. Williams, 30 App. D. C., 348.

Notwithstanding this adverse experience in the Court of Appeals under the ten year clause of the 1905 Act plaintiff secured two registrations of the words Shredded Wheat under the Act of 1920. Unlike registration under the Act of 1905, registration under the Act of 1920 does not carry any presumption of validity or ownership. No move was made to cancel those registrations.

About 1915, some three years after the expiration of plaintiff's basic patent and six years after the expiration of plaintiff's design patent, three employees of plaintiff organized The Ross Food Company, a New York corporation, located at Batavia, for the purpose of entering into competition with plaintiff. Their carton differed from plaintiff's in shape and color. Printed upon the face of their package was an exact reproduction of plaintiff's biscuit with the words "Ross's Whole Wheat Biscuit". They had no small cartons for purchasers of only one or two biscuits. In this situation plaintiff brought suit charging unfair competition. The case was carried to the court of appeals of the Second Circuit. The court held that Ross Food Company had the right to make a biscuit of the exact size and appearance of the biscuit made by plaintiff because by patenting the biscuit plaintiff had dedicated the product, process and design to the public and upon expiration of the patents they were open to public use. The Ross Company was directed to endeavor to band or mark its biscuit, if it could do so, without being under such handicap as would destroy its "indubitable right" to compete with plaintiff by making a biscuit identical with that made by plaintiff.

In a short dissenting opinion Judge Ward indicated the substantial agreement of all members of the

court in the application of general principles except as to the necessity of marking biscuits sold to customers without cartons. He said:

> "After the expiration of the complainant's product and design patents, the public generally had the right to manufacture the same article under the same name and in the same form. This was the condition on which the expired monopolies were granted. The defendant concededly does not use the same name, nor sell the article in a similar carton. It sells its article as 'Whole Wheat' biscuit, in entirely different cartons, nor is there any evidence of unfair advertising.
>
> I understand the court to agree that the defendant may make and sell its biscuit in the same form, color, and size as complainant's. The only question is what, if any, protection the complainant should have, in view of the secondary meaning its product has acquired from its mere appearance. When both parties mark their product, unfair imitation of the original producer's mark should be enjoined, as in Singer v. June Manufacturing Co., 163 U. S. 169, 16 Sup. Ct. 1002, 41 L. Ed. 118. In this case, however, neither party marks the biscuit itself, and it would obviously impair the strength and deform the appearance of this very fragile biscuit to do so.
>
> The complainant's claim to be protected in any secondary meaning its goods have acquired can go no further than its injury, and that is only so far as the public buys or is likely to buy the defendant's product supposing that it is the complainant's. The retail dealer and the purchaser of cartons are not misled. Guests in boarding houses and hotels on the American plan take what they are given. It is only a very small part of the public, namely, those who patronize lunch rooms, restaurants, or hotels on the European plan, and who order biscuit which they see on the

counters, or on plates or saucers, supposing they are the complainant's, when they are really the defendant's manufacture. This seems to me an insufficient reason for giving the complainant a monopoly for all time of what apparently is the best size of this ordinary commercial article, unless the defendant and other manufacturers adopt distinguishing marks which either increase the cost of manufacture or deform and weaken the product.

Moreover, I think that the form and size of the biscuit as always made by the complainant are functional, and that imitation of these features is no evidence of unfair competition. The form evidently tends to strengthen a product made out of such fragile material and the size is apparently the best fitted for use as a breakfast food on a saucer. I think the bill should be dismissed." Shredded Wheat Co. v. Humphrey Cornell Co., 250 Fed. 960, 967.

In that case the Court of Appeals entered the following decree:

"First, by relieving the defendants of any injunction in the sale of such biscuits as shall reach the last purchaser in cartons; second, all biscuits reaching the last purchaser outside of their cartons must either bear a letter, cross, or other plain symbol, impressed in their substance, or have fastened upon them a wrapping, tag, or band, stating that they are made by the Ross Food Company; third, the defendant at the end of six months may apply to the District Court to be relieved of the second requirement, upon showing that after a bona fide trial of all possible expedients it cannot comply with that provision, except at an expense which would make impossible any continued competition in the business of selling biscuits outside the cartons with any assurance of reasonable profit."

Andrew Ross testified in this case about the effort of his company to mark or band the biscuit:

"Q. 66. Did the Ross Food Company do anything with regard to that second clause of the modified decree, concerning the marking of the biscuit with a letter, cross, or other plain symbol? If they did, I wish you would relate to me in narrative form what was done and what results or conclusions were reached? A. We experimented as to what might be done to comply with that requirement, although we felt, with all proper respect to the Court, that they had no conception of trade conditions or they would never have made such a decision.

. . . . . .

However, we made experiments as to what might be done in the way of marking the biscuit. We tried to make an impression in the top of the biscuit, and we found that frequently it broke the shreds and distorted the biscuit, spoiled it. And when it did not do that, we found that, in the baking, when the biscuit rose, the marking disappeared.

Then we tried making a mark, or making a raised mark in the bottom of the pan, so that the delicate shreds, when they were fed out of the pan, would adjust themselves to that raised portion, so that that might, in the baking, leave a mark. But we found that that used to distort it and it was a very poor mark. We did not find any practical way of complying with that requirement.

Q. 68. Did you apply, at the end of six months, to be relieved of that second requirement as being impossible to carry out? A. No.

Q. 69. You did not apply at all? A. No.

Q. 70. Why was that, Mr. Ross? A. By that time, our capital was exhausted. We had no resources with which to do anything on those matters."

Next, defendant entered the field and challenged plaintiff's pretentions to monopoly. Defendant is the largest manufacturer of breakfast cereals in the country. It is the successor to Kellogg's Toasted Corn Flake Company and operates a factory at Battle Creek, Michigan. Kellogg's line of cereal products, like Kellogg's Corn Flakes, Kellogg's Bran and Kellogg's Pep are well known in the grocery trade and to the public. For years the name "Kellogg's" has been a distinctive household name meaning a particular maker of cereal foods. These foods have been widely advertised and are well known. Approximately a billion and a half cartons are put out each year. Since 1905 defendant has spent $50,000,000 in advertising its products. The name "Kellogg's" has appeared in every advertisement. From 1912 to 1919 defendant manufactured a shredded biscuit marketed in cartons marked "Kellogg's Toasted Wheat Biscuit". From the Fall of 1921 to the Fall of 1922 defendant manufactured and sold a shredded whole wheat biscuit of small size and pillow-shape. The size was less than two thirds the size of plaintiff's biscuit. In 1927 defendant resumed the manufacture of the small shredded wheat biscuit and still continues to market that biscuit in cartons marked "Kellogg's Shredded Whole Wheat Biscuit". Since 1930 defendant also marketed this small biscuit in cartons marked "Kellogg's Whole Wheat Biscuit".

In 1928 plaintiff sued two of defendant's dealers. After some depositions were taken plaintiff moved no further until the suit was ripe for dismissal for want of prosecution. In 1930 the suit was discontinued by stipulation. In 1932 the present suit was brought.

Neither party sells its biscuit loose or in bulk but only in cartons. The defendant's carton is in the familiar red and green colors of the old established line

of Kellogg's cereal cartons. The word "Kellogg's" in bold script and printed in red dominates the package. The defendant's cartons are of two sizes. There is a large carton carrying 15 biscuits weighing 12½ ounces. The other Kellogg carton is a two biscuit carton called "individual" and sold for use in the restaurant trade. Plaintiff's cartons are unlike defendant's. They are differently colored and featured by representations of Niagara Falls and of plaintiff's factory near by. Plaintiff has a large carton carrying 12 biscuits weighing 12 ounces and a small carton carrying 2 large biscuits. Plaintiff also has an individual carton carrying 2 biscuits indistinguishable in size from defendant's small biscuits and first put upon the market five years after defendant originated and popularized the small sized biscuit. It should be noted that defendant distinguished its biscuit from plaintiff's by making a different size yet plaintiff wiped out the size distinction by duplicating defendant's small biscuits.

Both parties encouraged the sale of their regular size shredded wheat biscuit to the restaurant, lunch room and hotel trade in individual cartons. Approximately 97½ per cent. of defendant's trade is supplied with biscuits in the large 15 biscuit carton. The remaining 2½ per cent. is divided into two parts: 98 per cent. of this 2½ per cent. receives the biscuits in individual cartons; the remaining 2 per cent. of said 2½ per cent. of defendant's total business or about 1 in every 5,000 biscuits is served apart from a carton yet is distinguishable because of its smaller size.

The marked difference in the cartons of the parties prevents confusion. Defendant's cartons bear no resemblance to plaintiff's and can not be mistaken for them. This is apparent from the following reproductions:

"SHREDDED WHOLE WHEAT BISCUIT" CARTON

Kellogg's
SHREDDED
WHOLE WHEAT
BISCUIT

This delicious, nourishing food is made from entire whole wheat. Contains all the elements necessary for the proper nourishment of the human body. In these biscuits you get all the valuable food elements of rich whole wheat—combined with the laxative properties of bran.

SPECIAL NOTICE

To restore crispness place in oven for a minute or two just before serving. To avoid over-toasting leave the oven door open about two inches.

Kellogg's
SHREDDED
WHOLE WHEAT
BISCUIT

Are delicious with milk or cream and a special treat with berries, peaches, prunes, bananas, canned pears and other fresh or preserved fruits. To serve, pour hot or cold milk or cream over the biscuit. Add sugar or salt to suit taste —also delicious with honey. The biscuits are especially appetizing when split open, buttered and browned in oven.

SPECIAL NOTICE

To restore crispness place in oven for a minute or two just before serving. To avoid over-toasting leave the oven door open about two inches.

Kellogg's

WHOLE WHEAT BISCUIT

(A SHREDDED WHEAT PRODUCT)

are delicious served with hot or cold milk or cream; and a special treat with berries, peaches, prunes, bananas or other fresh or preserved fruits. Add sugar or salt to suit taste —or sweeten with honey.

Split and toast the biscuits and serve with butter or use instead of short cake with fruits.

These nourishing, easy-to-digest biscuits are excellent for lunch as well as breakfast. Ideal for children's suppers or for a late bed-time snack.

Especially appetizing with hot milk on cold mornings.

KELLOGG COMPANY
BATTLE CREEK, MICHIGAN

Kellogg's

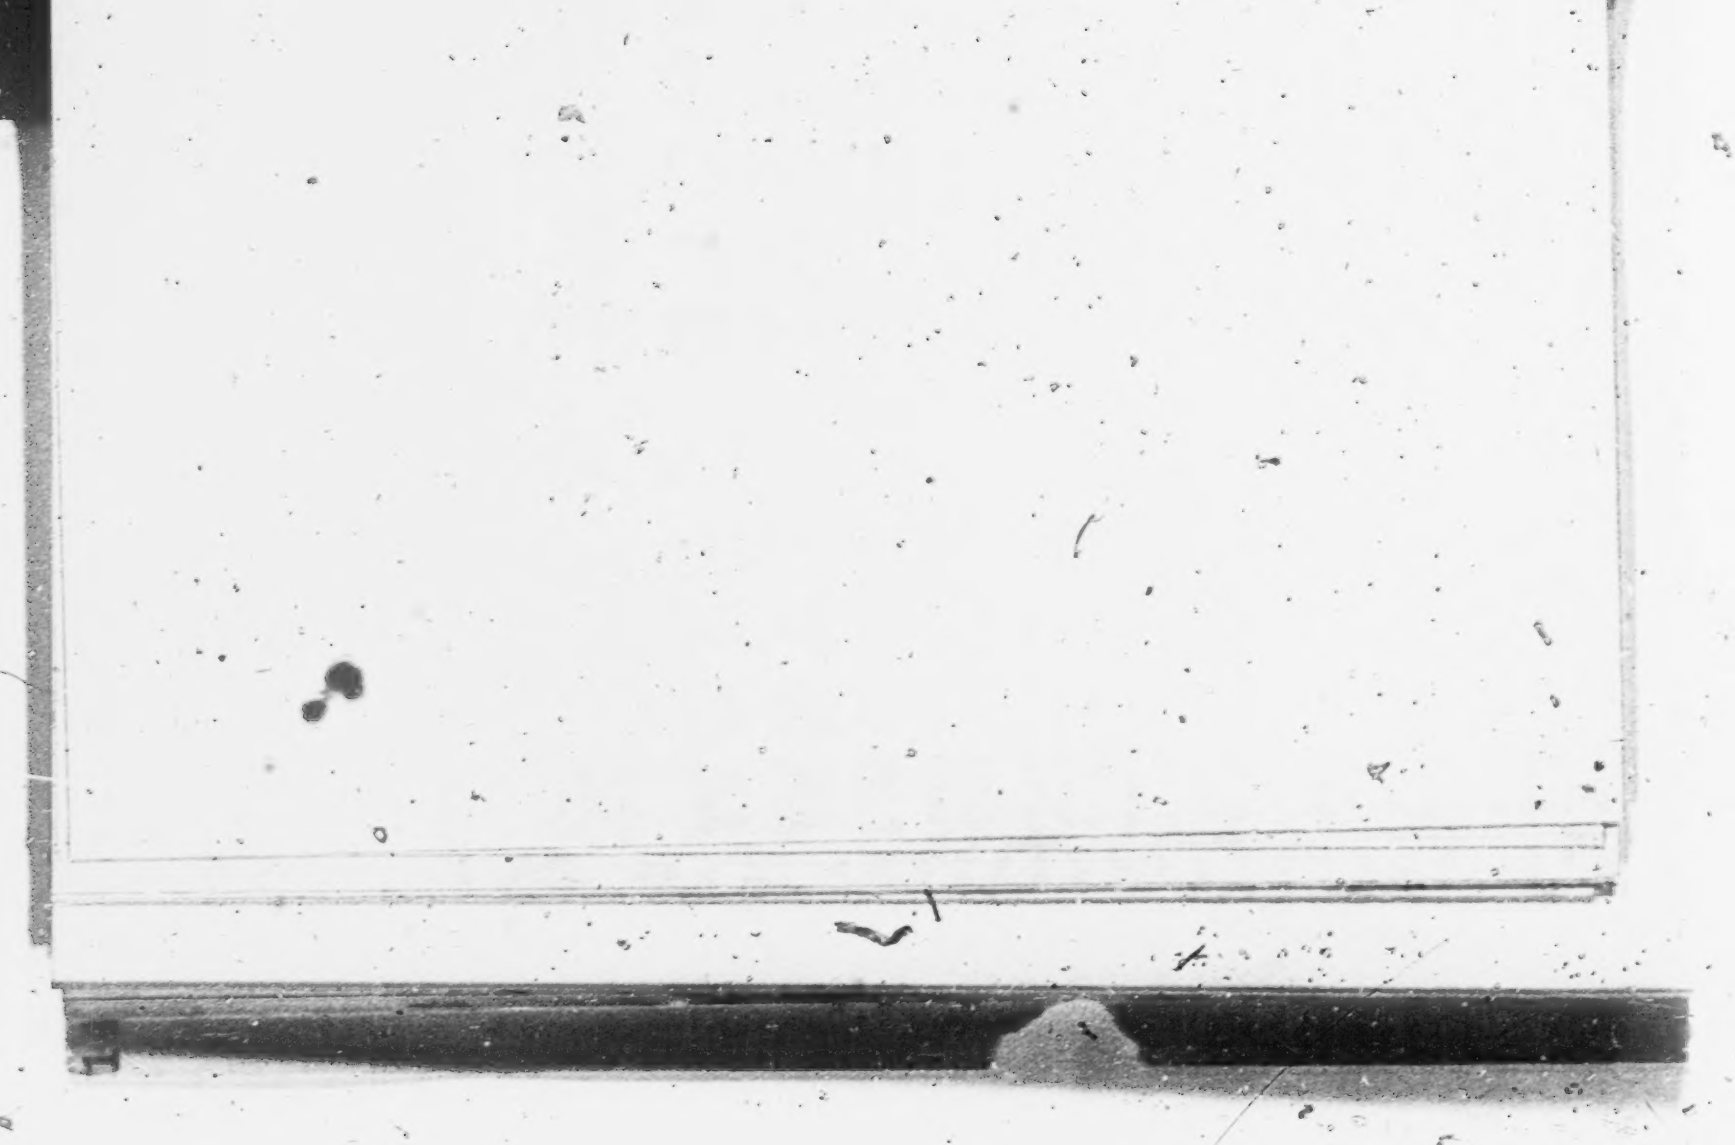
WHOLE WHEAT BISCUIT

(SHREDDED WHEAT IN ITS MOST DELICIOUS FORM)

are made of wheat, thoroughly cooked, shredded and toasted. These biscuits are a new convenient size — two just fit the bowl. Toasted on both sides the natural nut-sweet flavor of the wheat is made even better.

KELLOGG'S WHOLE WHEAT BISCUIT contain Vitamin B, the appetite and growth-promoting vitamin. They have an excellent supply of iron, the mineral necessary for red blood and protein for tissue building. The bran is retained so they are an aid to proper elimination.

(CASE NO. 324)



Biscuits of both parties are sold in some one of the above cartons. Since the bringing of this suit defendant has cut a window in one side of its carton eliminating the illustration of two biscuits in a saucer. The window is covered with cellophane through which the ends of the biscuits may be seen. The 12 or 15 biscuit cartons cover the great bulk of both plaintiff's and defendant's trade. As appears by the above representations the respective cartons of the parties are readily distinguishable so that no confusion can result. The small or individual cartons with the same distinctive markings remove all confusion in the lunch room, restaurant and retail service. By making its biscuit substantially smaller than plaintiff's, and using individual cartons, defendant has met the requirements of the decree of the Circuit Court of Appeals for the Second Circuit in the Ross case. In this case the proof fully confirms the testimony of Andrew Ross that the biscuit itself can not be branded or marked. With each biscuit distinctively marked by carton and by size, there can be no excuse for confusion or deception. Had the proof in this case as to marking been before the Court of Appeals in the Ross case the opinion of Judge Ward would doubtless have been the opinion of the court.

Plaintiff seeks equitable relief not only on the ground of unfair competition but also on the ground of alleged infringement of trade-marks. Plaintiff requests the court to make the following findings:

> "Plaintiff is vested with the exclusive right to manufacture and sell to the public in the United States such biscuit."
>
> "Plaintiff is the owner of and vested with the exclusive right in and to the following trade-marks which were duly registered in the United States Patent Office, to wit:

'Shredded Wheat', registered January 15, 1924, No. 178,725, for biscuit and crackers;

'Shredded Wheat', registered May 25, 1926, No. 213,456, for biscuits, crackers and cereal foods;

A picture of a dish with two whole wheat biscuit, registered August 17, 1926, No. 216,593, for biscuit, crackers and cereal foods."

"All of said trade-marks . . . have been used by the plaintiff in connection with the sale of its said biscuit for many years, and have been so associated with plaintiff's product that they have been and are indicative of source of origin in the plaintiff or its predecessor, the said trade-mark 'Shredded Wheat' having been used since the year 1892."

Whether the case is one of trade-mark infringement or of unfair competition or of both is of no vital consequence. The essential wrong in trade-mark infringement and unfair competition is exactly the same. The Supreme Court says:

"In all cases where rights to the exclusive use of a trade mark are invaded, it is invariably held that the essence of the wrong consists in the sale of the goods of one manufacturer or vendor as those of another; and that it is only when this false representation is directly or indirectly made that the party who appeals to a court of equity can have relief. This is the doctrine of all the authorities." Canal Company v. Clark, 13 Wall., 311, 322.

And in a later case that court says:

"Courts afford redress or relief upon the ground that a party has a valuable interest in the good-will of his trade or business, and in the trade-marks adopted to maintain and extend it. The essence of the wrong consists in the sale of the

goods of one manufacturer or vendor for those of another. . . . This essential element is the same in trade-mark cases as in cases of unfair competition unaccompanied with trade-mark infringement. In fact, the common law of trade-marks is but a part of the broader law of unfair competition." Hanover Milling Co. v. Metcalf, 240 U. S. 403, 412.

In this case plaintiff claims in perpetuity the monopolistic right to the descriptive word "shredded" and a monopolistic right in the shape or form of the biscuit. Any right of plaintiff must be based upon the wrong of defendant. Relief must be based upon confusion or palming off, otherwise relief should be denied. Originally patents covered every phase of plaintiff's business. There were product, process and design patents which secured plaintiff a perfect monopoly of the business. These patents have expired and *the case falls into the class of expired patent cases* and is controlled by the Singer case.

In that celebrated case the name "Singer" meant two things; it meant the type of machine and it meant the maker. The fundamental patents in the case had expired over twenty years before suit was brought. There was a large volume of testimony to the effect that when people in the trade were asked "What do you understand by a Singer Machine" invariably they answered "We understand it to be a machine manufactured by the Singer Manufacturing Company". The conduct of the June Manufacturing Company, the defendant, was particularly exasperating. It called its machine an "Improved Singer". It used "J. Mfg. Co." in imitation of "S. Mfg. Co." on plaintiff's machine. As the serial number on Singer machines ran into the millions defendant began with 300,000,000. It also imitated plaintiff's machine in external appearances and even in ornamentation. Yet, because the

patents had expired, the Supreme Court gave to defendant the right to make the Singer Sewing Machine; the right to use the name "Singer"; and the right to make the machines in the form in which the Singer Company had made them. The injunction that issued only went to the extent of requiring the June Company to put its name on its machines. In other words, June was only required to do what the defendant in this case has always done—place the name "Kellogg's" on the packages. The court said:

> "It is self evident that on the expiration of a patent the monopoly created by it ceases to exist, and the right to make the thing formerly covered by the patent becomes public property. It is upon this condition that the patent is granted. It follows, as a matter of course, that on the termination of the patent there passes to the public the right to make the machine in the form in which it was constructed during the patent. We may, therefore, dismiss without further comment the complaint, as to the form in which the defendant made his machines. It equally follows from the cessation of the monopoly and the falling of the patented device into the domain of things public, that along with the public ownership of the device there must also necessarily pass to the public the generic designation of the thing which has arisen during the monopoly, in consequence of the designation having been acquiesced in by the owner, either tacitly, by accepting the benefits of the monopoly, or expressly by his having so connected the name with the machine as to lend countenance to the resulting dedication. To say otherwise would be to hold that although the public had acquired the device covered by the patent, yet the owner of the patent or the manufacturer of the patented thing had retained the designated name which was essentially necessary to vest the public with the full enjoyment of that which had become theirs by the disappearance of the monopoly. In other words, that the patentee or manufacturer could take the benefit

and advantage of the patent upon the condition that at its termination the monopoly should cease, and yet when the end was reached disregard the public dedication and practically perpetuate indefinitely an exclusive right". Singer M'f'g. Co. v. June M'f'g. Co., 163 U. S., 169, 185.

In a later case the court said:

". . . but when the patent expired the exclusive right to manufacture the article expired with it, while the name which described it became, under the facts of this case, necessarily one of description and did not designate the manufacturers. There was no other name for the article, and in order to obtain it a person would have to describe it by the words 'Rahtjen's Composition'. The words thus became public property descriptive of the article, and the right to manufacture it was open to all by the expiration of the English patent." Holzapfel's Co. v. Rahtjen's Co., 183 U. S., 1, 10.

Where the name is the only name by which the article can be described and is the only name by which it was described during the existence of the patent that name becomes public property upon the expiration of the patent. Here the patented biscuit was known as Shredded Wheat or Shredded Wheat Biscuit. Upon the expiration of the patent that name became public property.

Evidence that Shredded Wheat or Shredded Wheat Biscuit has been understood by the public for years to mean a product produced only by the plaintiff does not establish plaintiff's right to that name. Where a secondary meaning is established even to the exclusion of any other meaning, a competitor has the right to use that name provided he clearly distinguishes his goods. So where a man distinguishes his goods he has fulfilled his duty to his competitors and to the public. What normal person desiring plaintiff's biscuit would take

defendant's package and think he was getting plaintiff's package. Or what person seeing defendant's package would think it was plaintiff's package. Such confusion can not be inferred from the circumstances of the case and there is no proof of it.

The testimony of a hundred witnesses from all parts of the country establishes there was no passing off of defendant's biscuit for plaintiff's or deception of the public to any appreciable extent. Howard Duane, a witness on behalf of plaintiff testified:

> "XQ. You saw right away that the biscuit handed to you in this carton was not the biscuit you had been getting? A. Immediately.
>
> XQ. Did you eat it? A. Yes.
>
> XQ. Did you notice anything about the size when you took it out of the carton? A. Yes, the size was shorter than the Shredded Wheat Biscuit.
>
> XQ. You did not think that was any biscuit made by the National Biscuit Company or the Shredded Wheat Company? A. No, I did not. I knew it was not."

Alvin J. Lee, plaintiff's witness, testified:

> "XQ. 44. Do you recognize this Kellogg's whole wheat biscuit package as one of the general family of Kellogg packages? Are not the colors the red and green colors of the standard Kellogg package?
>
> A. Yes, red and green, and it says Kellogg's.
>
> XQ. 45. You would recognize that as one of the family of Kellogg packages, would you not, that whole wheat biscuit package?
>
> A. Well, with the name on it, yes.
>
> XQ. 46. And you have never seen any of the whole wheat packages that did not have the Kellogg name on it in big red letters, have you?
>
> A. Not as I remember.
>
> XQ. 47. Is there any difference in size between the Kellogg's and the National shredded wheat?

A. I am rather inclined to think that the Kellogg's is smaller."

Mrs. Irma Coiliflower, plaintiff's witness, testified:

"XQ. 49. So, when you asked for shredded wheat and got this product, you knew right away that this brand was not the Niagara Falls product?

A. Why, absolutely.

XQ. 50. You understood right away, as I understand you, that she was giving you a product made by the Kellogg Company. Is that so?

A. Yes."

Mrs. Clara Goodman, plaintiff's witness, testified:

"XQ. 62. I show you this biscuit in Plaintiff's Exhibit No. 6 for identification and I ask you if you recognize any resemblance or any dissimilarity between those two?

A. No. There is a difference in the biscuits.

XQ. 63. What is that difference?

A. The shredded wheat is a larger biscuit.

XQ. 64. And when Mrs. Huber gave you this package of Kellogg's Shredded Wheat, you knew right away it was not the Niagara Falls package that you were getting?

A. Certainly.

XQ. 65. And you recognized instantly that it was a new shredded wheat package?

A. Yes."

Testimony of this sort could be quoted at great length. Unless there is deception or the probability of it there is no unfair competition. The proof is lacking in both respects. Plaintiff is complaining, not of unfair competition but of effective competition.

In conclusion I am of opinion that defendant has the right to make shredded wheat biscuit, to make the biscuit in a pillow form and to use the name "Shredded Wheat"; and that plaintiff has no trade-mark right in the words "Shredded" and "Shredded Wheat" or in the form of shredded wheat biscuit. Defendant is

guilty of no unfair competition by using the words "Shredded" and "Shredded Wheat" or by making shredded wheat biscuit in the form of a pillow or by displaying on its packages the illustration of its biscuit in a bowl.

This opinion contains a statement of the essential facts and of the law applicable thereto in conformity with Equity Rule 70½.

The bill must be dismissed.

JOHN P. NIELDS,
J.

January 11, 1935.

FINAL DECREE.

(Filed January 23, 1935.)

And now, to-wit, this twenty-third day of January, A. D. 1935, this cause having come on to be heard upon pleadings and proof, and briefs having been filed and argument made by counsel for the respective parties, and the same having been maturely considered by the Court, it is now, upon motion of E. Ennalls Berl, Esquire, solicitor for defendant,

ORDERED, ADJUDGED AND DECREED BY THE COURT that the bill of complaint herein be and the same hereby is dismissed, and that the costs of this cause be taxed against the plaintiff.

(Sgd.) JOHN P. NIELDS,
J.

PETITION FOR APPEAL.

(Filed February 13, 1935.)

To the Honorable the Judge of the District Court of the United States for the District of Delaware:

The above-named plaintiff, National Biscuit Company, conceiving itself aggrieved by the final decree made and entered in this cause on the twenty-third day of January, A. D. 1935, does hereby appeal from said decree to the United States Circuit Court of Appeals for the Third Circuit for the reasons specified in the assignment of errors filed herewith, and prays that this appeal may be allowed and that citation be issued as provided by law directed to the above-named defendant, Kellogg Company, commanding it to appear before the United States Circuit Court of Appeals for the Third Circuit, to do and receive what may appertain to justice to be done in the premises, and that a transcript of the record, proceedings and documents upon which said decree was made, duly authenticated, be sent to the United States Circuit Court of Appeals for the Third Circuit.

(Sgd.) Hugh M. Morris,
Solicitor for Plaintiff.

(Sgd.) Drury W. Cooper,
(Sgd.) Charles A. Vilas,
(Sgd.) Thomas J. Byrne,
(Sgd.) Henry J. Savage,
Of Counsel.

ASSIGNMENT OF ERRORS.

(Filed February 13, 1935.)

Now Comes National Biscuit Company, plaintiff in the above-entitled cause, by its solicitor, and presents, with the accompanying petition for appeal from the final decree made and entered herein by this Honorable Court on the twenty-third day of January, A. D. 1935, the following assignment of errors:

(1) That the Court erred in dismissing the bill of complaint.

(2) That the Court erred in failing to find and adjudge defendant guilty of unfair competition in trade with plaintiff.

(3) That the Court erred in failing to grant plaintiff the relief prayed for in and by its said bill of complaint.

(4) That the Court erred in failing to enjoin defendant from further unfair competition in trade with plaintiff.

(5) That the Court erred in failing to adjudge and decree that defendant account to plaintiff for defendant's unfair competition in trade with plaintiff.

(6) That the Court erred in failing to find and hold that plaintiff is the owner of and vested with the exclusive right in and to the trade-mark consisting of the words "Shredded Wheat" for its said whole wheat biscuit, registered in the United States Patent Office on January 15, 1924, No. 178,725, and that defendant has infringed plaintiff's said registered trade-mark.

(7) That the Court erred in failing to find and hold that the plaintiff is the owner of and vested with the

exclusive right in and to the trade-mark consisting of the words "Shredded Wheat" for its said whole wheat biscuit, registered in the United States Patent Office on May 25, 1926, No. 213,456, for biscuit, crackers and cereal foods, and that defendant has infringed plaintiff's said registered trade-mark.

(8) That the Court erred in failing to find and hold that plaintiff is the owner of and vested with the exclusive right in and to the trade-mark comprising picture of a dish containing two of its said whole wheat biscuit registered in the United States Patent Office on August 17, 1926, No. 216,593, for biscuit, crackers and Cereal foods, and that defendant has infringed plaintiff's said registered trade-mark.

(9) That the Court erred in failing to enjoin defendant from further infringement of plaintiff's said registered trade-marks identified in the three next preceding assignments of error.

(10) That the Court erred in failing to adjudge and decree that defendant account to plaintiff for plaintiff's damages and defendant's profits resulting from defendant's infringement of plaintiff's said registered trade-marks.

(11) That the Court erred in failing to find and hold that from the year 1892 until the present time, plaintiff's predecessors and plaintiff have manufactured and sold whole wheat biscuit in the same distinctive shape, structure and appearance (exemplified by Plaintiff's Exhibit 1) without material alteration or change.

(12) That the Court erred in failing to find and hold that the said whole wheat biscuit manufactured by plaintiff's predecessors and plaintiff during all of the said period from 1892 to the present time has been

readily recognized and distinguishable from any other form of food product manufactured or sold in the United States by reason of its said distinctive form and appearance.

(13) That the Court erred in failing to find and hold that the distinctive shape, structure and appearance of plaintiff's said whole wheat biscuit have, through long continued and exclusive use and by reason of extensive sale and advertising, come to indicate and signify the product and biscuit of plaintiff and of plaintiff alone; and that by reason of the uninterrupted use and association therewith for more than forty years of the words or name "Shredded Wheat," said whole wheat biscuit has become universally known to the trade and to the purchasing public as "Shredded Wheat" and the product of plaintiff exclusively.

(14) That the Court erred in failing to find and hold that during all the said period from 1892 to the present time, except for the unauthorized acts of the defendant and of the Ross Food Company, the plaintiff and its predecessors have been the sole manufacturer of whole wheat biscuit of the form, structure and appearance of plaintiff's whole wheat biscuit.

(15) That the Court erred in failing to find and hold that the volume of sales of plaintiff's said whole wheat biscuit of distinctive design and appearance increased continuously from the year 1892 until the year 1928, in which year 2,521,751 cases of said whole wheat biscuit were sold by plaintiff.

(16) That the Court erred in failing to find, adjudge and declare that plaintiff is vested with the exclusive right to manufacture and sell to the public in the United States said whole wheat biscuit of distinctive form, structure and appearance.

(17) That the Court erred in failing to find and hold that the distinctive form, structure and appearance of the plaintiff's said whole wheat biscuit has acquired a secondary meaning and significance as representing only the product of plaintiff.

(18) That the Court erred in failing to find and hold that the words or name "Shredded Wheat" have since the expiration of all patents relating thereto acquired a meaning and significance as indicating only the said whole wheat biscuit of plaintiff and have been accepted by the trade and by the consuming public as designating plaintiff's product exclusively.

(19) That the Court erred in failing to find and hold that defendant manufactures, sells and distributes in interstate commerce a whole wheat biscuit of substantially the same descriptive properties as the said whole wheat biscuit manufactured and sold by plaintiff, in derogation and infringement of plaintiff's property rights in and to said whole wheat biscuit.

(20) That the Court erred in failing to find and hold that each and all of the said registered trade-marks identified in the preceding assignments of error, 6, 7 and 8, have been used by plaintiff in connection with the sale and advertisement of its said whole wheat biscuit for many years and that by reason thereof, said registered trade-marks have become identified with plaintiff's said product, whole wheat biscuit, and have come to be and are now recognized by the trade and by the purchasing public as indicating the source of origin of said whole wheat biscuit in plaintiff; and that the said trade-mark "Shredded Wheat," registration No. 178,725 has been used by plaintiff's predecessors and plaintiff in association with its said whole wheat biscuit continuously since the year 1892.

(21) That the Court erred in failing to find and hold that defendant has employed on cartons and in advertisements in connection with the sale of its said whole wheat biscuit, the name or words "Shredded Wheat," in derogation and infringement of plaintiff's exclusive property rights therein and thereto and in violation of its rights in and to said registered trade-mark No. 178,725.

(22) That the Court erred in failing to find and hold that defendant employs upon its cartons and in advertising in connection with the sale of its said whole wheat biscuit the representation or reproduction of said biscuit in derogation and infringement of plaintiff's exclusive property rights in and to its said product whole wheat biscuit of distinctive shape, structure and appearance.

(23) That the Court erred in failing to find and hold that the representation or picture of the plaintiff's said whole wheat biscuit of distinctive design and appearance, shown in a saucer or dish, is a true trade-mark for said whole wheat biscuit and that the plaintiff is vested with the exclusive right therein and thereto.

(24) That the Court erred in failing to find and hold that defendant has employed on cartons containing its said whole wheat biscuit the reproduction or picture of a dish containing two of said whole wheat biscuit in infringement of plaintiff's right in and to its said registered trade-mark No. 216,593.

(25) That the Court erred in failing to find and hold that defendant has sold and continues to sell its whole wheat biscuit in cartons having cellophane panels or windows devised and designed to expose the ends of said biscuit, and calculated to deceive the prospective purchaser or consumer into the belief that the contents

of said carton is the biscuit manufactured and sold by plaintiff, of distinctive shape, structure and appearance.

(26) That the Court erred in failing to find and hold that the several acts of the defendant were intended to and do, in fact, deceive and mislead the public into the belief that the said biscuit of defendant is the whole wheat biscuit manufactured and sold by plaintiff.

(27) That the Court erred in failing to find and hold that the several acts and practices of defendant were intended to and have enabled its said product whole wheat biscuit to be mistaken for and substituted, sold and passed off as and for the genuine whole wheat biscuit manufactured and sold by plaintiff.

(28) That the Court erred in failing to find and hold that in the year 1922 the defendant commenced the manufacture and sale of a biscuit which it called "Shredded Whole Wheat Biscuit" which exactly resembled the biscuit of plaintiff with the exception of size, and that defendant, upon notice from the plaintiff, ceased to manufacture said biscuit in October, 1922.

(29) That the Court erred in failing to find and hold that both plaintiff's and defendant's whole wheat biscuit reach the ultimate consumer in many instances in restaurants, cafes, hospitals, institutions and homes outside and without the display of the package to the consumer.

(30) That the Court erred in failing to find and hold that the defendant has falsely and continues to falsely represent that the contents of its carton are "A Shredded Wheat Product" and are the "Original" of said product.

(31) That the Court erred in failing to find and hold that the defendant's said biscuit has been passed

off on numerous occasions by storekeepers, restaurant proprietors and others as and for the biscuit of plaintiff.

(32) That the Court erred in failing to find and hold that customers in stores, restaurants, institutions and private homes have received and consumed defendant's biscuit in the mistaken belief that it was the plaintiff's said biscuit.

(33) That the Court erred in finding that for twenty years from 1894 until 1914 the trade-mark of plaintiff was the Goddess Ceres, represented as holding a lighted torch in one hand and a sheaf of wheat in the other.

(34) That the Court erred in finding that the plaintiff and its predecessors made efforts to perpetuate their patent monopoly by the use of trade-marks and the institution of suits against competitors.

(35) That the Court erred in finding that throughout the patents owned by plaintiff and/or by its predecessors the word "Shredded" is used repeatedly and always as descriptive of the product.

(36) That the Court erred in finding as a matter of fact that from 1912 to 1919 defendant manufactured a shredded biscuit marketed in cartons marked "Kellogg's Toasted Wheat Biscuit."

(37) That the Court erred in finding as matters of fact that defendant distinguished its biscuit from plaintiff's by making a different size yet plaintiff wiped out the size distinction by duplicating defendant's small biscuits.

(38) That the Court erred in finding as a matter of fact that approximately 97½ per cent. of defend-

ant's trade is supplied with biscuit in the large 15-biscuit carton; that the remaining 2½ per cent. is divided into two parts: 98 per cent. of this 2½ per cent. receives the biscuits in individual cartons; the remaining 2 per cent. of said 2½ per cent. of defendant's total business or about 1 in every 5000 biscuits is served apart from a carton, yet is distinguishable because of its smaller size.

(39) That the Court erred in holding and concluding as a matter of law that defendant's cartons bear no resemblance to plaintiff's and cannot be mistaken for them.

(40) That the Court erred in holding and concluding that the respective cartons of the parties are readily distinguishable so that no confusion can result.

(41) That the Court erred in its conclusion that with each biscuit distinctively marked by carton and by size there can be no excuse for confusion or deception.

(42) That the Court erred in its conclusion of law that the case falls into the class of expired patent cases and is controlled by the Singer case.

(43) That the Court erred in its conclusion that evidence that "Shredded Wheat" or "Shredded Wheat Biscuit" has been understood by the public for years to mean a product produced only by the plaintiff does not establish plaintiff's right to that name.

(44) That the Court erred in its conclusion of law that where a secondary meaning is established, even to the exclusion of any other meaning, a competitor has the right to use that name provided he clearly distinguishes his goods, and that where a man distinguishes his goods he has fulfilled his duty to his competitors and to the public.

(45) That the Court erred in its finding of fact that the testimony of 100 witnesses from all parts of the country establishes there was no passing off of defendant's biscuit for plaintiff's or deception of the public to any appreciable extent.

(46) That the Court while correctly stating the law to be that unless there is deception or the probability of it, there is no unfair competition, nevertheless erred in finding and holding that the proof is lacking in both respects and that plaintiff is complaining not of unfair competition but of effective competition.

(47) That the Court erred in its conclusion that defendant has the right to make Shredded Wheat Biscuit, to make the biscuit in a pillow form and to use the name Shredded Wheat.

(48) That the Court erred in its conclusion that plaintiff has no trade-mark right in the words "Shredded" and "Shredded Wheat" or in the form of Shredded Wheat Biscuit.

(49) That the Court erred in finding that defendant is guilty of no unfair competition by using the words "Shredded" and "Shredded Wheat."

(50) That the Court erred in finding that defendant is guilty of no unfair competition by making shredded wheat biscuit in the form of a pillow or by displaying on its packages the illustration of its biscuit in a bowl.

WHEREFORE, the plaintiff prays that the decree of the said District Court of the United States for the District of Delaware be reversed and that said Court be instructed to enter a decree reinstating the bill of complaint and granting the relief therein prayed for.

(Sgd.) HUGH M. MORRIS,
Solicitor for Plaintiff.

ORDER ALLOWING APPEAL.

(Filed February 13, 1935.)

AND Now, to-wit, this thirteenth day of February A. D. 1935, upon consideration of the foregoing petition for appeal, the assignment of errors having been filed therewith, it is, upon motion of Hugh M. Morris, Esq., solicitor for National Biscuit Company, petitioner,

ORDERED BY THE COURT that the appeal of said petitioner to the United States Circuit Court of Appeals for the Third Circuit from the final decree entered in this cause on the twenty-third day of January, A. D. 1935, be and the same hereby is allowed, and that a transcript of the record, proceedings and documents and the opinion of this Court filed in this cause upon which said decree was made duly authenticated, may be transmitted to the United States Circuit Court of Appeals for the Third Circuit; and it is further

ORDERED BY THE COURT that the petitioner give bond according to law in the sum of Five Hundred Dollars ($500.00) with surety to be approved by the Court.

(Sgd.) JOHN P. NIELDS,
J.

BOND ON APPEAL.

(Filed February 23, 1935.)

KNOW ALL MEN BY THESE PRESENTS, That We, NATIONAL BISCUIT COMPANY, of 449 West 14th Street, New York City, as Principal, and the AMERICAN SURETY COMPANY OF NEW YORK, a corporation organized under the Laws of the State of New York and authorized to do business in the State of Delaware, as Surety, are held and firmly bound unto the above named KELLOGG COMPANY in the sum of Five Hundred

and 00/100 Dollars ($500.00) to be paid to the said Kellogg Company, for the payment of which, well and truly to be made, we bind ourselves, our and each of our heirs, representatives, successors and assigns, jointly and severally, firmly by these presents.

SEALED with our seals and dated the 18th day of February, 1935.

WHEREAS, the above named NATIONAL BISCUIT COMPANY has prosecuted an appeal to the United States Circuit Court of Appeals for the Third Circuit to reverse the decree dated the 23rd day of January, 1935, rendered in the above entitled suit, in the District Court of the United States for the District of Delaware.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH, That if the above named NATIONAL BISCUIT COMPANY shall prosecute its appeal to effect and answer all costs if it fail to make its plea good, then this Obligation shall be void, otherwise to remain in full force and effect.

NATIONAL BISCUIT COMPANY,
By: (Sgd.) C. S. STILWELL,
Vice-President.

CITATION.

(Filed March 2, 1935.)

UNITED STATES OF AMERICA, *ss.:*

THE PRESIDENT OF THE UNITED STATES,

To Kellogg Company, a Corporation of the State of Delaware,

GREETING:

You are hereby cited and admonished to be and appear in the United States Circuit Court of Appeals for the Third Circuit in the City of Philadelphia, Commonwealth of Pennsylvania, on the twenty-fifth day of March, A. D. 1935, pursuant to an appeal duly obtained from the final decree of the District Court of the United States for the District of Delaware, signed, filed, and entered on the twenty-third day of January, A. D. 1935, in the cause therein pending wherein National Biscuit Company is plaintiff-appellant, and you are defendant-appellee, and show cause, if any there be, why the final decree rendered against the said appellant should not be corrected and why speedy justice should not be done to the parties in that behalf.

Given under my hand in the City of Wilmington, in the District of Delaware, this twenty-third day of February, A. D. 1935.

(Sgd.) JOHN P. NIELDS,
United States District Judge, District of Delaware.

Service of the foregoing citation, with copy, accepted this second day of March, A. D. 1935.

(Sgd.) E. ENNALLS BERL,
Solicitor for Defendant-Appellee.

RECORD OF PROCEEDINGS AT TRIAL.

IN THE DISTRICT COURT OF THE UNITED STATES,
FOR THE DISTRICT OF DELAWARE.

TIONAL BISCUIT COMPANY, *Plaintiff*, —against— KELLOGG COMPANY, *Defendant*.	No. 980. IN EQUITY.

Wilmington, Delaware,
Monday, May 22, 1933,
at 10 o'clock A. M.

Before: HON. JOHN P. NIELDS, United States District Judge.

Appearances: HUGH M. MORRIS, ESQ. (Wilmington, Del.); MESSRS. COOPER, KERR & DUNHAM (New York City), by DRURY W. COOPER, ESQ., C. A. VILAS, ESQ., THOMAS J. BYRNE, ESQ., HENRY J. SAVAGE, ESQ. (District of Columbia), of counsel for plaintiff;

CRICHTON CLARKE, ESQ. (New York City), ARTHUR G. SEIBOLD (Chicago, Ill.), WARD & GRAY (Wilmington, Del.), by E. ENNALLS BERL, ESQ., of counsel for defendant.

Mr. Morris made an opening statement on behalf of the plaintiff and Mr. Clarke made an opening statement on behalf of the defendant, followed by a further statement by Mr. Cooper on behalf of the plaintiff.

PLAINTIFF'S TESTIMONY AT THE TRIAL.

ELWOOD B. CHAPMAN.

DIRECT EXAMINATION.

THE WITNESS: I reside at Swarthmore, Delaware County, Pennsylvania. I have been connected for nearly thirty years with the Stephen F. Whitman & Sons., Inc., until recently. I am no longer taking an active part in the management. The business of that company is manufacturing chocolates and they are located in Philadelphia. I have an office in Philadelphia at the present time.

(Package of Shredded Wheat received in evidence as Plaintiff's Exhibit 1.)

THE WITNESS: I recognize the article which you take out of Plaintiff's Exhibit 1 as the shredded wheat biscuit which I have been eating for a great many years—so long that I can hardly remember—probably twenty or thirty years. I have been a regular consumer of it and use shredded wheat for breakfast almost to the exclusion of other cereals. During the years that I have been using it the product has not altered in appearance to any notable extent. Apparently it is exactly the same as what I knew originally. I frequently order and consume it in places other than my home. I am connected with the Pennsylvania Park Association, which requires constant travel, so that morning after morning when I am on the road I am ordering in hotels and restaurants.

When I order this product for breakfast I ask for it as "shredded wheat" and never by any other name. I never knew there was any necessity for making any distinction or using any other name for the product only within the last year or two.

During all these years I have linked up the expression "Shredded Wheat" with this product which I have known and eaten for so many years, which I have seen made in the Shredded Wheat plant at Niagara Falls. I have visited the plant and seen the process of manufacture.

With reference to my statement about distinguishing the biscuit. The first incident occurred at the Penn Harris Hotel, April 28, 1931. I was on the Forest and Park trip through the State and I went down to get an early breakfast, and in fact I did not look at the menu—almost every one had "shredded wheat" and I called for an order of "shredded wheat" and possibly a glass of milk along with it, and the girl brought me a package that I had never seen before. This was the first time I had seen anything different from your own. I had seen a package like Plaintiff's Exhibit 1 frequently in my home and I have seen a similar package in which two biscuit are put up for an individual order, but this was something entirely new to me at that time, and I saw it at once and picked it up and looked at the name. I saw it was another name and I thought it was some imitation that they were trying to palm off on me and I took exception to it. I complained at once and asked for the original package. The girl told me that this was the only preparation they had. The biscuits were smaller and not as palatable as your own. I did not know the National Biscuit Company had it then and I addressed this letter to the President of the Shredded Wheat Company, not knowing it was taken over by National Biscuit Company.

The reason I took the trouble to take the top off the box and mail it in is that in my connection at Whitman's I have seen so much imitation of trade-mark products that I had been interested in—probably you all know the Sampler Package, which is admitted to be the best known box of candy in the United States,

and which has been imitated again and again, but not always an exact imitation of the Sampler itself or the use of the name, but in such a way that it could be substituted very easily by the drug stores and others who sell it, and it seemed to me that this was an instance of that kind.

THE COURT: I was prone to ask whether or not in the Sampler box you had any shredded wheat covered with chocolate.

WITNESS: No.

THE WITNESS: There is a product in the candy business which is almost similar to shredded wheat. It is made of very fine strands of sugar. The sugar is hard-boiled and thrown in such a way as to nest it one strand on top of the other—very similar to this biscuit, and is known as spun sugar. It is very close to your own product, that is, the method of manufacture.

THE COURT: Is it a corn sugar?

WITNESS: No, pure cane sugar cooked very high, so that it will harden very quickly and then thrown out into these very fine threads which crystallize and harden almost immediately, so that it packs up one on top of the other, making a little nest.

THE COURT: And you covered that?

WITNESS: That is something that is generally known in the business as spun sugar, but it is very similar to this product.

THE WITNESS: It is used as a container for candy, ices and things of that kind on the table at dinner. It is not covered with chocolate.

After the occurrence at the Penn Harris Hotel I wrote to The Shredded Wheat Company. There were other similar occurrences in varying ways, but on that

particular occasion when I protested and asked for shredded wheat I was told that was all they had.

THE COURT: It was served to you with a saucer and cream in a container like this?

WITNESS: Yes. Shall I give the instances which are listed here?

THE COURT: I suggested to the witness a Kellogg container.

THE WITNESS: I was impressed with this, because it was the first time I had ever seen anything that was purported to be a substitute for shredded wheat, and naturally I was on the outlook for it. The same thing occurred the following morning at the same hotel and I went through the same experience trying to get shredded wheat, but I was offered this and could not get anything else.

On May 1st at the Fort Pitt Hotel in Pittsburgh; June 27th at the Nittany Lion, State College, the surrounding circumstances were different in each case, but in some instances they were served outside the package. There was a somewhat different taste and a different size and shape which led me immediately to ask whether this was shredded wheat. In one or two instances I was told it was and I had to ask if it was the original shredded wheat. In a few instances I went to the trouble of going to the proprietor of the hotel.

At the State College instance I felt particularly aggrieved because we were holding a convention there and had practically filled up the hotel and gotten acquainted with the proprietor and I went to him and asked him why they should serve anything of that kind when it was noted on the menu as shredded wheat.

I have a little memorandum here and as I said, in attending a meeting of the Forestry Association I had three instances inside of three days.

At the State College the waiters brought me the Kellogg product although I ordered distinctly shredded wheat. I went to the length of taking this up with the proprietor of the hotel and he assured me that they carried both sizes and went so far as to send to the kitchen for a package of our own product, referring to the shredded wheat. Notwithstanding this the waiters had insisted that Kellogg's was shredded wheat and it was the only thing they had. I only got what I wanted by going to the proprietor of the hotel for it.

I have so many engagements in traveling around as I do that I have carried a diary for the purpose of noting the various engagements that I have had and the places where I stopped. I have a memorandum here of these as I have noted them and then wrote to the Shredded Wheat Company on my return to my office. I took that from the notations which I had made in my memorandum book.

The facts that I have narrated are true, but I did not finish that list. In addition to that there was a Fenway Tea Room at the State College and a day or so later the Hersey Inn; July 1st, the Algonquin Hotel at Cumberland; July 8th the Andrew Jackson, Knoxville, and July 14th, the Green Brier Hotel at White Sulphur Springs, and that is one place where I raised a row and I do not often do it, but I ran a restaurant myself a great many years, and here they charged you up to $25 a day and serving something that was not listed on the menu in substitution for what a guest asked for. I asked for Shredded Wheat and they did not bring it to me. It was a smaller biscuit and a little different in appearance and I had to investigate to find out whether it was Shredded Wheat. It was not brought to me in a package, but in a dish.

Here is the menu that I brought away with me from the Fenway Tea Room and my own mark of

Shredded Wheat, ten cents, is shown by the blue pencil mark around the word "Shredded Wheat."

(Menu card in evidence in connection with testimony of witness—Marked Plaintiff's Exhibit 238.)

WITNESS: My experience as to the method in which Shredded Wheat or this other product that I have mentioned is served in restaurants, cafes and hotels varied in these instances which I stated here. In some it was handed to me in the original package, and in others it was served separately, just on the saucer. There, of course, it required investigation to identify it, but I did in each instance which I stated to you.

During my traveling about in various places Shredded Wheat frequently was served without the production of the package. In the less expensive places they are more apt to hand one the carton, but the higher priced places they often hand it separately. Sometimes both biscuits and sometimes only a single one.

WITNESS: I have no connection with National Biscuit Company nor do I know any one connected with that company, or the Shredded Wheat Company, and I have no interest in the outcome of this litigation.

CROSS-EXAMINATION.

THE WITNESS: I still continue to ask for Shredded Wheat.

XQ. 49. And will you go on for the rest of your life asking for Shredded Wheat?

THE COURT: That is all in the realm of speculation.

WITNESS: On each occasion when the waiter told me Shredded Wheat was made by the Kellogg Company I specified Shredded Wheat. I do not know whether I said orginal, but I asked for Shredded Wheat particu-

larly and told him that this was not what I was trying to order—told him it was not Shredded Wheat at all.

XQ. 52. Is that strictly true? Is it not Shredded Wheat that is made by the Kellogg Company?

A. You are asking a question which requires rather a lengthy answer. I would not——

XQ. 53. Let me split it up.

THE COURT: The witness may give as lengthy an answer as he chooses within reasonable limits.

WITNESS: When you speak of Shredded Wheat it does not seem to me that that is technically a descriptive name of that product.

MR. CLARKE: I object to that.

WITNESS: To me it is not a technical descriptive name, because similar processes in various ways as I have already described in the candy business, how we built up out of a sugar a product almost like that which is called spun sugar.

THE COURT: Is this answer responsive to the question?

MR. CLARKE: I do not think so.

(XQ. 52 was thereupon repeated as recorded.)

MR. CLARKE: Is your answer no to that?

MR. VILAS: Give the witness an opportunity.

THE COURT: The question is in the inflection. Frame the question so that it will appear to be one when read.

MR. CLARKE: I will repeat it.

By MR. CLARKE:

XQ. 54. You say that this product which was handed to you was not shredded wheat made by the Kellogg Company of Battle Creek, Michigan?

A. To my mind Shredded Wheat was directed to one particular problem.

XQ. 55. Is it not capable of a yes or no answer?

I would say no if I might be given that little further chance to explain what my thought of shredded was. The reason for saying no, is this: In replying no to the question it is because as I started to explain, it is my thought shredded is not a technical definition of that. I have explained the one instance which I have already recited, when iron is pulled out into fine threads, it is called drawing, and in our own business again, chocolate is made into very slender cylinders, and it is called pressing there, and I do not know of any technical description of such a thing as that as being shredding.

In the Kellogg Company carton that was handed to me there was a biscuit somewhat similar in appearance to what I had been using, which I presume was made of wheat. It was not shredded under the definition of shredded that I have just attempted to give you, which is my own definition. You might call it by any of those names that I have stated that were ordinarily used, such as wire is known as drawn. If you wanted to find some name to technically describe what you attempted to do in making the fine shreds, you might have called it——

THE COURT: There is nothing fragile about the wire?

WITNESS: No. You could have called it from the sugar spun wheat or pressed wheat if it is pressed out. I do not know the process except in a general way.

XQ. 64. So that what you meant to tell these waiters when you said this was not shredded wheat was that it was not spun wheat or drawn wheat; is that what you mean?

MR. VILAS: I object to that question.

THE COURT: Overruled.

MR. VILAS: Exception.

A. It was somewhat similar to any of those processes. Such a thought did not come up at that time. I never told the waiters that it did not resemble drawn wheat or any of those things.

WITNESS: In several instances the waiter told me it was shredded wheat. In the dispute between myself and the waiters I meant to tell them that it was not the product which I had been asking for and eating for years. It was something that was made by Kellogg.

At first I thought it was an imitation. It looked like other imitations; looked like the original product, but was not. It was the product made by the Kellogg Company at Battle Creek, Michigan. At any rate, I knew right away it was not the product I had been getting for thirty years. When it was served outside of the plate I had to investigate to ascertain for sure just what they were trying to serve me. These later investigations were the result of the cumulative effect of the constant impositions, morning after morning, that made this effect upon me. On each of these occasions I knew it was a different cereal served to me in a plate. I inferred it was the Kellogg product because I remember the original carton that had been handed to me in the Penn Harris Hotel.

In the two or three instances where I went to the hotel proprietor I told him that I had been accustomed to asking for Shredded Wheat for years, and here was something that had been brought to me which was something that I had not been getting. I still had Shredded Wheat. This was particularly noticeable at this time in 1931 when I was traveling a great deal through the parks in western Pennsylvania and Virginia and there seemed to be a circle that had been well

covered by the Kellogg product. In other cases I had not noticed it, like nearby in my own home.

XQ. 78. Even if the Niagara Falls people, that is the plaintiff here, would put the word original on their package, original shredded wheat, would you then call it original shredded wheat?

MR. VILAS: I object to that question as hypothetical and speculative.

THE COURT: This is cross-examination. The objection is overruled.

A. Ought I to be required to suggest——

MR. CLARKE: That is not my question.

(Last question repeated as recorded.)

A. In my own business I would not expect to be original sampler on the top of the package.

XQ. 79. I said if they called it original shredded wheat, would you not call it original shredded wheat when you ordered it?

A. Not unless I noticed it for some continuous length of time that there was a change being made in the package. Do you not realize that for so many years I have been looking at this thing continuously that you do not stop to think that something is being palmed off on you.

THE COURT: Do you desire to supplement the answer?

WITNESS: No, I do not mean to make it too lengthy, but in picking up a package I would not scrutinize it every time unless it was noticeably different.

THE WITNESS: The Stephen F. Whitman & Son, Inc., make a spun sugar, not sponge chocolate. It is not a shredded product—it looks almost like either of the products here, a mass of little shreds, like spun

glass. This is not copyrighted or trade-marked. I merely cited that as something that is being classified as spun.

I knew the shredded wheat process was patented originally, but I understood that that has expired. My thought was that the way the other product was being marketed was under the heading of unfair competition and not infringing of patents.

WITNESS: I did not think that the little square package was the Niagara Falls package that I had been getting for years.

My own product was not copyrighted or trade-marked—it was something that had been made for years and years. Our sampler package has been copied again and again and at one time we had twenty-three imitations of various kinds. We never had to sue for they always stopped fortunately before we progressed very far. We took it up with counsel immediately; twice I think we got almost under way, but it never came to issue. Some imitations were deceptive and some only partially so.

XQ. 93. What was your objection to the ones that were not deceptive?

A. There it was a case of unfair competition by substitution on the part of the retailer. It gave the retailer such a splendid opportunity——

THE COURT: Are we getting away from the issue?

MR. CLARKE: I just wanted to see——

THE COURT: Have you seen?

MR. CLARKE: Yes. I wanted to see what it was in the witness's business that made him see these things.

WITNESS: And as a consumer, too.

WITNESS: I wrote to the complainant about receiving the Kellogg package at the very first instances as I stated in my original testimony. Here is a copy which I addressed to the president of the Shredded Wheat Company.

"May 4th, 1931.

"To the President,
Shredded Wheat Company,
Niagara Falls, N. Y.

Dear Sir:

For untold years I have been a regular consumer of your product. On the morning of April 28th, in the breakfast room of the Penn Harris Hotel, Harrisburg, I called for shredded wheat. The girl brought me a box from which the accompanying top was taken. I complained at once and asked for the original package; she told me that this was the only preparation that they had. The biscuits were much smaller and were not as palatable as your own.

"On the morning of the 29th this transaction was repeated at the Penn Harris, and to my surprise a few days later at the Fort Pitt Hotel in Pittsburgh, too.

"This is clearly illegal, as you are doubtless already aware. Under court decision no dealer has any right to sell a 'substitute' without stating plainly that he does not have the article asked for and is offering the other in its place.

"I am writing you at this length because as the owner of proprietary articles, among them the Whitman Sampler, I am greatly interested in putting a stop to this pernicious practice. If a considerable number of hotels are profiting by substituting this smaller and probably cheaper biscuit it

seems to me that it may have a very serious effect upon the volume of your own sales.

"Very truly yours,

(Signed) ELLWOOD B. CHAPMAN."

I received a reply acknowledging my letter—there was very little correspondence. Most of that developed later.

WITNESS: This Whitman Sampler candy is the one I referred to on direct examination as having a great many copies or imitations, but no case was ever filed. The more serious ones never got to issue in court. They have been repeatedly in the hands of counsel though.

I understand the words "shredded wheat" to mean a biscuit made by National Biscuit Company for twenty or thirty years because that company succeeded to the business of the Shredded Wheat Company.

WITNESS: The waiters said several times that this was shredded wheat. You know how much waiters generally know about the trade-marks and copyrights and names, scarcely anything.

In one or two instances where I could not get any other I consumed the Kellogg biscuit, but if you will refer to the correspondence there is some instances in which I succeeded in getting what I wanted. I cannot remember each individual instance.

Last year was the first time it came to my knowledge that there was any necessity of saying anything more than just shredded wheat. The first time it came to my knowledge was the date mentioned in that first letter.

I always associated Niagara or Niagara Falls with the plaintiff's product because I have seen it so often on the carton and on my visits to the factory itself, I naturally would be in association with it.

EARL T. OAKES.

DIRECT EXAMINATION.

THE WITNESS: I reside at Douglaston, Long Island. I am connected with National Biscuit Company, New York, and have been with that company since May, 1919. I was educated at Columbia University and graduated with degrees of Master of Arts and Doctor of Philosophy in Chemistry. I have been chief chemist of National Biscuit Company since October, 1932. From February, 1929, to October, 1932, I was production manager of the Shredded Wheat Bakeries. Prior to the acquisition of Shredded Wheat Company by National Biscuit Company I had to do with production matters of other products of National Biscuit Company in the New York Bakeries, where at that time we did about 45 per cent. of our entire business and my connection was with the general production, raw materials, processing and packaging of them throughout the plants. When I was production manager of Shredded Wheat Bakeries all my time was spent at the various factories in Niagara Falls, both on the Canadian and American side; Oakland, California, and England.

I am familiar with the machinery by which shredded wheat is produced. The purchase and price paid for raw materials that go into the shredded wheat product has not been under my supervision, but the material itself, the quality and so on has been under my supervision.

I define the kind of wheat we want, when we want it and how much we want and after delivery the wheat comes under my supervision. The wheat arrives in box cars with an inner door and it is boarded up. The cars roll up to the elevators ready to unload and the elevators at Niagara Falls have a capacity of three-quarters of a million bushels. Great care is taken in the selection of a particular grade or kind. As to the

quality, it is all graded at Niagara Falls by the Corn Exchange of Buffalo, the United States inspector passes on referee work on that. We use a No. 1 white winter wheat, which usually comes from New York State; some from Michigan, Ohio and Indiana. Those are about the only places that it is grown. The reason for this selection is based upon experience as to its adaptability for this particular purpose. We maintain a Wheat Research at our Toledo Mills, and there we have financed three State colleges in the development of a higher type of white wheat for this purpose and we are getting results from it. We have isolated a type that is supremely good, but we have not got enough of it to go into the large scale manufacture of it.

We do use a small percentage of Durum wheat, to to get certain results in our production; in places where we cannot get Durum wheat, we do without it. On the West Coast we use the West Coast wheat. In England we use Australian wheat. In Canada we use a local Ontario Province wheat. We do not use the red wheats and the darker heavier wheats of that type.

(Set of twenty-four photographs illustrating plaintiff's apparatus and process received and marked "Plaintiff's Exhibit A for Identification.")

THE WITNESS: The first photograph No. 1 is merely an outside view of the plant itself, showing a sign over the main entrance door—"The Home of Shredded Wheat." So far as I know this sign has been above the door since February, 1929.

MR. COOPER: I may say for the Court, that the principal witness whose testimony was taken on deposition who was connected with the Shredded Wheat Company, has told about the origin of that sign, two or three decades ago, I believe.

THE WITNESS: Photograph No. 2 shows the wheat tanks as they are at Niagara Falls. That is the standard type tank for storing wheat. Each tank holds about 20,000 bushels. The total capacity is around three-quarter million bushels. The wheat is dumped from the box car into the foot of the elevator, and carried up to the top of this place. We have a carload of wheat at a time, and it is transferred to a particular bin. From that point it is transferred to the cleaning room in the factory; and photograph No. 3 shows the so-called receiving and milling separator. The receiving separator has screens large enough to let the wheat through, and screen off the larger particles. The milling separator has smaller screens which screens out the finer particles.

No. 4 shows the cleaning machine, which is known as a Carter disk machine. The stream of wheat passes on a series of discs, with pockets in the face of each disc. These pockets are large enough for a grain of wheat, but too small for a grain of oats; and as the disc turns over, it carries the wheat over on the opposite side, and drops it away from the oats. It is picking out a kernel of wheat from the oats; and the photograph No. 5 shows the stoning machines, which are shakers, and they shake the stones out (the stones being heavier, you get a different specific gravity from the wheat), and separate the stones from the wheat. The stones would be in small particles of the same size as the wheat; everything else would have been screened out before. Machines similar to the oat machines separate the cockle seeds apart from the wheat, except here the pockets are just large enough for the round cockle seeds to get into the pocket, but too small for a grain of wheat.

Photograph No. 6 shows the character of the cleaned wheat after it has been through this cleaning process.

Photograph No. 7 shows the cooking equipment after the wheat is cleaned. It is transferred to a bin above the cookers, and there automatically weighed in lots, as charges for the cookers. The cookers are cylindrical iron tanks with a rotating perforated drum inside. The wheat is loaded into the perforated drum. The water run in there is in excess of the wheat, so that the wheat is all covered up with water—the cooker is enclosed. The whole grain of wheat is cooked. Before the wheat is gotten into this cooker it has been perfectly cleaned. The cooker is then closed with its wheat in water. The drum containing the wheat is rotated and the steam turned on to cook it. The same water is used for the cooking of this wheat as the drinking supply to Niagara Falls or for our other sources. The wheat is cooked or boiled until such time as all of the starch is completely gelatinized; that is, each tiny starch cell is ruptured. Each cell of starch in the grain of wheat originally is surrounded by a tough, more or less impervious membrane, which is ruptured and broken, exploded, as it were, in the cooking; but the kernel itself maintains its identity and is not mushy; it is firm and unbroken. Cutting the grain of wheat after it is cooked shows no white starchy portion such as you get in the raw uncooked.

After the cooking is completed, the cooker is opened and the wheat pours out into the hopper.

The hopper is on the same floor as the cooker itself, and the cooking, of course, results in a wheat which has about 50 per cent. of water. Originally we had around 13 per cent., and after it is cooked, it has almost 50 per cent. of water, and is swollen to about twice its original size. This Photograph No. 9 shows the relative size of the kernels of uncooked and cooked wheat. The cooked being on the right. The large kernels from the hopper into which the cooker discharges the wheat is dropped through cooling towers, because it is hot, hav-

ing been completely drained of the cooking water, and that surface moisture is taken out, and the wheat cooled by dropping it through these towers, which have a screen inside, and these luvres outside, so that the wheat drops through a wall about one inch thick, down the eighteen or twenty feet from the cooker to the floor below. Air is pulled through the luvres in through the blanket of wheat or sheet of wheat, and that cools the wheat and takes the excess moisture from the outside. The wheat comes from the cooker at boiling temperature.

Different wheats and different grades of wheat must be handled a little bit differently. It is impossible to get a pure strain of wheat commercially. If the farmer sows a high grade of wheat, or seed, it is only a year or two until it is contaminated with a number of other varieties. A red wheat will vary like that, and will cook much faster than the white, and depending upon the proportions of these different wheats, we must vary our cooking temperature and pressure, to get a wheat which is not mushy, and at the same time is completely cooked. Those cooling towers then discharge into tanks shown in the photograph.

They are luvres. They are slots really like this (indicating), and the wheat passes down through at the end side, and the air is drawn through these slots, and through the sheet of wheat and through the screen back of this. Those tanks into which the cooling tower discharges, hold about 200 bushels of cooked wheat. The wheat is held in these curing tanks for a period of up to 20 hours, and then it is dropped directly into another series of tanks, exactly the same as these, and held for another period of 14 or 16 hours. The dropping from one set to the other, serves to stir it up without any mechanical handling of it, and from here the wheat is conveyed to the shredding machine itself. The conveyor is a belt conveyor; the wheat is dropped onto

the belt and that belt carries it over to the hopper, above the shredding machine. Above this belt, as the wheat comes to the shredding machine, it is spread out in a thin layer, and the electric magnet is set there to take off any magnetizable material that may have found its way into the concern at all. That would be pieces of metal that might come from the pipes or tanks or something. The shredding machine itself consists of a series of rolls mounted tandem, 29 sets of these rolls are together, making the machine around 60 feet long. The wheat from the hopper is conveyed by a scroll conveyor the entire length of the machine. On each set of rolls there is a down spout from this scroll conveyor into the tiny hopper above the rolls themselves.

Twenty-nine sets of rolls. There is one smooth and one grooved roll on all of this set. We only operate 24 or 25 or 26 rolls at one time, so that we have from 3 to 5 idle rolls at all times; so that if anything goes wrong with one set of rolls, they can be cut off, and another set cut in, without stopping the machine. Each set of rolls is driven by a wooden clutch pin; so that if, from any source at all, the foreign material, sensibly tougher than a grain of wheat, gets into that set of rolls, it has too heavy a load for the wooden clutch pin to carry, and the pin breaks, and the roll stops, and is cleaned out and a new peg put in, and started up again. Each of these rolls are of the same size.

They are 4 inches wide and 4 inches in diameter, and they are driven from the one gear so that the periphery of the two is traveling at the same rate of speed. In other words, there is no slipping of one by the other, and consequently no tearing of the wheat as it goes through. It is a smooth rolling process from start to finish.

The rolls are made of a very hard tool steel. They are pressed up against each other, with a pressure of several thousand pounds. In order to make a clean-

cut of the wheat into the shred that we get from it, in fact, they are pressed so tightly that in time the grooved roll wears into the smooth roll, and they have to be either redressed, or new rolls put in.

The depth of the groove runs from 1/18 thousandth of an inch to 1/24 thousandths of an inch. They are 18,000, 20,000, 22,000 and 24,000ths of an inch; the reason for that being that in order to maintain the weight of the finished biscuit, if we have 25 rolls on the machine, operating one of them more or less will make the difference of 4 per cent. in our weight, which is too great a variation; and by having the different sized grooves we can make a finer adjustment of the weight in the finished biscuit; and also different weather conditions cause the wheat to shred differently, and we may have to put on more heavier rolls, or more lighter rolls to get the biscuit.

Each of these sets of rolls then is rolling out its shreds of wheat, and to accumulate them along the 60 feet of the machine, there is a conveyor that runs completely around the machine, and it picks up the wheat from the first pair of rolls. The second piles on top of that, and the third, and so on, until when we get to the other end, we have 24, 25 or 26 layers, piled one on top of the other; and this conveyor is practically filled to the top.

Photograph No. 13 shows the conveyor chain with the shredded wheat dropping on it. This roll is taken out to get the picture. This chain is made up of individual links. The links are separated by a narrow space all the way through. There are as many layers of this shredded matter on top of one another as we have rolls operating; in other words, about 24, 25 or 26; each set of rolls put on its set of wheat.

No. 14—from the fogginess of these strips looks as if the belt was running—shows the interior rolls laying their shreds on to the chain. This accumulator

chain carries the shreds up to the end of the machine; but it is to my knowledge the only type of machine employing in the biscuit manufacture a suction for panning the biscuits from the machine on to the pan, on which they are baked. The accumulator chain runs up to the end, as far as here, and then turns back to go to the other end, to come back over again. Between each of these links that I speak of, a lower so-called cutter chain operates on a shorter cycle and the knives from that coming up through between the links of the accumulator chain; these are not possibly to be spoken of as knives, because they have a flat surface of about 1/8 of an inch or 1/16 of an inch or 1.32 of an inch, so that they are not sharp.

Above the accumulator chain is a longer so-called panner chain, which operates—these are all numbered, so that we can do this afterwards—so that we have some long accumulator conveyor chain with links with slots in them. The knives on the links from the panner chain above meet those from the cutter coming through from below, and press together, to make the division in this long line of shreds. Then the cutter chain turns back away from those. The panner chain carries on above; each link of the panner chain carries a screen directly over the biscuit, and the hollow chamber above that, the suction operating through the hollow chamber sucks the biscuit up against the screen. The panner chain continues on over the pan itself carrying the biscuit.

Photograph 17 shows the biscuits as they are carried directly over the pan itself, and the suction is knocked off, and this line of biscuits dropped on. That gives a roll of biscuits along the side of the pan. Each pan as it opens, carries four of these rows of biscuits dropped here, and the pan indexed ahead, and another line dropped on.

The cutting operation results in the formation of the biscuit, which is as long as the trough is wide. If you give me about four biscuits I think I can explain that accurately. Now, instead of the biscuits being cut—this is the end of the accumulator chain, where these 24 piles of shreds have been cut, and this is all one mass, and the knife from below comes between the slot and the accumulator chain, and the knife above comes down over that. The two meet, and keep straight on. At the same time, another set of knives come behind them, so that these are cut off. They are not in fact cut off; they are pinched off, so that there is a selvage edge and it makes possible the formation of the biscuit of this kind. Is that clear? From the panning, the pans are conveyed around to the oven. The oven is the so-called reel or ferris wheel type of oven, which consists of a central shaft, from which the spider operates from the central shaft, much the same as the Ferris wheel operates with the buckets suspended from it. From each of these spiders, a shelf runs across; and no matter where this is turned it is always level as the shelf goes around.

Photograph 18 shows two biscuits loaded on to the shelf. Photograph 19 shows a close-up view of the biscuits themselves. You will notice there that they are much wider than the finished biscuit is. After the biscuits are baked, they have shrunk in width and piled up in height. They are thicker but narrower.

Now, as the wheat goes to the cooker, as I said, it has about 12 per cent. to 14 per cent. of moisture. As it comes from the cooker, it has around 50 per cent. of water. It loses a per cent. or two, in traveling from the cooker to the shredder; so that it goes to the oven a little under 50 per cent. of water. It comes from the oven with about half of that water baked out. The shell is thoroughly baked and browned; but the inside is still wet, and must be evaporated. The temperature

in the oven is about 540 degrees and the time about 20 minutes. From the oven the pans are placed in racks.

THE WITNESS: The biscuits are still on the pans and taken directly off of the shelf and into the rack. As they are baked and the pan of baked biscuit is removed from the oven shelf a pan of fresh biscuit is put in its place, so that the oven is always full, except for the pan being removed. Still no hand touching the biscuit; they are still on the pans. From the oven in these racks they are shoved into the drying tunnel and conveyed the length of the drying tunnel. This photograph shows them coming out of the drying tunnel. As they come from there, they are bone dry. The moisture has all been evaporated from them.

They are there about an hour, and at a temperature around 300 degrees. Then they are run over to the packing table and the pans from those racks are fed into the packing table. This is Photograph 22.

Photograph 21 was the evaporator, and Photograph 20 was the coming out of the oven. The packing table takes the pan of biscuits and conveys it the length of the table with girls sitting on either side, and as these pans pass between the rows of girls, they reach in there and pick the biscuits out and put them into the carton. The carton is packed and placed on the conveyor running along the middle of the table, and above the pans.

There is a certain continuity of progression in this. It is modern mass production. Those all travel through in a straight line, as I have narrated it. There is no piece work if you are referring to that. The biscuit are taken off as fast as they come in. It is all timed in together with the work. There are a few spots where it can accumulate. For instance, when the racks are pulled out of the evaporators, they are apt to stand around long enough for the biscuits and pans to cool

off, so that there will be no burning or anything of that sort; and if anything happens there at the packing table, they can accumulate, and the packing can go on later. That is an accident. It is all intended to be one cycle. Then these packed cartons shown in Photograph 23 are conveyed into the so-called sealing machines where the flaps are folded in, glued, and a ribbon of paper placed along the gap between the two folds of the ends of the carton.

Photograph 24 merely shows it made into a biscuit.

As I recall it there are about 200 grains of wheat in one of these biscuits. As to any wastage of material, if you will refer to Photograph No. 19, you will see that there is a different spacing between these rows of biscuits as they are dropped on the pan. This upper pan or chain knife sometimes gets a little bit of wheat gummed on the knife so that when it cuts another biscuit is is liable to tack onto that knife and when it drops it may flip up on another biscuit or the pan may be fed through with a bend on the end, which causes it to turn one way or the other; in other words, there are a number of different causes for one biscuit dropping on top of the other. That is a miscarriage and we have an operator inspecting each pan as it goes by. It is impossible as these pans travel by to adjust the biscuit; in fact, if you have the pan still where you can work on it you can scarcely touch these biscuits, they are so frail, without destroying them in the baking.

We pick these biscuits off the pan and put them into a receptacle and take that receptacle back to the shredder and feed it through a set of rolls which are maintained for the purpose of feeding the shreds back through. Any set of rolls can be used, but you have to take this down-spout off in order to feed them in. In every machine set up with 29 pairs of rolls there is one at least which is so arranged that the material that

has been spoiled in transit, so to speak, is put back through that particular set; the down-spout is hinged so that it can be folded up and the rolls used for re-shredding. Day in and day out there is a substantial amount that is thus retreated. According to my experience in many ways it makes a better biscuit.

Referring to the cutting operation, whereby the trough-full of material is severed to form the biscuit, it is not necessary to have cutters that will form the particular shape of biscuit that is here in court.

Q. 67. How much variation in the form of biscuit can you make at that zone of the operation without otherwise changing the machine than merely substituting one form of cutter for another?

A. I do not know how many different kinds you can make. You can make several different kinds, as many as you can thing of, I should say.

WITNESS: We have caused a variety of different shapes of biscuit to be made by merely changing the form of the cutting mechanism at the zone pointed out on the photographs here at which the severing does take place.

MR. COOPER: Yes, I will offer in evidence now the Plaintiff's Exhibit A for identification, which will be Plaintiff's Exhibit 239.

THE COURT: They are numbered from 1 to 24?

MR. COOPER: Yes.

THE COURT: In order that the record may be clear, you made an objection to the question. The Court overrules that objection.

MR. CLARKE: I take an exception.

THE COURT: Certainly. Let an exception be entered without in any way prejudging ultimately the merits of the very questions that you are now raising, and that is understood in this ruling.

(Received in evidence and marked "Plaintiff's Exhibit No. 239.")

WITNESS: Biscuits were made on the machine described without other variation in the process, except a substitution of other cutting machines for the particular form that produced a pillow-shaped biscuit. No change is made in the equipment except in the method of cutting.

Q. 71. Just what was the method of cutting on this exhibit?

A. These were cut with a hand cutter.

Q. 72. From your knowledge and experience as you have given it, was there any difficulty in applying that sort of a cutter to the machine?

A. No, sir, it is merely a matter of changing the shape of the knives.

MR. COOPER: I will offer in evidence the box and contents, which is Plaintiff's Exhibit 240 for identification.

MR. CLARKE: I make the same objection.

MR. COOPER: I understand it goes to the entire line.

THE COURT: The entire line of interrogation.

(Received in evidence and marked "Plaintiff's Exhibit No. 240.")

SECOND DAY.

May 23, 1933.

WITNESS: The box which Mr. Cooper holds contains samples of another form beside one I testified about yesterday. These biscuits were made on commercial machines, all except the actual cutting of them, the wheat was shredded and delivered from the machine. They were cut by hand, but they were shredded

and delivered from the regular and commercial machine to the hand attachment on the end of the machine.

These biscuits are a sort of cone-shaped triangular form. If I might state, these particular biscuits were cut on the machine, except for the diagonal cut. They were made entirely on the regular machine except for this sectional cut across. They are the pillow form as they came off that part of the machine and then cut diagonally, by hand. That is all there is to this.

We take the biscuits in their soft condition just after the pillow had been formed, then take them off the machine and cut once diagonally across from one corner to the opposite corner of the other end. That is what produced this box of biscuits.

No scissors were used. We have to use blunt knives in order to get the selvedge edge.

These diagonal biscuits or cone-shaped biscuits could be produced in the regular production of the machine by some change in the cutting arrangement.

(Box of cone-shaped biscuit received in evidence and marked "Plaintiff's Exhibit No. 241.")

Witness: I am using Exhibit—Photograph No. 15, in Exhibit 239—which shows the panel chain with its cutting knives, and the cutter chain with its knives, and by leaving these chains exactly as they are, and adding a diagonal knife across from the outer edge of one knife to the inner edge of the following knife, you have a diagonal knife, which would come across, and cut diagonally, while the other two were cutting straight.

The output would be exactly the same in tonnage, and double the number of biscuits. I can show you what I mean by that, if I may take that.

(Received and marked "Plaintiff's Exhibit B for Identification.")

WITNESS: Then the bucket chain would also be split to allow the cutter knife to come up diagonally from below, through it, with the other part of the cutting device, for the miniature biscuit.

(Received and marked "Plaintiff's Exhibit C for Identification.")

WITNESS: These biscuit, which I now hold, are doughnut-shape biscuit. We took the sheet of shreds delivered from the machine, and with a set of hand dies, one from below and one from above; those dies were circular with blunt knives, and a small circle in the middle, and cut the biscuit out as we have it here. It would be quite practicable to add suitable knives to the machine itself, to cut out its doughnut form, that is the ring-shaped forms, with the holes in the middle. This would affect the output of the machine—it would be less in tonnage, but not necessarily in the number of biscuits. They would have to have the center returned for shredding..

In the regular manufacture of round-shaped crackers by National Biscuit Company there is such continual scrap loss, the scrap being fed back into the machinery.

(Box of round-shaped biscuit with holes in the middle received in evidence and marked "P Exhibit No. 242.")

WITNESS: The box of biscuit which you have just shown me were made by us. The shreds were taken from the machine in the manner similar to the others. A round piece of disc was used without any circular hole cut out at the center; otherwise they are like the preceding set, and are of the diameter of about three inches. By furnishing suitable round cutters to the regular machine in its regular process, it would affect the output of the machine only by the amount of scrap

that is cut around from the sides. It would be sent back for retreatment. It is a sacrifice of tonnage, but not of number of biscuits.

(Received in evidence and marked "Plaintiff's Exhibit No. 243.")

WITNESS: Here is another box of biscuits, these being round and I think about two and one-half inches in diameter, made in the same way as the last exhibit as to size of cutter. They were cut by hand as the others were. If a suitable cutter for this size were out on the regular machine it would affect the output of the machine in tonnage, but not in the number of biscuits. The scrap as before would go back in the making of subsequent biscuits. Size is the only difference between this and the last. I think our idea in these was that the width of the sheet would just about carry two of these biscuits and there would not be much scrap returned to the machine. There would be less scrap in the two-inch size than in the three-inch size of the previous exhibit.

(Received in evidence and marked "Plaintiff's Exhibit No. 244.")

WITNESS: These round-shaped biscuits would probably be made by a separate cutter on the machine rather than this cutter chain that we have been talking about. This would be a practical change—applying the same method that we use in manufacturing biscuits to the manufacture of Shredded Wheat.

This other box of biscuits—we made these biscuits by dropping the shreds from a single roll down through a tube and as the amount in the one basket accumulated, that was cut off and the biscuit by sort of a slide arrangement on the outside, the inside of the tube was pressed around the edges and passed into the baking. That is to say, this was a molding process from a sin-

gle pair of rolls—the charge being let down sufficiently to fill a mold and then the charge was cut off. It is a practical way to make biscuits commercially, but I do not think it is a practical way to make Shredded Wheat Biscuit commercially. I will take that back. The Shredded Wheat Biscuit could be made commercially, but I do not think with our equipment developed as it is for making Shredded Wheat biscuits, that it would be sensible to go back to this single unit. It would not be as economical as our present machinery. If we had to start over again this would have been a more economic method of procedure because you are faced with the same thing in going into foreign territories. The production on the present machine is so great that until business had been built up we would only be operating the machine one day a month or a week, and a smaller machine like this, and taking less help would be operated more continuously and therefore more economically.

(Box of molded biscuits received in evidence and marked "Plaintiff's Exhibit No. 245.")

Witness: In this mold form all the material from the shredders would go into the mold and then you would cut off until the next mold came. We have another machine in use which is designated as the Automatic. In this Automatic machine the wheat is treated in exactly the same manner and the shredding is done in the same manner except that the biscuits are dropped in a row of 12, on a single pan. There are about 3000 of these pans just wide enough for a row of biscuits, long enough for 12 biscuits.

These pans are hooked up by a chain at either end so that they are carried along in tandem, one pan behind the other. The biscuits are dropped on the pan and the chain moves forward and another pan comes along and more biscuits are dropped. In this pan the biscuits are carried into the baking part of the oven.

They travel along about 60 feet and then come back and forth for five passages a[illegible] then there is a division of the oven and the biscuits go up into a chamber which has a lower temperature and there they pass through about 13 times, when they have completed their evaporation and are delivered to the packer. Always in the same pan. They are taken off by suction on this machine, except that they are dropped on to a pan which just takes one line of biscuits, and that pan moves on and there is no hand handling of the pan. The pan is carried through the oven itself, or driven through, and there are no free pans to be handled. In this machine also by a variation in knives all these various forms that have been introduced could be made.

In the continuous machine the biscuits that have come from the oven are baked more on the bottom than the ones from the other oven. The biscuits which I now hold in my hand have been made on the automatic. They are transferred from the pans to a canvas belt and from the canvas belt placed in by hand. At one time they were packed automatically without the girls touching them.

(Package of biscuits received in evidence and marked "Plaintiff's Exhibit No. 246.")

WITNESS: The girls who handle these biscuits are given medical examinations to see that there is no infectious disease or anything of that sort, and they are inspected by the forelady to see that they keep their hands clean. This is a regular procedure.

I am familiar with the smaller biscuits of National Biscuit Company, such as have been shown to the Court here, and as to the relative proportion of the entire output of the company in these smaller biscuits, offhand and without looking up the figures, I would say it was in the order of 1 per cent. or thereabouts, perhaps less than that.

As to the daily output of the company in the Shredded Wheat Biscuit, in the summer season it runs about ten thousand cases, and in the winter season about six thousand. A case means 36 cartons of 12 biscuits each—432 biscuits. The winter output, therefore, would be something in the order of about two and a half million biscuits a day. In the summer about ten thousand cases, and that would be about four and a half million biscuits.

CROSS-EXAMINATION.

WITNESS: We discontinued this automatic packing of the biscuits about a year ago, I think. Before that we had been packing the biscuits automatically for a period off and on of three years, I should say. When we used the automatic packing the biscuits were on the trays, a row of 12 on a tray. The rake raked off six of them and brought them in line before two packages. These two packages were side by side, like this (indicating), and the rake at cross angles to the first raked three into one package and three into the other, and then a divider was placed over the first three biscuits, and the next three placed on top, until the carton was filled. Then it was moved out of place and two more cartons brought into place. This automatic shoving machinery shoved the three biscuits over the top of the carton and let them drop over the top of the carton, the first three formed the bottom layers of the packed carton and another machine pushed the partition over from the opposite side and dropped down. If I might have an empty carton I can show that a little better. There was a false bottom that came up through the carton so that the first three biscuits were shoved in on the false bottom, and the false bottom dropped a notch and the insert came on top of that, and then three more came in, and the false bottom dropped

another notch. When packing the biscuit the carton was open at the bottom. When the biscuit is packed by hand the carton is unsealed at the bottom.

The automatic packing was carried on, on and off for about three years. It was in the course of development and we simply operated it long enough to find out places where we wanted to make further development and change until about April, I think, of a year ago, it was operating fairly continuously, and after we had it operating continuously for several days, we put it out of commission. During the three years this was more or less experimental operation.

It is common in the grocery trade to pack other kinds of cereal products by machinery. As far as I know Shredded Wheat Biscuit and that type of cereal, perhaps I might say the product that Kellogg is making, and Muffetts and Shredded Wheat are the only three cereals that I recall now that are in a type that are not packed in a dumped package, as you might call it. They are not a type adapted to dumping, because they have to be placed regularly in the carton or you have to use an oversize carton. If they are not placed regularly in the carton they would be subject to breakage more than they are now. I do not think you can put them in irregularly and get 12 biscuits in without breaking them up. If the oversized carton was used the breakage would come in the movement of the shipment and in handling. Throughout all my connection with the production of Shredded Wheat except those three years experimental operation, the biscuits have been packed by hand. The girls sit alongside of the traveling conveyor that brings the baked and dried biscuit and pick them up and put them in, sometimes one and sometimes two, and insert the partitions. The biscuit then goes on to some machinery which automatically closes the bottom.

The smaller biscuit, being about 1 per cent. in volume, that is made at Niagara Falls, has been made there about a year and a half. These biscuit are packed in little individual packages. This biscuit is partly packed by hand. The two biscuits are taken from the tray and placed in a compartment in a belt. This belt travels, and it is an endless belt with compartments just large enough for the two biscuits that the girl drops on the belt. When the belt comes back they are shoved into a carton which is delivered at that point and the carton is shoved off on a drum and sealed.

As to regular thickness of the shreds of these biscuit, as I recall it, there might have been one or two leads more or less, but they were substantially the same.

Not all of these biscuit are taken with the same number of shreds or strands, and there is no reason why they should have been. To manipulate that we cut off each roll, as many of the rolls as we might want to.

The pointed biscuit which you are showing me is very much arched at the big end than at the little end, and they come off of the belt reversed, the big end, the one at the left, and the big end of the next one at the right. The girls do not reverse them, they pick them up in pairs.

In regard to the full thickness of strands of Shredded Wheat that would be used in packing the regular Shredded Whole Wheat Biscuit, it would be difficult to say just how many. As near as I can make out there are about 12 layers of shreds in half of it and there would be as many in the lower part, I would say there were 20 to 26 strands. That would probably represent the standard thickness of strands. So that this biscuit even at the big end is very much less puffed biscuit than the regular Shredded Wheat Biscuit—running that diagonal cut through there even affects

the arch of the big biscuits, and the little end practically goes down to the vanishing point.

The heat could get in around those shreds for toasting purposes at the little end as at the big end—it is only the outside that is toasted anyhow and so it could be toasted as when it is open.

These biscuits would bake and toast when pressed flat as when the shreds were made homogeneous. They would bake then like a loaf of solid bread, if you pressed and matted them.

The doughnut Shredded Wheat is very much flatter than the regular Shredded Wheat. It has not as many layers of shreds as we have in the regular one. The open texture is there and not the hollowness that we have in the regular biscuit. The shreds are separated one from the other there.

We made dozens of the little doughnut-shaped Shredded Wheat Biscuits. Of the few dozens perhaps a half dozen were brought here. We have experimented on a number of different types other than the pillow-shaped during the course of the last four years, making six or eight different kinds. In the periods when we had a man available we would put him in the laboratory and let him work on those things.

The Shredded Wheat Biscuit is cut in the uncooked state, the biscuit is wider than this one and not so high—in the cooking it rises. If for any reason it did not rise it would go into waste. Possibly half of the shredding machines were cut off to make that doughnut-shaped biscuit.

(Diamond-shaped figures marked "Defendant's Exhibit A for Identification.")

WITNESS: The scrap from the V-shaped portions which are marked "A" would be scrap that would go back. There is no attempt made to figure out the best way of making these to use the least scrap. That al-

ways comes after the product was developed. We never had any difficulty about taking care of any scrap in the industry, I mean fresh scrap from the dough or from the material of this kind. Consequently, when we are designing a new biscuit, we make the best biscuit we can and take care of the scrap afterward, and we never have had any cases where the scrap was not economically taken care of.

The drawing Mr. Clarke made of the diamond-shaped biscuit is about as good as I could make. The V-shaped edge in between here, that material would be wasted in the sense of going back to be reshredded, the material marked "A" in the sketch.

To cut these biscuits we ran them out and dropped them on a long string and dropped them on a solid pan and cut them on that. The shreds were not moving when they were cut.

Our entire production in Canada is run on the automatic machines and about perhaps 15 to 20 per cent. of the production on the American side of the Falls. So that 15 or 20 per cent. of our American production are biscuits that are darker on bottom or toasted more on the bottom than on the top, and about 80 or 85 per cent. are relatively light-bottomed biscuits as compared with the top. The automatic output is fairly well confined to one territory—New England. There is no difference in the cartons between New England territory and the rest of the country, the cartons are the same as standard cartons. There is nothing on the cartons to indicate whether the biscuits on the inside of the cartons are dark-bottomed or light-bottomed.

The triscuit is rolled down and flattened down so that it does not rise so much. That is the way the regular Shredded Wheat is run into a cracker form—the same wheat in the same shreds and in one case you puff it up into the pillow-shaped biscuit and in the other case you run it between rollers to make the triscuit.

The packed down biscuit marked "Plaintiff's Exhibit 245" differs from the Triscuit in packing—This is merely dropped down through a tube and the triscuit comes along on the accumulator chain exactly the same as the Shredded Wheat biscuit does. There is a roll rolling it down flatter or tighter and matting it together a little bit and these are cut out into squares and baked between waffle irons to hold them down and keep them from rising. In Exhibit 245 the shreds are rather more mixed up than in the regular Shredded Wheat biscuit. They run in all different directions because they drop straight down from the roll. This triscuit has not longitudinal axes as the regular Shredded Wheat has.

I recognise the Uneeda Bakers Triscuit, 100 per cent. Whole Wheat Cracker and the statement "Made of shredded whole wheat, compressed into a cracker and baked crisp and brown." Triscuit is a little crisper product, not crispier, but it has been matted down so that it is a little more solid. I do not think that any of the shreds in triscuit are any more welded together than they are in the biscuit. The triscuit is, instead of being cut into separate sections like this, is carried along the width of the biscuit, a sheet of the wheat is dropped on a hot plate. There is a series of these hot plates carried on a chain. The biscuit is dropped the full width on the waffle iron and there is a slit in the middle of the waffle iron as sections raise.

Another waffle iron comes down on top of that and they are held together with some pressure, so that it is impossible for the triscuit to spring and rise. The wheat is a trifle drier than the wheat in the Shredded Wheat biscuit, so that there is not the tendency for the shreds to weld together and here while they are pressed down, perhaps matted, they are still identical shreds for the most part.

There is no tendency to more welding in the Triscuit than in the biscuit. We do use the same wheat

occasionally for the Triscuit that we do for the biscuit, and we do not notice a good deal more welding.

We have used an intermixture of Durum for both the triscuit and the biscuit. We use the waffle iron to prevent the natural springing up. In making the triscuit we use a little less moisture content than in making the biscuit, but it is unnecessary. For a long time we did not do it, and we used the same wheat, and we found it baked out a little drier and made a product that perhaps was a little easier to handle than the other was.

Invariably we use the same wheat in making the biscuit as in the triscuit. There can be some variation, except as to moisture, but not as a general routine. We do not as a matter of fact always use the same proportion of Durum wheat even in our biscuit.

We use the Durum wheat partly as a matter of flavor and partly a matter of economy and partly a matter of the operation of the machine. It is a matter the same as in your own plants you find you can handle certain material to your advantage at certain times.

Output of production or sale of the triscuit has not developed anything like the relative proportion of the biscuit. I would say it was holding up better than the Shredded Wheat itself. The demand of the pillow-shaped biscuit has been falling off more rapidly than the production of the triscuit.

The proportion approximately of production of the two products I should say is about—the triscuit is about 2 or 3 per cent. of the production of the pillow-shaped biscuit.

Besides the three products of Shredded Wheat referred to—Triscuit and the standard or large pillow-shaped biscuit and the small pillow-shaped biscuit, a product called Triscuit, but considerably larger than this present size, was made. Later it was changed to this size.

The so-called scrap from the biscuit after it is toasted and baked, we sell it—the crippled biscuits that do not get on the floor are ground up and sold as Silver Fox food or dog food, and the sweepings off the floor are sold as chicken feed.

Some of the scrap biscuit has been sold in small quantities for human consumption, but I do not believe it is sold now. If it has not been dirtied or contaminated it is just as fit for human food as the regular deformed biscuit.

If we got anything like the price for that that we get for the regular undeformed or broken biscuit we would be away ahead of the business. The profits would be much greater.

We compute the larger profit at a lower price because we have no packaging cost and no handling cost and we have lower shipping cost and lower package material cost. The packaging and the package and the shipping and the selling costs are practically all out of it. Pound for pound, without reward to these other things, the scrap sells for very much less than the price for the finished product. It is sold by the hundred pounds.

There is no retreatment. It is ground uniformly. When it has been on the floor, it goes into chicken feed. The dog food is crippled biscuits that are picked off the pan. The first girl on either side of the packing table is an inspectress as well as a packer. Her duty is to pick off any crippled biscuits and place them in a box beside the packing table.

I did not mean to convey the idea that the percentage of labor on the finished product would be any less or any more, but the regular machine turns out such a quantity that if you had a small outlet, it would be cheaper to operate a small machine continuously than it would to operate a large machine occasionally.

Are you speaking of National Biscuit Company or the Shredded Wheat Company when you ask if we have

tried to market any other products besides the four mentioned? I do not know about the old Shredded Wheat Company, but National Biscuit Company has had a number of these products up that would be marketed in normal times, but due to conditions in the last three years, we have not been able to get our people to authorize the production.

Yes, I am familiar with the product called Muffets. It is not a Shredded Wheat product, this Muffet product. It is a rolled ribbon product—a ribbon wheat product. Rippled Wheat, Muffets, etc., are all made on the same type of machine, and it just depends on what you call it. The first products called Muffets is a ribbon wheat product and you would have to adjust the machines, the rolls are further apart. The slackening off of the tension gives us a ribbon and bringing them up tighter gives us a shred. We have not used ribbons for any purpose in the last two or three years. Before that we did. Then we used them in the summer time when the wheat was a little sticky and the air was hot and light, they had difficulty in holding these biscuits up on the suction plate for panning.

It was then a common practice to open up three or four rolls in the middle of the machine and run a ribbon into the biscuit, so that when the suction worked up through there, it would have a solid piece to work on rather than coming up through the loose shreds, and that would do a better job of panning. The Shredded Wheat would have a sieve-like quality. When we ran the ribbon strip through the center we got a suction that we did not get without it.

XQ. 307. And this rippled wheat, taken from a rippled——

THE COURT: This ribbon is not a shredded thing?

MR. CLARKE: No, it is not shredded, but ribbon wheat.

THE WITNESS: As a matter of fact, none of it is shredded.

By MR. CLARKE:

XQ. 308. It is all ribbon?

A. It is all rolled and you either roll it into a sheet or into shreds.

By MR. CLARKE:

XQ. 309. You do not mean by that answer to say that when the rolls are close together, the product does not come out in these shreds or strings, but in the form of ribbons, did you?

A. Yes, sir. It all depends on how close together you have them. It is very difficult to get them close enough together to cut this wide ribbon into smaller or narrower ribbons or strings or shreds.

XQ. 310. Did you mean to tell me that none of the wheat that you make is shredded wheat in the sense of it being shredded, but it is all ribbon wheat?

A. I would say so, if you are trying to describe it, yes.

XQ. 311. And by ribbon wheat you mean these little shreds that we show in the demonstration machine coming down last night, do you call these little separate shreds?

A. We do not call it ribbon wheat.

XQ. 312. Is it anything like the wheat I have shown you in the rippled wheat or the Muffet wheat?

A. Yes, it is exactly like it, except that the ribbons are not entirely cut apart. Look at this rippled wheat and you will see many places where this ribbon is almost cut into finer parts or bands or shreds.

XQ. 313. I am not interested in your definition of words, but I want to find out what you do. Do you mean to say that your rolls are operated in the same way in making the regular pillow-shaped biscuit which is put on the market as Shredded Wheat Biscuit, that

the rolls are manipulated in making this rippled wheat or muffet?

A. I have never seen either of these articles made, but I would say that we could make this rippled wheat with our rolls——

THE WITNESS: Perhaps our greatest difficulty is to keep from running a product of what you call a ribbon type, so that we are almost always through the day sometimes running ribbons when we wish it were being cut into threads. We adjust the rolls closer together to make threads rather than ribbons. This is a ribbon. You can see those are cut this way. If the rolls are brought a little bit more together, there would be a series of narrower ribbons or threads. The whole surface across here is what you call a ribbon. I can make some on this machine. We do not like to get these tied together in our biscuit. All these are really corrugated ribbons. If these corrugations are cut through, you will get others.

When we find we are running ribbons instead of threads, we adjust the rolls to bring them close enough together to make threads, except in the summer time we used to adjust the rolls to make ribbons in the center of the biscuit. Now we try to prevent that. You cannot keep an operator from occasionally trying it when nobody is around and he is having trouble. We watch the operators so that they will not give us the ribbon form rather than the shredded form. It is very difficult to keep the 29 heads running with the correct adjustment. As the heads run in the morning, they start off cool, and as they operate, the rolls warm up and expand and tighten up and they have to slack off a little bit or adjust the tension one way or another, and that is a constant operation throughout the day.

We object to the ribbons being in the biscuit because we are not making a Muffet. We are trying to make a uniform product and we do not want two or

three different characters in the same biscuit any more than any other manufacturer wants an ununiform product.

(Chart entitled "Educational Exhibit of Shredded Wheat Biscuit" admitted to have been put out by Shredded Wheat Company, was admitted in evidence and read to the witness.)

That chart is a substantially true outline of the process in making Shredded Wheat Biscuit and Triscuit with a few corrections. I think you said 36 sets of rolls in your outline, and there are not now 36. The machinery has been changed occasionally. 36 pairs of corrugated rolls, and there are only 29 now on the standard machine, and the cooking of the wheat cooked by steam—it is not really steamed, but it is boiled. The steam is used to boil the water. Substantially it is the same.

Some rolls have grooves a little deeper. I do not think that we usually make a distinction on where the rolls with the deeper grooves are put. They may be on the bottom or in the middle or at the top of the biscuit.

As to the deeper grooves being always at some certain place on the bank of the 29 machines, it depends on how the machine is being operated. If some of these rolls wear out more rapidly than others, you will have to change the rolls, and if that change happens to come on the bottom, and we need 24 in there, we might put a 24 in there. I do not know that we make any conscious effort to keep them in the middle or on the bottom. We lately have not put them on the top at all. By 24 I mean a twenty-four thousandths of an inch groove. The grooves wear V-shaped. I believe originally they are not quite a V-shape. We did not change them. I say that originally they are milled out with a flat bottom. The cutting tool gives a flat bottom to them, but

as they wear, that flat bottom may be narrowed down to a V-shape finally. They do wear into a slightly different shape. The deepest groove we use is the twenty-four-thousandths. It is immaterial where these grooves go—on the bottom or in the center. The 24 is the deepest groove and 18/1000ths is the shallowest.

I have nothing to do with the marketing of the Shredded Wheat business, just the production. I was directly in charge with headquarters at Niagara Falls until October. Then when I moved to New York, another man was put in charge, who clears through me. In other words, I still have charge of Shredded Wheat manufacture. I am also chief chemist of National Biscuit Company. The production man at Niagara Falls is under me—I am his production superior. J. H. Haddon is directly in charge of the production at Niagara Falls. His title is production manager, Shredded Wheat Bakeries. He reports to me in New York at National Biscuit Company offices. There is a laboratory there. I have a desk in the laboratory where I spend about half of my time during office hours, and a desk in the Production Department proper, where I spend about the other half of the office hours.

I visit the plant at Niagara Falls on the average of once a month.

The so-called waste or scrap which has not been toasted or baked would make better Shredded Wheat when put back through the shredding machines because the re-shredding of it operates much the same as mixing dough. It gives a little more cohesion and gives a longer shred. It can hardly be called dough, though it is more like working dough, but the re-shredding of it does not form a dough by any means. It is probably an action on the gluten in the wheat. The more the gluten is worked and moulded and pressed, and so on, the more cohesion it has and the more it adheres together. The unbaked scrap was fed back through the

rolls. It feeds more easily through the rolls than the wheat grains.

To describe how it goes down—well, as you might pick up an unbaked biscuit and drop it into the rolls, it would be shredded. You could reach into the box and take out a handful and put it in. It is taken back to the shredding rolls as the pan goes by. The inspector takes the biscuit off and places it in a box, and that box is taken back, when it is filled, it is taken back to the re-shredding head and fed into it. Sometimes it is fed into any of the rolls, and usually the downspout of one or two heads is hinged so that it can be folded back and the material fed into that particular one. Actually it may be fed into any of them. From my recollection I would say that the rolls that are hinged are those about eight or ten heads from the top. It may be farther than that. It is an intermittent process.

You ask what elements go into this picking out of the biscuit that makes that twice worked dough and if there is an inspector there. Any biscuit that overlaps another to an extent that that can not be just touched and brought away. If the biscuit goes into the oven overlapping another one, naturally this biscuit is spoiled in the beginning, and this biscuit is spoiled. If there is a very slight overlapping, they get touched and brought away. If it had to be handled to any extent beyond just a slight adjustment, the biscuits are picked out and dropped in this. Either one, depending whether they are baked or not, goes back into the discard. The edge that is formed on the Shredded Wheat Biscuit where the knives cut in the baking, that is a much harder product. It has a thicker ribbon than the rest of it. There is more edge on the samples than there would be in production. I mean the samples were not made with any intent to avoid having an edge on them.

The pillow-shaped biscuit contracts a slight amount under the effect of heat in what might be called a longitudinal direction; the principal contraction is in a direction parallel with the lay of the shreds. There is considerable puffing there.

(It is conceded that so far as counsel are advised, and they believe they are fully advised, no applications for design patents have been filed on any of the forms of sample biscuits produced by witness.)

This puffiness is due to the contraction. The shred, as you see in the grains of wheat, the grains are almost twice the size of the original, so that the shred that comes here is about twice the size it will be after it is evaporated. That shrinkage is offset to some extent by the nature of the baking portion of the steam keeping it in that condition. The shreds were tight at either end, and as they shrink they pull the biscuit together. The outside takes faster, therefore shrinks before the inside does, and in shrinking on the outside, it shoves against these inside shreds, and makes them fold up, and press up the inside in the bottom and the top. You see these up and down folds.

When the machine is adjusted whatever adjustment you want, it automatically shreds the wheat that is fed into the rolls and deposits it down on a traveling belt and gives these long ribs or strips of wheat shreds. The machine as it is now automatically cuts into the pillow-shaped form ready for toasting and baking. With the present equipment it cannot produce anything else except the pillow-shaped form of biscuit.

The biscuit is first baked and then dried. We never try to define baking very definitely, but baking usually does resolve in some browning, and the operation is to put the biscuit into the oven for baking and transfer it to the evaporator for drying.

We consider the cooking is all done in the cooking machine, and the cookers—in the wheat before it is shredded. All we do from the baking is to really brown it and cook it on the outside and not on the inside. That is practically all the baking, the starch, the wheat itself has been thoroughly boiled, which you can consider cooking, if you like. The baking oven browns the outside and dries it out to an extent, and the browning is merely evidence of the starch being dextrinized by the heat. There is not much of any other effect that can take place in the oven, unless it is carried far enough to carbonize them in baking them. From there on we do not regard it as a cooking operation, but merely as a drying operation—the remaining moisture is dried out.

I have been connected with the Shredded Wheat only since National Biscuit Company took over the Shredded Wheat Company. My experience with Shredded Wheat has been since 1929.

Mr. John H. Hadden who is directly in charge of production of Shredded Wheat is also a National Biscuit Company man.

As to men who were with Shredded Wheat before National Biscuit Company took it over, we have Wallace, who is in charge of the English plants, who has been with the company since they moved to Niagara Falls; Mr. Wheeler, who is in charge of the Erie Avenue plant, Niagara Falls, and who has been with us since they came to Niagara Falls; Mr. Reed in the Buffalo Avenue plant, who has been there 15 or 20 years; Mr. Campbell, who is in charge of the Oakland plant, and who has been with the company for 15 to 20 years or 25 years. There are a dozen others I could mention.

Mr. Wallace who is abroad now has already testified by deposition.

By Mr. Cooper:

RDQ. 414. Can you conveniently, Mr. Oakes, illustrate on this little shredding machine which is here in court, how an adjustment could be made, so as to get what counsel called "ribbons" in place of what are distinguished as threads or shreds?

Witness: These rolls are driven exactly the same as any pair of rolls on the regular machine. In other words, there is one pinion gear back here operating on a gear directly attached to the roll. That gear drives the same sized gear on the other rolls, so that the two are moving in exactly the same speed all the time. There is no slippage of one roll past the other. These two bolts go through and hook on to the back rail, and by tightening them up, the one roll is pressed up tight against the other. As that is slacked off, there is space between the grooved roll and the smooth roll, so that the wheat can go through.

The Court: Which is grooved and which is smoothed there?

The Witness: This back roll is a grooved roll, and this one is the smoothed (operating machine)

Mr. Clarke: Both are grooved on this machine.

Witness: No, sir. This is a smoothed roll, but due to the operation, the grooves have cut tiny marks on the smooth roll.

RDQ. 415. Now you have adjusted the machine so that the product is coming through in a ribbon-like form?

The Witness: These ribbons are almost cut through into tiny ribbons. They can be opened up wider, so that you get a solid sheet down through

there, and in places you can see they are almost cut through. By setting up the two rolls closer against one another you can get them in a narrower form—as we tighten these just enough to bring the grooved roll up against the smooth roll, the product comes out in the form of, you might say, a great many very narrow ribbons, instead of one wide ribbon. It is the same as the wheat itself cut in the middle. Now, by opening the machine up still wider, you get a product of a slightly different character; with the bran of the wheat appearing as spots, instead of being rolled out into portions, by opening the machine still further.

THE WITNESS: We do not manufacture this product—by opening it up still further, the wheat will come out as rolled wheat, exactly the same as rolled oats would come out if they were put through a set of rolls.

MR. COOPER: If your Honor please, I may say I know of no way to preserve as evidence, those products of the machine. My suggestion would be that I might mark for identification the machine itself. That might be called D for identification, and it is the machine with which the two members B and C, the parts of the mould we previously used; and I presume that if in an Appellate Court, for example, it were desired to see these, we would simply have to operate the machine over again before the Court and show its product.

MR. CLARKE: There is no claim that this is a replica of any production.

MR. COOPER: No claim made for anything, except that the witness was asked on direct examination about that difference, and I was simply illustrating the difference.

RE-CROSS-EXAMINATION.

THE WITNESS: This wheat that was just out through this machine was cooked Saturday night about seven o'clock. We do not keep it that long in regular production if we can help it. We have operated on that on a cycle. There is not much difference in the biscuit. You may have a little more difficulty in the operating, but the handling is easier. The wheat is a little shorter and more of a tendency for the shreds to break as they fall down from the rolls to the accumulator chain. The wheat of the shred will break up before it gets long enough to reach the chain—the tendency is a thinner thread itself. I do not know that there is much difference in the baked shred.

WILLIAM A. HANNIGAN.

DIRECT EXAMINATION.

My name is William A. Hannigan and I live in Wilmington, Delaware. I am in the wholesale grocery business. The name of the company is J. D. Sissler Company located on King Street—at Third and King—Wilmington, Delaware. I am president of the company and have been with the company twenty-seven years—1906 to 1933. The business of the company is distribution of food products in a wholesale way. We purchase from the manufacturer and sell to the retailer. During all the twenty-seven years we have handled a product known as Shredded Wheat. Originally we knew of Shredded Wheat as being made at Niagara Falls.

Plaintiff's Exhibit 1, which you hand me is the package that I referred to a moment ago as Shredded Wheat. When we ordered or desired that product from the manufacturer we ordered so many cases of Shredded Wheat. Shredded Wheat I think it com-

monly went as. It was known to the trade as Shredded Wheat. The product was ordered from us by the retailer as Shredded Wheat. That term indicated to me, one of the members of the trade, the source or origin of that product. We handled it continuously; we handled it in supplies of duration of about two weeks period. We figured how much we would use in that time and placed our orders accordingly. Without definite records I should assume that we sold between 1200 and 1500 cases a year. Our territory was from Wilmington to Cape Charles, embracing about 12 counties in Delaware, Maryland and Virginia. We covered all of the territory known as the Delmarva Branch.

CROSS-EXAMINATION.

I am not actually out of the wholesale grocery business yet. My connection is still the same. I am winding up, or liquidating our business. It is not fully liquidated yet. It went into liquidation about eight months ago. I was in the wholesale grocery business up until that time and even right now. We still have merchandise to sell.

We did handle the Kellogg Whole Wheat Biscuit in our business and sold it to the grocery trade whenever it was called for. Unless Kellogg's biscuit was specified, this biscuit was always sent (indicating Plaintiff's Exhibit 1). That was up until about eight months ago.

I do not know anything about orders for Niagara Shredded Wheat being sent on orders for Shredded Wheat—I know only about my own business. It has been done, but I would not say that it was done specifically towards Shredded Wheat.

I was a wholesale grocer at the time that the Shredded Wheat Company was taken over by National Biscuit Company. We received a circular from Na-

tional Biscuit Company advising that the biscuit would be distributed from their local office, but we still continued to buy from the local office paying their price in order to accommodate our trade.

We did not have any special buying arrangement with the Niagara Falls Company—the National Biscuit Company, only general. Just the same as applied to all other purchases that we made; that we send our orders in in the regular fashion and keep our credit in good shape and consequently were able to purchase.

After National Biscuit Company took over Shredded Wheat Company we still continued to receive the product and we could not have been cut off.

We did receive a notice that thereafter they expected to serve the trade directly rather than through jobbers. If there was a delay occasioned by the notice it was only because of the selling out of the stock we had on hand—without putting any new orders in. We did that naturally, to keep our stock fresh. We gauged a couple of days in advance. At the time this notice came from National Biscuit Company there was a departure for the time being from that practice, we sold out what we had on hand without overlapping the order for a new supply.

Before they were out we made arrangements for purchase. National Biscuit Company then made arrangements allowing as to continue as a jobber, and up to the time of our liquidation we continued as a regular jobber for the National Biscuit Company product. This arrangement did not make any difference in our efforts to sell either the Kellogg product or National Biscuit product. We were distributors and we did not go out and push the sale of any particular product, because advertising usually obliged us to fill the demand for it. That is until we went into liquidation.

We handle the rest of the Kellogg line, but not the rest of the National line—just the Shredded Wheat. Kellogg's is known as a Shredded Wheat biscuit and was known to ourselves as a Shredded Wheat biscuit. It looked like Shredded Wheat, but I am not competent to judge whether it was wheat. I was only a seller. I would not make the statement whether either of them was a shredded biscuit. I only know them as called for by trade.

HARRY W. FRAZIER.

Direct Examination.

The Witness: I reside in Wilmington, Delaware. I am in the retail grocery business and my store is located at 822 Market Street. I have been located there I guess about 39 years, 38 or 39 years. The name of the company is Thomas J. Lawson Company. The company has been operating that store for a number of years. I have been with Thomas J. Lawson Company forty-eight years in all. That includes the John P. Allman and the Lawson Company. We were originally located at Eighth and Market where the Union Bank is. At the present time I am the owner of the Thomas J. Lawson Company.

I know what Shredded Wheat is from the selling of it. The package marked "Plaintiff's Exhibit 1" is the package we sell as Shredded Wheat. I cannot say exactly how long I have known Shredded Wheat, but I venture to say 30 or 35 years.

When we ordered the product in the carton similar to Plaintiff's Exhibit 1, we ordered Shredded Wheat and when customers asked for Shredded Wheat we supplied Plaintiff's Exhibit 1—this package of Shredded Wheat.

CROSS-EXAMINATION.

We handle the Kellogg's Shredded Whole Wheat Biscuit marked on the carton. We have bought some of that this year, one carton. We call the Kellogg's Whole Wheat Biscuit. We know it is a Shredded Wheat Biscuit that the Kellogg Company is making. I have read from the end of the package that it was Kellogg's Whole Wheat Biscuit made from a process with Shredded marked on the package.

I have seen the Kellogg Biscuit outside of the package. It looks similar and is very much like this biscuit, but a little shorter. I have no doubt that it is a Wheat Biscuit. I do not think I have any doubt that it is a Shredded Biscuit. It looks to me to be very similar in many respects. In fact it looks like the Shredded Wheat.

We sell so little of the Kellogg Biscuit that I do not know we have ever tried to explain what it is or what it is made of. Our calls or demands are for Shredded Wheat almost entirely. We will sell a case or two of this a week and we bought one whole case of the Whole Wheat Biscuit since last fall. That is not the first time we handled it, as we have cereals of all kinds. I should say we have handled the Kellogg product about two or three years.

We have never tried to sell it, representing that it was National Biscuit Company product. If some one asks for Kellogg's Whole Wheat Biscuit we will want the goods to supply the order.

We never practice substitution as we are very much opposed to it.

XQ. 37. As a practice in the grocery trade, that type of fraudulent substitution is practically obsolete?

MR. MORRIS: In the witness' store, or is the question now intending to——

THE COURT: Is fraud obsolete among grocers, I do not know that that is relevant, and it is sustained.

XQ. 38. It certainly is obsolete in your store?

MR. MORRIS: That is an inference that——

MR. CLARKE: I think that is directed absolutely to the issues.

THE COURT: I know about that store since I am six years old.

MR. CLARKE: But the issue of this case is exactly that, as I understand it, on the law. There is no law that has been cited here except fraudulent or deceptive substitution and the question has been put to practically every grocer without any reflection.

MR. MORRIS: That has nothing to do with the question as to whether it is obsolete in Mr. Frazier's store.

THE COURT: There is an innuendo there. The inference is that it previously existed.

MR. CLARKE: I did not intend that.

WITNESS: There are times when goods might be substituted, but we aim to call the customer and ask them if they would care to have us send something else in case of our being out of some particular item, but to substitute for our trade will not work.

We have handled Kellogg product about three years. We have had one case this season. We put that case in to fill a consumer demand for the Kellogg product; if one calls for it.

I do not know whether I can answer correctly about whether the customers ask for Kellogg Whole Wheat Biscuit or Kellogg Shredded Wheat Biscuit, but I would say that they would ask for Kellogg's Whole

Wheat Biscuit—if we received orders for Kellogg's Whole Wheat Biscuit—if they would ask for Shredded Wheat, we would send this—Plaintiff's Exhibit 1.

If they asked for Kellogg's Shredded Wheat we would give them Kellogg's product.

I happened to come here today as a witness because a representative of National Biscuit Company called to see me and asked if I would come here as a witness. We handle the cracker line of National Biscuit Company—we have dealt with that company for many years. We handle other lines, such as Sunshine and Ivins, Keebler and quite a number of them, Huntley and Palmer and foreign crackers.

HOWARD DUANE.

Direct Examination.

I am a member of the Bar of this Court and of the State Courts and have been such for a number of years. I know Shredded Wheat having been accustomed to eating a Shredded Wheat Biscuit from time to time. I would say that I have indulged in that practice for about 20 years.

Shredded Wheat means to me the product of what used to be the Niagara Falls Shredded Wheat Company, and has recently been taken over by the National Biscuit Company.

On April 25th I had breakfast at the Union News Stand in the Pennsylvania Station here in Wilmington, and I looked at the menu and on the menu was Shredded Wheat, and I asked for Shredded Wheat, and instead of giving me Shredded Wheat they gave me Kellogg's Wheat Biscuit. As I remember it, it was in a small carton with two biscuits in it. I had two biscuits for breakfast.

On another occasion, I remember, I would not say how many years ago, but it was probably two or three years ago, one box of Kellogg's biscuits got into the house, and we had always had the Shredded Wheat.

CROSS-EXAMINATION.

I saw immediately that the biscuit handed to me in this carton was not the biscuit I had been getting. I noticed the size was shorter than the Shredded Wheat Biscuit. I knew it was not the biscuit made by National Biscuit Company or the Shredded Wheat Company.

I had a conversation with the waitress about it. I asked her why, when I asked for Shredded Wheat, I was handed Kellogg's Wheat Biscuits. She did not say anything, but shrugged her shoulders and walked off. I have not had a meal there since. I ate there because I was on my way to New York on business and was waiting for the 8:25 train.

I eat Shredded Wheat about once or twice a week.

The product that I consumed at the station was not Shredded Wheat. I knew it was not Shredded Wheat. It was wheat that was shredded, but I knew it was not the product of the Shredded Wheat Company. I knew it was not Shredded Wheat made by National Biscuit Company but Shredded Wheat made by the Kellogg Company.

RE-DIRECT EXAMINATION.

THE WITNESS: It is not true that I had been asked to come to this place and ask for Shredded Wheat.

I told Mr. Culbertson, an associate of Mr. Morris, that I got Kellogg's Biscuit when I called for Shredded Wheat and that is the reason I am here.

RE-CROSS-EXAMINATION

THE WITNESS: I was up here to the clerk of the Federal Court office about two weeks ago and I heard

a discussion about Shredded Wheat Biscuits and Kellogg's Wheat Biscuits and this case that was coming on for trial, and I was here on another matter, and I just remarked that I thought I could be a witness for somebody and related this story. That is the way Judge Morris's office got it.

Shredded Wheat to me means the product that has been made for years at Niagara Falls, New York, and formerly of the Shredded Wheat Company, and now as I understand it, although I do not know, controlled by the National Biscuit Company. That information is written on the package. All the packages that I have ever seen said that this was the product of the Shredded Wheat Company of Niagara Falls, New York, and recently it has had something about National Biscuit Company as successor. I saw that many times on the packages.

MR. VILAS: If the Court please, we have agreed for informality of the proof that I may introduce a sheet drawn from the *Tampa Morning Tribune* of Saturday, July 9, 1932, containing an advertisement of Kellogg's Wheat, which I now offer in evidence.

THE COURT: Any objection?

MR. CLARKE: No objection.

(Received in evidence and marked "Plaintiff's Exhibit No. 247.")

MR. VILAS: I offer as plaintiff's exhibit a sheet drawn from the *Tampa Daily Times* of Friday, July 8, 1932, which contains an advertisement of Shredded Wheat, with the word "Kellogg's" in smaller type and a cut of the plaintiff's carton.

(Received in evidence and marked "Plaintiff's Exhibit No. 248.")

MR. VILAS: I also offer in evidence a sheet, page 5 of the *St. Paul Pioneer Press* of Wednesday, April 26, 1933, containing among other things an advertisement of one Schoch, a witness who testified on behalf of the defendant during the taking of the depositions.

(Received in evidence and marked "Plaintiff's Exhibit No. 249.")

MR. VILAS: The plaintiff now offers the depositions which have been taken in this case. I may state very briefly, your Honor, that the defendant has examined in round numbers—the plaintiff has examined 160 witnesses, and the defendant approximately 180 witnesses. The depositions have been recorded pursuant to stipulations between counsel.

MR. VILAS: The record now discloses that we have offered all depositions of record and certified to the Court, both on the part of the plaintiff and the defendant and the respective cross-examinations.

Let me at this point call attention to the fact that there is a stipulation which we will offer which was made in a suit brought by the Shredded Wheat Company against certain distributors of the Kellogg Company and against the Kellogg Company in the District Court of Connecticut.

That suit was pending when the Biscuit Company acquired the Shredded Wheat Company, but after about a year was dismissed without prejudice upon the stipulation which permits either counsel to use any depositions already taken in that case, in any future litigation involving the subject matter.

THE COURT: We are not using such depositions here.

MR. VILAS: Yes, I am asking leave to file a small volume of depositions which were taken by the Shredded Wheat Company and counsel for the Kellogg Company, pending the proposed trial of that case. I have that here.

THE COURT: The Court suspends any rulings as to the admissibility of depositions taken in another case.

MR. VILAS: We will produce the stipulation pursuant to which I now offer them, and I ask leave to refer at the moment to them in connection with some historical testimony.

MR. CLARK: If your Honor admits them then I will offer the cross-examination, but I am objecting to them as having no bearing on this case. This case has been fully tried and depositions showing the whole trade situation, and 317 or more witnesses were examined on both sides.

THE COURT: My objection is that you are launching into an unfortunate precedent. If the Third Circuit Court of Appeals has spoken, that is the end.

THE COURT: The Court initiates the objection on its own part.

MR. VILAS: Again I ask leave to read just the pertinent lines of the stipulation, because I think they have some bearing on the discussion.

MR. MORRIS: Should not the stipulation be offered in evidence?

MR. VILAS: I so offer it:

"The Court consenting thereto, it is hereby agreed and stipulated"——

THE COURT: What Court?

MR. VILAS: Connecticut District.

MR. CLARKE: The Federal District Court.

MR. VILAS: "The Court consenting thereto, it is hereby agreed and stipulated among the several parties hereto that this suit may be and hereby is ordered dismissed without prejudice, and with the condition that should plaintiff, or its successors, sue again upon the same cause of action, or bring any other litigation involving the same, or related subject matter against these defendants, or any of them, or their successors, representatives, agents, or privies, in this or in any other Court or before the Patent Office, then any party to such litigation may avail himself or itself of any part of or of all of the proceedings, orders, testimony and depositions heretofore had, entered or taken in this case, or for use herein, to the same extent and for the same purpose as though the same had been taken, had or done in such litigation."

That was signed by the plaintiff and by the Kellogg Company by its president, the Kellogg Sales Company by Will K. Kellogg, and also by Mr. Kellogg individually and also by the other defendants who are distributors.

MR. CLARKE: They were not parties defendant in this case.

MR. VILAS: But they signed a stipulation of dismissal.

THE COURT: Do you offer the stipulation as evidence?

MR. VILAS: I offer it.

THE COURT: Admitted.

MR. CLARKE: Exception.

THE COURT: Let an exception be entered.

(Received in evidence and marked "Plaintiff's Exhibit No. 251.")

THIRD DAY.

May 24, 1933.

MR. MORRIS: Yesterday afternoon my associate, Mr. Vilas, offered in evidence the depositions taken in the case between this plaintiff and one of the dealers of the defendant, in which suit this defendant was named a party, but not served, but in which a stipulation was filed, which was signed by this defendant, stipulating that the depositions taken in that case, should be admissible in any future case between the parties.

The case to which I referred was 263 Fed. 481, the opinion of Judge Woolley. The witnesses were dead. One of the cases relied upon by Judge Woolley was 137 Fed. 48, decided by the Circuit Court of Appeals for the Sixth Circuit. In view, however, of the fact that the defendant objects to the admission of these depositions, notwithstanding the stipulation, we withdraw the offer.

MR. CLARKE: If your Honor please, we are prepared to withdraw all objections to the tender of the depositions that they want. The depositions were not actually offered in the other case; but they all showed there was no confusion between the parties at that time, when the defendant's product was first put on the market. I withdraw the objection, if they want to offer those depositions.

MR. COOPER: There are a few matters, your Honor, by way of offer to close our case. First, I wanted to call attention to the defendant's answer which contains an affirmative defense in many paragraphs. Now, Rule 30, I think it is, for Courts in Equity, Supreme Court Rules says that the averments of an affirmative defense in an answer are deemed denied.

Some of these affirmative defenses which we explicitly admit in our reply to the answer, to the affirmative defenses of the answer, but being a little uncertain as to whether those affirmative defenses will be taken as admitted without further proof under the state of the pleading, I will offer two paragraphs from the affirmative defenses as an admission against interest of the defendant.

They relate simply to formal matters, and I think will avoid considerable documentary proof.

THE COURT: Whose admission?

MR. COOPER: The defendant's admission as contained in the averments of its affirmative defense.

In our complaint we aver our corporate capacity and the defendant's corporate capacity and the like and the answer first proceeds to deny all those averments, and then proceeds under the heading of affirmative defenses to aver certain of those facts, and it is that pleading which I am offering in evidence as an admission against interest. Section 1——

MR. COOPER: Section 1 of the affirmative defense, reads:

"1. That the defendant Kellogg Company is a corporation organized and existing under and by virtue of the laws of the State of Delaware, a citizen and an inhabitant of said State, and has a manufacturing plant at Battle Creek, County of Calhoun, and State of Michigan, and that plaintiff National Biscuit Company is a corporation organized and existing under the laws of the State of New Jersey with a regularly established manufacturing plant and place of business at New York City, in the Southern District of the State of New

York, and another factory at Niagara Falls in the State of New York."

I offer that in evidence as an admission against interest.

The next paragraph of the affirmative defense is No. 2:

"That on information and belief, Cereal Machine Company was duly incorporated under the laws of the State of Colorado on June 8, 1893; that it was engaged in the manufacture and sale of a Shredded Whole Wheat Biscuit, an edible product; that Henry D. Perky was the founder of the business of said Cereal Machine Company, and was President of said Cereal Machine Company; that or or about the 17th day of May, 1900, the name of said Cereal Machine Company was pursuant to the laws of the State of Colorado, duly changed to Shredded Wheat Company; that in the year 1900, the Natural Food Company, a corporation, was duly organized under the laws of the State of New York, and that in the year 1900 said Natural Food Company acquired, succeeded to and thereafter continued until in the year 1930 the said business thereafter conducted by said Colorado corporation under the successive names, Cereal Machine Company and Shredded Wheat Company; that on or about the 15th day of May, 1908, the name of the said Natural Food Company was pursuant to the laws of the State of New York, duly changed to the Shredded Wheat Company; that in the year 1898 plaintiff, National Biscuit Company, a corporation, was duly organized under the laws of the State of New Jersey, and since its incorporation said plaintiff has been and now is engaged in the manufacture and sale throughout the several States of edible products; that in the year 1930, plaintiff, the said National Biscuit Company, ac-

quired and succeeded to the whole of the going business, alleged trade-marks and property of the said Shredded Wheat Company, a New York corporation; that since said plaintiff acquired and succeeded to the said going business of said The Shredded Wheat Company, it has continued and is now continuing to conduct the same throughout the several States and with foreign nations."

THE COURT: Are these so-called admissions necessary jurisdictional facts that you are proceeding to prove by this form?

MR. COOPER: Not so much the jurisdictional facts as the derivation of title from the original Perky enterprise down to and including the National Biscuit Company.

THE COURT: Not so much, but are they jurisdictional facts essential to your case, that you are seeking to introduce in this form?

MR. COOPER: Yes, they would be so regarded.

THE COURT: Are you seeking to amend your bill in this way?

MR. COOPER: Not at all. We averred these facts in our bill. They first deny them, even their own corporate capacity, in their answer, and then to support their affirmative defense they make these averments that I have read to your Honor.

In our reply we admit the truth of the allegations that I have read to your Honor, so that there is no issue upon them at all, but simply because of a little puzzlement on our side as to whether under Rule 30 of the Rules of Equity, we might be considered to have denied these affirmative averments, I am offering them in evidence as an admission against interest.

I do not think it is necessary because under the state of the pleadings, there is no issue raised.

I am offering in evidence these two averments of the defendant.

THE COURT: If it be a document, by whom is it signed?

MR. COOPER: By Kellogg, or by the defendant herein. That is a formal answer. Those are formal averments of the defendant's answer.

THE COURT: I understand the answer. I thought you were tendering something in order that it might appear that these averments were not denied under Rule 30.

MR. COOPER: Yes, I am. Of course, I tendered my reply to that answer. I am tendering those averments from the answer in the first place, as admissions against interest.

THE COURT: Is that the old common law pleading orally in Court?

MR. COOPER: No, this is on the equity side. Like any other document proceeding from my adversary, I can offer it in evidence as an admission against interest.

THE COURT: What are you offering?

MR. COOPER: I am offering those two sections of the answer No. 1 and No. 2, under the heading of affirmative defense in the answer.

THE COURT: It being a pleading and part of the record in the case, you are offering them?

MR. COOPER: Yes, not being certain whether under the Equity Rules it stands as an admission or is itself considered to be denied.

THE COURT: As proof in contrast to pleading?

MR. COOPER: Yes.

THE COURT: Very well. Have you any objection to having your own pleading go in as proof?

MR. CLARKE: No, except, if your Honor please, if it is going to deprive us of the right to see these title documents, I would ask your Honor's permission to withdraw those allegations. I know nothing about them. I will let the pleadings stand in that way without objection, if they let me see the title document. I make demand on them now.

THE COURT: You are charged with knowledge of what you pleaded.

MR. CLARKE: Precisely. I simply asked, and I will not change the state of the pleadings in any way if they let me see the title documents from the Shredded Wheat Company to the National Biscuit Company, otherwise I ask to amend by withdrawing those allegations.

THE COURT: He desires that the documentary evidence to stay in that proof to be tendered.

MR. COOPER: We have not got it here.

MR. CLARKE: They said they can have it here by tomorrow.

MR. COOPER: We said we could have it here, but I did not hear anybody say by tomorrow. We will have it here merely as a matter of convenience to you.

MR. CLARKE: If there is any question about my proving anything as important as the title, I will ask to amend by withdrawing the allegations.

MR. COOPER: After your adversary has acted upon it?

MR. CLARKE: If they will not let me see the title documents, I will ask your Honor to let me amend by withdrawing the affirmative allegations.

THE COURT: As a practical matter, will the documents be available?

MR. COOPER: Yes, we are sending for them now, and as a practical matter, we will try to have them here before the trial is over, and I will assure you and counsel that if they are not here before the trial is over, we will show them to him anyhow, and if he is not satisfied with what he sees then, he may bring what he wishes before the Court at any time.

I would raise no question of it being untimely if he approached your Honor with a motion in the event that the papers do not get here before the trial is over. I will raise no question if after seeing them subsequently, they not being actually produced here on the trial, he should approach your Honor with some motion based on the fact of something appearing in the papers which he might have raised on the trial. I will not raise the question of it being untimely.

MR. CLARKE: May I except to that for the record?

THE COURT: Yes.

MR. COOPER: I will offer in evidence defendant's answers to all the interrogatories except No. 34. The exception I make is because I think that answer No. 34 is not responsive to the interrogatory. I make the explanation about the long delay in filing them as a reason why it was not taken up with the Court before.

If your Honor please, they are referred to both in the complaint herein, the bill of complaint, and in the defendant's answer, four certificates

of registration in the United States Patent Office. They are identified fully in both sets of pleadings, and I want to offer those four in evidence. They might, I think, as a matter of convenience, go in as a single exhibit. I will specify what they are. They are numbered——

THE COURT: You offer the interrogatories and the answers save one?

MR. COOPER: Yes.

MR. CLARKE: The defendant will offer the other answer.

MR. COOPER: What its effect will be, I don't know. I do not think he can offer affirmative proof of his own answer. It is a self-serving declaration and not strictly responsive that I omitted it.

I will cut this Gordian knot, that my brother is raising so frequently in his effort to get out of things that he has done formerly by offering the whole set of answers to interrogatories as well as the interrogatories themselves, and moving to strike out as perfectly improper the answer to the Interrogatory No. 34, and ask your Honor to rule on that with the other things in the case. I do not think it would be necessary to take it up at this moment.

Now, I will offer in evidence as a single exhibit the four United States registered trade-marks to which I was referring, a moment ago, they being No. 85,186, registered January 3, 1912, and that one being a trade-mark which shows a bowl with a wheat biscuit in it and some milk or the like, and the second one being——

The second one in the exhibit is trade-mark No. 216,593, registered August 17, 1926, and that shows a saucer with two wheat biscuits in it, the thing that has been so familiar from these exhibits as being depicted.

The third is registered trade-mark No. 178,725, registered under the act of March 19, 1920, on the words "Shredded Wheat," it having been registered on January 15, 1924.

The fourth is trade-mark No. 213,456, registered under the same act on May 25, 1926, on the same words, "Shredded Wheat."

The difference between the third and fourth of these trade-marks is that the fourth applies the words to a greater variety of substance than does the one immediately preceding.

THE COURT: For every appropriate purpose they are admitted.

MR. CLARKE: May I have an exception?

THE COURT: Certainly; let an exception be entered.

(Received in evidence and marked "Plaintiff's Exhibit No. 252.")

MR. COOPER: I now offer in evidence certificates of registration of the name "Shredded" as a trade-mark in the State of California, Colorado, Connecticut, Delaware, Illinois, Indiana, Iowa, Louisiana, Texas, Maine, Maryland, Massachusetts, Michigan, Missouri, Minnesota, Nebraska, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, Tennessee, Vermont, Virginia, West Virginia and Wisconsin.

With the admission of my brother on the other side to whom I have submitted them, I use photostatic copies in place of the originals, the originals all being here, and I can offer them all as one exhibit, on the front of which is a list of the various states and their identification mark.

(Received in evidence and marked "Plaintiff's Exhibit No. 253.")

MR. COOPER: That, if your Honor please, is the plaintiff's case.

PLAINTIFF'S WITNESSES.

EDWIN L. WALLACE.

Deposition taken in New York, August, 1932.

DIRECT EXAMINATION.

THE WITNESS: My name is Edwin L. Wallace and I am 56 years old. I have resided at Welwyn Garden City, Hertfordshire, England, since 1924, where I am employed by The Shredded Wheat Company, Limited. I have been connected with the business of shredded wheat since 1896, when I received my first employment at Worcester, Massachusetts, with The Cereal Machine Company. The principal person connected with that company was Mr. Henry D. Perky, whom I knew from 1897 on, until he severed his connections with The Shredded Wheat Company. Mr. Perky is dead. He died about 1903-1904.

I was first employed on a production table as a panning and peeling man, putting the shredded wheat from the boxes in which they were made on to the trays for baking. I was employed by The Cereal Machine Company until 1901, and I think the name of the company was changed to The Shredded Wheat Company and then to The Natural Food Company. My next employment was in the machine shop working on the construction of a new automatic shredder and panner machine.

When the company moved to Niagara Falls in 1901 they commenced business under the name of The Natural Food Company. The plant at Worcester continued to run for about a year afterwards, until it was closed, and all the production was transferred to Niagara Falls. I installed all of the production machinery on the second floor of the Niagara Falls plant, except what was installed on contract by other people.

We made our first shredded wheat at the new plant in August, 1901, and we had four complete machines running. This plant is still producing shredded wheat. After the Niagara Falls plant started I carried on there as production foreman until the end of 1904, when I was given charge of assembling a plant which was to be started in Ontario, Canada. We started operations at the Canadian plant in January, 1905. I continued on there as factory superintendent until I was sent to England in 1924, where I had charge of the building of the plant, installing the machinery, organizing the force and getting the plant in running order. We made our first shredded wheat in England in 1925 and I have been with that factory ever since in the capacity of managing director, which puts me in charge of all departments, including sales and production. I assisted in a general way in the construction of other plants at Oakland, California, and Erie Avenue plant at Buffalo. Thus, I have been continuously connected with The Shredded Wheat Company and its predecessors since 1897 and engaged in actual and practical operation in the capacities stated. During that period of years I have become thoroughly familiar with all the processing and manufacture of the shredded wheat product.

Operations of the plants have been continuous since I have been connected with the company except for periods when they were overstocked. I was personally connected with the development of machinery that is used today in the manufacture of shredded wheat.

When I first went with The Cereal Machine Company the product of the company was called "Shredded Wheat."

The shredded wheat biscuit that is manufactured now is practically the same in appearance and constituency as the biscuit that was manufactured in 1898.

MR. VILAS:

Q. 96. P I, page 14. Is it true to say that that product, as produced today by the shredded wheat factories of the plaintiff is, in all respects, substantially the same as that produced in 1898?

A. It is.

Q. 97. That is, in size, shape, appearance, and contents?

A. Yes, yes and in weight.

Q. 99. Has it always been put in the same sized package?

A. Yes, 12 biscuit in a package.

Q. 100. What is the shredded wheat biscuit composed of?

A. Fibres or filaments of whole wheat, I should say.

Q. 101. Does it contain anything else?

A. No.

Q. 102. Is anything added to or taken away from the whole wheat kernel or berry in the manufacture?

A. No, it is still the whole wheat in the finished product.

Q. 103. Has that always been true?

A. Yes.

Q. 104. From the beginning of your connection with the company?

A. Yes, it has always been the same.

THE WITNESS: If any changes have occurred in the process of manufacture they have been in the nature of improvements in the machinery to produce the biscuit.

The general process of the manufacture of shredded wheat as it was carried on in 1898 is as follows:

The wheat was received in bags and stored until use, when it was subjected to about five or six different

processes of cleaning. It was then cooked by boiling it in a tumbler or drum immersed in boiling water for about ten minutes; then drained and lifted into wire bottom trays, which were covered with a cotton sheet. It was next turned by hand or with paddles about twenty-four hours until it was cured or in a condition for shredding. It was then shredded with rolls practically the same as those in use at the present day.

In the process of shredding the whole wheat kernels which had been previously cooked and cured were drawn between these rolls, one of which was full and the other grooved. The rolls were subjected to a considerable pressure, which drew this wheat out into filaments or fibres, which have always been known as shreds, although, in reality, technically, I suppose they are not shreds; but shreds and shredded wheat are names that have been connected with it ever since I can remember. (Page 18.)

The wheat is more pressed than cut, although the grooves are sharp. The pressure seems to string them out into shreds, and the berries or kernels of wheat blend into each other, so that there is more or less a continuous thread in the groove. We have often taken a thread two or three feet long, composed of one kernel of wheat, blended into another and so on.

The finished product shows the bran broken up on the shred. If you look at one of those biscuit you could distinguish particles of bran and a little grain of starch on the outside of the shred. Although I cannot give a chemical analysis offhand, the wheat berry is composed of starch fibre, bran and what is known as the middlings, which is taken off in flour. All these are pressed out by what we call the shredders.

There were 36 pairs of rolls in the complete shredding machine at that time (1898) and about 32 sets were in use. The depth of the groove ran from fourteen to eighteen thousands of an inch. Each pair of

rolls deposited its quota of shreds in a series of boxes that passed under the rolls and then the biscuit were in turn cut by an automatic knife; the boxes were then drawn out on to what they call the peeling bench.

These 32 sets of rolls were disposed in a line and each one deposited its filaments or shreds in the boxes that rode on a leather belt, so that after a box has passed underneath the 32 shredders it contained about 32 layers of filaments.

Thus the nature of the process was to pile up a longitudinal pile of layers or shreds and when it got on the table it was drawn into a pressing or cutting machine that shaped the biscuits and cut them apart in the box. They were then peeled with wooden peels from these boxes and laid on the pan.

A peel is a little instrument probably 8 inches long, about 4 inches wide, made of wood, with a little handle at one end. It is a kind of shovel which is shoved under the shredded wheat biscuits whereby they were picked up from the table and deposited on the pans.

The constituency of the biscuits at the time they were put on the pans ready for the oven contained approximately 46 per cent. moisture.

The pans were put on racks and the racks were taken to the oven room. After baking they were again put on racks and the racks were run through evaporators or drying chambers, which removed any moisture which might remain after baking. In the evaporator the moisture was reduced to about three or four per cent. In 1898 it used to take about 35 minutes to bake the biscuits in an oven of about three to four hundred degrees. They were in the evaporator about an hour and as soon as the biscuit were cooled they were ready for packing.

Between this time and the present day there have been improvements and refinements in the mechanical

process of making the biscuit. In 1898 an automatic shredding, cutting and panning unit was built but that machine was discontinued after several months because of the high amount of waste connected with it and a new machine of the same type was developed, which is substantially the same as is in use in the factories today.

In the Erie Avenue Plant at Buffalo, New York, and in the Canadian plant there is now an automatic machine which has been developed after about 18 years of experimental work and study. This machine automatically shreds, cuts, pans, bakes, evaporates and then delivers to the packing table; thus this new machine eliminates a great deal of the old hand labor and it is no longer necessary to use peels. All of the factories are still using some of the old system but this automatic machine is used in addition to the old units.

As for the treatment of wheat today—the wheat instead of coming in bags is received in cars in bulk, approximately 1800 or 2000 bushels in a car, which is handled by a car shovel and unloaded very quickly.

The cooking process is very different from the old slow tumbler and kettle. It is now cooked in a steel drum with a perforated metal tumbler or inner compartment, and it is cooked under steam pressure. The old style of doing it was simply to boil wheat by immersing a tumbler full of raw wheat in boiling water.

Before the wheat is cooked it goes through nine processes of cleaning so that by the time it is ready for cooking, foreign matters such as straw butts, unthrashed wheat, cockle, mustard seed, black or wild oats, barley, peas, beans, corn, lumps of dirt and stones have all been removed.

As for the shredding apparatus, there has been substantially no change and all the shredders work exactly as they did in the original process.

They are now baking the biscuit at 500 to 550 degrees F. in a period of 15 to 20 minutes. The evaporation process takes about fifty to sixty minutes.

The rolls used today have coarser grooves, which run from twenty to twenty-four thousands of an inch deep, and the number of sets has been reduced to 29 for the reason that the deeper groove produces a lighter and more porous product and enables us to shorten up the machine from 36 to 29 sets of rolls. There are twenty grooves on a roll, which is the same today as it was in 1898.

In the first cleaning process there is a combination of perforated screens and air suctions which removes the straw butts and raw offal. The wheat then goes through a milling separator with about six different types of screens which further separate foreign substances. If next goes through a scouring process whereby brushes brush the dirt from the outside of the berry. Next the cockle cylinders, a disk machine, remove the cockle and broken kernels of wheat. Then there is a set of stoning or gravity machines which remove stones by a shaking motion which cause the heavier material, such as stones, to climb to the high side and drop off and the wheat to drop off the low side.

Pure white wheat is the best for shredded wheat. It is difficult to get a pure white wheat in Canada or in the United States—it is more or less red or amber. We used to get the bulk of the wheat from the Genesee Valley, some from Michigan and some from other parts of the United States. In Canada it was nearly all Ontario wheat.

In summing up, I would say that the essential product and the essential steps of the actual manufacture of the product are the same today as they were in 1897, with the exception of the improved methods.

Shredded Wheat could be made in many different designs and produced in commercial quantities.

Each year the amount of shredded wheat produced has increased.

I believe that the average individual, when shredded wheat is mentioned, immediately thinks of the shredded wheat product that is produced by The Shredded Wheat Company.

The question was objected to as incompetent, irrelevant and immaterial.

(The witness was now shown several volumes containing carton samples that had been used in the past and was asked to identify him.)

THE WITNESS: I recall the use of the representation of the dish on page 19-A of Volume 1 of Plaintiff's Exhibit 2, which has been used for a great many years and as early as 1908. I also remember the picture on the cartons of a dish containing two shredded wheat biscuit. This picture of the biscuit in a dish has been used for considerable time in our American, Canadian and English plants. As a matter of fact we have a gift scheme in England where we give premiums to customers who return a certain number of these dish pictures from the cartons.

Shredded Wheat will keep almost indefinitely if it is kept dry.

CROSS-EXAMINATION.

THE WITNESS: The rolls which make the shreds coarser are used both in England and the United States at the present time. There has not been any lessening or refinement of the shreds in the United States in recent years, although the shreds that are laid on the bottom and on the top may be finer in order to make a better appearance. Also, the rolls with the deeper grooves do not wear out as quickly as those with the

shallow grooves. We have conducted experiments with these cases in mind—wearing qualities of the roll, improvement of the roll, improvement of the biscuit and regulation of the weight of the biscuit.

Shredded wheat is registered as a trade-mark in England.

In our new automatic ovens biscuits are browner on the bottom because they are baked on perforated, heavy metal pans rather than wire pans. The metal pan holds the heat and browns the bottom. Thus, some of our biscuit which are on the market may have darker bottoms than others, which are baked on the wire pans. The biscuit may also vary a little in shape, depending on the weather and the quality of the wheat, that is, some may have round bottoms while some may have flat bottoms. This is an accidental variation.

In the past we have had small demonstrating machines set up in store windows which made small Shredded Wheat biscuit. These, of course, were for demonstrating purposes only and most of the resulting biscuit was given away.

I have been familiar with the Kellogg biscuit since around 1920, when they were manufactured with ribbons rather than shreds and were made from dough. As for the present day Kellogg biscuit, I have not noticed it to any great extent, except that it is shorter in length, and I did not pay any attention to them because they have not entered our territory.

Our advertising department has requested us to use the picture of two biscuit in a dish rather than the one biscuit as they feel that will induce people to eat two biscuit instead of one.

I would say, as I have before, that our biscuit has been substantially the same as it has always been, except for changes in the size of the shreds which the consumer would not notice.

EDWARD EVERED SWEET.

Deposition taken in Providence, Rhode Island, September 7, 1932.

Direct Examination.

Witness: I reside in Cranston, Rhode Island, and am 46 years old. I have never lived in Wilmington, Delaware, nor within 100 miles thereof except that I at one time lived in Philadelphia.

The article which counsel takes from Plaintiff's Exhibit 1 I recognize as a biscuit called shredded wheat. I have been familiar with that, if my memory serves me right, since 1915. Since that time I can not remember any changes in the form of the biscuit. It is the same now as I have always remembered it in form and appearance because I have been eating it as long as I knew it. I can not remember any change in taste either.

The first experience in ordering shredded wheat in restaurants that established itself in my mind because of any unusual circumstances was on St. Patrick's Day, 1932, at breakfast at the Biltmore Hotel, Providence. I ordered a shredded wheat from the menu in the Providence Biltmore Hotel in their lunch room.

Yes, at the Providence Biltmore Hotel, in their lunch room; and a small package, such as might indicate that it was an individual package—or at least two biscuits were exposed during delivery of the food; and, because I was dividing my attention between the package and a newspaper, I just automatically removed one of the biscuits, as I always do when I receive an individual package, and started to eat it. Eating two or three portions convinced me that there was some sort of change in the biscuit, so I paused in my reading long enough to examine the package more closely; and I discovered that it was not shredded wheat, but that

it was a product known as Kellogg's Whole Wheat Biscuit. That, of course, indicated to me why it might be different from the shredded wheat that I had been eating.

The suggestion that I got was that it was hard to chew. My first impression was that I must have a very old shredded wheat biscuit That is what caused me to look at it and examine the package, and then on more close examination it semed like a shorter biscuit.

I called the waitress and, if my memory serves me right, I said to her: "This is not shredded wheat."

And she said: "What is it?"

And I said,—if I remember correctly, "This is Kellogg's Whole Wheat Biscuit."

"Well," she said, "they have sold out to the National Biscuit Company."

I had asked the waitress for shredded wheat, and no more. I had a similar experience at the same place on August 11, 1932, when I again ordered shredded wheat in the lunch room from waitress No. 172, and I wanted particularly to see what was delivered to me. On that occasion she delivered to me an individual package of Kellogg's Whole Wheat Biscuit. I identified the package by a mark I put on it and I asked her specifically not to open it because I wanted to take it out. On the previous occasion the package had been opened at the top, exposing two biscuits.

(The package referred to was received in evidence and marked "Plaintiff's Exhibit 5.")

WITNESS: In the March 17th experience I can not say what side of the package was toward me. I did say that the top of the package was open to expose the ends of the biscuit. In other words, I presume it was served that way for convenience in removing the biscuits. I did not have to open the package. It was open so that the ends of the biscuits were visible from the opening.

On August 11th I again asked the waitress for shredded wheat, and after the package was delivered I asked her if that was the only kind of shredded wheat they served at the Biltmore Hotel and she said yes. I then reminded her that that was not shredded wheat and I distinctly called her attention to the fact by referring to the package and that it was Kellogg's Whole Wheat Biscuit. She then said that that was the only kind of shredded wheat they carried. In that instance my order was written in full and I signed my name on the back of the card and left it with the cashier.

On September 2d, 1932, in the afternoon, I again ordered shredded wheat from waitress No. 177. She delivered and opened a package of Kellogg's Whole Wheat Biscuit. I ate the biscuit and then told the waitress that I would like a copy of the receipt. She arranged for a copy on a blank sheet of paper. I wrote the number of the check from which it was copied in the lower right-hand corned and signed it.

(Slip received in evidence and marked "Plaintiff's Exhibit 6.")

WITNESS: I produce the package delivered that day with my initials "E. E. Sweet, 9/2/32" written in pencil on the end of the package.

(Package received in evidence and marked "Plaintiff's Exhibit 7.")

WITNESS: On September 2d I ordered from the menu and retained the card, which I produce, with a circle around the words "Shredded Wheat Biscuits". I had seen the same item on the same menu several times before.

(Menu received in evidence and marked "Plaintiff's Exhibit 8.")

WITNESS: I recall having lunch with counsel at the Biltmore on September 1st, 1932, when counsel ordered shredded wheat. Counsel called my attention to the fact that the waitress wrote the words "Shredded Wheat" and I remember that I received Kellogg's Whole Wheat Biscuit in an individual package containing two biscuits, served with the top opened and counsel called the attention of the waitress, No. 172, to the fact that that was not shredded wheat.

At that time, she was rather surprised to think that it was not and asked you (counsel) to look on the package and see if it was not manufactured by the National Biscuit Company, following which she inserted a fork in the package and removed one of the biscuits to show counsel that it was shredded wheat in appearance.

I remember, further, that counsel again called her attention to the fact that it did not say anything about Niagara Falls or shredded wheat on the package and again called her attention to the fact that that particular product that she was showing him was made by Kellogg at Battle Creek, Michigan.

(Carton received in evidence and marked "Plaintiff's Exhibit 9.")

WITNESS: Since 1915 I have been employed professionally with sales and sales management of cereals, dairy products, canned goods and soaps. In 1915 I was employed by W. K. Kellogg Company at Battle Creek, Michigan, and severed my connection with them in 1919. In 1915 I was engaged at Chicago to peddle samples for them from house to house. In 1916 I had charge of their sample operations at Chicago. They later sent me to represent them at Peoria, Illinois, for the Peoria district as a salesman. I served them in that capacity until the conclusion of my services. During that period the Kellogg Company had a product that they called Kellogg's Wheat Biscuit. I did not

then, nor do I still, consider that biscuit in any way in conflict with shredded wheat. It was flat and rather hard. It was packed side by side in a long package. I do not recall how many in a package but it was smaller than the biscuit they now make. It was made of whole wheat but I have never seen the formula. It was sold as and for a whole wheat biscuit.

In the course of my work with Kellogg Company, I visited the trade, both wholesale and retail customers, particularly after I was appointed to the Peoria district. Before that I was concerned mostly with sampling but during the period between my original engagement and the final assignment to a permanent territory, they used me on the Chicago trade. In the Chicago trade the company was more particularly concerned with cornflakes exclusively. My first memory of the biscuit is concerned with the first convention I ever attended in 1917 or 1918 at Battle Creek, composed of salesmen that had not previously been to Battle Creek, some district managers and the heads of the sales organization. At that time I knew shredded wheat biscuit very well. I had seen them on the trade and I had eaten them.

I recall that a portion of that convention was devoted to the sales opportunity for Kellogg's products; and in that particular discussion, the men in charge of the subject specifically related to the opportunity for the Kellogg biscuit by indicating the tremendous volume that was enjoyed at that time by shredded wheat. Shredded wheat certainly enjoyed a splendid territory and splendid distribution—I should say nearly complete distribution so far as the retail trade was concerned. In selling the Kellogg Whole Wheat Biscuit after that convention it was necessary to expose it to the trade at the time that we tried to sell it to them. We had to do that to indicate its character. We had to tell them about the profit. We made comparisons between

the profit that was present in our biscuit and profit margin which we believed was present on shredded wheat. We went through the usual motions of demonstrating it by allowing them to taste of it.

Very often when we were presenting this product for the consideration of our retailers they would make the comparison that it was similar to shredded wheat. I was always very careful not to create the position that we wanted to make that kind of a comparison at all.

We did, however, guarantee the sale of the biscuit. We definitely told our trade that, if they could not sell them, as soon as we had satisfied ourselves and them that there was no place in their particular trade for it, we would refund the money that it had cost them so that it would be no loss to them.

I personally removed a good deal of the distribution that I obtained later by actually buying back the products from the retailer at the price they had paid the wholesaler for it. It was quite natural that, in our contact with the retailer, we made every effort to obtain their good will and interest for the product; but we naturally solicited their patronage of the product, and, by every ethical method, we endeavored to get their support for the product in the trade and make it move.

I would not say that the product actually competed with shredded wheat distribution. It was not successful in distribution in my territory.

I made daily reports to the company of sales and market conditions comprising the towns that we had covered during the day. They comprised the record of the distribution that was present in the retail stores concerning the products that we had to sell; and they also comprised a record of competitive products and also comprised our estimate of the division of sales of the different products. These reports were all on stan-

dard printed forms with places to report the sales of various Kellogg products by name and blank spaces for inserting matter referring to competitive products. I very definitely referred to shredded wheat in comparison with Kellogg biscuit sales. In some parts of the territory where we had no biscuit sales we used Krumbles for comparison in making shredded wheat sales.

After I left the Kellogg Company, I went to the Armour Grain Company as salesman at Milwaukee and later was assistant manager of bulk cereal division at Chicago. Later they sent me to Philadelphia to assist their district manager. That was for approximately 2 years and then I was appointed general manager of the Canadian Rit Dye Soap Company, at Toronto, Canada, in 1921. That was a job of reorganization which required only approximately 6 or 7 months. Following that I joined the Post organization, that is, the Post Products Company at their New York office and in that capacity I was employed in general observation of their entire field of sales procedure. My opinion was solicited concerning field campaigns, advertising, the general condition of their sales organizations. That was entirely cereals. I remained there until 1924 when they went into General Foods and I was sent into the field for observation and sales direction.

Finally, in 1925, I was placed in charge of the brokerage end of the L. W. Pennington business at Portland, Oregon, in charge particularly of the General Foods contacts which were handled out of that office. I continued in that capacity until February, 1927, at which time I became merchandising manager of the Western Dairy Products Company at Seattle, Washington. I had sales direction also of the California dairies at Los Angeles and in 1928 became president of their subsidiary, the Dutch Chain Stores, at Los Angeles, concluding that connection August 1st, 1929.

On August 3d, 1930, I joined the H. J. Heinz Company of Pittsburgh, in connection with their chain store operations, requiring coverage of all national contacts such as their own branches, concerning my contact entirely with the grocery end of the business, and that position was later changed to an attempted development of their cellulose program. That concluded February 2d of this year. Since then I have been in the care of doctors at Providence and Pittsburgh.

I feel that since 1915 I have been more competent regarding cereal products and distribution because of my experience which has been largely with cereals. It included all the cereals manufactured by Kellogg during the period I was with them; all the cereals manufactured by the Armour Grain Company during the period I was with them; and all the cereals manufactured by Post Products and later General Foods while I was with them; and the cereals and distribution and under development by H. J. Heinz in Pittsburgh.

I certainly have had an education in cereals that would probably permit me to be more critical than the ordinary consumer. For that reason, I am probably very critical of the cereals and the comparisons that I make when I select them and eat them. When I find a biscuit like that in Plaintiff's Exhibit 1 I can not think of anything but Shredded Wheat. When I think of Shredded Wheat the thought I get is concerned entirely with the product manufactured by the National Biscuit Company at Niagara Falls.

Prior to March 17, 1932 I had not seen this particular Kellogg product and did not know of its existence. During my experience in the cereal business, we kept ourselves constantly informed of products of a cereal nature regardless of whom they were manufactured by in order that we might make comparisons, but in those years I had never seen the Kellogg's

new biscuit until my contact with it at the Biltmore Hotel.

As to the effect upon the ordinary consumer who orders shredded wheat at a restaurant or at a grocery store and receives Kellogg Whole Wheat Biscuit, I think that would depend a good deal upon the consumer. The consumer today, I think, is pretty well advised of the structure of the products that they order from a grocer. I think that is primarily the reason they order these products: They know what they want, and they know what they are going to get.

Assuming that Kellogg's Whole Wheat Biscuit is served out of the package in a restaurant without accompanying identification of the package, I think it would pass very acceptably as shredded wheat. When a customer or member of the general public asks for shredded wheat, my understanding is he expects to receive Plaintiff's Exhibit No. 1. The term shredded wheat is connected very much in the public mind with the Niagara Falls product and I think that situation has been built up through the medium of their advertising. I think that Niagara Falls and Shredded Wheat and the Shredded Wheat Company are particular factors in the identification of the shredded wheat product in the minds of the public, and in the minds of the distributors.

I have had experience in dealing with retail store keepers throughout the country and I know their reactions and the methods of sales dealing with them. I think it would be very hard work for a salesman to properly demonstrate the taste, appearance, method of packing Kellogg's Whole Wheat Biscuit and properly compare it with any other product that might exist in a similar field, if I were a retail dealer, without making me conscious of my investment in shredded wheat. I do not think he could do it without making me conscious of the fact that if I purchased it I would necessarily expect to split the volume of that char-

acter of cereal between the two products. In my opinion, the retail trade has, for the period of time covered by my experience, been familiar with the shredded wheat as a sort of yardstick of that sort of cereal.

CROSS-EXAMINATION.

WITNESS: At the time this individual package of Kellogg's Shredded Whole Wheat was put before me, if I had not been reading the paper and I had looked at the package in the beginning, I certainly would not have had this confusion of it if I had examined it. I do not say there was similarity between the packages but that it is that characteristic that I had become accustomed to: the similarity of the two biscuits. There is no comparison between the containers. I am talking about the identification on the side of it. So, if I had not been reading the paper, I would have seen instantly that the Biltmore Hotel was serving me another kind than that which I had been accustomed to get.

As I recall now, it was on my second visit that the waitress told me that they only handled the Kellogg product. I naturally asked for shredded wheat because that was my preference. I made no complaint about it. I think they were very truthful to say they handled only the Kellogg product. I have proved it. When I saw shredded wheat on the menu, I certainly thought that they might handle it. What I saw on the menu was Shredded Whole Wheat Biscuits.

This is the first statement under oath that I have made about this but I sent a letter to Mr. Lowry and all correspondence since has been with Mr. Vilas. The occasion of sending the statement to Mr. Lowry was nothing more than amusement. I am always amused by any confusion, especially in the cereal line, because I have been concerned with cereals; and almost everybody who has been concerned with cereals during my

history is an acquaintance of mine, some of them very close acquaintances.

My confusion was not from looking at the packages but it was the possibility to me that it was not shredded wheat and the difference was first made conscious to me by the taste, or rather the difference in the chewiness of it. It seemed hard to me. It seemed different for that reason. I did not examine the biscuit as to baking on top and bottom for the reason that I have no history that tells me that that is characteristic of either biscuit.

As I detected this difference, I looked at the carton and as a cereal man, or in my capacity as an ordinary consumer, I knew that I was getting a product of a different carton. I would like to add also that in writing Mr. Lowry originally, I did so without intending any unkind notion. In writing Mr. Lowry, I was merely commenting on a situation that existed that was comparable to the many such situations that I had to handle and guard against when I was with Kellogg, from the start. One thing that we fought desperately against when I was with Kellogg was substitution. That has always been a vital consideration with our organization, with every organization that I was with, to avoid substitution. Consequently, I have performed that same service in defense of my own position and in defense of the Kellogg Company when I was connected with it; and, in making that motion to Mr. Lowry, I had not in any way anticipated that it was in any way possible that it would be used as testimony. I think that my own letter would indicate that it was done on the basis of amusement.

The basis of my amusement was that Mr. Kellogg's product was in the position of being substituted for that of somebody else. I did not hear from Mr. Lowry but subsequently heard from Mr. Vilas asking me if I would care to give testimony.

I constantly asked for shredded wheat at the Biltmore because it is a cereal that I am eating for a specific reason right now. I have never gone into the Biltmore Hotel or any other hotel for some time past without, if I was concerned with eating it for that particular meal; asking for shredded wheat. So that is a constant practice of mine. I think the Kellogg product which I received at the Biltmore Hotel is a distinctly shredded product and I do not mean to imply that it is not a wheat product. That is claimed for it on the outside of the package. I know that the Kellogg organization would not sell anything that they did not cover on the outside of their package. I distinctly told the waitress that it was not shredded wheat; and the connection between that and her observation is a connection that I think is quite vital to you and to the National Biscuit Company. It has been a practice ever since I have been a cereal man to ask for shredded wheat meaning the food that is in that exhibit (Plaintiff's Exhibit 1). When I said to the waitress that it was not shredded wheat, I meant that it was not Shredded Wheat made by the Niagara Falls Company. I did not have any thought about the Kellogg Company or National Biscuit Company or its product when I talked with her except that I wanted to make the comparison that the product that had been manufactured by Kellogg at Battle Creek, that was the Kellogg's Whole Wheat Biscuit, was not Shredded Wheat, meaning the one manufactured at Niagara Falls; not when I was identifying it by its distinctive name; but if that was served to me, not being this product, that was served for this product, being another product. I merely took it upon myself to tell the waitress that it was not the Niagara Falls shredded wheat, but I did not mean to say that it was not what it said on the package. It contained what it said on the package. It says

"Kellogg's Whole Wheat Biscuit" I showed her the package.

If I asked for corn flakes I would expect to receive Kellogg's Corn Flakes. There have been many other brands of corn flakes. If I had asked for Kellogg's Corn Flakes and received some other brand of corn flakes, I certainly would have complained that they were not the corn flakes that I hoped to get. I very likely would have told the Biltmore that those were not Kellogg's Corn Flakes. If I were eating constantly at the Biltmore, I would tell them, and I have done that to many hotels and restaurants in the United States when I wanted corn flakes, that I wanted the best corn flakes, meaning Kellogg's.

I did not join Kellogg's until 1915 but I had been a consumer of corn flakes for five or six years previously. I had never seen the Kellogg biscuit until my contact with it here in Providence. Yesterday I got it at the Providence Biltmore. Whatever I have had to say to them has not had the effect apparently of their purchasing the other, or rather serving the other, to me. All I am interested in is getting Shredded Wheat when I ask for it. I do not think what I did injured the Kellogg Company.

As a salesman, I do not see any reason why, in selling Shredded Wheat, or in selling Kellogg's Whole Wheat Biscuit, why their salesmen, for either product, has completed his job if he does not make it clear to the man that he sells it to that, if he wants to get the utmost from either product, he should distinguish those two products on his menus.

Further, I do not think that any salesman is doing his job, on either product, when he sells it to a hotel or a retail dealer, unless he also sells the idea with the product that the buyer is not going to get at all a view of the difference between those two products, unless he distinguishes between those two prod-

ucts and ties it into the advertising of both the organizations.

And, if that had been properly done by the salesmen, so far as the Biltmore was concerned, if that job had been carried out properly, both items would show in exact relation to the package identification, on the menu, and there would be no confusion between the Kellogg biscuit and the shredded wheat on the menu, if both items were written as they are identified on the package and their appearance on the menu, so that when the consumer looked at that menu, he would know that there were two products available and he could make his choice between them.

There is nobody—and particularly, I am not concerned with how much Kellogg's Shredded Whole Wheat Biscuit the Biltmore may sell, nor do I care how much Shredded Wheat the Biltmore may sell. The only question is that, if you ask for shredded wheat and you do not get it, you certainly have a right to say that you are not getting what you asked for. That is my interpretation of the sales position of the two products; and the Biltmore Hotel—so far as any motion that I have made or any motion that I have seen anybody else make, it is certainly not intended to disturb the sale of your product.

The motion has been made to secure proper identification and proper delivery of the products, as they may be ordered in that hotel.

I think a hotel like the Biltmore should put on their menus that they carry only one brand of corn flakes, or that if they do carry several brands, they should mention them all. It would be to their advantage to do it. That is, from the standpoint of identification to the customer. When they order it, they know exactly what they are buying. The customer might not like Jersey Corn Flakes and he might take your Whole Wheat Biscuit in preference; whereas, if

they had your corn flakes and Shredded Wheat Biscuit, they might, conceivably, prefer your corn flakes. What I was concerned with in connection with the Biltmore Hotel was that when I ordered Shredded Wheat Biscuit I did not want Kellogg's Whole Wheat Biscuit. I do not claim that as a consumer I was particularly acquainted with the shredded wheat situation when I saw this first package of Kellogg's Whole Wheat Biscuit, but I absolutely claim that it was the first time I had any contact with it or ever heard of it.

I could be quite familiar with shredded wheat, as I think of shredded wheat made by the Niagara Falls Company; but it is very possible that Kellogg could have his new biscuit in different parts of the United States and still not have it in distribution in any stores where I might come in contact with it or where my wife might come in contact with it or buy it so that I may become acquainted with it.

So the basis of my feeling that I knew something about the shredded wheat situation would be my own personal contact with Shredded Wheat or what I might have heard and what I might have come in contact with, and with advertising.

I was not closely enough connected with the Kellogg organization to know that they put out a shredded wheat biscuit or advertised it as such for some years before I heard of it.

Whenever you say Shredded Wheat to me, I can not think in terms of anything but the product made by the Niagara Falls organization. I think it would be possible that I could overlook entirely the fact that the Kellogg Company had put out on a national scale shredded wheat biscuit. I never saw any advertisements of Kellogg's shredded wheat until I encountered the product, then I saw advertisements in a window in Providence. I can not recall any advertising that I had previously seen put out on Kellogg's bis-

cuit; but my interest was stimulated after getting the product by seeing advertised in a grocery store a day or two after I had eaten the biscuit that product, and that led me to believe that Kellogg was instituting a definite advertising program on this biscuit. It occurred to me that it must be.

I was particularly convinced by the window display that they were putting out a biscuit, a shredded wheat biscuit. I did not investigate as to what its contents were; but I was convinced, after seeing the window display, that they were putting out a biscuit, and that they were different than anything I had seen before, other than the contact in the restaurant.

I would say that they were giving their biscuit very definite and wide publicity.

It has been my purpose, whenever I asked for shredded wheat, to try to get the product made by the organization at Niagara Falls and if the time comes when I want Kellogg's Whole Wheat Biscuit, I will specify it as Kellogg's Whole Wheat Biscuit.

(Letters produced by the witness received in evidence and marked "Plaintiff's Exhibits 1, 2, 3A and 3B.")

WITNESS: I think if the procedure I suggest were followed in every place where Kellogg's product is distributed, it would help the sales of the Kellogg product, if the distinction on the packages were carried on to the menu; and I am quite certain that is just what the Kellogg organization wants the salesmen to get for them.

I have not had any instructions from Mr. Vila. Everything that I have done since the day of my first letter to Mr. Lowry, in connection with the National Biscuit Company, has been done in accordance with the teachings that I received when I was with the Kellogg organization. If I have done anything for the

National Biscuit Company that is valuable to them—I mean by that that is valuable to their local sales force—if I have given them any thought that puts their local sales force in a situation that they are able to help on their sales, then I have voluntarily contributed something that has been developed for that reason and for that reason alone; and I have done it many times for your organization, and that is where I learned to do it.

Well, I certainly am a free lance; and I certainly have not expected that the National Biscuit Company was under any obligation to me, when I made it possible for them to supply a product or at least take steps to supply a product that they manufactured, that I was trying to buy at some place in Providence.

If they can put the National Biscuit product, Shredded Wheat, where I can get it when I ask for it, that is all the compensation that I expect, and it is all the compensation that thousands of people expect when they write to your own organization or to any other cereal organization in the United States under similar circumstances.

I have seen thousands of letters from consumers who have tried to buy products manufactured by the different organizations for which I have worked, asking us where they can buy it or if they will please provide it through certain dealers, so that they can get it there.

I do not think my action would be effective to try to force a hotel to throw out the Kellogg biscuit and put in the Shredded Wheat. I was not in touch with the manager of the hotel in any way.

I am not now employed and I left the Kellogg Company because I had a better opportunity with the Armour Grain Company. They paid me more salary to go to Milwaukee for them and increased my salary to come to Chicago for them. I solicited the position while I was still employed by the Kellogg Company.

Every night before I go to bed the last thing I eat is a bowl of shredded wheat, meaning this Shredded Wheat. (Plaintiff's Exhibit 1.)

Before February 2d, 1932, I was not a constant consumer of shredded wheat, but I have been a cereal consumer for a great many years. Shredded wheat and half and half is the dish of my preference because I like the taste and find it agrees with me. I have been eating the Kellogg product at the Biltmore right along. In this instance I bought the package, not intending to eat it there, and I told them so when I bought it, referring to Exhibit 5. I consumed the Kellogg product but it was not the product that I asked for when I got it; there is certainly nothing the matter with any of the Kellogg products that anybody should find disagreeable. My relations during the period of my employment by Kellogg were very cordial. I have always continued with a very high admiration of their products.

I would not say that there is some one leading brand of cereal which should have the right to exclude the service of any other products when they are called for by that name; but I certainly think hotels are doing themselves an injustice if they do not identify the brands of cereal they serve. I would say that if I ran the smallest hotel in the world, if I put a menu before my trade, I would brag about the lines that I carried. If I carried five brands of corn flakes, I would certainly put them all on the menu and I think the Biltmore is really missing an opportunity when it does not do that.

I think if they say "Kellogg's Corn Flakes"—that is my opinion, now—I think if they say "Kellogg's Corn Flakes" on the menu, they are indicating that they are carrying what is accepted as the standard quality of corn flakes available. I think that applies to anything else, whether it is ketchup or what it is.

If they carry something else, there must be a reason for buying it, and the best opportunity to sell it is to let the public know that they have got it; but I think that, when they say "corn flakes" and have three or four kinds of corn flakes—in fact, I know from experience that it is the most injurious thing to profit that they can do. There must be a reason for buying it, indicated by the reason that there is a demand for it; and, if there is a demand for it, they certainly ought to identify the fact that they have got it to those who want it. And the only place they can put it to do that is on the menu. And there will be no confusion if they will do that. I do not think there is a merchandising expert in the United States who will not agree with that.

I do not think it unethical for a hotel to say merely "corn flakes" on its menu, but I think it is unwise from the standpoint of the hotel. I did not, in any way, in conversation with the waitresses or the cashier at the Biltmore, say that they had no lawful right to carry the Kellogg product, and I did not even say there was no lawful right why they should not substitute it. I made no comments on it. I have not told them a thing about any litigation and no one connected with the hotel knows anything about this correspondence. The letter of August 11th, 1932, to Mr. Lowry was my first letter concerning the Kellogg product and was written after I had seen a reference in the press to a litigation between National Biscuit Company and Kellogg Company. I hoped it would not involve me as a witness in the case.

RE-DIRECT EXAMINATION.

RDQ. 301. If you asked for shredded wheat, Mr. Sweet, what would you expect to get?

A. Exhibit No. 1, or a product of that character.

RE-CROSS-EXAMINATION.

WITNESS: I would take cognizance of the fact that we now know there are two shredded wheat products on the market. I have not been concerned with that at all. I have been concerned with getting shredded wheat of the character of that contained in Exhibit No. 1 when I specified shredded wheat instead of Kellogg's Whole Wheat Biscuit, which was not what I ordered. I shall continue to ask for shredded wheat if I want the Niagara Falls product; and I will ask for Kellogg's Whole Wheat Biscuit if I want that product. I would not ask for Kellogg's shredded wheat biscuit.

If I asked for Kellogg's shredded wheat and they had Kellogg's Whole Wheat Biscuit in stock, I think I would be very likely to get Kellogg's Whole Wheat Biscuit; but if I asked for Kellogg's shredded wheat and they did not have Kellogg's Whole Wheat Biscuit in stock, and did have shredded wheat like Exhibit No. 1, or the same character as Exhibit No. 1, I think that they would be very likely to offer it to me. I would regard it as a particular case of confusion either way. If they gave me something else, I certainly would regard it as a substitution. If I specified the Kellogg product, I would not expect to get anything else because, if I specified the Kellogg product, I would do so because it has made some special appeal to me to make it popular enough to me to ask for it and designate it by name.

RE-CROSS-EXAMINATION.

WITNESS: Now that I have been fully apprised of the facts since April of this year, that there are two products of shredded wheat on the market, I would expect to specify which one I wanted. Because of my interest in cereals, because of my regard for cereal advertising; and because of my regard for the ethics which have pretty generally existed in cereal industry.

any time that I order cereals I will order them by their trade names, and in the future I would specify whether I wanted the Niagara Falls or the Kellogg product. If the restaurant said, "We are only handling Kellogg's shredded wheat product," I would accept that statement.

Such advertising as I have seen would indicate to me that Kellogg has another shredded wheat biscuit in distribution. That is based on what I have seen as a display. I do not think it would be good business for Mr. Kellogg to try to conceal anything under false colors.

RXQ. 298. Yes, and by that display, you do not think that he is trying to do it?

A. I think that he is very definitely indicating that he is making a biscuit—and I know definitely now that he has a whole wheat biscuit and that it is shredded.

In every case where it has come to me in restaurants as a consumer it has come to me in the whole wheat package of Kellogg's.

I certainly would not want to give testimony against the Kellogg Company. My relations with Kellogg have been very cordial. I do not have any reason to want to hurt the Kellogg organization. I have no particular reason for testifying now, except that I have been asked to relate the experience that I referred to. The sole motive that I had in writing Mr. Lowry was that I thought he would want to pass it along to his local branch manager giving the history that I wrote him, and possibly have him go over to the Biltmore and see that I could secure shredded wheat when I asked for it. In other words, here is a customer who wants shredded wheat. See if you can not supply it to him when he asks for it. That is the sole thought that I had in mind.

It is fair to assume that when I wrote Mr. Lowry I had the thought in mind that I could get the product

when I asked for it. That is the sole thought I had in mind.

RE-DIRECT EXAMINATION.

WITNESS: In speaking of the Kellogg slogan on cross-examination, our own slogan when I was employed with the company w : If the customer says corn flakes, they mean Kellogg's; and, if they say Kellogg's—speaking to the retailer—they mean corn flakes; but I was anxious to use that as a basis because it is in exactly the same position today when I say shredded wheat. I mean such as is contained in Exhibit No. 1.

JAMES GALLAHUE.

Deposition taken in Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a grocery and provision dealer, 351 Tremont Street, Boston, having been ten years there, and twenty-five years in an office on Widener Street, Porter Building.

I recognize article from Plaintiff's Exhibit 1 as Shredded Wheat, also recognize the package; first knew of the article at food fair in Boston, thirty-five or forty years ago. George H. Barnes, my employer then, was manager of the fair. They had machinery and made shredded wheat, which is first time I saw it. It looked then like biscuit just taken from Exhibit 1.

I have been familiar with it since. We always carried it. Always had same general shape, size, appearance this biscuit. If they ask for package of Shredded Wheat today, we give them like Plaintiff's Exhibit 1; would not give customer anything else. If he asks for Shredded Wheat, I know immediately what

he desires. When a customer asks for Shredded Wheat, I give him that package with Niagara Falls on it.

I recall having seen on package of Shredded Wheat similar to Exhibit 1, picture of saucer with shredded wheat biscuit in. Cannot say how long; knew it was there, and thought it was on every package. If it was left off, I might not have noticed.

When our customers ask for it, they usually ask for a package of Shredded Wheat. That has been so always since we handled it, thirty-five years or more, and before that when I handled it for Barnes. Until lately, never had any other kind of shredded wheat. Never handled anything but that. I have been asked to handle Kellogg's; thought not enough difference in price to make it an object.

First heard of Kellogg's Shredded Wheat about two years ago. I think the purchasing public, my customers, mean that package, like Plaintiff's Exhibit 1, by shredded wheat.

CROSS-EXAMINATION.

THE WITNESS: I never carried Kellogg's Shredded Wheat. I know what the Kellogg package is and have seen it. It has been opened. The Kellogg package and Niagara Falls package pretty much same, except it has "Kellogg" printed on. If I were stocked with Kellogg's Shredded Wheat and a customer asked for it, I would give them Kellogg's Shredded Wheat.

The package shown me by Mr. Vilas is made at Niagara Falls. I have been familiar with the fact it is made there, for many years; had invitations to go there and heard people speak of the wonderful factory there. Never been to Battle Creek. I have seen the Kellogg's shredded wheat biscuit. Think it is little longer package, more in it. I have seen Kellogg's biscuit, a smaller biscuit than Niagara Falls Shredded

Wheat. Package did not look any larger and had 15 cakes in, against 12 in this.

I have seen Niagara Falls individual package, but not Kellogg's; in restaurants. Never handled it. I would not say it is common to illustrate food products with saucer containing some of product. Have seen peas that way; have not noticed it particularly.

Do not remember on early Shredded Wheat package picture of woman holding torch. Do not think Kellogg's biscuit introduced generally into Boston market. First saw it at Boston Wholesale Grocery Company, girl salesmen showed it to me. I figured price so little different, most people would want old article. Price of this is about $1.09 a dozen. Kellogg's, about $1, two for $1.98; $3.87 with discount. This cost $4.05, and discount about 17 per cent. Price has held steady until reduced lately. Sold it 12 cents for years; now everybody selling at 10 cents. Prices to public and grocers came down, perhaps two years ago.

RE-DIRECT EXAMINATION.

THE WITNESS: Have heard people speak of Niagara Falls factory, perhaps five or six years; two or three different occasions, that they were there and it was a wonderful factory. Other dealers and customers have been there. Customers never ask me for Kellogg's Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: I have heard Kellogg located at Battle Creek. We have always carried Kellogg line since they came out. Originally carried Kellogg's Corn Flakes, and the other products all time mills carried them. Kellogg Company has good reputation in the trade. Have not heard it charged with unfair dealing. We have tried other corn flakes but people do not seem

to want them; so we carry Kellogg's almost exclusively. Package of Kellogg's looked like a Kellogg package to me; just looked at it once or twice; did not look at it specially, but saw it was Kellogg package, because of printed signature.

FRED A. SYKES.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I am a retail grocer and provisions, at 63 Winthrop Street, Medford, Massachusetts. In retail grocery business since 13 years old; now 50. Owned present store eight years, worked there thirty years. Handled various cereals during that period, and similar grocery products.

I recognize article from Plaintiff's Exhibit 1; have sold it as shredded wheat, nearly from time it started; cannot remember year; but demonstrations of it at various food fairs in Mechanics Building; from then on, we sold it. The expression shredded wheat means the package, Plaintiff's Exhibit 1. I am familiar with it, have handled it for many years.

If customer comes to my store and asks for shredded wheat, as a rule I give him this; at times, on sales, have pushed Kellogg's shredded wheat. There has been a time when a customer has asked for Shredded Wheat and I have given him Kellogg's. At sales, with a lot of other new articles, we try to push the one there is a dollar in. Cannot tell you how often. We had the product in five-case lots, and they ran premiums, dishes, etc. We have made quite a sale of it.

Up to short time ago, trade knew only this Shredded Wheat. When they say shredded wheat, if

they do not find fault with it, we put out the other. Some found fault with it, of course; then we gave them the Shredded Wheat they wanted.

Since I have known Shredded Wheat Biscuit, it has not been in any different shape or form than as put out by the Shredded Wheat Company, that I know of. I do not use it. We sell it in cases or packages. I am not familiar with the biscuit as people who use it every day. I like other cereals, like old-fashioned oat meal.

I think at one time different label on Shredded Wheat than now, with saucer or something; do not know how long ago; but I know there was different label from now. Cannot say I ever had posters or cards in my store displaying Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: Shredded Wheat salesman asked me to come here today, said they were having discussion here regarding Shredded Wheat; all the conversation I had.

I carry Kellogg's Shredded Wheat. First time I saw the package, recognized it as Kellogg package; did not confuse it in any way with Niagara Falls package. The packages are different. I have carried Kellogg's line from time they started with Force people, and then their corn flakes right after. Always found the Kellogg people to deal fairly with me. They have good reputation in trade.

When I first had Kellogg's shredded wheat, a customer sold it to me. I featured it then at a considerable cut below this shredded wheat; made quite a display of Kellogg's biscuit. People who came into the store could see what the packages were. We sometimes put package of Kellogg's in basket on route.

When customers ordered Shredded Wheat over telephone as in past, we gave it to them. Sometimes on

sales, we put in Kellogg's. Some wanted it changed; but lot of them kept it. We sell today a lot of both kinds.

Believe I was told the Kellogg packages are a little smaller. I do not use Shredded Wheat personally; have not opened any packages. In my store, a few recognize there are two shredded wheats made by different manufacturers. I continue to carry Kellogg's biscuit. At the time I first had it, they were giving green dishes with each package, a plate or saucer, or cup; which is often practice today in introducing a new article. We have several articles they give a dish or cup with. We gave it with every package of Kellogg's biscuit, just as we advertised it, placards in the window display, prominently.

I have not noticed advertisements of Kellogg's Shredded Wheat, except window displays.

RE-DIRECT EXAMINATION.

THE WITNESS: I now stock both products; cannot swear what Kellogg's product is now called on package. All I know it by is just shredded wheat. That is what it is called when we had the demonstration. Sixty per cent. of our business is telephone. Since we ran those sales, quite a few wanted the other, and when a customer asks for Shredded Wheat, we usually give him a package like Plaintiff's Exhibit 1. Very few customers today ask for Kellogg's Shredded Wheat. We have it for those who want it.

RE-CROSS-EXAMINATION.

THE WITNESS: I always took this for Niagara Shredded Wheat. The other is Kellogg's Shredded Wheat. I take it they are both the same thing, shredded wheat.

RE-DIRECT EXAMINATION.

THE WITNESS: I have seen no packages by Kellogg with a cellophane window showing what i nside.

JESSE A. LEONARD.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I am fifty-nine, a grocer, retail, in Auburndale, Mass.; having been in grocery business twenty-six years, always in same place, my own store and business. I carry usual line of retail groceries, including cereals.

I recognize article taken from Plaintiff's Exhibit 1; it is a shredded wheat biscuit, which I have known ever since I have been in business, and four years previous, while working for other grocers, total of thirty years. Shredded wheat biscuit is a biscuit that comes out in shreds and is baked into that form. I have been through a factory and seen the process, at Niagara Falls. The only theory of that name I have is that it was given to it by its originators.

When our customers ask for shredded wheat, we give them just shredded wheat. I do not know any other. That is the only one I have ever seen or handled. I can only send a customer what we have in shredded wheat. Plaintiff's Exhibit 1, a package like that is the only one I have ever seen. Shredded Wheat has had a very large sale with me. I do not recall having seen advertisements in the form of the representation of a saucer with biscuit in it.

Cross-Examination.

The Witness: I have heard of but never have seen a package known as Kellogg's Whole Wheat Biscuit or Kellogg's Shredded Wheat. I think a grocer in town said they had it in.

ROBERT H. HAMILTON.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I have been in the retail grocery business forty years, since I was eighteen, my entire business life; at my present address, 4202 Washington Street, Dedham, Mass., five years, last June, prior to that on High Street, in Dedham. My store is Robert Hamilton & Sons. We carry the usual line of retail groceries, including cereals.

I recognize the item taken from Plaintiff's Exhibit 1 as shredded wheat, which I have known since January 6, 1895. When this discussion came up, I was interested to know how long shredded wheat was on the market and I had known it. A few days ago I looked through an old chest in the cellar, picked up old account book and saw we bought first shredded wheat biscuit January 6, 1895. I was asked about it by a representative of the National Biscuit Company and was curious to know something about it.

We have carried Shredded Wheat ever since that time. I do not recall any change in general form, appearance, or shape of the biscuit. I recognize the package, Plaintiff's Exhibit 1; do not recall any material change in it. They may have changed some of the printing. I notice a picture of Niagara Falls on the package, which has been there as far back as I recall particularly.

When a customer says shredded wheat, it means a package like Plaintiff's Exhibit 1. When a customer orders it, that is the package I supply her. Many of my customers order by telephone. They order this product as Shredded Wheat. When we get such an order, we supply this shredded wheat; have never supplied any other.

I think, some years ago, they used to have advertising of shredded wheat with a sort of saucer and two shredded wheat in it. I recognize Plaintiff's Exhibit 1C for identification as one of the old style packages. I would say we have handled shredded wheat in a package like that quite a while ago. I see at the bottom of the panel in which a building is shown, a copyright designation, but that does not refresh my recollection when we handled it. I recognize the representation of the saucer with shredded wheat, to which I previously referred. I do not know how long ago they used that package, but it is quite familiar to me.

I have a general idea in my mind of what Shredded Wheat is. When a customer asks for it, I always have taken for granted that she means a package of shredded wheat, packed as Plaintiff's Exhibit 1. As I understood, that is what this package is known as by everybody I have come in contact with, as shredded wheat.

CROSS-EXAMINATION.

THE WITNESS: I regard the term shredded wheat as describing the form and nature of the biscuit in the package, too; because I think the name applies as the biscuit, not as a shredded wheat in any other form. When I say shredded wheat, I mean a biscuit made of wheat, shredded, in this biscuit form. I mean this biscuit form. That is what they want, what they mean.

I do not, at the present time, know of any other shredded wheat biscuit on the market besides this Niagara Falls Shredded Wheat. Some time ago, there was another shredded wheat on the market, the Kellogg product, and I saw a package of it. At that time, it was called shredded wheat. I saw the biscuit, itself. I knew it was a biscuit similar to this one. It might have been a trifle different in size; I am not positive. I just saw it one time, when the salesman brought it

to me and tried to sell me some. I did not stock any of it. We carry other Kellogg products, sell a great many of them.

The salesman said, in effect, they were out with a new shredded wheat biscuit and wanted us to put it in, used the usual sales talk.

We average four to five dozen packages shredded wheat a week, which is more in packages than any other cereal, except Kellogg's Corn Flakes. I have never at any time stocked Kellogg's Whole Wheat Biscuit. The salesman only offered it to me once.

RE-DIRECT EXAMINATION.

THE WITNESS: My principal reason for not stocking the Kellogg biscuit was they were coming out and stealing the product of another firm. I told the salesman so and gave him a good, sound talking to about it. I said, "To my mind, you are simply going out and trying to steal their business and putting out a shredded wheat, which they have had on the market for years and years. I do not approve of it, do not sanction it, and will not buy it at all." I remember that particularly.

RE-CROSS-EXAMINATION.

THE WITNESS: I have always felt that nobody except the Niagara Falls company should make a shredded wheat. If I were in their place, I should think any other concern coming out with that would be an infringement on the product. I had that feeling when Kellogg first put out corn flakes and then other people did, to some extent. I feel the first one putting out corn flakes, or wheat or rice flakes, should have a preference, at least. I cannot say I feel no one else should make that same product; but I do not think he should come out and sell it as the same thing. He can make the same product.

As I recall, the name on the Kellogg package shown to me by the salesman was shredded wheat, and, of course, the usual advertising and the Kellogg's name. I have heard of Kellogg's Shredded Wheat since then. I do not think they have any right to put out a package marked shredded wheat.

I saw one of the Kellogg biscuit packages just once. I did not think it was an original package of shredded wheat, because I was familiar with the size of this package. I knew it was not. I am not a believer in someone else stealing any other man's product. I think that the shredded wheat product, as shredded wheat, under that name, and the right to make that product belongs perpetually to the Niagara Falls concern. If I discovered it was a patented product, on which the patent had expired many years ago, I would still feel the same way.

After the patent runs out on Gillette Safety Razor, for instance, I think others could make a safety razor; but I do not think they should call it the Gillette safety razor. I do not know it would be considered a Gillette type, but it would be a safety razor.

I carry two brands of corn flakes: Kellogg's and Post's. If a customer simply asks for corn flakes, we give them Kellogg's. I have no doubt Post's Corn Flakes are corn flakes. I have every reason to believe they are. I simply regard them as corn flakes not made by Kellogg.

I have never been to Niagara Falls. I knew they were somewhere before they went to Niagara Falls, but did not recall where. I was never interested in the Shredded Wheat Company in any way, except to make what money I could by selling the product. I use the product myself one or two mornings a week.

I do not believe there should be any competition in the manufacture of the product known as shredded wheat, under the name of shredded wheat. I would not think it would be wrong for me to stock Kellogg's

Whole Wheat Biscuit in a carton such as you show me, if I wanted to (Defendant's 4 for identification). I would not feel that I would be doing any wrong.

I did not stock Kellogg's because I did not think it was right for them to come on to the market with a package calling it shredded wheat. I would not say Defendant's Exhibit 4 is a wrong package for Kellogg to put out, if they are going to put out a package of whole wheat biscuit and call it shredded wheat. I, personally, would distinguish that from the Niagara Falls package, like Plaintiff's Exhibit 1, very readily. I would regard that, in color and makeup on the line of the Kellogg package. (Second carton marked Defendant's Exhibit 5 for identification.)

RE-DIRECT EXAMINATION.

THE WITNESS: Customers do not usually examine carefully the ordinary packages they receive. In some lines, like fancy goods, they examine them very carefully. I think the ordinary housewife, if we sent her Defendant's Exhibit 5 for identification, would recognize the difference between that and the Niagara Falls package.

I do not think the average person would be very much confused by the representation of a dish with shredded wheat in, as appearing on Plaintiff's Exhibit 10 and Defendant's Exhibit 4. I think some housekeepers, some housewives, would notice the difference.

Looking upon it from the point of view that it was a copy of someone else's package, I would not consider it right of the Kellogg Company to place upon either Defendant's Exhibit 4 or 5 for identification, a picture of a dish with biscuit in it.

When I talked to the Kellogg salesman, I referred to the use of the whole thing, as a whole, the package of Shredded Wheat itself, coming out, putting out on

the market of the shredded wheat itself; trying to get me to put that in and sell it or put it out in preference to a product we had been selling for years. I think the salesman had his package open. The biscuit I then saw was very similar to the biscuit in Plaintiff's Exhibit 1.

RE-CROSS-EXAMINATION.

THE WITNESS: I do not think I testified it was a smaller biscuit; it might have been a trifle smaller. I was not sure. The name on the package was Shredded Wheat. There was nothing more that I recall specifically, except on those packages the usual advertisement of the Kellogg Company. That was several years ago. The first I knew of any litigation or any prospect of it was about a week ago, when I was asked if I would come into the hearing. I was told there was a suit on between the two companies. They did not say what it involved. I looked for some information in regard to it.

It is a common practice, done quite often, to illustrate on the container of a food product the representation of a dish containing a quantity of the contents, an ordinary advertising device.

MRS. GRATIA C. SANBORN.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a demonstrator, now employed by Swift & Company, promoting sales of different products. I have been employed by the National Biscuit Company to promote sales of Wheatsworth cereal and flour, and other cereals, for just five

weeks, beginning about the thirteenth of October, 1932. I never had any other connection with them.

I recognize the article taken from Plaintiff's Exhibit 1, shredded wheat, which I have used in my own home for twenty years, always, as a breakfast cereal. The only way I would ever apply the term shredded wheat is to one of those biscuits. The only thing I know about shredded wheat is there. We always connected shredded wheat with Niagara Falls, a great many years before I knew who manufactured it. I always purchased it in packages.

The packages, as I have known them, during the time I have used it, have been similar in appearance to Plaintiff's Exhibit 1. I have bought shredded wheat in packages like Plaintiff's Exhibit 10, with a dish on the end, which I recognize. I have known that in connection with shredded wheat a number of years. If I saw a dish like that, I would naturally think of shredded wheat, the cereal breakfast biscuit, shredded wheat.

I went into a store, asked for a package of shredded wheat, and was given a package. As it was taken from the shelf, I saw it was not shredded wheat, as I know the product, not the same shaped box. This was October, 1932, in Hamilton Cash Market, Hamilton, Mass. I said to the lady serving me: "Is that shredded wheat?" She said, "Yes, shall I do it up for you?" I first said no and then yes, and it was given me. Plaintiff's Exhibit 11 is the package she sold me; my signature and the conversation that took place are on a piece of paper pasted to it, which identifies the package to me as the package I received then. I had no further conversation with the sales person at that time.

Another time, I ordered a package of shredded wheat over the telephone, from a local dealer near my home, where I am living now. A package was delivered to me similar to Plaintiff's Exhibit 11. I used it. No

package like Plaintiff's Exhibit 1 was delivered in tha order.

CROSS-EXAMINATION.

THE WITNESS: I went with the salesman of th National Biscuit Company, Kenney, to make the pur chase. He asked me to buy a package of shredde wheat. I was working for him at the time. It wa while I was working for the company then, and h repaid me.

I have only used Kellogg's Whole Wheat Biscui once, the time it was brought into my home. I do no eat cereals at all. I noticed it was the same type o biscuit, but not shredded wheat as I have always notice the shredded wheat biscuit. The size was different no particular difference in taste. I did not notice th biscuit toasted on bottom as well as top. I do not ea shredded wheat biscuit myself. I noticed the differ ence in the package as soon as the girl reached for it

I have seen food packages from time to time wit an illustration of a plate with some of the food in it That is the only type of package or food of that par ticular type that I have seen this illustration of a plat with two biscuit on. I have seen manufacturers doin that same thing on beans.

MISS ELIZABETH C. BARRETT.

Deposition taken at Boston, Massachusetts, No vember 20, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a stenographer for Colin Cole not employed by or connected with the National Bis cuit Company.

I recognize the article taken from Plaintiff's Ex hibit 1 as shredded wheat. I have been familiar with

it all my life, pretty nearly, thirty years, more or less. I have been a user of shredded wheat during that period. I purchase it at retail stores and at restaurants. It is served in restaurants, both in and out of the package. I have had it both ways.

Shredded wheat or shredded wheat biscuit conveys to my mind a sort of stringy substance, and I know it is more or less porous. It is shredded wheat. Shredded wheat is the original shredded wheat; Shredded Wheat Biscuit from Niagara Falls, not from any other place, always from Niagara Falls.

At the Hawthorne Hotel in Salem, Massachusetts, about three weeks ago, I asked for shredded wheat, and they brought me some biscuit that looked similar to a shredded wheat biscuit, not as large, came in a package marked Kellogg's Wheat Biscuit or something like that. I called the waitress and asked if it was shredded wheat. She said yes. There was a package with two biscuit, and I said, "This is not shredded wheat." She said, "Yes, it is." I said, "Does it say so on the package?" She said, "No. Well, it is, just the same." She did not take the package back. I finally accepted it. I kept the box they were in. I recognize Plaintiff's Exhibit 12 as the carton delivered to me then.

I also brought with me a menu card, which is Plaintiff's Exhibit 13. I do not know who put the pencil mark around the words shredded wheat. I did not do it.

I have noticed and been familiar for a long time with the picture of a dish with biscuit in, such as is on the end panel of Plaintiff's Exhibit 10, in connection with shredded wheat advertising. I have purchased packages of shredded wheat with that picture on them. For fifteen years, this has meant shredded wheat. If I saw that picture of a dish on another package, it would mean shredded wheat to me.

I have seen packages like Defendant's Exhibit 4. The panel of that package with a dish with two biscuit in it means to me shredded wheat.

CROSS-EXAMINATION.

THE WITNESS: I came to testify today through Mr. Sullivan, brother of a friend of mine. I imagine he is connected with the National Biscuit Company. He was talking about his company and more or less joking. He said, "If you go to lunch, order some shredded wheat." This was at the Hawthorne Hotel. That was the only time I had any conversation with him about the case. I made a written statement of the incident then and signed it.

I have seen packages like Defendant's Exhibit 4 in stores, up on the shelves. I have used other Kellogg products.

I have eaten Kellogg's Whole Wheat Biscuit on other occasions besides this incident at the Hawthorne Hotel.

I think I have seen within a couple of years a package of Niagara Shredded Wheat with the illustration of the dish. I have seen other food products in packages with illustration of a dish containing some of the product in the container. I do not think it is necessarily a method used in a great many food packages. I would not be surprised if you told me you could show me dozens of packages in a grocery store, each illustrating a dish with some food in. I have only noticed it on this package. This means shredded wheat to me.

I have noticed a dish on the outside of the Kellogg package, too. Those two instances are the only ones I recall.

MISS MARIE CREEDON.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I work for the John F. Cabeen Company, plumbing and heating; not connected with National Biscuit Company in any way whatever.

I recognize the item taken from Plaintiff's Exhibit 1. It looks very much like shredded wheat, but a little smaller than the biscuits I have seen. I have known shredded wheat all my life, all of twenty years or more. I have used shredded wheat more or less during all my life and have bought it at stores. I have ordered it by telephone. I have been familiar with it in a package like Plaintiff's Exhibit 1, and I have seen it in a package like Plaintiff's Exhibit 10. I have often noticed a picture such as is on the end of Plaintiff's Exhibit 10 in ads in magazines.

Shredded wheat to me means a wheat biscuit made in Niagara Falls, a product of the Shredded Wheat Company (reading from the package in front of witness). It does not mean the product of any other concern or company. I never connected it with anybody but the Shredded Wheat Company.

Recently, I went to a store in Salem, Massachusetts, asked for shredded wheat, and was given Kellogg's Whole Wheat Biscuit. It was a National or Hurder's, or one of those grocery stores, on North Street. The fellow took down this Kellogg's package. I said, "That is not shredded wheat." He said, "Oh, yes, it is; it is just the same thing; only you are getting fifteen in a package instead of twelve. You are getting more in a package." I said, "Is that exactly the same thing?" and he said, "Yes." I took the package, which

is Plaintiff's Exhibit 14. The piece of paper pasted thereon is my statement, signed by me.

CROSS-EXAMINATION.

THE WITNESS: I had never made any other purchases at this store of G. B. Hurder. Mr. Sullivan of the National Biscuit Company asked me to go there to buy shredded wheat. I have known him maybe a couple of years. He refunded what I had paid. He just asked me to ask for shredded wheat and observe what was said. I said, "It is not shredded wheat." He did not tell me to say that. He told me to ask for it and see what they gave me. He did not ask me to go to any other store, just picked out that one for me. There are quite a number of National stores in Salem besides that. I usually do my buying over on my street, that I prefer. He did not say anything about going to my own grocer.

CHAUNCEY A. STIMETS.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, at 1286 Washington Street, West Newton, Massachusetts, in business for myself for seventeen years; worked in it thirty-four years, in West Newton.

I recognize the article taken from Plaintiff's Exhibit 1 as Shredded Wheat from Niagara Falls. I have sold it, I guess, thirty-three or thirty-four years. I cannot say it has changed during that period in general appearance, size, or shape of the biscuit. I should say it has been substantially the same. The package is practically the same. The lettering has been prac-

tically the same. I could not say just what has been changed in that. I recognize and should say I have handled the product in packages like Plaintiff's Exhibit 10. I do not recall if the dish with biscuit in on the end panel of that package has been on all the time or not. I do not recall seeing that dish with the biscuit in it, in connection with shredded wheat.

Shredded wheat, to me, means this: They use it in the business. They fill orders from that Niagara Falls Shredded Wheat. Anybody that asks for shredded wheat, that has always been our way; filling orders with Shredded Wheat of Niagara Falls. If a customer asks me for shredded wheat, I fill it with this Niagara Falls Shredded Wheat. When a customer orders shredded wheat, she expects to receive Niagara Falls Shredded Wheat. That has been true ever since I handled it.

CROSS-EXAMINATION.

THE WITNESS: I am not familiar with any other shredded wheat on the market besides Niagara Falls Shredded Wheat. I have heard of Kellogg's Whole Wheat Biscuit; have it in the store now. I would never fill an order for shredded wheat with that. I would supply it in answer to calls for whole wheat biscuit. I have had people call for Kellogg's Whole Wheat Biscuit and gave them that product. I think I tried some when it first came on the market, last three or four years, something like that. It is an advertised product.

RE-DIRECT EXAMINATION.

THE WITNESS: Once in a while we have a call for Kellogg's Whole Wheat Biscuit. The sale is very small.

MRS. FLORIDA P. McCABE.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: My husband is an agent of the National Biscuit Company.

I recognize the article taken from Plaintiff's Exhibit 1 as shredded wheat, with which I have been familiar since I was a little girl. I have been a user of it. I eat it every other day, and have been a purchaser of it for eleven years.

Shredded means to me something taken apart, shredded to pieces. The minute I see shredded wheat, I always think of shredded wheat coming from Niagara Falls. I positively never think of shredded wheat coming from any other place; I never have any such idea.

The biscuit I have known as shredded wheat has always been the same to me, throughout the years. I have been familiar with the package in which I purchased it. It has changed a little bit. It used to have a saucer with biscuit in, like the picture of a dish with two biscuit in on the end panel of Plaintiff's Exhibit 10. I have known that for a long, long time. It is associated in my mind with shredded wheat. I have never seen it used to advertise any other product until the day when I was given a different package. I needed shredded wheat and I went into the store of Fontaine, at Castle Hill, Salem, Massachusetts, about a month ago. I asked the clerk for a package of cigarettes, and he gave them to me. Then I asked for a package of shredded wheat. He handed me this package, Plaintiff's Exhibit 15, which did not look like shredded wheat to me that I have been using. I asked him if it was shredded wheat, and he said yes. I said, "It does not look like the shredded wheat I have been using." He

said, "It is positively the same thing, except it is a smaller biscuit." I said, "I want to make sure that, when I call for anything, I find what I want." He said, "That will be the same."

I took the package. The piece of paper attached to it is my report, signed by me. That is my signature on that exhibit. Having refreshed my recollection by looking at the exhibit, the store was 327 Jefferson Avenue, and the date, November 2, 1932.

CROSS-EXAMINATION.

THE WITNESS: My husband positively did not ask me to make this purchase. I wanted shredded wheat. After I told Mr. McCabe I wanted shredded wheat, he said, "Why do you not go to buy it in that store?" So I went. I have no regular store to trade in; go everywhere. I live at 49 Hawthorne Street, Salem, about five minutes from 327 Jefferson Avenue. I had not made purchases in that store before; that is the only one I made there.

My husband did not tell me to get it there. He asked me if I wanted to go. It was convenient for me because I was going up that way. I have bought shredded wheat since that time in another store. That time I went to the store across the street. They did not have it and sent me to this store, which my husband had suggested. I needed shredded wheat. The typed notice was put on the package at the National Biscuit Company, Jefferson Avenue. When I got the package, I turned it over to my husband, who took it away. Some time later he brought it back to me to sign, and I signed it, the same day. Mr. Kenney brought it back to me the same afternoon to sign. I had turned it over to Mr. Kenney, not my husband. He is connected with the National Biscuit Company, I believe. I was with Mr. Kenney that morning. He

stayed outside while I made the purchase. He was not outside the first store I went to. I had been the day before to that store and knew they were out of it. Nobody suggested to me the day before to go to the store which was out of it. That store was on the way to the beach. I would stop if I needed little things in the summer once in a while.

The package I needed the day before, I needed shredded wheat. If they wanted to buy it for evidence —that was a package I was buying for them, if they had had shredded wheat. Mr. Kenney did not tell me to go to that store, also. Mr. Kenney came to me the next day and suggested I buy it at the Fontaine store, and he joined me and took me to the Fontaine store and stayed outside. I did not go to any other stores that day with Mr. Kenney.

HAROLD M. ROBBINS.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I am buyer and store manager of the Star Market Company, just one store, at Watertown, Massachusetts, meats, groceries and provisions. I have been in the retail grocery business fourteen or fifteen years, with Star Market six years. We deal in a full line of groceries, including cereals.

I recognize the article taken from Plaintiff's Exhibit 1 as a shredded wheat biscuit. I have known it since I have been in the grocery business and before, as a consumer. The Star Market carries it. During the time I have known it, I could not say whether it has changed in appearance, shape, size, color, etc.

If you came in my store and asked for a package of shredded wheat, and I was on the counter, I would

pass you shredded wheat biscuit, the same as in Plaintiff's Exhibit 1, with the Niagara Falls picture on the end. Shredded wheat means to me a product that comes from Niagara Falls, on account of the picture of the Falls on the end of the package. It is the only product I would call shredded wheat. If a customer would come in and ask for shredded wheat, that is what they would get.

To my customers and the purchasing public generally, shredded wheat means the same as it does to me: that the package of the Niagara Falls company is Shredded Wheat.

I have seen in the ads of the Shredded Wheat Company or the National Biscuit Company an illustration representing a dish containing the biscuit. As I remember, that was on the end panel, as in Plaintiff's Exhibit 10. I do not remember just when or how long. I have noticed it mostly in the ads, not so much on the package. I refer to magazine ads.

Kellogg salesmen have been in to me to buy their biscuit, but I did not stock it. I stock everything in Kellogg's, but not the biscuit, because shredded wheat has the demand and the call; and it would mean we would have to push and explain to people that Kellogg's biscuit was something similar. Perhaps the customers would take it; perhaps not.

SAMUEL ABRAMSON.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I am a retail grocer in business for myself, at 331 Eastern Avenue, Malden, Massachusetts. I have been in the business thirty-one years, for my-

self, in Charlestown a short while, and twenty-eight years in Malden. I carry a full line, including cereals.

I recognize the article taken from Plaintiff's Exhibit 1 as shredded wheat, which I have known more than twenty years. The label has changed, maybe once, to my knowledge. The biscuit has remained the same thing. I carry this line of shredded wheat biscuit and have carried it about twenty years. The public has always asked for shredded wheat. When a customer asks for it, I give him shredded wheat, positively. If they ask for shredded wheat, we give them shredded wheat. A customer never asks for anything but shredded wheat. We forget the company or where it is coming from or what it is, when they ask for shredded wheat.

I happened to be at Niagara Falls once. That is the reason I know where it comes from. The chances are I might not think of it, or maybe I would. I saw the factory.

I saw a representation of a dish with two biscuit in it, a few years ago, in connection with shredded wheat. That was like the dish on Plaintiff's Exhibit 10, which I recognize. It must have been five, or eight, or ten years ago. A representation of the dish with biscuit does not mean anything to me, because we are in the habit of calling it shredded wheat.

We tried the biscuit of shredded wheat put out by the Kellogg Company, and it did not go very fast. We had that shredded wheat, but it did not go very fast, and we cut it out. That was a couple of years ago or so. The customers used to call it shredded wheat biscuit and shredded wheat.

CROSS-EXAMINATION.

THE WITNESS: In the last six months, we have been connected with a voluntary chain of 155 members.

I have no idea if any member carries Kellogg's biscuit. Nobody was interested in it. We carry it once in a while; but it is a kind of merchandise that does not run fast, and we try to cut it out.

One of the salesmen asked me if I would come here. I told him I had no objection. He did not tell me why; just asked me if I was going to Boston Tuesday. I told them I was going to see the doctor. I do not know if any other members of our chain are here today. I have not go my list.

If a customer asks us for Kellogg's Whole Wheat Biscuit, we are just around the corner from Northern Products, and we go there and get it, maybe a dozen at a time. We always get a lot of shredded wheat, because there is a big demand for it.

It is very common to put an illustration of a dish with the food on packages of canned food, such as baked beans, or peas. I remember Peter Pan peas used to have it with a dish, but that has been taken off. I have not noticed that practically every food product in packages has some such representation.

RICHARD CLARKE.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I am a grocer, retail, under name of L. E. Smith Company, in Lexington, Massachusetts, forty-five years altogether, thirty-two in Lexington; at present time in partnership with two others. We carry a full line of meats, groceries and fish; and we have cereals.

I recognize the article taken from Plaintiff's Exhibit 1, as shredded wheat, which I have known since I

was in Lawrence; I should say about thirty-five years ago. I should say the appearance, shape, size, color, etc., of the biscuit have remained pactically the same throughout those years. It looks a little browner on top. It has not been altered in any other respect that I have ever seen. The package has been changed, just simply on one end, I should say. One end used to have, I think, a dish with a biscuit in or alongside of it. The other end had Niagara Falls. Plaintiff's Exhibit 1 has Niagara Falls on both ends.

I know there was a change in the package while I have been in Lexington. Plaintiff's Exhibit 10 is the one I have in mind. That was used by the Shredded Wheat Company I think up to a very few years ago.

If anybody should order shredded wheat, we would give them the one with the Niagara Falls on, which is the only one we ever had until the last few years.

The term shredded wheat has a connection in my mind with the origin or source of the product. I took it that it meant that they were the originators of the shredded wheat, when this first package came out. We never ordered anything but shredded wheat, never signified anything but the one kind; and we always got the one kind.

From my experience over the years as a retail grocer, the consuming public has in mind that this is the package they would want, the Niagara Falls package. I recall that, because that is the only way I know of it.

A short while ago, we were out of shredded wheat and had Kellogg's biscuit. A lady came in and asked for shredded wheat. The clerk came to me and said, "What will we give her?" I said, "Give her that. Is that not shredded wheat?" He gave it to her and she refused it. That is the only such incident in my experience, about a year ago. She wanted the kind she had always had, she said.

I do not think the representation of a dish with two biscuit on it on a package of cereal conveys to my mind any indication of its source or origin. We carry Kellogg's Wheat Biscuit, and we carry Muffets, which is something on the same principle, but a round package, made practically like a shred, something like shredded wheat. I think it resembles in appearance, but not in shape, shredded wheat. A Muffet can readily be distinguished from a shredded wheat biscuit. Customers usually ask for these products by name.

When they ask for the Niagara Falls product, shredded wheat is all they ask for. I have never had anybody ask for anythng else, except that one instance, where she asked for shredded wheat and we gave her the other. Our customers sometimes ask for Kellogg's Whole Wheat. I do not think I ever had any ask for Kellogg's Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: Mr. Murphy, the man from the National Biscuit Company, asked me if I would come in and testify how long I had been in business and what I know about shredded wheat. I told him what I have told you. Seven years I was painting, but most of the time, I have been in the grocery business. Our firm belongs to the Pioneer organization. I have not seen any members of it here today.

BENJAMIN FEINBERG.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am in the department food market business, the North Shore Market. We carry every

kind of food, including groceries, fish, meats, cereals. I have been in that business about 18 years, during which I have conducted this food store. Previously, I was in the wholesale grocery, salesman for five years.

I recognize the article taken from Plaintiff's Exhibit 1 as shredded wheat, with which I have been familiar ever since I have been in the grocery business. The biscuit looks the same to me as it has always. I recognize the package. I remember the picture, as far back as I can remember. I cannot say I have looked it over thoroughly to notice any changes. I remember the picture of Niagara Falls on the end and the buildings on the side panel.

I recall seeing a carton like Plaintiff's Exhibit 10. I never studied the back of an outside container, but I remember the container, the biscuits, and buildings. I do not remember the time, the two biscuits and plate were used. I would say the package looks just like this now, because it is one of thousands of things we sell. Naturally, I do not get down to examine the package, as long as the contents are the same. When a customer asks for shredded wheat biscuit, we give him shredded wheat. It is the only thing I have, except sometime ago, when Muffets came in.

We were a little indisposed against shredded wheat then, because Muffets were good priced when first introduced; and we tried to substitute that way. At one time, the chain store cut the price and there was no profit for us in shredded wheat. But nobody would accept Muffets, because they asked for shredded wheat. The only reason we brought up the Muffet question was that the salesman sold me the idea of substituting Muffets for shredded wheat, and we were not successful in doing that.

We just know the shredded wheat as the biscuits there; that is all we know of. I do not know of any article of that sort, any different thing but shredded

wheat. I have dealt with the public direct in selling them cereals. The only thing I know as shredded wheat is this shredded wheat that comes in that package, Plaintiff's Exhibit 1, just that sort and nothing else. The buying public mean by shredded wheat just that package and absolutely nothing more, as far as my experience is concerned. That has been true ever since I have been in business.

The expression good-will means to me the fact that, if something becomes established, it ought to have a certain amount of protection, after you have worked hard to build it up. As a merchant, I would say I think there is good-will, as I understand it, attaching to shredded wheat, on account of the advertising of it and the good-will that it has built up of itself, so that, whereas, when we tried to substitute, it did not work out. I know from observation that the Shredded Wheat Company has advertised its product.

CROSS-EXAMINATION.

THE WITNESS: I was asked if I would care to come down to the Parker House, visit representatives of the shredded wheat people, and answer some questions about shredded wheat. The salesman talked to my head bookkeeper, who got me when I was very busy. I had to go to the hospital every morning anyway, and dropped in here on my way back. My bookkeeper told me it was practically the same thing I just repeated, about shredded wheat, and if I knew anything about the Kellogg's Wheat Biscuit. To be frank with you, I did not know there was any such thing. It was never offered to me personally. I am a busy man, except the last few quieter months, and I could not give my attention to all departments. I was doing the buying. Outside of that, I do not seem to have been approached about it.

I belong to the Thrift, a voluntary chain, in order to get special discounts. I do not know if any members handle any Kellogg's biscuit. If I had known, I would have known about Kellogg's Whole Wheat Biscuit. I heard of Triscuit, but never of Whole Wheat Biscuit. This is the first I heard of it, because of what the salesman asked my bookkeeper.

I had some trouble with shredded wheat, because I found I could not get it cheap enough to get a competitive price. We put in Muffets, thinking it was a good way to resist chain store competition. They were a Quaker product. It looked like a shredded wheat. We thought it would take its place. I do not know how long Muffets have been on the market. We sell very few. We carry it and have a few calls. It is circular. I would not call it cup shape.

I have never seen any package like Plaintiff's Exhibit 14, never handled it in my store or had anything to do with it and do not know what kind of product is inside the package; do not know anything about it.

ARTHUR R. ELLIS.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, at 62 Bacon Street, Waltham, Massachusetts, in my twentieth year in business in Waltham.

I recognize the item taken from Plaintiff's Exhibit 1 as shredded wheat, and have known it at least twenty-five years. I remember seeing it first in England when I was an errand boy, twenty-five years ago. I am just over twenty-one years here. During that time, I have carried shredded wheat among cereals. As far as I can

see, the form, appearance, shape, and size of the shredded wheat biscuit is practically the same as when it first came out, or when I first remember it. I cannot see anything different in the package from what I have always known. Plaintiff's Exhibit 1 certainly looks familiar to me. I have sold quite a lot of it, the second largest cereal seller we have in the shop. I recognize the picture of Niagara Falls on the end panels, which has been on the package since I have known it.

I can remember a package with a picture on the end with a dish with two biscuit. I do not have to look at Plaintiff's Exhibit 10 to recognize the dish. That is what I have reference to. I cannot recall any time that was not there. I see it is not on Plaintiff's Exhibit 1, so I am wrong there. Plaintiff's Exhibit 10 is the old package we had. I should say it was up to within three or four years ago, prior to that for at least ten years.

For shredded wheat, I never knew anything else but just shredded wheat. To me it has always signified the picture of the factory at Niagara Falls, and this biscuit inside, such as I see in Plaintiff's Exhibit 1. Shredded wheat has never meant any other product to me. If a customer comes in my place and asks for shredded wheat, that is the only thing I know to sell them, Plaintiff's Exhibit 1, the Niagara Falls product.

I have never sold Kellogg's Shredded Wheat Biscuit; but I have sold the Triscuit, which is, I suppose, made of somewhat similar ingredients, but it is not the same type of biscuit. I guess the National Biscuit Company makes Triscuit at this time; made by the Shredded Wheat Company, I guess, before National took it over. I have carried Kellogg's Corn Flakes, and Kellogg's Bran, and things like that; but I do not carry their shredded wheat biscuit or whole wheat biscuit.

CROSS-EXAMINATION.

THE WITNESS: Mr. Murphy of the National Biscuit Company asked me to come down today. He told me Kellogg was putting out shredded wheat biscuit, and the National people were up in arms about it; that they did not like it, and they were going to fight it. He asked if I would come down to testify. I had sold shredded wheat; did not ask me whether I had carried any of Kellogg's Shredded Wheat.

I am an independent, just for myself, do not belong to any buyers' chain. I have never had any experience with Kellogg's Biscuit, like Plaintiff's Exhibit 14; but I have seen a package like that before. A man came in the store and tried to sell it to me. I did not buy it. I usually buy through wholesalers; generally through Washington Street office there. We get our shredded wheat now direct from National. Kellogg sells its products to wholesalers.

Kellogg's Corn Flakes is the largest cereal seller we have. I have known of Kellogg for many years and always found them always fair in their dealings. I have handled other Kellogg products besides Corn Flakes.

RE-DIRECT EXAMINATION.

THE WITNESS: I did not stock Kellogg's biscuit because I guess I am kind of funny. I do not believe, after a man has established a business, anybody should come up behind him and take his business away; nor that, after Shredded Wheat has been on the market so long and got such a fine reputation, somebody else should come and take it away.

When I said I found Kellog's fair in their dealings, I meant they have always treated me all right in my dealings with them. In that particular thing, I do not think they are doing the right thing.

RE-CROSS-EXAMINATION.

THE WITNESS: I think this package is an unfair package as compared with theirs. I think absolutely it would be confused with their package. I think surely this package, Plaintiff's Exhibit 14, is comparable to Plaintiff's Exhibit 1. Taking Plaintiff's Exhibit 10 and Plaintiff's Exhibit 14, I do not think that is right. I do not believe in the whole thing, the product itself. The Shredded Wheat people have built up a business. Kellogg has a darned good business, Kellogg's Corn Flakes. Why should they come and meddle with this one?

I handle Kellogg's Corn Flakes and Post Toasties. I did not sell one of Post's to a case of Kellogg's Corn Flakes. We have not the demand. I did not give it a thought when Kellogg's brought out Corn Flakes and then Post Toasties came out. I do not like the Post Company introducing competition in the corn flakes. I do not think that is just. I feel Kellogg should have had a complete monopoly in their brand of corn flakes, because they brought it out. I do not know as to the National Biscuit Company. I will go back farther than that and say that the Shredded Wheat Company should have a monopoly, for all time, absolutely.

RE-DIRECT EXAMINATION.

THE WITNESS: Eliminating for the moment the words "Kellogg" and "biscuit," the picture of two biscuit on a dish represents shredded wheat to my mind. It is one of these, and it is in a dish. Taking a biscuit from Plaintiff's Exhibit 1, taking the two together, it is just a small picture of the shredded wheat. I think it is unfair.

RE-CROSS-EXAMINATION.

THE WITNESS: If the Kellogg package were made so that, in my idea, it was not a scale copy of the

Shredded Wheat Company package, I think it would still be wrong. It is not necessary. There is no need for them to put it on the market, no call for it. That is not the reason I did not put it in. I surely want to testify that I turned down a product I thought there was a demand for. I have done it in several cases. I know there is not a demand for Kellogg's, in my lifetime, anyway. I turned it down on the ethical ground I thought it was not fair to the National Biscuit Company, through my lifetime, anyway, if not perpetually.

I cannot say that I did have any feeling about stocking competitive Corn Flakes against the Kellogg Company. To be honest, I think Kellogg's Corn Flakes and Post Toasties are two different products. One is a lot thicker, the Post Toasties. In my opinion, they do not taste half as good. There is really no comparison between the two. If they made the same kind of thin corn flake which could not be distinguished from the other, I would refuse to stock them. On that ground, I think Kellogg should have a monopoly on them for all time. If they bring it out, put it on the market, and everybody is satisfied, I do not think they should come across and take advantage of their advertising. All the stock of corn flakes I have tried in the store are Kellogg's and Post Toasties. I have been offered many others.

I just like to have one brand and one kind of product, if it is a good one. That is a more convenient way for me in carrying on the grocery business. It prevents me from getting stocked up with a lot of different brands.

LUCIEN N. ROBINS.

Deposition taken at Boston, Massachusetts. November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am in the retail grocery and provision business and have been at my present place about 20 years. I was in Charlestown, running a store there for about nine years, and was over there eighteen or nineteen years. During that period, I dealt in general lines of groceries, buying and selling, cereals among others.

I recognize the article taken from Plaintiff's Exhibit 1 as a shredded wheat biscuit, with which I have been familiar as long as I can remember. We sold it years ago in Charlestown; I should think, as long as I have been in the business. I should think, all the time I have known it, the biscuit has been about the same. It is about the same as I have always known it.

Shredded wheat means to me a breakfast food, a cereal. If a lady comes to my store or telephones and asks for a package of shredded wheat, we give her a package like Plaintiff's Exhibit 1. There is no other product I know of I use to fill an order for such an article. I know my customers, when they say shredded wheat, have in mind that package.

I have had occasion to know, over the period of years I have been handling it, that this product has been advertised, and it has always been one of our best sellers. We never have had any trouble with it in any way. I think there is a large demand for shredded wheat. I do not know exactly what would cause that demand, any more than what they like and want.

I have seen advertising of shredded wheat, consisting of a picture or representation of a dish with biscuit in it. I do not know if it was carried on a package. I recognize Plaintiff's Exhibit 10, as a package

that has been used by the Shredded Wheat Company, and I remember the picture of biscuit in a dish now. I do not know how long it has been used. It seems to me that is the package, as long as I have known it.

CROSS-EXAMINATION.

THE WITNESS: A National Biscuit salesman asked me to come to testify; wanted to know if I would come down to some kind of meeting; said there was some sort of meeting between Kellogg and National. He did not seem to know anything about what he wanted me to testify to.

I buy shredded wheat through the Boston Wholesale Grocery Company; that is, I did, but not now. We bought it until after National took the distribution over from the wholesale grocers, as a National Biscuit Company product. I cannot say how long ago it was added to the National Biscuit line. I have chain competition near me. They handle National Biscuit Shredded Wheat. I do not know how they buy it. I do not know their prices and discounts, any more than hearsay. I always supposed they bought the same.

I know nothing about Kellogg's biscuit, never have carried it in my store; do not think it was offered to me; will not say it has never been. I do not know much about the product; do not know that I have ever seen any. I handle Kellogg's Corn Flakes, which I think is a bigger seller than shredded wheat.

JAMES KERSHAW.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I have a retail grocery and provision store, at 361 Broadway, Revere, Massachusetts.

where I have been about twenty years. I have been in retail grocery business twenty-five years.

I recognize the article taken from Plaintiff's Exhibit 1 as shredded wheat, which I have known since I was a baby, old enough to eat it. I am a consumer of it as well as a dealer. I have to eat it. I used to like it but do not care much about it now. When I was a hungry boy, I liked it. During the time I have known it, its appearance has been about the same. I do not see any change. I remember the package. They always look alike to me. I never see any change in it at all.

When a customer asks for a package of shredded wheat in my store, that is all she gets, because that is all I ever handled. All I know of shredded wheat is that package. I have known it as shredded wheat ever since I can remember knowing anything. When I hear the expression shredded wheat, I go for that package. That is it. I never had anything but this shredded wheat in my store. When a customer comes in and says she wants shredded wheat, she always gets that. I had no other to see whether there was any special one or not; only they must like it. I sell a great deal of it. They do not bring it back and say they do not want it.

I do not know about the representation of a dish with biscuit in it. I recognize it by knowing the front with the building and so on. I do not recognize and have no recollection of Plaintiff's Exhibit 10.

CROSS-EXAMINATION.

THE WITNESS: I never heard of Kellogg's biscuit until I happened to see it today. I just saw it here. I might have had it offered to me. I turned down lots of salesmen, had a lot of trouble with them.

In Corn Flakes, we just have Kellogg's. My reason for having one brand is to keep it fresh. I have

much competition, but I meet it by keeping it fresh. I have my cake down to one brand and keep it fresh. It is desirable from our standpoint to keep one brand and keep it moving along. If I were offered another brand of shredded wheat, the chances are I would turn it down, for that reason. Generally speaking, I like price competition between different manufacturers.

I buy what I want through New England Stores Supply. If I cannot get it there, I buy it outside for cash. I buy shredded wheat directly from National Biscuit Company, not through any wholesaler or chain: because I can buy it from them with profit and sell it the same as they. I handle other products of the National line, cookies, which are delivered to me along with other products when I order them from the National.

I have been buying shredded wheat direct from National ever since they took it over. I have tried other brands of Corn Flakes, but they want Kellogg's.

HARRY ADRIAN.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am in the retail grocery and provision business, at 102 Main Street, Malden, Massachusetts; having been there ten years, my entire grocery experience.

I recognize the article taken from Plaintiff's Exhibit 1 as shredded wheat, which I have known for about twenty years. I was a consumer of it before I was in the business and still use it. It is a favorite cereal in my home. I am familiar with the package and have known it for the same time.

If a customer asks for shredded wheat, we give her shredded wheat, for we have no other in the store. It means whole wheat biscuit, with a picture of Niagara Falls, with the factory. The name shredded wheat carries with it an indication of the fact that it is made in Niagara Falls.

We had a peculiar experience once, passing some shredded wheat which was not that product or in that box to a customer, and she said she wanted the one with the Falls on it, refusing it until I produced the other. What we tried to give her was Kellogg's Whole Wheat Biscuit. I had one case in the store and it lasted so long I would not reorder it. I had to discontinue the sale of the whole wheat biscuit because we do not like that long a turnover in the store. We ought to have cereals once a month.

I opened up a package of Kellogg's biscuit, took them home, and liked them very much. They are precisely the same, only it is probably smaller. In my experience, it was a trifle crisper when milk was poured over it; a very nice flavored biscuit.

If I had a Kellogg's biscuit on the table outside the package, I would think it was a Shredded Wheat Biscuit. It would be hard to differentiate them without the box.

I think the shredded wheat biscuit like those in Plaintiff's Exhibit 1 have a great reputation with the consuming public, because it has been before the public eye so long a time that one does not conceive of shredded wheat, unless it is in that style package.

The dish on the package of the shredded wheat is one of the outstanding features of shredded wheat, as long as I can remember. Even in my younger days at home, it had a dish with two biscuit.

I have seen a package like Plaintiff's Exhibit 14; only the one we had before had cellophane, and I do not believe there was a dish. Shredded wheat showed

through the cellophane, the window, which showed the ends of the biscuit inside the package. A person seeing that package in a pile, without reference to the reading matter on it, but seeing the saucer and the two biscuit, would get the impression it is shredded wheat.

CROSS-EXAMINATION.

THE WITNESS: I have no doubt it is shredded wheat. I was asked to come to testify today, by a representative of the National Biscuit Company. I also handle their other products. I used to buy shredded wheat through the wholesaler. Since National took it over, I buy it both ways, direct and sometimes through the wholesaler when he gives us a better trade than the National. I cannot conceive how they do it. A jobber will come in and say he will give us a good trade for shredded wheat, and we take a case. Maybe he is trying to get some money he needs or trying to get into the store to sell us other merchandise.

I do not know whether the National distributes its merchandise through wholesalers or not. Most of it is distributed by themselves. I handle several products in competition with National. We have Sunshine, Feldman Biscuit, Weston Biscuit. We have a special trade that asks for those. We have just Kellogg's Corn Flakes and Post Corn Flakes.

RE-DIRECT EXAMINATION.

THE WITNESS: I do not think one glancing at Exhibit 14 be led to believe it was the Niagara Falls Shredded Wheat; because, if they did not have Niagara Falls on, they would know it was not the shredded wheat they had always been buying. Maybe they would know it was a biscuit of the same kind. I had the occasion I spoke of, where a customer asked for shredded wheat, and I offered her Kellogg's. She looked the

package all over and said it was not the biscuit she wanted: "I want it with the factory on."

RE-CROSS-EXAMINATION.

THE WITNESS: That one instance is the only one I recall. I did not have shredded wheat, and I did not want to lose the sale. We had just one case of Kellogg's biscuit. It was a slow seller, so I did not want it in the store.

W. A. DOYLE.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am now demonstrator on shredded wheat and cereal for National Biscuit Company, with whom I have been about three months. Before, I was with Arbuckle Coffee Company in New York City. We have just been going from store to store here, where they designate.

I am familiar with shredded wheat, having known it ever since I have been able to talk and see things; all my life. I recognize Plaintiff's Exhibit 1 and contents as shredded wheat, that I said I have known all my life. It is just exactly the same form and appearance of biscuit as I knew when I was young.

I know shredded wheat has a reputation with the public, from my experience in purchasing it; it is the only shredded wheat I ever knew, the only box I would ever accept as shredded wheat. The same applies to the public at large. The good will of the public is in Shredded Wheat; and there is nothing else you could call shredded wheat.

I had breakfast at the Biltmore Hotel at Providence, Rhode Island, November 7, 1932, and ordered a

serving of shredded wheat. They brought me a package of Kellogg's biscuit in the original package. I told the girl that was n[illegible]e shredded wheat I wanted. She said, "That is [illegible] shredded wheat we serve." I did not eat it; bu[illegible]the package and the menu they listed it on alo[illegible]e. Plaintiff's Exhibit 16 is the package and Pl[illegible]'s Exhibit 17 the menu I took at that time.

I had a similar experience last summer, while I was connected with Arbuckle Coffee in New York. Mr. Kenney and I were at breakfast in Doukas Cafe, Keene, New Hampshire. We ordered shredded wheat. A gentleman who I think was the proprietor brought a serving of Kellogg's biscuit. We objected to it and said it was not shredded wheat. It was in the package. He insisted it was shredded wheat. We went into lengthy detail about it. He also stated Kellogg had bought out Shredded Wheat Company and that that was the shredded wheat.

We did not succeed in getting anything else. He did not even state it was owned by National. His honest statement was that the Kellogg Company had bought it out. I knew that was not so. I did not keep the package.

I recall the picture of a dish with two biscuit, on shredded wheat packages, similar to Plaintiff's Exhibit 10. That was there for maybe fifteen years. I think I remember it up to a couple of years ago. Then it was not on. Recently, it has come back. There was always that association of the dish with two biscuit, on the package.

I observe the dish with biscuit on Plaintiff's Exhibit 14. I have seen the Kellogg package before. As a cereal man, I would say there was great possibility of the public being deceived thereby. The dish with two biscuit certainly looks as if it must have been taken from the old shredded wheat package. That would be

my belief. In fact, I have heard a few comments about that.

CROSS-EXAMINATION.

THE WITNESS: I know Mr. James F. O'Brien; knew him while he was with Arbuckle Brothers. I did not go with the National when he did. He was with them quite some time. I only came here recently, two and a half or three months ago.

The only practice I would have is, if I were to order shredded wheat, I would want shredded wheat. If they served me Kellogg's I would not take it.

When I told the man at Keene it was not shredded wheat, I meant it was not the shredded wheat made by the Niagara Falls concern. He said nothing about it being made at Battle Creek. He said it was shredded wheat. I doubted that it was shredded wheat, because I was always able to tell shredded wheat. I knew the exact biscuit, could pick it out of any biscuit.

I have eaten the Kellogg product, which is a whole wheat biscuit. It is not shredded wheat. I could not say if it is a shredded whole wheat biscuit. I call the product in Plaintiff's Exhibit 1 shredded wheat biscuit. Not being really familiar with the Kellogg biscuit, I could not tell you what it is, not being posted about the making of it.

In Plaintiff's Exhibit 1 is shredded wheat. I do not know anything about the manufacturing process. If I asked for shredded wheat, I would want it served to me.

I have only been with National two and a half months. Did not come with them through O'Brien, only as demonstrator, not really being paid by the company. From my own experience, I cannot say if the shredded wheat biscuit is made by shredding wheat and forming it into a biscuit and baking it. All I can say is from eating shredded wheat.

THOMAS ROGER KENNEY.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I am in the employ of cereal division, National Biscuit Company, and have been for six months; in cereal business for twenty years. Was with Kellogg Company about fifteen years; then with Arbuckle Brothers, previous to National.

I have been familiar with shredded wheat all my life. Shredded wheat means to me the shredded wheat biscuit. The only association I would have with the term shredded wheat would be the Shredded Wheat Biscuit put out by the National Biscuit Company.

In August of this year I was in Doukas Cafe, Keene, New Hampshire, asked for shredded wheat, and was served Kellogg's biscuit. I told the waiter that was not shredded wheat, was not what I wanted. He insisted it was shredded wheat, the only shredded wheat he had. To convince me it was, he told me the Kellogg Company had bought out the Shredded Wheat Company and was now putting the biscuit out in this package and in this form. I explained who I was and my connection with the National, and told him he was wrong, that shredded wheat was still being put out, as it always was, and the package he had served me was not shredded wheat.

Cross-Examination.

The Witness: I meant that it was not shredded wheat, by the term that shredded wheat implied. There was never any qualification as to shredded wheat. It was shredded wheat, always, just a regular shredded wheat biscuit.

I would describe the Kellogg product I was served as a whole wheat biscuit, not known as shredded wheat

biscuit. It was a solid biscuit, not what you might call a raised biscuit. I knew it had entirely different physical properties from the biscuit the Shredded Wheat Company made, because he served it to me in a Kellogg package. I did not see the biscuit inside; I refused the package. Mr. Doyle was with me then. We ate breakfast together. I did not eat any shredded wheat in that restaurant that day. I went somewhere else and got shredded wheat.

We sold this man at Keene shredded wheat. He still had Kellogg's biscuit there, but we sold him shredded wheat made in Niagara Falls and sold it in two or three other places. It is not my position or work to and I am not going around the country for the National Biscuit Country telling people that Kellogg's product is not a shredded whole wheat biscuit.

I have seen the Kellogg biscuit outside the package; but I say that, physically, there is no resemblance at all between the Kellogg product and the Niagara Falls product. I know how shredded wheat is made. I believe the two products are made differently. I do not know exactly the difference. I never associated the two together.

The time Doukas, at Keene, tried to tell me Kellogg's biscuit was a shredded wheat biscuit is the first I had heard of any association between that biscuit and the Niagara Falls biscuit. He told me he had been informed Kellogg had taken over the Shredded Wheat line. I was with National at the time; before that, with Arbuckle Brothers, and James F. O'Brien was with them then, and I knew him. I came into National through him.

I was with the Kellogg Company from 1914 to 1929. I have sold some Kellogg whole wheat biscuit, when it was a flat biscuit, when it was on the market, not as late as 1929. O'Brien was not with Kellogg in 1929. I think he left them in December, 1928. When I was with

Kellogg, I knew we had a Whole Wheat Biscuit, but we never called it a shredded wheat biscuit.

I have seen a package like Defendant's Exhibit 5. That was only on the market a short time when they changed it. I knew of the package, but we were instructed to discontinue to refer to the biscuit that way. I am positive I never, in any way, thought of the Kellogg product as being physically a shredded wheat product. We always associated it more with Triscuit than with Shredded Wheat Biscuit. I refer now to the product marketed in cartons like Defendant's Exhibit 5.

Stipulated that each of the following witnesses:

I. Loss, 124 North Street, Salem;
Alexander Lager, 79 Leach Street, Salem;
Charles Goldberg, 107 School Street, Salem;
George Quint, 47 Margin Street, Peabody;
A. J. Ayotte, 247 Jefferson Avenue, Salem;
R. C. Smiley, 86 North Street, Salem;
Samuel Wallace, 123 Hale Street, Beverly;
A. Nelson, 944 Broadway, Everett;
Donald Black, 681 Main Street, Melrose;
Peter Tolan, 213 Franklin Street, Wollaston;
G. O'Brien, 1911 Dorchester Ave., Dorchester; and
Thomas Cafferalla, 77 Newbury Avenue, Atlantic;

would testify, if called, that he is a retail grocer in or about Boston, handles Shredded Wheat of the National Biscuit Company, formerly made by Shredded Wheat Company; has known it for several years, and, when customers ask for shredded wheat, the order is always filled with the product of the plaintiff.

MRS. GRACE DARLING.

Deposition taken at Boston, Massachusetts, November 29, 1932.

Direct Examination.

The Witness: I am a housekeeper in Wollaston, Mass., and have a son, sixteen years old. I am familiar with shredded wheat, having used it since my son was four months old.

I recognize Plaintiff's Exhibit 1, having bought a good many of them; it is the package in which I have been accustomed to purchase shredded wheat.

In October of this year, I went to the Quincy Market, as I do Saturdays. As I went up the aisle, a clerk held a package out. I did not see the name but what I supposed was shedded wheat. I was out of shedded wheat, and I wanted some, because I am never, never without it. I gave him my traveler and said, "Send it up," and thought no more about it.

Q. 13. Let me ask you this: When you say you saw what you thought was shredded wheat, do you mean that the words *shredded wheat* were on it?

A. No. I saw this picture there, and I supposed it was shedded wheat. I did not see the name.

Q. 14. You saw the picture, but you did not see the name?

A. No.

Q. 15. Was that the box, Plaintiff's Exhibit No. 1?

A. Yes, that was it.

Q. 16. But you did not read it?

A. I did not read it as carefully as now.

Q. 17. What happened then?

A. I went away that night, and I did not come back home until the next day, and he always comes up to see me; and he started to make a dreadful fuss about the

shedded wheat, and how he wondered where I got it, and what is the matter with it, and why I did not get shedded wheat; and I said, "It is shedded wheat." And he said, "It is not shedded wheat; it is straw." And I said, "No? Oh, well, if is all right." And he kept on fussing and fussing about it; and he asked me that I would not get him any more. I kind of forgot it and went out to the store and ordered some more shedded wheat, and the box of shedded wheat disappeared. I do not know where it went to. I am sure I do not know, and that was——

Q. 18. Was that the first time you had received anything different from that which you had been accustomed to receive?

A. I had never seen a substitute in all the years that I had bought shedded wheat. That is the first time I had seen a substitute for shedded wheat. That is, I presume, the reason why I did not stop to look at it and read it.

Q. 19. So you had purchased shredded wheat for a number of years?

A. Since he was four months old. That is all I had, nothing else for him.

Q. 20. And he has used it constantly all during that time?

A. Yes, we had it all the time.

CROSS-EXAMINATION.

XQ. 47. It is perfectly obvious to me that your son did not think he was getting the product he had been getting.

A. No, he said it was straw and he did not want any more of it. Well, I said, "You do not need to have any more of it." I did not even look at the name. I just saw the picture there while I was going up the aisle. I did not want to have to go all the way back to the other corner where I would have to go to get it, and I just passed the slip in, as I went by.

XQ. 48. And at that time, you think it was this same package?

A. Yes, this same package.

XQ. 49. Referring to Plaintiff's Exhibit No. 14?

A. Yes.

MR. CLARKE: That is all.

RE-DIRECT EXAMINATION.

RDQ. 53. You saw the package?

A. I saw the shedded wheat, you see. I had to have it Saturday night. Saturday afternoon, I had to have the shedded wheat. That is all I did see.

RDQ. 54. Do you mean you saw the name?

A. No, I saw the picture of shedded wheat. I did not look at the name, you know, because, in all the years I have bought shedded wheat, I have never seen a substitute for it; and I suppose that is why I did it.

RE-CROSS-EXAMINATION.

RXQ. 55. Have you a husband?

A. I just buried my husband.

THE WITNESS: He was a minister. I do not approve of the manufacture of shredded wheat by more than one concern for my home. I am not speaking generally, but I would not use it in my home.

PRESTON DARLING.

Deposition taken at Boston, Massachusetts, November 29, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am sixteen. My mother just testified. I have eaten it ever since I can remember. I recognize the package, Plaintiff's Exhibit 1, it is

shredded wheat. I recognize the biscuit in it as the biscuit I always have.

Plaintiff's Exhibit 14 is the package sent home that day. I recognize it. We usually eat shredded wheat biscuit for breakfast with milk and sugar; sometimes eat it dry with butter on.

I ate the Kellogg biscuit both ways; first with butter. I did not like it. It cut my tongue. I tried it for breakfast with milk, I think. I only ate two out of the package.

CROSS-EXAMINATION.

THE WITNESS: I do not know what became of the rest; but I think my sister's dog likes it and I think that is where it went. I do not know if she tried any. My sister does not live with us. I do not know how she got it. They take the dog to our house quite often. That must have been when the dog got it.

Then I wrote this message to National, that I had been eating shedded wheat, my mother said, ever since I was four months old; that she brought home a new kind, which looked as if it would pass for shedded wheat, but it did not taste like it. We got an answer from somebody who said they were glad to hear from satisfied customers. I do not know what else they said. Some fellow came to see me, and then Mr. Savage saw me. Sometimes, when shredded wheat is gone, I have to eat some other cereal.

The Kellogg biscuit cut my tongue just enough to make you know it was not good, that it was not showing up very good. I do not know if I ever had shredded wheat hurt my tongue in any other way. It breaks up. This stuff is just like wire. I knew right away I was getting another product.

HAROLD A. DAGGETT.

Deposition taken at Burlington, Vermont, December 7, 1932.

Direct Examination.

The Witness: My family live on Cape Cod. I sleep around here, where I happen to be. I am a salesman of the National Biscuit Company, my duties requiring me to travel, on the road all the time. In the course of my work, I have found demonstrations of Kellogg's products.

In October, I was at Colodney's Market, in Burlington, conducting a sale of Wheatsworth. Next to me was the Kellogg demonstrator, a woman, selling a package of Wheat Flakes, a package of Rice Crispies, and a package of Pep, the three for 29 cents, and she stated she was giving a package of shredded wheat free with each purchase. I saw what she was giving as shredded wheat. It was Kellogg's Whole Wheat Biscuit. I saw her hand that out several times, in my presence.

Cross-Examination.

The Witness: I think her name was Brownell. She demonstrates for them here, has been with Kellogg for some time. I have seen her here for them before. She told me she worked for them; does practically all their demonstrating here. She is a short woman. I am not positive of the name.

XQ. 18. What language did she use in demonstration? How did she talk?

A. She would say, "We have a value here today. A package of Wheat Flakes and a package of Crispies, and a package of Pep, all for twenty-nine cents; and we are giving you a package of shredded wheat free."

XQ. 19. You are quite sure that that was the language she used? Are you sure she did not say Kellogg's Shredded Wheat?

A. No, she said, "We are giving you a package of shredded wheat."

XQ. 20. How many times did you hear her say that?

A. Well, quite a few times; because, naturally, I pricked up my ears when I heard her say shredded wheat.

XQ. 22. What kind of package was it that she gave out? A Kellogg package or——

A. A Kellogg's Whole Wheat Biscuit, you know, the regular package that they have.

XQ. 23. And you say that that was the package that she was giving out?

A. Oh, yes, I would say that that was the package that she was giving out.

XQ. 24. And that package was unwrapped, was it?

A. What do you mean?

XQ. 25. It must have been unwrapped, because you saw it.

A. Well, she had one of the little isinglass packages, you know. There is one little package that has isinglass in the center of it. She had that right there, you see.

XQ. 26. Was it a package of the whole wheat biscuit?

A. Yes, it was that. She would take it from her stock there.

XQ. 27. So she had a stock piled up there?

A. Well, you see, she said that they sold some four hundred packages.

XQ. 28. How was that stand arranged?

A. Well, there was a package of biscuit here, and the packages—one of those little display stands, with a pile of each of them there.

XQ. 29. They were prominently displayed?

A. Oh, yes, prominently displayed.

THE WITNESS: I kind of joked with her, told her that was not Shredded Wheat. One of the customers turned it back and said, "That is not shredded wheat. I do not like it." The woman had tried it, and I heard her say that. The woman would not buy it. A lot of them took it and did not know the difference. They had had it, but, like a lot of other things, I do not know where it is carelessness or not. When I say it was not shredded wheat she was selling, I mean it was not Niagara Falls Shredded Wheat. I mean to say the shredded wheat I know is the shredded wheat I have had since I was a kid, made at Niagara Falls.

I am not a production man, and I do not pretend to know whether it is possible to have shredded wheat made anywhere except at Niagara Falls. I have eaten Kellogg's biscuit, and I cannot say it was not shredded wheat. As a matter of fact, I know nothing about it. When I am talking about shredded wheat, I am talking about the shredded wheat I have known. I did not talk to the woman who handed it back, at all. I never spread around that Kellogg's biscuit is not shredded wheat. I never knock anybody. There has never been a National man even mentioned Kellogg's. We are too busy selling our own products.

BENJAMIN HARRISON SHARPLEY.

Deposition taken at Burlington, Vermont, December 7, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a restaurant proprietor, having been such two months. I lived in Burlington all my life, have been chef, and steward in hotels. I recently purchased a restaurant at 150 Church Street, Burlington, and ordered some supplies. I am familiar with shredded wheat, and have been for twenty-five to

twenty-eight years. All I know about it is that it is a very healthful, delicious breakfast. I know the Niagara Falls Shredded Wheat Company really puts out the finest cereal in domestic commerce. I have known that ever since I have kept a hotel.

I ordered shredded wheat for my new restaurant, at the Burlington Grocery, wholesale. I received Kellogg's wheat biscuit substitute. I ordered the real Shredded Wheat Biscuit, Niagara Falls, emphasized that in my order. I got the carton, photograph of which is marked Plaintiff's Exhibit 18, being case No. 3221-24.

I obtained from National some menu cards for my restaurant, like the one you show me, carrying printed on the bottom the words *shredded wheat.*

We still have the shipment of Kellogg's Whole Wheat Biscuit on hand, having served only an order or two since we got it. The help have eaten some of the rest, to get it out of the way. When a customer calls for shredded wheat, I give him the whole wheat biscuit. One occasion, a customer said, "No, have you got the real shredded wheat?" I said, "That is real shredded wheat." And he said, "No, that is a whole wheat biscuit. I want shredded wheat. If that is what you call shredded wheat, that is too tough."

CROSS-EXAMINATION.

THE WITNESS: I think we served an order or two of Kellogg's biscuit in our restaurant. I still have some on hand. It is on exhibition there. If our trade want it, all right, it is there.

I have Niagara Falls Shredded Wheat now and did have it. I am serving two kinds of shredded wheat now, whole wheat and shredded wheat.

I do not believe I have specially noticed the picture of Niagara Falls on the shredded wheat package. I

know the Niagara Falls Shredded Wheat Company puts out the finest cereal. I spoke of it as that, because it stated Niagara Falls on there. In saying that, I associated the picture of Niagara Falls with a picture of shredded wheat on that first product. I remember seeing the picture of the Shredded Wheat factory at Niagara Falls, I guess, away back.

I did not see that the Kellogg biscuit was not the Niagara Falls Shredded Wheat until it was up on the shelf. Then a customer gave the girl an argument. I thought the Kellogg Whole Wheat package was a Niagara Falls package. I saw the difference, noticed that right away. This customer started the argument my first week in the restaurant, say between the 17th and the 23rd. The girl put the whole wheat biscuit down, and he said, "I want some shredded wheat." The girl insisted that he got it, but he said, "No, that is Whole Wheat. Don't you know what shredded wheat is?" Then I snapped into it. That roused me. I overheard it. I said, "No, that is not real Niagara Falls, but a different kind of shredded wheat biscuit." He said, "I want Niagara Falls. It is made in Niagara Falls. That tastes more like baled hay."

When he said it was whole wheat biscuit, he had the carton in front of him. The girl simply opens it up and hands it to him. He handles it himself. The girls are not allowed to touch that. It is a little individual carton, holding two whole wheat biscuit. The girls were serving it in those cartons, marked Kellogg's Whole Wheat Biscuit. A customer said it was not Niagara Falls Shredded Wheat. I explained it was a different kind of Shredded Wheat, made at Battle Creek, that I had ordered Shredded Wheat and had not yet received it; that was all I had that morning, and I would see I had it in stock. He said it tasted like baled hay. I was very busy, so I do not remember all that took place.

I had no complaints from my help about eating Whole Wheat Biscuit. You would not get it from them, anyway. I have tried it myself. There is as much difference as day and night between the two. I could tell the difference blindfolded, between the Kellogg product and the Niagara Falls product.

ALEXANDER VERRET.

Deposition taken at Burlington, Vermont, December 7, 1932.

Direct Examination.

The Witness: I am a retail grocer at 112 Church Street, Burlington, in business for myself for thirteen years, worked in grocery store in Burlington twenty-nine years. I carry a full line of groceries, including cereals.

I recognize the article taken from Plaintiff's Exhibit 1 as shredded wheat biscuit, which I have known for twenty-nine years. During that period, the general appearance, form and size of the biscuit has been the same. My customers ask for shredded wheat biscuit and I give them a biscuit like that in Plaintiff's Exhibit 1. I recognize the package, with the picture of Niagara Falls. I have been familiar with it about twenty-nine years, and it has been substantially the same in form during that time.

I have seen in shredded wheat advertising a dish with two biscuit in it, as on Plaintiff's Exhibit 10. I remember seeing that for a long while. Shredded wheat and the name shredded wheat have a reputation among the purchasing public. When a customer asks for shredded wheat, I believe she means Niagara Shredded Wheat. It is the one that has been identified with the package with Niagara Falls on it.

CROSS-EXAMINATION.

THE WITNESS: I have handled Kellogg's biscuit. We carry it in cartons like Plaintiff's Exhibit 18. We do not supply the small two-biscuit cartons to the restaurant trade. I still carry Kellogg's biscuit and deliver it to customers who ask for Kellogg's whole wheat. Some do ask for Kellogg's Whole Wheat. If a customer asked me for Kellogg's Shredded Wheat, I would give them Kellogg's Shredded Wheat. I have no doubt about the Kellogg product being a shredded wheat product made by Kellogg. I have been handling the Kellogg product two or three years, and I buy it through wholesalers.

RE-DIRECT EXAMINATION.

THE WITNESS: I do not sell many Kellogg's Whole Wheat Biscuit.

FREDERICK E. BLAIS.

Deposition taken at Burlington, Vermont, December 7, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, purchasing my supplies from Burlington wholesalers, Vermont Food and Burlington Grocery. I ordered shredded wheat from Burlington Grocery Company two or three weeks ago and got Kellogg's Whole Wheat, the package, Plaintiff's Exhibit 18. I wrote my name on top to identify it down to the agency. That is my signature. I went there and told him I wanted a case of shredded wheat and ordered some other stuff, too. There were no ifs and ands. When I got to the stock room, I got a case of this. I had a wagon there to take it away. My order for shredded wheat was filled with Plaintiff's Exhibit 18.

CROSS-EXAMINATION.

THE WITNESS: I did not know whether they had any Niagara Falls Shredded Wheat in stock and could not tell you if they had been cut off from supplies of Niagara Shredded Wheat. When I saw the Kellogg carton, I knew it was a Kellogg product and not Niagara Falls Shredded Wheat. I have been in business about six years and dealing in Kellogg products all that time.

After getting the case of whole wheat biscuit, I had to go by the National Biscuit agency where my brother is shipping clerk. I told him I had ordered a case of shredded wheat and gotten this from the Burlington Grocery. He told me to drop it there, which I did. Some man from the National paid me for the case. It was not my brother asked me to buy this case; but the other fellow told me to buy a case of shredded wheat and, no matter what kind of case I got, to bring it to him. He said to ask for a case of shredded wheat, and, if I got a case of Kellogg's, to bring it to him. He asked me first where I usually buy my groceries. I told him I got some from Burlington Grocery and some from Vermont Food. So I went to Burlington Grocery. I knew nothing about whether they had cut off the Burlington Grocery as a wholesale dealer, and he did not tell me.

I handle both kinds of shredded wheat, Plaintiff's Exhibit 14 and Plaintiff's Exhibit 18 in my store. I have handled this one, like Plaintiff's Exhibit 18, only in the last two or three months. I do not sell a great lot of it; because, when they ask me for shredded wheat, I always push the Niagara Falls one. I do not care about selling the other. They had a kind of sale. A certain percentage of sales was going for the benefit of Veterans of Foreign Wars; and they asked us, to oblige them, to get a full line in. That is the first time

I had it. The Kellogg salesman asked me to take the whole line, because I did not handle Whole Wheat or Kaffee Hag. We got them from them then.

I now buy my Niagara Falls shredded wheat from the National Biscuit Company and buy and handle their whole line, one hundred per cent. I handle no cookies or crackers except the National. I get no special discounts except the regular 10 per cent. I handle the National line because I think it better; just on the quality of the goods. The only competitor to the National line in my store is Kellogg's Whole Wheat Biscuit; otherwise, I have a hundred per cent. National products. The other products I buy from wholesale grocers. I buy the Niagara Falls Shredded Wheat from the National Biscuit Company, and they deliver it to me.

I am not a member of any chain store organization. The Reed Murdock salesman has not come over yet, but National has promised that, through him, it will get in touch with me and give me a special extra seven and a half per cent. discount.

I was not involved in the old discount fight between grocers and the National some years ago. I did know, however, they gave preferential treatment to chain stores.

RALPH THAYER.

Deposition taken at Burlington, Vermont, December 7, 1932.

Direct Examination.

The Witness: I am a contractor and builder. Sometime last month, November, 1932, I went in a restaurant on Church Street, the Vermont Lunch, and called for a serving of shredded wheat biscuit. She took down a small box of Kellogg's biscuit, opened it and brought it to me. I said, "This is not shredded wheat, is it?" She said, "No, it is not; it is Whole

Wheat, but it is the same thing, made just the same way and of the same stuff, just as good, if not better." I said, "I want shredded wheat." She said, I have not got it; this is the same thing." I asked to see the box, and she took another box and set it up. I said, "I want the box this came out of," and she got it. Then she wanted to know if I did not call it just as good, just the same as the other.

I ate the Kellogg biscuit. I did not see any menu on the counter. The box that was served me, which contained two small biscuit, is Plaintiff's Exhibit 19.

CROSS-EXAMINATION.

THE WITNESS: I ate the Kellogg biscuit served in the little Kellogg package. The girl asked if I liked it. I told her I could not see any difference, but I always used the other and insisted on it. I have not used Kellogg's since; that is the only time I had it. I have not been in that restaurant since. If I go to a place, ask for something, and they refuse it, if that is all they serve, I do not care to go there again.

I did not notice any difference by eating it. I have no relatives here connected with shredded wheat. I have been working there in that lunch room. No shredded wheat person was with me when I bought it. I have known Mr. Bradbury, of the National, and he spoke to me about going in there at first. Then, I told him I knew them in there and I would go in. He suggested that I go into the Vermont lunch. I think he did tell me to tell them the Kellogg product was not shredded wheat. I told them it was not; and they said it was not shredded wheat, but it was just the same thing, made by the same process and of the same material. I do not think we ever used any by Kellogg's before. It was at Mr. Bradbury's suggestion I brought away the carton that was served me. I had never seen the Kellogg's Whole Wheat carton before this inci-

dent in the Vermont lunch. I was served with two biscuit. I knew before that Kellogg's had a shredded wheat biscuit on the market, but supposed it was one biscuit.

I know Mr. Bradbury is the National representative in this vicinity. He had spoken to me about this controversy before this incident in the Vermont lunch. I never worked for the National, but I had worked in the Vermont lunch, making switches, and so on. I had known Mr. Bradbury before then, went down one night and put up an elevator, did work around there. Through him I knew about the Shredded Wheat-Kellogg controversy, but not very much until I had been in there. Then he asked me what was said and told me what was going on.

RE-DIRECT EXAMINATION.

THE WITNESS: I have been familiar with shredded wheat biscuit ever since I came to Burlington, four or five years. The first place I boarded that is about all we had for breakfast for a year and a half. When I went back up country, they had shredded wheat for breakfast.

ERNEST BRADBURY.

Deposition taken at Burlington, Vermont, December 7, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am National Biscuit Company sales manager in Burlington and have been with them sixteen or seventeen years. At noon yesterday, I was in Burlington with Mr. Vilas, Mr. Smith and Mr. Atcheson. The four of us lunched at the Montpelier Tavern. Mr. Vilas ordered shredded wheat and was served Kellogg's Whole Wheat Biscuit in the Kellogg

package, individual size. Mr. Vilas mentioned the fact it was not shredded wheat; and the young lady said, "It is." Mr. Vilas said, "I am sorry; but that is not shredded wheat." The young lady replied: "Oh, you want the other biscuit," and she grabbed up the Kellogg biscuit, took it back, and served Niagara Falls Shredded Wheat to Mr. Vilas, in a dish out of a package, one biscuit. There was a menu card on the table. Plaintiff's Exhibit 20 was that menu.

This morning, I stopped with Mr. Vilas to take him to breakfast, at Dorn's Cafe, in the New Sherwood Hotel. He ordered shredded wheat and was served Kellogg's biscuit out of the package, two biscuits in a dish out of the package. Mr. Vilas examined them and said to the girl: "Why, that is not shredded wheat!" The young lady stated, as was the case in Montpelier Tavern, "Yes, that is shredded wheat." Mr. Vilas said, "I am sorry, but it is not." Then she said, "Just a minute. You want the other biscuit." She reached down and said, "This is what you want," and pulled out a package of Niagara Falls Shredded Wheat, individual size, opened it up, and served the two Niagara Falls biscuit in a dish without the package. I happened to notice, when she took the two first biscuit out, which were Kellogg's biscuit, when she went back to change them, she took the two biscuit out of the dish, and laid them on the counter. She then took the two Niagara Falls biscuit out of the individual package and put them in the dish, leaving the Niagara Falls package lying beside these other biscuit.

Then, she served the Niagara Falls biscuit to Mr. Vilas. I sat there waiting for Mr. Vilas to get through. I happened to notice she picked up the two Kellogg's biscuit and put them in the Niagara Falls package, brought the package over, and put it down where she keeps her shredded wheat cereal. We obtained that

package just as she put it down. It is Plaintiff's Exhibit 21, which is exactly in the condition in which it was placed by the waitress in the stock, on the shelf. It has not been touched. The two biscuit now in it are the biscuit first served to Mr. Vilas in the dish. I saw them put in there. They were served to Mr. Vilas from outside the package.

I am familiar with the Vermont lunch, Mr. Sharpley's restaurant. They have a supply of menu cards furnished by the National Biscuit Company, of which Plaintiff's Exhibit 22 is one, which I identify as having been taken by me from Mr. Sharpley's restaurant.

Three or four weeks ago, I stopped in at Dorn's Cafe to have a light lunch. I like shredded wheat very much, and I ordered it. I knew they had both shredded wheat and Kellogg's biscuit, and I ordered shredded wheat. The girl picked up Kellogg's biscuit and served it to me out of the individual package, two biscuit in a bowl. I told her right away that it was not shredded wheat, and, as we have stated before, she said, "That is shredded wheat." I told her she was mistaken, it was not and she was doing a very wrong thing by substituting another item when shredded wheat was called for.

Then, a lady who is cashier or something at the door seemed to take quite a little interest in it. She spoke up, asked me what the trouble was. I told her I called for shredded wheat and, though they had shredded wheat on the shelf, the girl had picked up Kellogg's biscuit. In the conversation the remark was made that Kellogg's salesmen were after the girls all the time to push their biscuit out when shredded wheat was called for. This young lady acting as cashier said, "Thank you very much for calling my attention to it. We will have it corrected."

In the instance I just described, I saw the waitress take a package of Kellogg's from the shelf. I saw

her this morning take it, also. In both instances, the biscuit were taken from the package and served in a dish.

CROSS-EXAMINATION.

THE WITNESS: Mr. Vilas is staying at the Vermont Hotel on the trip to Burlington. I drove around and got him this morning. I suggested we go out to breakfast elsewhere and drove to the Dorn's Cafe, where the incident I have related occurred. This was the same cafe where I dined under similar circumstances two or three weeks ago. We sell Niagara Falls Shredded Wheat to them.

Before I went in there then, I believed they were handling Kellogg's product, because, along in September, they had not been purchasing Shredded Wheat, and I figured they would either have some Kellogg's biscuit left or would still be handling it. After September I sold them Shredded Wheat. I think we had sold them a little something before September, but not so much.

They were handling Kellogg's biscuit in that restaurant before I sold them Shredded Wheat. I stated, when Kellogg's was first handed to me in Dorn's, I told her at once it was not shredded wheat. I had ordered shredded wheat and saw her go directly over to the cereal section under the counter. Niagara Falls biscuit and Kellogg's biscuit were there. I saw her deliberately pick up Kellogg's biscuit. When I order shredded wheat, I want shredded wheat and not Whole Wheat Biscuit. The girl said: "That is shredded wheat, made by someone else." That is not literally true, to my idea. When I told her it was not shredded wheat, I meant it was not the Shredded Wheat I have known for years.

I do not tell people it is not Shredded Wheat of anyone's. The way I feel about it, it is not the

shredded wheat I have known. I do not know whether it is wheat. I do not question that it is. I do not say it is not shredded. I am not saying it is not in biscuit form. I say it is not shredded wheat biscuit. The only shredded wheat biscuit I have ever known is Niagara Falls Shredded Wheat.

As general manager of sales in this district, I make the statement that, if it is not Niagara Falls biscuit, it is not shredded wheat. That is true. When I order shredded wheat, I mean Niagara Falls Shredded Wheat.

Wherever I order shredded wheat, if it is not shredded wheat, I tell them so. I did nothing with this Kellogg product that was served me two or three weeks ago. I just let her take it back, and she brought me Niagara Falls Shredded Wheat. That was the same cafe to which I took Mr. Vilas this morning. I do not know the name of either the waitress or the cashier there.

Wherever restaurants want Shredded Wheat menus, we supply them, and we give them cards. We sell shredded wheat direct to the Dorn Cafe now, and we make deliveries direct. That is our general method of supplying the trade in this district.

I drove over with Mr. Vilas to Montpelier yesterday. I had had lunch at the Montpelier Tavern before. The other gentlemen drove over with us, and we had lunch together.

The National Biscuit Company, no longer, as far as I know, markets cartons with picture of a dish with two shredded wheat, as in Plaintiff's Exhibit 10. I have not seen one in a long time that way. All the cartons marketed by the plaintiff company, as far as I know, contain a picture of the Niagara Falls factory and on the end a picture of Niagara Falls, with the words: The Home of Shredded Wheat. The plaintiff distributes its product in two sizes of package, a large

carton with twelve biscuit, and individual cartons, containing two biscuit each.

So far as I know, the policy of the plaintiff company is to encourage the sale of individual cartons so far as restaurant or hotel trade is concerned.

I have been connected with the National Biscuit Company between sixteen and seventeen years. I was not in any way connected with the Shredded Wheat Company before the National Biscuit Company took over the Shredded Wheat Company a few years back.

HARRY J. SOOST.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am in the retail grocery and meat business in Pittsburgh. I have been in this business all my life having been brought right up with it, ever since I was about six years old and have never done anything else. I carry a full line of groceries, including cereals and the like.

I recognize the article taken from Plaintiff's Exhibit No. 1 as being shredded wheat which I have known ever since it has been on the market about thirty-five or forty years. I know this article comes from Niagara Falls, New York, as I have seen it made, having visited the factory twice. The shredded wheat biscuit looks exactly like it always has and the carton in which it is packed is the same as it has been, as far back as I can remember, about twenty or twenty-five years.

Yes, I recognize Plaintiff's Exhibit No. 10 with a picture of a dish on it and some biscuit in the dish.

This panel on the cartons with the dish and the biscuit in it has been used for about ten or fifteen years. A long time ago we gave dishes—similar to the one on the package—away with shredded wheat. When our customers ask for Shredded Wheat we give them the Shredded Wheat made at Niagara Falls as we have never had anything else to give them and that particular shredded wheat is what our customers expect to receive.

The reputation of shredded wheat biscuit is very good and as long as I have dealt with the company they have occasionally sent a man around to see that the stock was all right and no complaints and I have had less trouble with Shredded Wheat than with any other breakfast food we ever handled.

Shredded Wheat has been well advertised and when anyone went to Niagara Falls the main thing to see was the Shredded Wheat factory.

CROSS-EXAMINATION.

THE WITNESS: I was at the Shredded Wheat factory twice and saw the biscuits made but I really do not remember what they were made of. Some people called them bales of straw or they would ask for the little bales of wheat.

There is no other name for biscuit put up with shredded wheat. I had never heard of Kellogg's shredded wheat and knew nothing about them until the last week or two. I have known the All Bran and have handled Kellogg's Corn Flakes and when a customer asks for Corn Flakes I give her Kellogg's but I have never seen Kellogg's Whole Wheat Biscuit. I have an idea that Kellogg's products are made up in New York State some place. I was one of the first grocers in Pittsburgh to handle their products and have done so ever since they have been on the market

but I have never seen any of Kellogg's Whole Wheat Biscuit and only heard of it recently when my brother-in-law told me that they were putting out a whole wheat biscuit. I had never seen one until just now looking at that package is the first time and they do look the same to me as shredded wheat.

MR. VILAS: Has that an exhibit number?

MR. CLARKE: The reference is to Defendant's Exhibit No. 4 for identification.

I recognize Defendant's Exhibit No. 4 as a Kellogg package by the Kellogg name on it and the color and arrangement suggests a Kellogg's Corn Flakes package.

I remember well seeing the picture of Niagara Falls on the Niagara Falls product and of the representation of the Falls on the end of the carton. They have always emphasized the fact that this biscuit was made at Niagara Falls and this fact is very generally known in the grocery trade.

For the last thirty-five or forty years I have purchased the biggest part of my Shredded Wheat supply from Weisbrod Wholesale Grocery, in Pittsburgh, from whom I can get about the best price. There was no change in the distribution of Niagara Shredded Wheat after the National Biscuit Company took it over, everything went along just about the same.

In addition to National Biscuit Company goods I handle some Beech Nut crackers. I have handled Loose-Wiles goods but not for the past five or six years.

RE-DIRECT EXAMINATION.

If I had a package like Defendant's Exhibit No. 4 for identification and a package like Plaintiff's Exhibit No. 1, side by side, I would have no doubt

in my mind as to which was which. My customers always study the package they are buying and would know the difference all right because we have handled this other package so long.

ALFRED F. BRAUN.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

Direct Examination.

The Witness: I am a retail grocer, in business about thirty years at the same place in Pittsburgh. Up to five years ago it was Stilpe & Brown and now I am in business for myself. I carry a regular grocery line including cereals. Yes, I recognize Plaintiff's Exhibit No. 1 as being shredded wheat, having eaten it at home quite often and I also carry it in the store and have carried it ever since we opened up about thirty years ago. When a customer asks for shredded wheat I give them shredded wheat in a package like Plaintiff's Exhibit No. 1. Plaintiff's Exhibit No. 10 is an old timer that was used ten or fifteen years back.

I recognize Defendant's Exhibit No. 4 as Kellogg's Whole Wheat Biscuit which we have carried for about a year.

I cannot say whether my customers would be familiar with the picture of the dish—probably some of the old-timers would recognize it.

Cross-Examination.

I understand "shredded wheat" to be a wheat product made into biscuit form and shredded. I recognized that Kellogg's Whole Wheat biscuit was a shredded biscuit the first time I saw it. I know of no other way of describing this product and have never heard any other name applied to it.

I would not say that Shredded Wheat and Corn Flakes were both descriptive names. Shredded Wheat sounds different than Whole Wheat Biscuit, there might be a little confusion with some people. Corn Flakes would not be a special name because there are a great many corn flakes on the market. If a customer asks for corn flakes I would give them Kellogg's, it might happen that we would give them Post Toasties but that would be very seldom unless they specified Post Toasties.

I remember the picture of Niagara Falls on the Shredded Wheat package during all the time I have been familiar with it but I am not sure about the picture of the plant with the windows in it on the front face of the cartons. Plaintiff's Exhibit No. 10 seems a little strange, it does not seem to me that the picture of Niagara Falls has been on there long. The factory picture has always been on. I buy direct from National Biscuit Company and handle the rest of their line. I handle some Loose-Wiles goods, not quite as much as National.

I have handled Kellogg's corn flakes, bran products, Pep and whole wheat biscuits ever since we opened business.

RE-DIRECT EXAMINATION.

Yes, "Whole Wheat Biscuit" is another way of describing wheat in the form of a biscuit made of shreds.

RE-CROSS-EXAMINATION.

I would now know what was in a package with the name "Whole Wheat Biscuit" if I did not see the picture of Shredded Wheat on the package but previously if I had simply seen it marked "Whole Wheat Biscuit" I would have known it was a wheat biscuit, possibly made of wheat flour of any character. The first time I saw the Kellogg package if it was re-

ferred to as Kellogg's Shredded Wheat I expected to see a shredded biscuit something like the biscuit in Plaintiff's Exhibit No. 10.

EDWARD P. LOUGHREY.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I have been a grocer for the past twenty-eight years, for the past eight years in business for myself during which time I have been selling a general line of groceries to consumers. During these eight years I have been buying groceries from wholesalers and jobbers and manufacturers including cereals such as corn flakes, bran flakes, shredded wheat, wheatettes, Post Toasties, etc.

Plaintiff's Exhibit No. 1 is the shredded wheat product which I have been selling for twenty-eight years.

I never paid much attention to the packages but I do recall that at certain times of the year I would see a picture of a dish with strawberries on the shredded wheat. That took my eye because it always looked so doggoned good.

The biscuit taken from Plaintiff's Exhibit No. 1 looks like the shredded wheat which I have always sold for shredded wheat. It is the Niagara Falls Shredded Wheat which has always looked the same. I do not remember ever seeing Kellogg's shredded wheat. When I order shredded wheat I merely ask for a case of shredded wheat, meaning the National Shredded Wheat from Niagara Falls and this is what I always get. If a customer came in to my store and asked for shredded wheat I would give her the package like Plaintiff's Ex-

hibit 1, being the only package that I know as Shredded Wheat.

CROSS-EXAMINATION.

I knew the Kellogg Company were around selling a whole wheat biscuit but would not know just what that was, there being so many things whole wheat, but when you speak of Shredded Wheat Biscuit I would know it to be Niagara Falls Shredded Wheat.

The biscuit just taken from Kellogg's package I would sell for Whole Wheat Biscuit, that being what it is marked. I would not call them shredded wheat because I would not know them as that.

It may be possibl for more than one manufacturer to make Shredded Wheat. I only know Kellogg's Corn Flakes in the trade. There are other kinds such as Post Toasties. I have heard of Jersey Corn Flakes but have never handled them. Kellogg's is not the only one that makes corn flakes but when a customer asks for corn flakes I give them Kellogg's, although I handle Post Toasties and Wheaties.

I have handled the Kellogg products since I have been in business for myself and knew of them when working with others in the business. While I have seen the Kellogg Whole Wheat cartons before now I have never seen the whole wheat biscuit. I have had a dozen packages in my store on consignment but could not sell them so exchanged them for something else.

From the time that I went to school and heard them talking of Shredded Wheat I remember seeing the picture of Niagara Falls on the face and panel of the carton. Kellogg's products, I believe, are manufactured in Battle Creek, Michigan.

I handle some of the National Biscuit Company cakes and their shredded wheat and purchase these directly from them. Also carry some Colonial crackers. I am an independent grocer not belonging to any chain.

Seeing the two biscuits together I would recognize that there are two different brands of shredded wheat. If I had Kellogg's product in stock and a customer asked for Kellogg's Shredded Wheat, I would ask her if that is what she wanted.

RE-DIRECT EXAMINATION.

I buy Kellogg's products through a jobber and National Biscuit Company products are delivered by their own wagons.

LEROY SHAFFER.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

THE WITNESS: For about ten years in the one place in Pittsburgh I have been in the retail grocery, meat and vegetable business.

I recognize Plaintiff's Exhibit No. 1 as shredded wheat. The article taken out of the package is shredded wheat which I have eaten off and on for the last thirty years and the appearance of the biscuit has always been the same. I carry quite a line of cereals. We are right in a district there where people use cereals much more than do those in the cheaper neighborhoods. I handle shredded wheat which I purchase now from the National Biscuit Company. Before they distributed it I purchased it from wholesale grocers and ordered it as shredded wheat. In fact I had but one shredded wheat in mind. I did not always bring in the Niagara Shredded Wheat, I always just asked for shredded wheat and always got the shredded wheat that you have here. If a customer asked for shredded wheat we would give her the shredded wheat we have been

handling for years. Kellogg's have a Whole Wheat Biscuit which we would give out when someone asked for Kellogg's Whole Wheat Biscuit.

In 95 per cent. of the cases, customers asking for shredded wheat want the Niagara Shredded Wheat. Kellogg's Whole Wheat Biscuit are not as well known as their other products. The old carton with the plate or dish on was used for shredded wheat four or five years ago. I do not know exactly the number of years but probably until they changed to the new package marked Plaintiff's Exhibit No. 1.

CROSS-EXAMINATION.

In recent years the shredded wheat cartons have featured the Niagara Falls at both ends. I think I have known since I was a boy that this biscuit was made in Niagara Falls and some years ago I visited the factory myself.

I would not say that Niagara Falls has been emphasized and beaten into the trade but my idea is that that is the original Shredded Wheat. When Kellogg's came out I identified that as whole wheat biscuit. If a customer called up and asked for a package of Kellogg's Shredded Wheat we would ask her if she wanted Kellogg's Whole Wheat Biscuit, to be correct.

My definition of shredded wheat is that it is little shreds perhaps easier to digest.

Kellogg's is the chief brand of Corn Flakes and there are Post Toasties which do not conflict much with corn flakes. I have heard of the Jersey brand of corn flakes, they are made near here. It would indeed be news to me if I were told there were a hundred different kinds of corn flakes.

When a customer asks for corn flakes we give them Kellogg's Corn Flakes because that is what they expect to get. If a customer asked for Post Corn Flakes

I would ask her if she wanted Post Toasties. If she asked for Jersey Corn Flakes and I had them I would be glad to sell them. Kellogg's is a good line except the Whole Wheat Biscuit which is a poor seller compared to Shredded Wheat. I carry both brands to be fair to Kellogg's.

The National Biscuit Company man asked me if I cared to come down to testify. I have known for a long time that there was an infringement as to the name Shredded Wheat but it never concerned me a lot as we never had but the one shredded wheat.

I have never heard of Quaker Corn Flakes nor seen such a package. The Postum Company I have known since I have been in business and I guess it was a long time after I knew them as makers of cereals that they put out the toasted corn flakes. I did not go into the grocery end when I first started in business but the Post Toasties representative lived near me and he put in a line of Postum goods. I consider Post Toasties and corn flakes as two different cereals. If someone asked for Post's Corn Flakes I would ask if she wanted Post Toasties. Most people when they want corn flakes ask for Kellogg's Corn Flakes. If someone asked for Kellogg's Shredded Wheat I would tell them it was Kellogg's Whole Wheat Biscuit. I presume it would be possible to have a whole wheat biscuit in another form made of whole wheat flour or even whole wheat flakes.

I have seen the Kellogg Shredded Whole Wheat Biscuit package but I do not know whether I have ever had it in stock or not. I have never had a case of whole wheat biscuit in the store at one time as it is such a poor seller with us.

Since the National Biscuit Company took over the Shredded Wheat Company I buy direct from them as I can get quicker delivery and get the regular discount.

For the past year I belong to the Triangle Grocers Association.

When I first started in business I handled Loose-Wiles goods but no more unless Triangle has a special sale, in which case I may take a dozen with a guarantee for the sale. If they don't sell they go back.

JANE HESS WHITE (Mrs. Arthur White).

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a housewife and have been acquainted with Shredded Wheat about twelve or fifteen years and have used it about six or eight years, but not so much recently although my father uses it every morning. I have seen it manufactured, having been at the Niagara Falls factory about nine years ago.

When I see the words Shredded Wheat it always conveys to me the fact that it is made at Niagara Falls.

I went to purchase a package of Shredded Wheat last week and was given something else. This was in Duritsky's store on Elma Avenue, Uniontown. I asked for two or three articles first and then for shredded wheat. They gave me another product which I said was not Shredded Wheat, but was assured by both the lady and man in the store that it was shredded wheat, a smaller biscuit and more in a box. I proceeded to get the balance of my things and they wrote out the slip marking it "S. Wheat." I asked them to write out the full name of all articles purchased. What I was given was a package of Kellogg's Whole Wheat Biscuit. The sales slip and carton which you have are my receipt for the articles that I bought and the Kellogg Whole Wheat Biscuit carton. The biscuits I gave to

Mr. Moser, who is the Uniontown sales manager of National Biscuit Company. It was at his request that I made this purchase in a store I had never been in before. The sales slip is signed by Mrs. Mary Duritsky, who owns the store.

MR. SAVAGE: I offer in evidence, as Plaintiff's Exhibit No. 23, the sales slip concerning which the witness has just testified, and as Plaintiff's Exhibit No. 24, the Kellogg carton to which the witness has just referred.

(The slip referred to was received in evidence and was marked "Plaintiff's Exhibit No. 23"; and the carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 24.")

CROSS-EXAMINATION.

I have known Mr. Moser about fifteen years; he was sales manager when I first knew him and deposited in the bank where I was teller. I have no relatives connected with the National Biscuit Company and came into this case merely as a friend of Mr. Moser, who asked me to go to Duritsky's to make this purchase and I knew when they gave me Kellogg's Whole Wheat that it was not the product which Mr. Moser had told me to buy. This store is in my neighborhood and judging from the looks has a good reputation, but I never had any dealings with them. Mr. Moser asked me if I used shredded wheat and then asked that I buy a package at Duritsky's, which was the only store I went to. I recognized the package immediately as not being the Niagara Falls product and asked if that was Shredded Wheat and was told by both the lady and man that it was a smaller shredded wheat. The Niagara Falls Shredded Wheat is the only shredded wheat I had ever heard of and looking at the Kellogg's product I would not know now that it was shredded wheat be-

cause it is not marked on the box. I have not had much to do with shredded wheat the past few years, but previous to that my parents bought it and now I buy a box occasionally for my husband to eat. I am not familiar with any brands of corn flakes and I went to no other store but Duritsky's, where I had them write down the items I. purchased. I occasionally do this because I buy for relief organizations and must show a slip of the purchases. I have never done any demonstration work for either National Biscuit Company or Shredded Wheat Company.

MRS. EDITH MOSER.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am the wife of Mr. Moser, agent of the National Biscuit Company at Uniontown, and was with Mrs. White when she made her purchases at Duritsky's. She purchased beans, potatoes, corn, etc., and then asked for a package of shredded wheat. On being handed the package she said "Is that shredded wheat," and was told that it was, but a smaller biscuit, and you got more in the box. The package she received was like that of Plaintiff's Exhibit No. 24. She took the package, paid for it and had the boy put the purchases in the car.

CROSS-EXAMINATION.

The party waiting on us at Duritsky's pointed to the picture on the front of the package and said "it is shredded wheat," "it is a smaller biscuit but they are packed more in the box," but kept the package in his hand.

Q. Did you have any doubt that the biscuit in this package were any different from the biscuit illustrated on the carton? That is, did you think that he did not know what he was talking about or that he was lying to you?

A. Well, I did think that it was not shredded wheat. The boxes were not lettered "shredded wheat." I thought to myself, then, "Why do these people say it was shredded wheat, when I could not see any "shredded wheat" on there.

Q. Does it not say "Made of deliciously flavored whole wheat shreds, double toasted"?

A. Yes, it does say that.

Q. And on the side of the carton, does it not say this: "This certified analysis, made by the Medical Arts Laboratory of Philadelphia, indicates the splendid food value of Kellogg's Shredded Whole Wheat Biscuit"?

I could not read the side of the package, only being able to read what the boy was holding up. I thought if there were shredded wheat in the package it should be marked on the outside. Kellogg's name was not mentioned in connection therewith, although I saw Kellogg's name on the package. This package I gave to Mr. Moser.

When we were handed the package we naturally looked for the large biscuit in the corner and not seeing it knew it was not the Niagara Falls Shredded Wheat, and the name Kellogg's Whole Wheat Biscuit meant nothing.

I had never been in Mrs. Duritsky's store before and had never heard my husband speak of her and did not know until last week why he wanted me to go there to make this purchase.

EDWARD TRESER.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

Direct Examination.

The Witness: I have been in the meat and grocery business for the past 32 years. For the past ten years I have carried a line of groceries, previously meats only. I do a retail business and carry a line of cereals. Plaintiff's Exhibit No. 1 is a package of Shredded Wheat and the contents Shredded Wheat Biscuit which I have known to be the same in form, shape and appearance for the past thirty years or more. We carry Shredded Wheat in our store and sell a lot of it. When a customer asks for shredded wheat we give her a package like Plaintiff's Exhibit No. 1 and never anything else. This is an old established product.

Cross-Examination.

I came here at the request of Mr. Nasmith one of National Biscuit Company's salesmen from whom I buy crackers, etc. I have been dealing with the Biscuit Company about ten years. I handle Kellogg's Corn Flakes and Bran but have never handled their Whole Wheat Biscuit and have only heard of it within the past year, that is, I heard they were putting out a shredded wheat biscuit. I have always associated Shredded Wheat with Niagara Falls, their package has always looked the same to me.

I give my orders to the salesman and the goods are delivered by the National Biscuit Company's trucks. I buy some of their cookies, etc., and some of Loose-Wiles products. At one time I was tied up with the Royal Scarlet stores but no more.

This is the first time I have ever seen a Kellogg Shredded Wheat and I can see that it is not as large

it is smaller, shorter than the Niagara Falls Shredded Wheat. I am familiar with Kellogg's general type of carton for corn flakes, bran, etc., and would recognize the whole wheat biscuit carton as belonging to the Kellogg family as its red and green colors are very similar to their other packages.

MRS. IRMA COLLIFLOWER (Mrs. J. A. Colliflower)

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a housewife and recognize Plaintiff's Exhibit No. 1 as a box of Shredded Wheat which I have known ever since I was a little girl. I buy it right along giving it to my children. When buying I ask for a box of Shredded Wheat and usually get the package similar to Plaintiff's Exhibit No. 1 with the exception of this one.

Q. Will you state the circumstances connected with this carton which you have just produced, stating where and when you got it and any other circumstances connected with it?

A. Well, I stopped at the L. H. Black Grocery at 601 Second Street, Juniata, Pennsylvania, and I asked for a box of Jell-O. And she did not have the Jell-O which I asked for. She said she had some gelatin. And I said, "All right." And she took time to explain about the Jell-O. Then I asked for a box of shredded wheat, and she gave me this. She said nothing about it, and I asked for a slip, and she handed us her name on the slip.

(The slip referred to was received in evidence and was marked "Plaintiff's Exhibit No. 25.")

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 26.")

I took the package, paid for it and nothing more was said. The words Shredded Wheat mean Niagara Falls Shredded Wheat to me and means a biscuit when broken is very tasty and palatable and is the only shredded wheat I have known and have cared to use. Any other product by that name would seem to me to be a misrepresentation.

CROSS-EXAMINATION.

The biscuit contained in Defendant's Exhibit No. 6 look like a small sized shredded wheat biscuit and a little dryer.

The National Biscuit Company Altoona salesman asked me to go into this particular store to make any purchase I desired and to buy a package of shredded wheat and to take what was given me. I had seen Kellogg's product on the shelves in stores and knew immediately that I was not being given the original Shredded Wheat as the carton did not contain a picture of the Falls nor was it marked "Home of the Shredded Wheat." I understood right away that she was giving me a product made by Kellogg Company. I was asked to make purchases at two other stores; at the first store I was told they had two brands, National and Kellogg's, which did I want. I asked for National and received it, taking it home and using it. The other package was turned over to the National Biscuit Company salesman and I did not see it again until today.

I am very familiar with Kellogg's Corn Flakes as I like them very much. As to the shredded wheat package one could easily be misled, if in a hurry, into thinking that Kellogg's package was the Niagara Falls Shredded Wheat. Of course, if one is expecting that they may get a substitution you would be most careful to see what you were getting, whereas if you were in a hurry you might receive another package without noticing the difference until you arrived home.

The other store I was asked to go to was the Clover Farm Store in Altoona.

I am not connected with or related to anyone in the National Biscuit Company. The name of the salesman who asked me to make these purchases is J. L. Black of Altoona whom I have known for several years, he explained at the time that he wanted me to go to Pittsburgh to act as a witness. After making the purchase I met him accidentally on the street and gave him my purchase.

RE-DIRECT EXAMINATION.

In the first store I dropped in they had one package in each shelf with both prices of merchandise showing and this was the store where they explained the difference between the two packages. I had never been in this store before. In the next store I made the purchase.

RE-CROSS-EXAMINATION.

I rarely have the wrong merchandise sent to me—I specify plainly what I want and if I did not get it would send it back. If Kellogg's Shredded Wheat were sent me instead of Niagara Falls I would return it because the latter is what I like and what I would order. Occasionally I try a new product if it is explained to me and then if I don't like it I go back to the old.

MRS. CLARA GOODMAN (Mrs. J. E. Goodman).

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

I am a housewife and recognize Plaintiff's Exhibit No. 1 as Shredded Wheat which I have known ever since I can remember and which I use nearly all the

time. When I purchase it I ask for shredded wheat and until recently have received the same as Plaintiff's Exhibit No. 1. Last week in Huber's grocery store at Altoona I was offered a package of whole wheat biscuit and the package before me is what I received when I asked for Shredded Wheat. I also had them give me a sales slip for this purchase.

(The sales slip referred to was received in evidence and was marked "Plaintiff's Exhibit No. 27.")

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 28.")

CROSS-EXAMINATION.

This purchase was made at the request of Mr. J. L. Black, the National Biscuit Company salesman at Altoona. I frequently buy at Huber's and have always gotten what I asked for including Shredded Wheat with this one exception. I was also asked to go to Fritz's and here I was given the Shredded Wheat that I asked for. The package of whole wheat biscuit that I bought I put in the car and turned over to Mr. Black who lives across the street. I do not know what became of the biscuits that were in the package. I had never heard of the Kellogg shredded wheat until this package was handed to me and did not know there were two kinds. I knew then there were two kinds of shredded wheat on the market. There is a difference between the two biscuits you show me, the Shredded Wheat biscuit is larger. When Mrs. Huber gave me this package of "Kellogg's" shredded wheat, I knew right away it was not a Niagara Falls package I was getting. I recognized instantly that it was not a new shredded wheat package.

The conversation I had with Mr. Savage had to do with the difference in the boxes and there was nothing said about the Niagara Falls biscuit being the only shredded wheat. The Kellogg biscuit does not look like the Shredded Wheat I have been buying, it is a smaller biscuit and very brown and I would describe it as a whole wheat biscuit, to call it a shredded wheat biscuit would be a misrepresentation. If this biscuit is made of wheat, shredded and put in biscuit form, I would still say that it is not Shredded Wheat for it is not made by the Niagara Falls people. It is whatever you people have marked it.

Defendant's Exhibit No. 5 for identification is not Shredded Whole Wheat biscuit because if an article is marked you usually ask for what it is marked, if that is what y[illegible] mean but if I had the same biscuit in a carton, Defendant's Exhibit No. 5 for identification I would say that that is Whole Wheat Biscuit because that is what it is called. As to Exhibit No. 5 for identification, I have always bought Shredded Wheat biscuit and therefore I would say that is Whole Wheat Biscuit.

Referring now to Plaintiff's Exhibit No. 14, the articles in the plate on the end are Shredded Wheat Biscuit. They look different to me from the other package on account of the size and the picture. One I would call Shredded Wheat and the other Whole Wheat Biscuit. This is just my own idea, just sitting here talking to you not talking to anybody about it. If you get all of the cartons out of sight and just put two biscuit down on the table, one would be Shredded Wheat and one would be Whole Wheat. I have known that only since last week because I have not known your product until last week.

RE-DIRECT EXAMINATION.

Q. What would you think, if Kellogg's or any other manufacturer, other than the National Biscuit

Company, put a biscuit on the market like that, this whole wheat biscuit, and called it shredded wheat! What would you think?

A. Well, I think it would be misrepresenting the company that it is made by.

RE-CROSS-EXAMINATION.

Ten years ago I worked as a saleslady handling clothing and such things but I have never been a demonstrator nor done any work in the grocery line.

JOE H. MILLER.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

I am a salesman, 36 years old, unemployed at present. Plaintiff's Exhibit No. 1 is a Shredded Wheat carton, the biscuit taken therefrom is a Shreded Wheat Biscuit which I remember as far back as I can. I have been eating Shredded Wheat since childhood and occasionally purchase it in a grocery store where I ask for a box of shredded wheat. I have received Shredded Wheat and have also received Kellogg's Whole Wheat Biscuit, the latter several times and once very recently, the last time being Thursday when I made a purchase of a bottle of milk, a loaf of bread and a box of Shredded Wheat. I received the first two and a box of Kellogg's Whole Wheat Biscuit. I asked for Shredded Wheat, was given the Kellogg package which I accepted and paid for and received a sales slip for. The store was Witherow where I had made purchases

before and had always heretofore received Niagara Falls Shredded Wheat. I made this purchase at the request of the National Biscuit Company representative. I was asked to go to one other store but did not do so.

(The sales slip referred to was received in evidence and was marked "Plaintiff's Exhibit No. 29.")

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 30.")

CROSS-EXAMINATION.

Mr. Black of Altoona asked me to make this purchase. I have known him about 14 or 15 years. He said that I should ask for Shredded Wheat and see what I was given and that later I was to come here and testify. Mr. Black asked that I go to the Witherow store and one or two others but as I got the evidence he wanted in the first store I did not go to the others. I believe the other store I was to go to was L. K. Black, which is a Handy Service Store by which I mean they form themselves into a buying organization.

When employed I was a salesman for the General Outdoor Advertising Company. I have never worked in the grocery line. The first time I heard of Kellogg's Shredded Wheat Biscuit was six or seven months ago when there was a package at my home which my mother said the store had sent. We used up that package but have had no more since.

At the time I made the purchase the package was set on the counter together with the other items I purchased—I recognized it as a Kellogg package later but did not open it. I saw the biscuit in the package my mother had but could see no difference between that Biscuit and the Niagara Falls biscuit. The biscuit taken from Plaintiff's Exhibit No. 1, is a Shredded

Wheat biscuit which I recognize from seeing it and knowing the shape and design.

I have known Puffed Wheat and know that wheat is put up in various forms such as shreds and puffed and flakes, also bran, and made into flour and the flour into wheat bread.

From looking at the biscuit I could not tell where it was made but I would call it a shredded wheat biscuit. One is shorter than the other but they both look like shredded wheat, one made at Niagara Falls, the other at the Kellogg plant.

Q. You want to change your testimony now and say that this Kellogg product which I show you, taken out of Defendant's Exhibit No. 6 for identification, is not a shredded wheat biscuit?

A. Oh, no, that looks like a shredded wheat biscuit.

Q. To you?

A. Yes.

Q. Did you say you had been a salesman at one time?

A. A salesman, yes.

MR. CLARKE: That is all.

RE-DIRECT EXAMINATION.

By MR. SAVAGE:

Q. Just one more question: Will you state what impression it would make on you or what your opinion would be if a biscuit, such as is contained in Defendant's Exhibit No. 6 for identification, were sold or offered for sale in the stores as shredded wheat biscuit, instead of whole wheat biscuit?

A. I think it would be very unfair competition.

E. N. THOMPSON.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

Direct Examination.

I am in the food market business which deals in meats, green goods, poultry and bakery. We are right in the residential district, our P. O. being Homewood station. We have eighteen employees, run four delivery trucks and have six telephone lines. Our store is what we call a complete service store where people can call up and receive just what they want. I have always been in the grocery business and in this particular business for about fourteen years.

I certainly do recognize Plaintiff's Exhibit No. 1 as a package of Shredded Wheat and the contents as Shredded Wheat biscuit. I have been familiar with this biscuit for the past twenty years or more in which time I do not think the biscuit has changed any in form or appearance. The general public designates this particular package as Shredded Wheat and when they call up and ask for Shredded Wheat we give them the same as Plaintiff's Exhibit No. 1 and nothing else. I have never known any other shredded wheat. The expression Shredded Wheat has a very good reputation attached to it in the mind of the public and is a nationally known product and when people ask for Shredded Wheat there is but one product that they want.

Cross-Examination.

I am carrying Kellogg's Shredded Wheat at the present time and when a customer asks for Kellogg's Shredded Wheat that is what I give them. The Kellogg's biscuit was put in during my absence and a one-cent sale run. There is not enough difference in the two products to justify a grocer in carrying both—one is a good seller, the other is not.

I believe in competition in trade and that no one should have a monopoly on any certain thing but where two articles are so similar it does not warrant a grocer in stocking them. There is a difference in the size of the biscuit but other than that there is little difference. We still have some Kellogg's biscuits on hand which we are trying to dispose of. I realize Kellogg's are large advertisers but I have not seen any of their advertisements of shredded wheat, nothing but the package itself. Both of these products are shredded wheat, there is a difference in size, otherwise they are the same with the exception that one is made in Niagara Falls, the other in Battle Creek, Michigan.

I handle Post Toasties as well as Kellogg's Corn Flakes. When a customer asks for corn flakes we ask her whether she wants Kellogg's or Post Toasties. I have never heard of anyone asking for Post's Corn Flakes but if they did I should give them Post Toasties. I have never heard of Quaker Corn Flakes but of Quaker Crackles.

JAMES LEE BLACK.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

Direct Examination.

I am a special salesman for the National Biscuit Company. At my request Mrs. Goodman, Mrs. Colliflower and Mr. Miller made purchases of shredded wheat in certain stores in Altoona. After their purchases they delivered them to me and they are now Plaintiff's Exhibits 25 to 30, all of which I can identify.

Exhibit No. 25 is the sales slip from Black's store; I marked this slip with the grocer's and the purchaser's names on the back with blue pencil.

Exhibit No. 26 I can identify by the writing of "Black's grocery" in the red pencil. This sales slip and carton were delivered to me by Mrs. Colliflower after she had made her purchase at Black's store. I put same in my car and later took them to the office where I removed the contents and folded the carton and mailed same to Mr. Thoms of the National Biscuit Company at East Liberty.

Exhibit No. 27 is a sales slip issued by Mrs. Huber on the back of which I have marked in blue pencil the date, the name of the purchaser and the store and Exhibit No. 28 is the carton which was received.

Exhibit No. 29 is a sales slip issued by the Witherow Grocery in Altoona and the purchaser J. H. Miller and this sales slip and package were turned over to me by Mr. Miller.

Exhibit No. 30 is marked 13¢ on the outside of the box and the sales slip calls for 12¢. Mr. Miller brought me the sales slip and the package direct from the store. Exhibits 27 and 28 are the identical slip and package I received from Mrs. Goodman and Exhibits 25 and 26 are those received from Mrs. Colliflower.

CROSS-EXAMINATION.

I have been in the grocery specialty business about 13 years.

It was not necessary to put any heading in Plaintiffs' Exhibit No. 27 as it was already in there. Exhibit No. 29 had no heading on it so I marked in the name of the store, the street number and Altoona, Pennsylvania, just as a reminder. I was outside of the stores in each instance when the purchases were made and immediately after they were made they were turned over to me. Sometimes I was in my car, sometimes standing on the street corner. I added the name "Witherow" out on the street, the address I added

after I had gotten back in my car. The reason for these notations was for identification purposes by me to show where the purchase was made. I did not think it necessary to have that information supplied by the seller.

I had asked Mr. Miller to go to two stores but after his purchase at the Witherow store I told him it would not be necessary to go to the other. One of the other women went to two stores in one of them she got the shredded wheat she had asked for and I still have that package, not deeming it necessary to say anything about that. In the other instance the lady got Kellogg's Whole Wheat Biscuit instead of Shredded Wheat. I do not know whether it is shredded wheat or not because the outside of the carton calls for Kellogg's Whole Wheat Biscuit. If the Kellogg's biscuit were served to me in a bowl and not having tasted it I would say that it looked like shredded wheat. I have never tasted them and do not know whether there is any difference in the taste from Shredded Wheat. If a customer asked me whether the Kellogg product was a shredded wheat I would say it was a substitute.

I do not know just how Shredded Wheat is made but know that it is one of the biggest selling breakfast foods that there is. I know that it is made of wheat as the carton calls it Shredded Wheat and according to the laws of Pennsylvania things have to be what they are advertised.

I have been to Niagara Falls but never to the Shredded Wheat plant; the time I was there was July 4th when the plant was closed. My contact with Shredded Wheat has been only since the National Biscuit Company has taken it over. I know nothing about the biscuit being shredded, I only know what it is advertised as. In my contact with the stores I tell the merchants that Kellogg's product is a substitute for

that made at Niagara Falls. I ask them if they have been successful in selling Shredded Wheat and in nine times out of ten they say "yes" and then I ask them why they substituted. There are various reasons given for this question. I never talk about Kellogg products, if possible, and if a grocer asked whether there was any difference between the Shredded Wheat made by National and that of the Kellogg product I would tell him that was for him to decide.

On two occasions in the past I was served with Kellogg's individual package in two different restaurants and these were my first introduction to the Kellogg Whole Wheat Biscuit. Had they been served outside the carton I would have noticed a difference in the taste and would have realized that they were not Shredded Wheat. I also recognized the difference in size and after they were served to me I merely ate some of the milk and then pushed the biscuit aside, being loyal to National Biscuit Company products, and that was my first experience and introduction to Kellogg's Whole Wheat Biscuits.

RE-DIRECT EXAMINATION.

The first of these substitutions occurred in the Palace Restaurant in Johnstown and I think the other was at the Washington restaurant in Greensburg, Pennsylvania. The Greensburg incident happened three or four weeks ago and the Johnstown incident a week or two prior to that.

I realize that products are saleable in Pennsylvania under trade names and trade-marks and that those sold as Kellogg's Whole Wheat Biscuit or Kellogg's corn flakes need not necessarily be made by Mr. Kellogg.

In my opinion the name "shredded" means something pulled apart such as shredded wheat or shredded

cocoanut, but Shredded Wheat to me means a biscuit that I have known since childhood.

RE-CROSS-EXAMINATION.

In my second experience with the individual carton of Kellogg's biscuit I did exactly the same as in the first, I ate a little of the milk off and pushed it aside. I fully realized I was getting Kellogg's product as in each instance the biscuits were served to me in the individual carton. I realize that Kellogg's product is being sold in competition and being sold as a shredded wheat. It makes a good substitution and is being handed out to consumers for Shredded Wheat on requests for Shredded Wheat.

My favorite brand of Corn Flakes is Kellogg's, occasionally I eat another brand. If I asked for Kellogg's and was given another brand I would say it was a substitution. Since childhood Shredded Wheat has always meant the Niagara Falls product to me and Corn Flakes has always meant Kellogg's.

FRANK J. PIALET.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

For the past twenty years I have been a retail grocer in the suburbs of Pittsburgh. We carry a full line of groceries and employ three clerks. Our store is what is called a service grocery store, telephone orders, deliveries and credit. I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat and the contents as Shredded Wheat Biscuit which I have been familiar with for the past twenty years as a grocer and previously as a consumer about ten years. The Shredded Wheat Biscuit

in form, shape and appearance remains the same as I have always seen it. The term "shredded wheat" conveys to me a biscuit made of wheat in shredded form and manufactured at Niagara Falls and regarded by me as the only Shredded Wheat Biscuit. When our customers ask for Shredded Wheat we give them the original Shredded Wheat same as Plaintiff's Exhibit No. 1. Plaintiff's Exhibit No. 10 with the dish on the end of the package I recall being used up to three or four years ago, the length of time it was in use I should say was about twenty-five years.

About two weeks ago I went to the Grayboro for breakfast and called for Shredded Wheat biscuit. The young lady picked up an individual package of Kellogg's Whole Wheat Biscuit—I told her that was not Shredded Wheat and she said it was just the same. I finally took it because she had opened the package, but it was not the same as Shredded Wheat to me.

CROSS-EXAMINATION.

This was a biscuit made of shreds of wheat and baked, although the package did not read that way, but what I wanted was the old familiar Shredded Wheat made at Niagara Falls. I knew immediately that it was a different biscuit as it was not as crisp nor did it have the toasted flavor of Shredded Wheat. I did eat one of the biscuits but did not like them. I cannot say about this dislike being general, but I will say that Kellogg is practicing on someone else's trade-mark and selling under someone else's advertising. The package, to my way of thinking, misrepresents the contents. To my taste the Kellogg biscuit is not as crisp or as well toasted as the National Shredded Wheat, but other opinions may not be the same.

If I were asked for Kellogg's Corn Flakes I would not give a customer Post Toasties and tell them they

were the same. The girl evidently had no Shredded Wheat and gave me the nearest thing to it, but to my taste it was not Shredded Wheat. She said it was the same as the other shredded wheat biscuit, of course I had the carton before me and knew it was not the same as it was marked "Whole Wheat Biscuit" and the size and the taste were not the same.

I have been in the grocery business about twenty years but in the retail grocery for myself only about five months.

I came here to testify because I was asked whether I had ever asked for Shredded Wheat and had been given whole wheat biscuit. I did not know the gentleman who had asked me, but I told him that I had and where it was. This was several weeks ago and then another gentleman whose name I do not know asked me to testify here—I have three people running my store, so I was able to get away. If anyone asked for Shredded Wheat I would give them the Niagara Falls product; if they asked for Kellogg's Whole Wheat Biscuit I would give them that; if they asked for Kellogg's shredded wheat I would give them the Whole Wheat Biscuit.

RE-DIRECT EXAMINATION.

If I had a product on which I had spent millions of dollars and years of time to put it on the market I would consider it decidedly unfair if someone else came along and put out the same kind of an article. I know that the Shredded Wheat Company has done extensive advertising over a great period of years.

RE-CROSS-EXAMINATION.

We carry every product that Kellogg makes except their Whole Wheat Biscuit, for which there is no demand. If a customer asked for it I would tell her

we did not keep it as the turnover was so slow we could not keep it fresh. We tried it out but the customers wanted the old shredded wheat biscuit.

I handle Kellogg's Corn Flakes and their Rice Crispies, but I do not handle Post's Corn Flakes because my trade prefers Kellogg's. If a customer just asks for Corn Flakes I give her Kellogg's; none other come up to it. I certainly believe in the competitive system, but it does not seem fair for another concern to put something similar on the market and gain the advantage of the enormous amounts of money that have been spent in advertising. Wherever you would see Shredded Wheat you would see a picture of the Niagara Falls cataract, that being the home of Shredded Wheat.

WILLIAM H. McSHANE.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

I have been a retail grocer for the past eighteen years carrying a full line of groceries in the same town, eleven years for others and seven years for myself. Our store is both a service and cash and carry.

Plaintiff's Exhibit No. 1 is Shredded Wheat, the contents of which have looked the same ever since I have sold it, for the past eighteen years. If a customer asked for Shredded Wheat I would give her the package similar to Plaintiff's Exhibit No. 1. Shredded Wheat to me means a biscuit made at Niagara Falls and none other. To my customers it means a breakfast food and as they have always been accustomed to getting this particular biscuit, that is what I give them when they ask for Shredded Wheat. I carry the Kellogg Whole Wheat Biscuit. Some years ago there was

a similar biscuit on the market—I believe it was called Ross, but it did not sell.

CROSS-EXAMINATION.

I carry both products at the present time and recognize that they are both physically the same type of product and look alike except that the shredded wheat biscuit is larger. I have eaten the Kellogg product and have enjoyed it and in my mind there has never been any confusion between the two products.

I handle Kellogg's Corn Flakes and Jersey Corn Flakes as well as Post Toasties and give the customers whichever they ask for. The three are different makes of the same general type with the Post Toasties a little thicker than the Kellogg's Corn Flakes.

9.

MARGARET TRESCHER.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

I am a housewife, married, living in Pittsburgh.

Plaintiff's Exhibit No. 1 is a package of Shredded Wheat, the contents of which I have been familiar with for the past fifteen years. I associate the name of Shredded Wheat with Niagara Falls, that being the picture on all their packages. When I order Shredded Wheat that is what I usually get, but recently I went into Isaly's Dairy and asked for Shredded Wheat and was handed this package. They had just a small package and they gave me that. I have identified the package with my initials. No, I did not eat them on the premises. I was going to eat them on the premises, and it was rather late, so I asked the waitress to put them in a bag for me. She asked me if I wanted more

as long as I was taking them away. This is the bag they put them in and I just looked at the package, because really I had never seen them.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 31.")

CROSS-EXAMINATION.

After I initialed the carton I gave it to Mr. Crilly, whom I have known for a great many years and who works for the National Biscuit Company. He asked me if I had ever been given any other product when asking for Shredded Wheat. At the time I did not know there was another product. The next time I went to Isaly's, where I eat occasionally, I asked for Shredded Wheat and was given the Kellogg product. I knew right away it was a different shredded wheat that I was getting. I noticed right away that this was a Kellogg package they had handed me. I took it home and ate it, because the place was crowded at the time. Mr. Crilly asked me if I would go to Isaly's sometime and see what product they served, but he suggested no other places for me to go to. I had never known before that there was a similar biscuit on the market, but I realize now that there are although they taste somewhat different, one biscuit is harder and has less taste to it and it is toasted more. By that I would assume that it was a biscuit made out of wheat in shredded form.

RE-DIRECT EXAMINATION.

Up to the time I received the two Kellogg Whole Wheat Biscuit I had never had anything else that was like a shredded wheat biscuit. Defendant's Exhibit No. 6 looks like Shredded Wheat; if I saw that dish dissociated from the other printing matter I would think it was shredded wheat.

GEORGE JOHN BORNEMAN.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

Direct Examination.

I am in the trucking business for the Pittsburgh Wholesale Delicatessen and am familiar with Shredded Wheat for the length of time that I have sold it, about twenty-four years. The package before me marked "Plaintiff's Exhibit No. 1" is Shredded Wheat, the general appearance of the package and biscuit have not changed any during the time I have known it.

Recently I was in a restaurant with Mr. Crilly and he asked me to have something to eat. I had had my dinner so just ordered some shredded wheat and was handed a package of Kellogg's Whole Wheat Biscuit. I asked at the time if that was Shredded Wheat and was told that it was the same thing. I ate the biscuits and have with me here the carton.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 32.")

Cross-Examination.

Mr. Crilly, who is one of the National Biscuit men, came in the restaurant while I was there and joined me—he asked me to have something to eat—I had already eaten, but as I can always eat at any time I just ordered some Shredded Wheat. I immediately recognized a difference in the biscuit, first in the package and then in the size and taste of the biscuit. I was familiar with the fact that Kellogg's made a shredded wheat biscuit, having handled it when I was with the independent stores. While with the A. & P. stores I was familiar with Kellogg's Corn Flakes as well as two other brands which they carried, the Jersey and

a brand of their own called Sun filled corn flakes made by the Quaker people and sold in their stores exclusively. The A. & P. have from fourteen to sixteen thousand stores. I waited on the counter there and when anyone just came in and asked for corn flakes I would give them Sun filled corn flakes. Of course, if they asked for Kellogg's or Jersey we would give them the brand they asked for if we had it in stock.

I came here to testify at the request of Mr. Crilly inasmuch as I had had this experience while with him—I came of my own free will and do not expect to be paid.

RE-DIRECT EXAMINATION.

While with the A. & P. stores, when a customer asked for Shredded Wheat we gave her the package same as Plaintiff's Exhibit No. 1.

RE-CROSS-EXAMINATION.

It is six months since I left the A. & P. At that time they did not carry Kellogg's Whole Wheat Biscuit and I do not know what their policy would be now if they carried both products. I have never heard of shredded cocoanut or shredded codfish.

JOHN A. ORR.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

I am a retail grocer in Turtle Creek, a residential suburb of Pittsburgh. I have four stores, all in Turtle Creek. I am familiar with Plaintiff's Exhibit No. 1, having sold it about thirty years, first in Toronto, Canada, for the T. Eaton Company, and for the past twenty-eight years in the United States. I have been in business for myself since 1921. I recognize the

contents of package as Shredded Wheat, which has remained the same size and shape during the years that I have been familiar with it.

Shredded Wheat to me means a national product which we are selling to the public every day and it means but one article. The purchasing public come in and ask for it and we give them Shredded Wheat, which is what they want. It has a positively established reputation and a lot of good will attached to it. Shredded Wheat has been so extensively advertised that it practically sells itself. Three or four years ago I carried Kellogg's Shredded Wheat, but it could not compete with Shredded Wheat Biscuit—there would be no repeat orders and we finally had to send some back.

I do recall when the Kellogg people changed the name of their biscuit to Whole Wheat, but I do not know the reason for it and I have carried none of the biscuit since the name has been changed. At the present time I have one of their packages with the glassine window in. Kellogg's salesman was in my store the other day and gave it to me and told me if I told the people it was like shredded wheat we would sell it. Looking through the glassine window the biscuit does look like shredded wheat, but there is a difference in the taste. I have tasted them and the Kellogg's biscuit, when it becomes moist, is tough, whereas Shredded Wheat remains crispish.

I do think the glassine window in the package will affect the sale of Whole Wheat Biscuit, as people will see that the biscuit looks like Shredded Wheat and will buy it on the strength of Shredded Wheat quality.

Cross-Examination.

I believe in competitive sources of manufacture of different products and have no fight with the Kellogg

people; we try all of their products but their shredded wheat will not sell in our store and I have no room for goods that are not movers.

The goods in Defendant's Exhibit No. 6 is an imitation Shredded Wheat, there being a difference in the size, the Niagara Falls product being about an inch longer. I handle Kellogg's Corn Flakes, in fact five brands of their cereals. I also handle the Jersey corn flakes which are in a sense an imitation of the Kellogg Corn Flake except for the difference in the quality, the Kellogg's Corn Flakes being superior in my mind and in the minds of most people.

I do not think a grocer should fraudulently sell the Kellogg product for the Niagara Falls products—they are both shredded wheat biscuits and of course the Kellogg product is as good as they know how to make it. The Kellogg package is advertised as Whole Wheat biscuit and if a customer comes into my store and asks for a package of Shredded Wheat and if I give her the Whole Wheat Biscuit she would say "that is not what I want". Then I would have to tell the lady "it is the very same as Shredded Wheat but put up differently" as she would not know by the name Whole Wheat that it was shredded wheat. It is made of wheat, on the same order as Shredded Wheat but there is a difference in the make-up. Some of the customers will repeat but many will not. I know I did not get rid of mine. No, I would not be surprised to be told that Kellogg's had a very large business on Whole Wheat Biscuit and I agree that if it were not for the plate with the two biscuit on it no one would know what was in the package as it could be any one of six or eight different things and still be called Whole Wheat Biscuit. I could not sell this article as a Whole Wheat Biscuit and it was necessary to tell people that it was a biscuit made by Kellogg's. This was not un-

fair on our part as it was our only avenue to dispose of the goods and had customers come back and asked for more of it I would have been perfectly satisfied.

RE-DIRECT EXAMINATION.

Q. Now let us get down to brass tacks. Is it fair or unfair for the Kellogg Company to get out an imitation, as you call it, of shredded wheat biscuit?

A. No, it is not fair to the people who put out Shredded Wheat. It is not fair to them, to come in and put out this other product, because they cannot sell this without telling them it is Shredded Wheat and telling them it is identically the same as Shredded Wheat.

When I had the package with the window in it all I had to do is to put it on the counter and let them see for themselves.

RE-CROSS-EXAMINATION.

If I were trying to sell a corn flake put out under a different name and also carried Kellogg's Corn Flakes and a customer came to buy corn flakes I would have to tell her that the contents of the first package was an imitation of Kellogg's Corn Flakes in order to sell it and in order that she may know what is in the package. If Kellogg was the only concern allowed to use the word "Corn Flakes" and others were making a similar cereal put out under a different name I would have to explain to them that it was like Kellogg's Corn Flakes.

There were other articles sold blind like that necessitating explanations, one being a Whole Wheat product put out by the Jersey Corn Flakes people which looked like Rolled Oats but was a Rolled Wheat and it was necessary to mention each time you sold a package that it was like Rolled Oats.

In the case of the Jersey Corn Flakes the name is on the outside of the package and the customer

knows exactly what it is. The sale of Kellogg's Whole Wheat Biscuit was handicapped by the necessity of having to tell customers what was in the package. Had the package been marketed as Kellogg's Shredded Wheat it would have explained itself. If the dish were removed from the face of the package and reference to shredded wheat removed the package would have to be opened to find out what it contained. It requires a real salesman to put across the sale of a blind package.

Yes, I recall when Kellogg's Corn Flakes were known as toasted corn flakes and so many brands of corn flakes came on the market that Kellogg had to call theirs Kellogg's Toasted Corn Flakes.

I understand that both of these companies are friendly to us and I am not fighting one more than the other. They are all my friends.

ORVILLE KEEDER.

Deposition taken in Pittsburgh, Pennsylvania, December, 1932.

DIRECT EXAMINATION.

Empire, Ohio, is a town of about 700 about twelve miles up the river from Steubenville.

Recently at Isaly's in Steubenville, a confectionery store which sells milk and butter and puts up lunches, I asked for shredded wheat and was handed this box of Kellogg's Whole Wheat. I said "Now, this is Shredded Wheat, is it?" and she said "Yes, sir." I knew that it was not from the box but I at it and brought the box away. The piece of paper attached to the box was signed by me and attached to the box by Mr. Herron about an hour after I received it.

(The box referred to was received in evidence and was marked "Plaintiff's Exhibit No. 33.")

CROSS-EXAMINATION.

Isaly's Restaurant is in Steubenville. I had never been in there before but went this time at the request of Mr. Herron who came in after me. Charles Stewart, a young man who works in the National Biscuit Company offices in Steubenville introduced me to Mr. Herron and I was then asked to go to this restaurant and to buy shredded wheat. I ate one of the Kellogg biscuits and did not like it. I do not care for shredded wheat so it made no difference to my personal taste which package I received.

THEODORE KEENAN.

Deposition taken in Pittsburgh, Pennsylvania, December 1932.

DIRECT EXAMINATION.

I am familiar with Shredded Wheat and recently I went to Kresge's five-and-ten-cent store in Steubenville and asked for shredded wheat. I was handed the biscuits and the girl threw the package under the counter. Later another girl came along and I asked her to give me the package which was thrown under the counter. I have that box with me here gotten at the request of Mr. Herron of the National Biscuit Company. The paper attached to it was signed by me and attached by Mr. Herron in my presence.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 34.")

I had never seen the Kellogg small package but had seen the Niagara Falls package and knew instantly that I was not getting the Niagara Falls product when the girl at Kresge's handed me the package.

MR. CLARKE: I am willing to stipulate that each of the following witnesses: F. H. Fitzgerald, 7301 Kelly Street, Homewood; P. E. Gibson, 5847 Ellsworth Avenue, East Liberty; George E. Straw, 1111 Maple Avenue, Turtle Creek; Frederick Gross, 317 Atlanta Avenue, McKeesport; O. Dornbush, Adams Street, Steubenville, Ohio, if called would testify that he is a retail grocer in or about Pittsburgh, that he handles the Shredded Wheat of the National Biscuit Company, formerly made by The Shredded Wheat Company; that he has known it for several years, and that, when customers ask for shredded wheat, the order is always filled with the product of the plaintiff.

And it is further stipulated that said witnesses also would testify that customers who ask for corn flakes mean Kellogg's Corn Flakes, in practically every instance, and that where a customer asks for corn flakes the grocer gives them Kellogg's.

WILLIAM FRANKLIN NUBERMEYER.

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

I have been in the grocery business about twenty-five years carrying a full line of groceries, including cereals. My business is in the residential suburb of Cleveland and we do a credit service delivery business, receiving a great many orders over the telephone.

I recognize Plaintiff's Exhibit No. 1 as a package of Shredded Wheat and the contents of the package as shredded wheat biscuit. I have been familiar with shredded wheat for the past twenty-five years and have always carried that item. During this time I have

noticed no perceptible change in its appearance. The term "shredded wheat" conveys the fact that it is shredded at some time or other and is made by The Shredded Wheat Company of Niagara Falls, and is a breakfast food.

When a customer either in the store or over the telephone asks for shredded wheat we give her the same as Plaintiff's Exhibit No. 1 which we have always known. Plaintiff's Exhibit No. 10, particularly the end of the carton was changed about a year and a half ago. I remember seeing that dish as long as I can remember shredded wheat. The strip of paper, I have seen in store windows within the last year.

(The strip display sign referred to was received in evidence and was marked "Plaintiff's Exhibit No. 35.")

MR. VILAS: I have a glass bowl here, with biscuit in it, which I would like to have marked for identification.

MR. CLARKE: You may have it marked in evidence now, if you wish.

MR. VILAS: Very well. I offer it.

(The glass bowl referred to was received in evidence and was marked "Plaintiff's Exhibit No. 36.")

The glass bowl, Plaintiff's Exhibit No. 36 I have seen some ten or twelve years ago in restaurants, cafeterias, etc., usually filled with shredded wheat biscuit.

A. It seems as if every restaurant had them—that is, the cheaper type of restaurant, cafeteria, and the little restaurant, on the outskirts, as I remember it.

CROSS-EXAMINATION.

I know of Kellogg's Shredded Wheat which we handle and which we introduced in the store about three years ago.

HARRY EDWIN PENDER.

Deposition taken in Cleveland, Ohio, December, 1932.

Direct Examination.

I am in the retail grocery business for the past twenty-two years working for the Southworth Company in capacities from driver to superintendent and at the present time store manager. We are members of a voluntary chain of which there are between one hundred and fifty and two hundred stores. In the store which I manage we carry a complete line of groceries and meats. Our store is a service store in the downtown section run chiefly on a cash basis to accommodate the people working in the downtown section and who wish to pick up things to take home with them. The orders taken downtown are transferred to outlying stores for delivery service.

Plaintiff's Exhibit No. 1 which you have in your hand is Shredded Wheat and the contents are Shredded Wheat which I have known for about twenty-two years and which has remained the same in appearance. The package in which the biscuits were packed has also remained practically the same during all those years. Plaintiff's Exhibit No. 10 with the dish on the end of it I can remember up until recently, the dish on one end and the Falls on the other, I should say this was on for approximately twelve or fifteen years.

If a customer asked for shredded wheat I would give her the Niagara Falls Shredded Wheat and I would say that it is the package they would expect to receive. Shredded Wheat has a reputation or goodwill attached to it and they have advertised very extensively. We have had their advertising in the store at different times.

I do not recognize the strip, Plaintiff's Exhibit No. 35 but I do recognize the glass bowl, I have not seen.

that for perhaps fifteen years, when I did it was always in front of you in a restaurant.

We handle a full line of Kellogg's products including Kellogg's Whole Wheat Biscuit in packages like Defendant's Exhibit No. 6.

CROSS-EXAMINATION.

If a customer asked for Kellogg's Shredded Wheat I would ask them if they meant Kellogg's Whole Wheat Biscuit or Shredded Wheat.

There is a family resemblance between the whole wheat package and the Kellogg family of packages as to color, set-up, etc. About three years ago we handled the package known as Kellogg's Shredded Whole Wheat Biscuit the same as Defendant's Exhibit No. 5. The first time that package was shown to me it would throw my idea to the package of Shredded Wheat without seeing the contents but if I were shown a package of Kellogg's Whole Wheat biscuit without any illustration on it I would not know what was in the package and would have to open it up the first time. If the package contained a picture of shredded wheat on it it would then revert back to the other Shredded Wheat.

I have associated "Niagara Falls" with Shredded Wheat ever since the package came into existence. I used to do a good deal of window trimming and in pyramiding them up we always tried to alternate the ends.

RE-DIRECT EXAMINATION.

If I saw a package like Defendant's Exhibit No. 6 so blanketed that I just saw the picture of the dish with the biscuit in it I would think of the original Shredded Wheat made at Niagara Falls.

RE-CROSS-EXAMINATION.

I would be very much surprised now to find that there was any grocery man in the grocery business who did not know that there were two brands of shredded wheat on the market, one Niagara Falls and the other Kellogg's.

JACOB J. COHEN.

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

For approximately eleven years I have been in the general grocery business carrying a full line including cereals. Plaintiff's Exhibit No. 1 is Shredded Wheat which I have handled since I have been in the game. The biscuit has been substantially in the same form and appearance since I have known it.

The term "shredded wheat" to me means only the one biscuit which was the only one I knew of up until a few years ago when muffets came on the market which I handled too, at one time.

When a customer asks for shredded wheat I give her the package same as Plaintiff's Exhibit No. 1 as that is the only kind I handle. I handled Kellogg's Whole Wheat Biscuit at one time packed in the type package as Defendant's Exhibit No. 5. I got this lot from the wholesaler who said that I could sell the consumer telling him it was shredded wheat, that there were more biscuit in the package and it was a little lower priced than the National Biscuit product at that time. The sale of it did not increase as I hoped it would, the customers preferring the original Shredded Wheat and I was forced to wish it on a lot of customers by sending them Kellogg's when they phoned their

orders, unless they complained, which some of them did and then I had to give them the original Shredded Wheat.

Last Saturday in the Sunnybright Restaurant I asked for shredded wheat for breakfast and was given a little box. I said, "Have you got them," and he said, "No, this is shredded wheat, ain't it?" I accepted it and examined the box which said Whole Wheat Biscuit on one side and Shredded Whole Wheat on the other.

CROSS-EXAMINATION.

We have had both packages in the home and I really do not see a lot of difference in the taste. They both look alike and taste alike practically. They are both made of wheat and put into biscuit form. From the name I have assumed that they were made of wheat cut into little shreds and as far as I am concerned, the description fits the Kellogg Biscuit as well as the Niagara Falls biscuit.

The fact that the chain stores did not carry Kellogg's made an impression on me. The jobber who sold it to me, an old Clover Farm Company man said "here is a good chance to get back at the National Biscuit Company, there are more biscuits in the package and the price is lower too." At first I thought it would go across pretty good but it did not seem to so I had to use the argument that it had more in it and that it was a shredded biscuit biscuit. The Kellogg name was prominent on the package.

The National Biscuit Company changed their policy on the discount proposition in the cracker department in the past year or so but that change was not due to the competition of the Kellogg Company. They never tried to encourage the sale of their crackers through their shredded wheat line. About a year ago they started selling the grocer shredded wheat direct;

previously it was purchased through jobbers and the price was the same and their price was the same. About six months ago they started giving the same discount to everybody alike, before that independent grocers felt that the chain stores were getting a better discount in the cookie department.

I handle the full line of Kellogg's products with the exception of shredded wheat and that did not go across with me. I handle Kellogg's and Post's Corn Flakes. If a customer asks for Corn Flakes I give her Kellogg's unless she asks for Post Toasties.

RE-DIRECT EXAMINATION.

When talking about cracker discounts and chains, etc., I refer entirely to the sale by the National Biscuit Company of its regular line of crackers and cookies. This dispute has been going on right along, their contention being that the Federal Trade Commission had to give them permission to allow the sale. National Biscuit Company started selling Shredded Wheat about the first of the year and since then we have been getting a cracker discount on same of 17½%.

RE-CROSS-EXAMINATION.

The discount proposition came on this year—Kellogg's Shredded Wheat has been on the market two years or more and it is probably two years since I handled any of it as I did not have over two cases altogether. It did not move fast enough for me. I got rid of what I had although I regarded it as a slow moving product.

It would not surprise me to hear that they had quite a volume on the product now and if I thought it would move fast enough I would stock up with it again.

MARX ALTFELD.

Deposition taken in Cleveland, Ohio, December, 1932.

Direct Examination.

I am a grocer having been in business in Cleveland for about thirty years. I handle groceries and delicatessen including cereals. Plaintiff's Exhibit No. 1 is the old Shredded Wheat biscuit. I have never handled anything but the Niagara Falls Shredded Wheat and this is what a customer gets when asking for shredded wheat.

I have known Shredded Wheat for over thirty years and some thirty or thirty-two years ago I went through their factory at Niagara Falls. When a customer asks for Shredded Wheat I know she wants the Niagara Falls biscuit as I have never handled any other.

I recall Plaintiff's Exhibit No. 10 having had cartons like that in the store and remember seeing the building and the picture of the dish for a good many years. I also remember seeing the strip, Plaintiff's Exhibit No. 35 in stores but not recently. I do not remember ever seeing the biscuit displayed in a glass globe like Exhibit No. 36.

Cross-Examination.

Yes, I have heard of Kellogg's Shredded Wheat but not for long. It has always been my thought to confine myself to as few lines as possible and that if I would confine myself to Shredded Wheat people would take that, if they did not want that I would let it go. That was my reason for not putting in Kellogg's Shredded Wheat. I have seen the Kellogg product and recognize it as the same kind of a biscuit but smaller. I do not remember ever seeing Defendant's Exhibit No.

6. When it first came out it was in a package much like Defendant's Exhibit No. 5.

CARL MILLER.

Deposition taken in Cleveland, Ohio, December, 1932.

Direct Examination.

I have been in the grocery and meat business for approximately twelve years, previous to that had experience in the grocery business since about 1916.

I recognize Plaintiff's Exhibit No. 1 which you have in your hand as shredded wheat and the contents of the package as shredded wheat biscuit which I remember as a little boy when mother had them and if I remember rightly they were the same then as now. I have known them continuously since then and their form, shape and appearance has remained practically the same. Shredded wheat means to me only one thing, the biscuit contained in the package you have in hand.

When a customer asks for shredded wheat I give her the package same as in your hand, Plaintiff's Exhibit No. 1, never anything else. Years ago I saw a package like Plaintiff's Exhibit No. 10, the picture of the biscuit in the dish on the end of the package has been on every box that I have ever seen that I can recall. It is not on Plaintiff's Exhibit No. 1 and I cannot definitely say for how many years I have been familiar with it.

The strip, Plaintiff's Exhibit No. 35, I believe I have had at the store, Mr. Graham, the National Biscuit Company salesman having put them up in the store about a month or two ago.

Defendant's Exhibit No. 6 with the name blocked out suggests a Shredded Wheat Biscuit. I have never

stocked any of Kellogg's Whole Wheat Biscuit and never knew that they made a biscuit called Whole Wheat. No one from Kellogg's ever called on me and I never had a call for the product, if I had had enough of them I might have stocked it but I really do not know whether I would have or not as the package to me looks like a little bit of a steal.

The picture of the shredded wheat in the dish for one thing suggests the steal. If they were put in a package similar to Defendant's Exhibit No. 5, without the picture, I believe that would be a little more fairly taken. To me there is only one Shredded Wheat, that one package. (Referring to Plaintiff's Exhibit 1.)

CROSS-EXAMINATION.

That is a hard question to answer whether there is any other name that would describe that biscuit, I do not know of any. From just the name Whole Wheat Biscuit I would not have a definite idea what the package contained. It might be any one of 6 or 8 different kind of biscuit and to find out definitely it would be necessary to open the package. The picture of two shredded wheat biscuit on the package would indicate that it was a biscuit made of wheat in shredded form. I handle no Kellogg products whatsoever, no Kellogg representative having ever called upon me.

WILLIAM PERRY FISHER.

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

I am an interior director, thirty-six years old, not connected in any way with the National Biscuit Company and recognize Plaintiff's Exhibit No. 1 as the

National Biscuit Company Shredded Wheat which I have been familiar with about seven years, my younger sons eating most of the shredded wheat in our family. When I ask for a package of shredded wheat I expect to get the package with the picture of Niagara Falls on and I have never been handed anything else in a grocery store but had that experience in a restaurant at 8719 Huff Avenue, Cleveland, on Saturday, December tenth. I went in, asked for shredded wheat, toast and coffee. Immediately in front of me, at the back of the counter, I noticed small packages of Kellogg's Whole Wheat Biscuit—the man turned around, opened one of these packages, put it in a bowl and handed it to me. I looked the package over and noticed that it did not have the picture of Niagara Falls so I asked if it was shredded wheat and he said, "Yes, isn't that what you ordered?" He handed me the package which was marked Whole Wheat Biscuit and said it was the same thing, so I ate the biscuit and brought the package with me.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 37.")

CROSS-EXAMINATION.

I came to save this package this particular day because Mr. Owens, who is salesman for National Biscuit Company is a particular friend of mine and in discussing different products he told me that some stores and restaurants were serving Kellogg's Whole Wheat Biscuit for Shredded Wheat, so when I had this experience at Harvey's Restaurant where I dine whenever I am on Huff Street, I just brought the package out with me and gave it to him. When the biscuit was served in the bowl I had no doubt about it being a shredded wheat biscuit product, that is, a wheat shredded into shreds and put into biscuit form.

MRS. EMILY HERRON.

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

My husband is a special salesman for the National Biscuit Company, traveling all over. I recognize Plaintiff's Exhibit No. 1 as being Niagara Falls Shredded Wheat which I have been familiar with for about fifteen or eighteen years, having used it in the home for a good many years as I have a youngster who uses it all the time. When I ask for a package of shredded wheat I expect to get the product made at Niagara Falls and which I have seen made.

About three weeks or a month ago I gave a telephone order to Hammer's, the store close to my home at One Hundred and Second Street and Madison, and among other items ordered Shredded Wheat. When the order was delivered I received Kellogg's Wheat Biscuit. The order arrived in my absence and I did not see the grocer that evening, in fact, I have not been there since. I served the biscuits to the youngster in the morning but she seemed to notice the difference in taste and refused to eat it.

I brought the box that the biscuits were in with me, the piece of cardboard attached with writing on must be the grocer's who took the order. This was in the box with the groceries when it was delivered. I could see the biscuits in the package through the glassine window. The writing in lead pencil on the package is "Sakot," the name of my sister and brother, with whom I live and who pay for all the things purchased.

(The slip referred to was received in evidence and was marked "Plaintiff's Exhibit No. 38-A," and the box referred to was received in evidence and was marked "Plaintiff's Exhibit No. 38-B.")

CROSS-EXAMINATION.

The slip, which was received in evidence as Plaintiff's Exhibit No. 38-A, was with the groceries when I came home in the evening. I could see through the window in the package that this was not the Niagara Falls Shredded Wheat, there is a difference in the size and when I ate it noticed a difference in taste and texture, one seems crispier and harder than the other.

I have not ordered any shredded wheat from this store since. I intended to go to the store but as there were a few heavy things I did not care to carry I telephoned it and my husband then asked me to include shredded wheat. This is the only time I have ever received Kellogg's Shredded Wheat. The biscuit in the package looked like shredded wheat and I would not know any other name for it but it is what I have always called the regular Shredded Wheat which I have been accustomed to using and which I expected to get. I could see through the glassine window that the Kellogg product looked like shredded wheat but there was a difference. Sometime during the summer I was at Niagara Falls and saw the process of making the Shredded Wheat biscuits, saw it made into shreds and cut off into biscuit form and then baked, this was since the National Biscuit Company took over the business.

MRS. ADELINE LANSDOWNE (Mrs. S. J.).

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

I am not related to anyone connected with the National Biscuit Company but have some friends employed by them. I keep house in Cleveland. I recognize Plaintiff's Exhibit No. 1 as the National Shredded Wheat which I have been familiar with for quite a

number of years. I have had eight in the family and have bought and used an awful lot of it. When I ask a grocer for shredded wheat I expect to get the Niagara Falls Shredded Wheat, same as Plaintiff's Exhibit No. 1.

A couple of times I have had the experience of getting something else when I asked for shredded wheat, the first time was one day last week. We drive a lot and I make purchases wherever it is handy. On this day I stopped at a store on Hayden Avenue and asked for a few things on my list including Shredded Wheat. The grocer said "I do not have Shredded Wheat but I have Kellogg's—it is just the same." I looked at it and said, "This is not made at Niagara Falls," he said "No, but it is just the same," so I took it. I cannot tell the name of the store, as it was in a neighborhood that I just happened to go through. The package I have in my hand is one of the packages I received when asking for shredded wheat. There is a yellow slip attached to it and the slip is marked Norris Grocery, which is the name of the store. The storekeeper wrote what is on it in pencil and Mr. Rank, one of the salesmen, wrote my name and address at the bottom of it. The second instance of receiving Kellogg's Shredded Wheat was in a store on Lakeview Road. I asked for shredded wheat, the grocer looked up on the shelf and said "I have Kellogg's." I told him that was not what I wanted and he said "it is just the same," so I took it and had the grocer give me a sales slip. I then gave the package to Mr. Rank.

(The yellow slip referred to, from the Norris Grocery, was received in evidence and was marked "Plaintiff's Exhibit No. 39-A," and the carton with it was received in evidence and was marked "Plaintiff's Exhibit No. 39-B.")

(The white slip referred to, from the grocery on Lakeview Avenue, was received in evidence and

was marked "Plaintiff's Exhibit No. 40-A," and the box accompanying same was received in evidence and was marked "Plaintiff's Exhibit No. 40-B.")

CROSS-EXAMINATION.

I noticed that the biscuits looked like shredded wheat, but were smaller than the Niagara Falls product and they were harder. I have been to Niagara Falls but have never been through the factory. The two products look very much alike until you come to try them. My children ate the Kellogg biscuit once but said they were harder and did not taste the same and were not as good as the others.

Mr. Rank was not with me when I made these purchases and he did not suggest these stores; he just asked me if I ever did any buying to ask for some shredded wheat and as I said whenever I am out riding I stop at any store that is handy. These are the only two instances where the Kellogg product was given me—I kept one of these packages and gave Mr. Rank the other. He wrote my name and address on one package and the signature on the box I kept is mine, written by me.

JACOB F. SCHNEIDER.

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

I have not been in business for twelve years, before that I was a grocer in Cleveland, twenty-five years for myself, and about fifteen years for other people. I have been in the retail grocery business since I was fourteen years old, all that time in Cleveland and for twenty-five years had my own store in which we took orders over the telephone, delivered goods and carried credit accounts.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat, which I have been familiar with since they came on the market back in the nineties. My first knowledge of it came during their first advertising campaign in Cleveland and later I was a delegate to a convention of grocers held at Niagara Falls shortly after their plant was built. They met in the plant and had a banquet later and Dr. Perky gave us a lecture on shredded wheat and we went all the way through the plant. When the shredded wheat came to the Cleveland market I stocked it and carried it all the years after that. When a customer asked for shredded wheat I gave her the Niagara Falls Shredded Wheat as that is what it always meant to me and what it meant to the purchasing public.

Shredded wheat had a reputation which was acquired through advertising and being in our food show. Like all new articles, it is hard to get people to use it at first, but the people that bought from me took to it readily although some people do not like it, they did not at that time and at that banquet they had turkey, ice cream and different kinds of food, and everything had shredded wheat mixed in with it that did not appeal to us grocers who were mostly Germans and we had quite a time over the straw and hay we were fed at the banquet. Some of the public thought it was straw and hay at first, while others took to it very readily.

To the best of my recollection they kept plugging away at the advertising all the time. The demand for it grew as at first I used to buy in just small amounts and then I bought it by the case and when a deal was on I took in the deal.

Plaintiff's Exhibit No. 10 is an old timer. I cannot say how many years they used that sort of a package, but I remember handling it. Within the last two or three years I have asked for shredded wheat and been

given something else, but I insisted on getting Shredded Wheat until within the last week or two I was in a store on West Twenty-ninth Street, where they just call him Bob; there I ordered a few other goods and asked for a package of shredded wheat and was handled Kellogg's package. I said, "This is not Shredded Wheat, Mister" and he said, "yes it is. That is shredded wheat." I said nothing more to him and took the package and this is the box; the yellow slip attached to the box is a list of the items asked for and purchased. My son ate most of the contents of the carton.

(The slip referred to was received in evidence and was marked "Plaintiff's Exhibit No. 41-A"; and the carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 41-B.")

When Kellogg's Whole Wheat Biscuit first came out a long time ago I carried it but it did not sell, people were used to Shredded Wheat. To the best of my recollection that Kellogg package when I had it said "Kellogg's Shredded Wheat" on the front of it.

CROSS-EXAMINATION.

My son, who is connected with the National Biscuit Company, asked me to make this purchase at Bob's store and I asked the grocer to make out a slip for me on which he wrote "shredded wheat," and I said "this is not shredded wheat." In some stores it is customary to make out slips, in others it is not, but they will all give you slips if you ask for them. The Kellogg product looked like shredded wheat biscuits only smaller, but whether they eat the same I do not know; as a matter of fact I do not like either one.

When Kellogg's Corn Flakes first came out in 1905 or 1906 I handled them; that was a big seller. I have a faint recollection of it just being called Toasted Corn Flakes at that time and after other corn flakes

began coming on the market it was called Kellogg's Toasted Corn Flakes to distinguish it. I also handled Post Toasties. If a customer asked for Post Corn Flakes she would be given a package of Post Toasties. If she asked for Kellogg's Corn Flakes that is what she would get and if she just asked for corn flakes I would ask which kind did she want, as I carried two.

If I were in business today and carried Niagara Falls and Kellogg's Shredded Wheat and someone came in the store and asked for shredded wheat I would give them the Niagara Falls product. If someone asked for Kellogg's Shredded Wheat I would give it to them provided I handled it; after I found out it did not sell I did not buy any more.

MRS. FLORENCE STIBELING.

Deposition taken in Cleveland, Ohio, December, 1932.

Direct Examination.

I keep house, am not related to anyone in the Biscuit Company, but one of the salesmen is a friend of mine. He recently asked me to make a purchase of shredded wheat for him which I did at a Y grocery and meat store at 168th and Euclid. I went in there, purchased four articles and asked for shredded wheat and was handed a box of Kellogg's Wheat Biscuit. I said, "Well, this is not shredded wheat," and he said, "No, but it is the same thing, only the biscuit are smaller." That is all that was said; he gave me a purchase slip and I have the slip and carton with me. The package of whole wheat biscuit I gave to Mr. King, the salesman, and wrote my name at the bottom of the slip.

(The slip referred to was received in evidence and was marked "Plaintiff's Exhibit No. 42-A,"

and the carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 42-B.")

CROSS-EXAMINATION.

Yes, I asked the grocer for a sales slip. Mr. King told me the store to go to, to ask for shredded wheat and to take whatever was given me and to remark that it was not shredded wheat. He also refunded the price of the wheat to me. When the package was handed to me I immediately knew it was not the Niagara Falls Shredded Wheat, as I had seen that package on the shelves in the store some three or four months before. The first time I saw it I knew it was a shredded wheat product and that the package was different from the Niagara Falls package, but this was the first time I had bought any of it. I had been buying the Niagara Falls Shredded Wheat for myself and this is the only time that anybody handed me Kellogg's Shredded Wheat.

HARRY C. ROHN.

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

I am twenty-nine years of age, business—locksmith. I am not employed by the National Biscuit Company or related to any of its men. I recognize Plaintiff's Exhibit No. 1 as shredded wheat which I have been familiar with ever since I can remember, having used it at home, and it happens to be my favorite breakfast dish. When I ask for shredded wheat I expect to get Shredded Wheat and that means to me a little shredded wheat biscuit. The wife does all the buying. I do not see the package itself, hence I cannot say that it is associated with any place in my mind.

I recognize Plaintiff's Exhibit No. 1 as a shredded wheat biscuit.

Yes, I have asked for shredded wheat and have received something else. This happened last week Saturday at Huff's restaurant. I asked for an order of shredded wheat and received Kellogg's. It was served to me in a bowl, but I happened to see the package that it came out of before it was served to me in the bowl and I said "This is not shredded wheat." And, the waitress replied, "Sure it is. Doesn't it look like it?" She also said, "That is what we serve for shredded wheat." There were two biscuits served—I ate one of them. I asked for the carton they were served in and have same with me.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 43.")

CROSS-EXAMINATION.

Nobody asked me to get the carton, but the girl said it was shredded wheat and I said "it is not". I just wanted to prove to her that it was not shredded wheat. I ate one of the bircuit and it did not taste like the one you have here, the Niagara Shredded Wheat Biscuit. It tasted something like it but there is a difference. I think I could say that I know there are two shredded wheat biscuit on the market which have a somewhat different taste, one compared with the other. One of these is made by the Niagara Falls people and one by the Kellogg people.

After I got this carton I think I ran over here to the National Biscuit Company's office because there is a friend of mine that works over here and I breakfasted with him. At that time I came over here with him at his request but I made no written statement. His name was Mr. Gray and I gave him the carton. He is connected with the National Biscuit Company and happens to be

a friend of mine who took me to this restaurant. I do not remember whether he paid for this Kellogg Shredded Wheat. He had a breakfast but I do not know what it was. It was not at his suggestion that I asked for and retained this Kellogg carton. I did it purely to satisfy the young lady that it was not shredded wheat. I did not mean to say that it was not shredded wheat made at Battle Creek, Michigan, I mean that it was not the shredded wheat that I am used to eating. I meant that those two shredded wheat biscuit that came out of that carton were not shredded wheat biscuit made by the National Biscuit Company at Niagara Falls. I did not tell her that I simply told her "that is not shredded wheat." Nobody ever told me that it was not shredded wheat unless it was made by the National Biscuit Company. We just went there but it was by no suggestion of his that I made this purchase or any purchase. He suggested we go to that restaurant but he did not ask me to order shredded wheat.

That is the only experience of that kind I have had.

RE-DIRECT EXAMINATION.

The reason I said to the waitress "that is not shredded wheat" is that I seldom eat breakfast in a restaurant but at home for breakfast we get a large cake like that and that is what I am used to. And I think that is the first time I ever ran into the little biscuit. And it did not look like what I am acquainted with. That is why I said, "It is not shredded wheat." So when I asked this waitress for shredded wheat I had something definite in mind that I expected to get and that something was the shredded wheat biscuit I had previously eaten so much of.

RE-CROSS-EXAMINATION.

RXQ. 67. Mr. Rohn, if you went into a restaurant from now on and wanted to get this large biscuit, would

it not occur to you to ask for the Niagara Falls Shredded Wheat?

A. Well, I do not know. With me, shredded wheat is Shredded Wheat.

THE WITNESS: If I had liked this Kellogg product so much that I would have liked to have some more of it I would have asked for Kellogg's Shredded Wheat when I was in this restaurant. It was the first time I had ever heard of Kellogg's Shredded Wheat. I am now thoroughly educated to the fact that there are two shredded wheats on the market; one that is the Niagara Falls product and one the Kellogg product.

FRED LEIGHTON.

Deposition taken in Cleveland, Ohio, December, 1932.

DIRECT EXAMINATION.

I live in Lakewood, a residential suburb of Cleveland, and am in the business of grocery and fruits, conducting a service grocery store. My clients are middle class people. I have no charge accounts but run a cash and carry store. I have been in the grocery business since 1918 and have been with every chain except the Clover Company. I have had my own store for 2½ years and during all my experience have been actively connected with the management of retail grocery stores and the handling of products in those stores with which I have been connected in various capacities as salesman and sales manager.

I have been familiar with cereals and recognize Plaintiff's Exhibit No. 1 as Shredded Wheat and the contents which is called shredded wheat, the only name I know it by. I have been familiar with it as long as I have been in the grocery business and longer. I sold

Shredded Wheat when I was only a boy 14. I worked in Canada and I also went through the Shredded Wheat factory twenty-six years ago back in Niagara Falls. Shredded Wheat means to me just the one name, what it implies: Shredded Wheat.

When a customer asks for shredded wheat we give her Shredded Wheat, that is all she knows it by. It is practically all I know shredded wheat by. Just the one word is what it implies. That is all it means, a biscuit in its shape and form. When a customer asks for shredded wheat she only knows shredded wheat. When a customer comes in and asks for Shredded Wheat we give her a package of Shredded Wheat as we have always known it. I would not give a customer anything else than a package like Plaintiff's Exhibit No. 1 if she asks for shredded wheat. The buying public already has that one package in mind. She has that in mind as shredded wheat and she knows the package is a package of shredded wheat. That is all she simply knows.

I have carried Kellogg's Whole Wheat Biscuit. I do not carry it today because I do not have any demand for it. That is, when you ask for shredded wheat—and I did have what they had—the Kellogg's biscuit on the shelf, and I just disposed of it as shredded wheat, because I wanted to get rid of it. I had no demand for the Kellogg's biscuit, because, when they asked for shredded wheat, they wanted Shredded Wheat. And I had quite a time to get a demand for the Kellogg's biscuit. I did not give Kellogg's Whole Wheat Biscuit only when a customer asked for Shredded Wheat and I wanted to dispose of Kellogg's. I asked the woman would she take it. I gave the customer a good price. In fact, I gave it to her at lower than cost, to get it off the shelf, because I had quite a time to get it off the shelf. I told them it was shredded wheat and I said it might not be just the same, but they led me to believe

it was just the same; but, if she did not like it, I would gladly give her the money back. And I had a couple of different women there who really refused to take Kellogg's biscuit. One of them says, "Mr. Leighton, I have dealt with you quite some time, and I really believe what you tell me is true; but give me Shredded Wheat." Well, I said, "This is shredded wheat." She says, "No, I do not want it. I just do not want it. That is all." "I want Shredded Wheat," and I said "That is all right." I gladly gave it to her. I am familiar with the shape and appearance of the Kellogg's Biscuit.

Q. 32. What do you say as to the shape and appearance of the Kellogg's Biscuit.

A. Well, I would say that shredded wheat in biscuit form—that is, just a—well, there is a biscuit right there in front of me, and the customer knows it as Shredded Wheat. Now, you take—I really truthfully believe that Kellogg's putting out this Whole Wheat Biscuit is nothing more than a camouflage to deceive the customer, to make her believe that she is getting something that is a shredded wheat. That might be. But I really believe that it is nothing more than a clever camouflage to infringe the Shredded Wheat people.

I have seen a box like Plaintiff's Exhibit No. 10 and recognize the picture of the dish with biscuit in it. The Shredded Wheat Company used that carton with the picture of a dish on it a long, long time ago. So far back that I would not want even to say what I guess.

I have seen a strip like Plaintiff's Exhibit No. 35 recently because I have painted the price in there on the white space and used it in my own store.

CROSS-EXAMINATION.

I would rather handle just one kind of shredded wheat than two and one kind of Corn Flakes. There is only one Corn Flake, Kellogg's, the leading brand, and

if people just say corn flakes I give them Kellogg's. There is not much competition in these foods. We handle one Bran Flake—Post's. Kellogg's has a Bran and we handle their All-Bran but when people want Bran Flakes we give them Post's. It is just like a woman coming in and asking for a bar of soap. If she asks for a bar of soap, we naturally give her the P. & G. soap, unconsciously, maybe.

We do not often get better treatment from one manufacturer than another. They have all got that price. They all offer deals and when one makes a price the other follows.

XQ. 69. Assuming that there are no patents to prevent anybody from making a shredded wheat product, you do not think, do you, that there is anything morally wrong if a concern comes along and makes a shredded wheat, also, as long as they put their own distinguishing trade-marks on that package?

A. Well, yes. I do not just agree with you there. They could come out with an item that should be entirely different. I think that, for instance, it should not be a biscuit of that same type or form as Shredded Wheat. They are more or less camouflaging and deceiving the public. That is my idea.

WITNESS: From my chain store experience I know there are many brands of Corn Flakes but I do not feel that it was wrong for others to manufacture Corn Flakes in competition with Kellogg when he had started it. Post does not just put on there Corn Flakes but I would be a little prejudiced and feel that it was unfair to put out a corn flake as a competitor. I would be better satisfied to have one kind of Bran Flakes and one kind of Corn Flakes and one kind of shredded wheat. It would be simpler for me as a grocer.

RE-DIRECT EXAMINATION.

When a woman comes in and asks for a pound of sugar I would give her a pound of whatever sugar I may

have. There are many products like that but Shredded Wheat is Shredded Wheat; that is all. It is in a different class from ginger snaps or sugar or other common articles of trade. It is a cereal and it has a reputation.

RE-CROSS-EXAMINATION.

RXQ. 95. Mr. Leighton, it is true, is it not, that you, as a grocer, now know that there are two distinct brands of shredded wheat on the market; one made by the Kellogg Company at Battle Creek, and the other made by the National Biscuit Company at Niagara Falls?

A. No, I know only one. There is only one Shredded Wheat.

RXQ. 96. Yes, but I mean, do you know that the Kellogg Company is making a shredded wheat product?

A. Well——

RXQ. 97. Have you heard that in the trade?

A. I have tried to sell it as such.

WITNESS: I know that Kellogg's have a biscuit that they are trying to say is Shredded Wheat but I do not say it is Shredded Wheat. But I only know one biscuit as Shredded Wheat—put out by the Kellogg Company, I do not know—but they are trying to make the public think it is such. I do not know whether the Kellogg Biscuit is a Shredded Wheat product but I think they are trying to infringe on Shredded Wheat. They are so much alike that you would not know whether one was Shredded Wheat and one was the other biscuit, and if you cut them down to the same length I could not tell one from the other.

I can tell Post's Bran Flakes from Kellogg's Bran Flakes absolutely. Even a blind man can see the difference in appearance. My idea of interference here is that these two products are two near alike and I

think the Kellogg Company should make some other kind of shredded wheat product that would be sold regardless of price. Even if the new product were offered at half the price it would not do any good. I would have to do too much advertising or talking to people as compared with selling Shredded Wheat. I would have to use a lot of sales talk and would have to put on a whole bunch of clerks. And even if the cost would be less my profit would be just the same. It would be better to use Shredded Wheat even though I would charge her twice as much.

NICK PYROS.

Deposition taken in Cleveland, Ohio, December, 1932.

Direct Examination.

For nine years I have run a restaurant at 8305 Harvard Avenue. I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat, the kind I use. I know no other kind. When my customers ask for shredded wheat I supply them with just Shredded Wheat and that is the kind I use. I recognize the glass globe, Plaintiff's Exhibit No. 36 that came from the Shredded Wheat Company six or seven years ago. It has been in my place nine years. I found it there when I took the place and it had Shredded Wheat in it made at Niagara Falls. I recall the Shredded Wheat man putting the biscuit in the globe a long time ago. The date is on a piece of paper on the bottom, December 2, 1925. I had the globe on display right in the front window all the time that it was in the restaurant until day before yesterday when it was taken out.

Cross-Examination.

I sell Shredded Wheat in individual cartons and have for many years. We had the big packages too and

if I ran short I would get it from the grocery store. I have heard of Kellogg's Shredded Wheat but never knew anyone that used it. It was offered to me about a year ago but I refused to take it.

FLORENCE BERNARD.

Deposition taken in Detroit, Michigan, December, 1932.

Direct Examination.

I have no occupation and am not related to any of the employees of the National Biscuit Company but have friends in the organization. I recognize Plaintiff's Exhibit No. 1 as shredded wheat which I have been familiar with all my life—twenty-three years. The expression shredded wheat to me has always been a breakfast cereal, something that I did not like—tried to get out of eating. I only eat breakfast cereal when I am forced into it. I do not know much about its origin. I have never known any other article than the article in this package, called Shredded Wheat. I recently went in a store and asked for Shredded Wheat and was given something else. That was on December 12th in a grocery store at the corner of Percival and McLean. I was waited on directly by a boy—I imagine of high school age—but the proprietor of the store was the one selling me the goods, although I paid the boy. I asked the boy for a bag of pure Buckwheat Flour, he was unable to find it, he then called another boy and he could not find it, so the proprietor was called and he was unable to find it, so he told me he did not have any but would have it on the following day. I then asked for butter and a package of Shredded Wheat. The boy was standing directly in front of the case or wall, where cereals of all sorts were sold, and he looked at the shelves and said, "Hain't we any Shredded

Wheat?" The man said, "Why, yes, we have. It is right in front of you." The boy looked and looked and said, "Well, I cannot see any Shredded Wheat." The man came over and said, "Well, it is right in front of you." And he took down a package and handed it to the boy, who said, "Is this Shredded Wheat?" The package was then handed to me and I said, "Is this Shredded Wheat? It is not the package I am accustomed to purchasing. That has a picture of Niagara Falls." The man said, "Well, yes, it is shredded wheat, you are getting fifteen biscuit—it is a better size for serving." I have the carton given to me with me—on it is written my name in my writing, the contents were taken out and the package turned over to the National Biscuit salesman.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 44.")

CROSS-EXAMINATION.

Cullen is the only one I know connected with the National Biscuit Company, he took me to this store and paid for the things I bought and was within about two blocks when I made the purchases. He did not ask me to go to any other store and this is the only time anything of this kind occurred to me.

MRS. C. COE HARRIS (Arthur D.)

Deposition taken in Detroit, Michigan, December, 1932.

DIRECT EXAMINATION.

I am a housekeeper, not related to anyone in the National Biscuit Company. I recognize Plaintiff's Exhibit No. 1 as the Niagara Falls Shredded Wheat. The contents look like Niagara Falls Shredded Wheat. I

have been familiar with it for a number of years, a long time. I buy it for the children, I am not particularly fond of it myself. I have had occasion to ask for it and receive something else, that was at the College Inn Cafe in Flint, Michigan, at the corner of Detroit and Second Avenue, on December 13th. This is a cafe, I picked up the menu, looked it over, and saw Shredded Wheat on it and ordered it, and half a grapefruit and a cup of coffee. She brought me the package which I have in front of me. When she handed it to me I asked her if she would serve it for me and she said, "Sure." I said, "Isn't that a cute little Box? This is different than what I have been used to buying. Have you no Niagara Falls Shredded Wheat?" She said, "No; but I think this is real good." I accepted it and ate it, That is not my writing on the printed slip. Yes, I identify the box, my name is on it and there is half a stick of gum inside. I took the box out to the car and took it home and showed it to Mr. Paine, the National Biscuit man, and gave him the box.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 45.")

CROSS-EXAMINATION

I had not been in that restaurant in a long, long time. I am in the habit of eating in Flint when I go in, regardless of the time. I usually do not go in there; but lately, I have been in the habit of going to the Home Dairy. Mr. Paine asked me at one time to go in any place, where I was, ask for Shredded Wheat and see what they gave me and to keep the carton. When the girl came back she asked me how I liked the Kellogg's, and I said, "It is real good." And she said, "We think it is real good." She did not say that she offered to substitute it or that she thought it was better or anything like that. She just simply said that they thought it was real good.

HAROLD O. YORKE.

Deposition taken in Detroit, Michigan, December, 1932.

Direct Examination.

I am a chiropractor and am not related to any one connected with the National Biscuit Company. I recognize Plaintiff's Exhibit No. 1 as a package of Shredded Wheat and the contents as Shredded wheat biscuits which I have been familiar with ever since I was a kid, as far as I can remember back. Shredded wheat conveys to me a biscuit made at Niagara Falls. We used to look for that on a package to identify it. There has never been anything the same as that, as far as I know.

I never had occasion to ask for Shredded Wheat and receive something else until I got this package in the Owen Grocery on Livernois Avenue one day last week. I went in and asked for Shredded Wheat and the woman said, "This is better than Shredded Wheat. It has got more biscuit in it, and you are foolish to buy the other stuff." And she said, "We do not sell that big Shredded Wheat. We only sell this." This is the package I got, I used part of the contents; the writing on the slip pasted on the package is my signature in my writing.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 46.")

Cross-Examination.

I knew as soon as I saw the package that it was not Niagara Falls Shredded Wheat. I made the purchase at the request of Mr. Smith, a salesman for the National Biscuit Company and a friend of mine. He asked me to go to this store and make this purchase—I have gone in there and bought things at different times. I

paid for the package and Mr. Smith refunded the money. I ate some of the biscuit but did not like it as well as Shredded Wheat. I have a little girl who has eaten Shredded Wheat ever since she started to eat cereals and I am a constant consumer of it myself. There is a difference in the taste and I do not like the Kellogg's Shredded Wheat as well as the Niagara Falls.

EPHRAIM McCLELLAN.

Deposition taken in Detroit, Michigan, December, 1932.

DIRECT EXAMINATION.

I live in Fenton, about eighteen miles out of Flint. I am a retired electrical engineer at which I worked all my life until a few years ago. Plaintiff's Exhibit No. 1 is Shredded Wheat, by the look. You cannot be sure about the contents. It might be and it might be Whole Wheat. I think we have been buying it for twenty or twenty-five years and possibly a little longer. When we asked for Shredded Wheat we expected to receive Shredded Wheat, of course, which meant a very good breakfast food; and the children liked it especially. They called it Shredded Wheat.

Mr. Paine took us around and dropped me in front of a store in Flint, I do not know where it was; I went in and called for a package of Shredded Wheat and he showed me this package, you see, and I looked it over and I said, "Haven't you the Shredded Wheat!" And he said, "No, we do not handle it." He said, "We think this is just as good or a little better." And he said, "The Shredded Wheat is owned by the big syndicates, and Standard Oil has money in it." And he says, "We are cutting that out." I paid for the package and took it away with me. I did not write what is on

that piece of paper but that is my name on it and the figures 12/13/32.

(The package referred to was received in evidence and was marked "Plaintiff's Exhibit No. 47.")

CROSS-EXAMINATION.

Mr. Paine did not take me to any store except this one where I made the purchase and he refunded to me the purchase price of the Kellogg's Shredded Wheat. My niece, Mrs. Harris, and I drove in from Fenton today at the request of Mr. Paine. Detroit is about fifty-six miles, something like that, from Fenton. I knew as soon as I saw the Kellogg package that it was not the Niagara Falls Shredded Wheat. I never opened the package but turned same over to Mr. Paine and he had it until I saw it here this morning. I have known Mr. Fenton four or five years; he is the National Biscuit Company man around Fenton.

JOSEPH C. MELLOURE.

Deposition taken in Detroit, Michigan, December, 1932.

DIRECT EXAMINATION.

I am a bookkeeper and am not connected with the National Biscuit Company. I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat which I have been familiar with nearly all my life. About twenty years. Shredded wheat to me means a breakfast food and when I ask for Shredded Wheat in a store or restaurant I expect to get Shredded Wheat Biscuit. I have never known more than one Shredded Wheat.

On the twelfth day of December I went into the Eighth Street grocery in Flint to purchase a box of Shredded Wheat; he did not even say that he did not

have it. He put out one of Kellogg's packages. And when I questioned it as to whether it was Shredded Wheat, he immediately opened the package and explained that it was not the Shredded Wheat that I had been buying, but that it was the same thing, with more biscuit in the box, that it was electrically cooked, whereas, the original was baked with gas, and that, if I was not satisfied, my money would be returned; and that that was what most of them were then purchasing, meaning most of the customers.

I examined the biscuit inside the package, they looked about the same as I had always bought; maybe, smaller. I took away the package of Kellogg's Whole Wheat Biscuit that I purchased and can indentify it by my name and the date which I put on it. This is not the package that he opened for me, it was another similar to this one.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 48.")

CROSS-EXAMINATION.

Mr. Woods, salesman for the National Biscuit Company, asked me to make this purchase. He took me to the neighborhood and told me where the store could be found and later on he came and got me. I did not go to any other store. I had no previous experience with the Kellogg's Shredded Wheat and had never seen it before, nor heard of it before. I had never known of more than one shredded wheat product previous to this. I know now that there are two such products, one made by Kellogg and one by the Niagara Falls people. I was driven down this morning by the National Biscuit Company local man's car. His wife was the only other person in the car. Flint is from between fifty, and—about fifty-five miles from Detroit.

FRED SELL.

Deposition taken in Detroit, Michigan, December, 1932.

Direct Examination.

I am a retail grocer since 1894, in business always in Detroit. My store at present is a small cash and carry; I used to have a larger one. I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat and the contents as Shredded Wheat which I have been familiar with fifteen or twenty years, probably. It has a great reputation with us because the public demands it and when the public asked for shredded wheat they expect to get the box right here same as Plaintiff's Exhibit No. 1. I make this statement from my experience with the purchasing public. I have never had any substitutions for Shredded Wheat, just this here, all the time. I have never handled Kellogg's Whole Wheat Biscuit and do not know that I have ever seen it. I never was offered this. When I got Shredded Wheat I asked for Shredded Wheat and never took anything else.

I do not remember ever having seen Plaintiff's Exhibit No. 48. By covering up the name on it, it looks as though the package contained Shredded Wheat. I believe I did handle Shredded Wheat in a package like Plaintiff's Exhibit No. 10. I do not really remember if the picture of the dish was on it, but I do recall the picture of the factory on the front panel. The picture of Niagara Falls is familiar to me on plaintiff's exhibits.

Cross-Examination.

Today is the first time I learned that the Kellogg Company had a shredded wheat product on the market and I now know that there are two shredded wheat products made, one by Kellogg and one at Niagara Falls. I never knew the difference, because I only know the product in Plaintiff's Exhibit No. 1.

I would say that the contents of Defendant's Exhibit No. 6 are shredded wheat. The Niagara Falls product is a little longer. Yes, I handle Kellogg's Corn Flakes and recognize a family resemblance between the corn flakes package and the Kellogg's Whole Wheat package. The colors and dress look about the same and I recognize a clear distinction between this package and the Niagara Falls package.

RE-DIRECT EXAMINATION.

Some of the purchasing public behaves one way and others another. They come in, and if I would hand them a different package they might take it, and probably they would bring it back if I would not explain it first. Or, she might say right away, "That ain't Shredded Wheat" you see. Some of the purchasers are less careful than others as to what they buy. When a customer asks for shredded wheat I would give her that package there—pointing to Plaintiff's Exhibit No. 1. I would never give her anything else.

CROSS-EXAMINATION.

I never knew about Kellogg's Shredded Wheat until today. I handle Kellogg's corn flakes, also Post's corn flakes. If a customer just asks for a package of corn flakes I would give them Kellogg's unless they asked for Post's. If they asked for Kellogg's Shredded Wheat I would tell them that it is all I got, meaning Niagara Falls Shredded Wheat.

RE-DIRECT EXAMINATION.

If a customer demanded Kellogg's Whole Wheat Biscuit I would go to a wholesale house and buy a dozen or whatever I could get to please the customer. It would be foolish for me not to do it.

MYRTLE GREENE.

Deposition taken in Detroit, Michigan, December, 1932.

Direct Examination.

I am a housekeeper and not related to anyone in the National Biscuit Co. I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat, made by Niagara Falls, National Biscuit Shredded Wheat. Well, really, I do not just exactly recall how long I have been familiar with it, but it is quite a number of years.

The term shredded wheat means to me that it is whole wheat biscuit, and I know that the doctors are prescribing it, and it seems to be very good for you. When I ask for a package of Shredded Wheat I expect to get Niagara Falls Shredded Wheat, a package like that, pointing to Plaintiff's Exhibit No. 1. This morning I had occasion to stop at the Victory Lunch, I went in and ordered Shredded Wheat and coffee and the girl took a Kellogg's Whole Wheat Biscuit out of the drawer; and I asked her if it was Shredded Wheat. And she said, "That is the only shredded wheat we have." So, of course, I cancelled my order. And I was at Cunningham's a few days ago, and I asked for Shredded Wheat, and she gave me Kellogg's Whole Wheat. And they threw the package away, but you can recognize it instantly when you taste it. It was in Cunningham's drug store that I had Kellogg's Whole Wheat Biscuit served to me in a dish outside the package. I asked if that was Shredded Wheat, and the girl said, "Why, yes, that was shredded wheat." And I asked if I could see the package and they had thrown the package in the incinerator. And they went and got the package and here it is, Kellogg's Whole Wheat Biscuit. The package is identified by the initials on it in pencil.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 49.")

That experience has happened to me four times in the last two weeks in restaurants.

CROSS-EXAMINATION.

The National Biscuit Company man sent for me today and he was with me when I stopped in this restaurant. He did not suggest to me that I order shredded wheat. I have eaten it for the last two years every morning for breakfast. If Kellogg's Shredded Wheat should come into general use I would stop eating shredded wheat as I would not eat any other product than Niagara Falls Shredded Wheat. I had this package of Kellogg's biscuit from Cunningham's this morning. It did not make me ill but it does not taste like a hundred per cent. whole wheat biscuit to me. There seems to be some other ingredients in there. I have been eating Niagara Falls Shredded Wheat every day for about two years. I have no personal friends in the Biscuit Company, but I have been with drug companies previous to now and I have had salesmen calling on the drug store, otherwise, I do not know of any one with the National Biscuit Company. I was a soda fountain manager in a couple of drug stores and came in contact with a number of National Biscuit salesmen. I told my experience to Mr. Feldman and he asked me why I did not report it to the company, and when this came up he called me and told me that now is the time, if I wanted to present my package, to bring it in.

I think if I were blindfolded I could tell the difference between the two shredded wheat biscuits. I do not believe there is any great difference in the size between the two biscuit but there is a difference in the taste. If you are accustomed to using a certain kind of

shaving cream all the time and then are given a different kind, even if it is just as good, you do not like it as well and it is the same thing with this: if we order Shredded Wheat and they give us something else, we would not like it. It is the same thing. It all comes under the same heading. We want what we order.

MRS. FLORENCE L. COWLES.

Deposition taken in Detroit, Michigan, December, 1932.

Direct Examination.

I am a housewife and am related to Mr. Diesing of the National Biscuit Company, who is my uncle. He is a salesman of the National Biscuit Company.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat which I have been familiar with for about fifteen years and which I use in my home. When I ask for Shredded Wheat in the stores I expect to get the package with the picture of Niagara Falls on it. Shredded Wheat has never meant any other product to me. Recently I had an experience with the purchase of Shredded Wheat—this was over on Third Avenue at Dave's grocery store on the twelfth day of December this year. I walked in the store and asked for several articles, among them Shredded Wheat. She placed a box of Kellogg's Whole Wheat on the counter and I said, "Is this Shredded Wheat?" and the lady said "Yes." I said, "I thought the Shredded Wheat had a picture of Niagara Falls on it." And she said, "Well, this comes from Niagara Falls,"—meaning the Kellogg package which she placed on the counter. I asked her whether it was just as good as the other package that I referred to and she said, "Yes, just as good." This is the package and I have my initials on the bottom and it is the package that she had reference to when she

said, "This comes from Niagara Falls." The paper bag contains an itemized list of the things I had purchased—that is the clerk's handwriting.

(The paper bag referred to was received in evidence and was marked "Plaintiff's Exhibit No. 50-A"; and the carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 50-B.")

CROSS-EXAMINATION.

My uncle asked me to go to this store, to make this purchase and to get some sort of a bill for it. I gave him the whole package, I did not keep any of it. I have never eaten any of Kellogg's biscuit.

MRS. CLARA WESTPHAL.

Deposition taken in Detroit, Michigan, December, 1932.

DIRECT EXAMINATION.

I am a housewife, not related to anyone connected with the National Biscuit Company. I am familiar with the package called Plaintiff's Exhibit No. 1. It is Shredded Wheat which I use in my home and have been familiar with quite a long time. When I ask for shredded wheat in a grocery store I expect to get the National Biscuit package with the picture of Niagara Falls on it. I have always received this package until just here lately when I went to Shubert's, up Warren Avenue, on Monday of this week and asked for a package of Shredded Wheat. The lady handed me a package; and I looked at it and I told her it was not the kind I always got. And she said it was just as good as the other kind. What she gave me was a package of Kellogg's and I have here the package that I got which I can identify by my initials right on there. I had nothing to do with the piece of paper pasted on the end.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 51.")

I never knew there was a Kellogg's Shredded Wheat until just here recently, when I went to the store and the minute this package was handed to me I knew it looked different and I told the clerk it was not the kind I have used. Now that I know there are two kinds on the market I would specify the next time that I wanted Niagara Falls Shredded Wheat.

Shubert's store is not my regular grocery store. I went there at the request of Mr. Bernier, a neighbor of ours who is connected with the National Biscuit Company. He just asked me to go in there, ask for a box of Shredded Wheat and take whatever they gave me. He later refunded to me the purchase price. He drove me to the store and waited for me outside. I turned over the entire package to him and did not use any of the contents.

ANDREW B. MacELROY.

Deposition taken in Detroit, Michigan, December, 1932.

DIRECT EXAMINATION.

I buy some goods for G. & R. McMillan's, wholesale and retail grocers, and I have charge of the coffee department over there. They have been in business since 1848 and I have been connected with them about thirty years. They have a retail store where goods are sold to the public at retail and they also do a wholesale business in all lines of groceries in the same building. They are the largest grocery store in the State of Michigan.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat made in Niagara Falls which I have been familiar with about thirty years. If I were waiting on a

customer and she asked for shredded wheat I would give her the original package of Shredded Wheat made in Niagara Falls. That is the first package I have seen. I have seen the Kellogg's so-called shredded wheat under a different name. I have seen Shredded Wheat advertised in magazines and street cars and the papers for quite a number of years. Shredded Wheat has a reputation among the public, so far as the quality is concerned, it has a good reputation. We sell great quantities of it and have sold quantities of it for the last twenty years. G. & R. McMillan's have published 13 catalogues, the one you have in your hand now was published in 1913 and 1914. We had them in the store, thousands of them distributed among the public. The items that are carried in that catalogue are items that are offered for sale by G. & R. McMillan and were stocked by them at that time.

(The catalogue referred to was received in evidence and was marked on the page designated, "Plaintiff's Exhibit No. 52.")

THE WITNESS: We have those catalogues even at the present time. They are published every year.

The words Shredded Wheat referred to in the 1913 catalogue referred to the Niagara Falls product. I could not tell you whether subsequent catalogues have similarly carried that.

CROSS-EXAMINATION.

I buy some of the cereal for our concern. I might have seen Kellogg's product and not paid any attention to it. I do not buy their product. We handle some of the Kellogg's package goods. Our house is the largest wholesale and retail house in Michigan. They have handled some of Kellogg's Whole Wheat product; I have seen the package in the house and I have seen corn flakes and such as that. I know now that there

are two shredded wheat products on the market. In 1913 I was not connected with the buying end of the business. I never heard of the Ross Biscuit back in 1913; they might have handled it.

Mr. Freeman, of the National Biscuit Company, asked me to come down here today. I have known him for a number of years but he is no particular friend of mine. During all the time that I have personally known anything about Shredded Wheat referred to as Plaintiff's Exhibit No. 1, I have associated Niagara Falls with that product. This is the first time that it has been called to my attention that Kellogg's had a shredded wheat product on the market and I shall look to see if we have any when I go back to the store. I have no doubt about it now that there are two shredded wheat products on the market. If a customer asked me for Shredded Wheat, I would naturally give him the Niagara Falls and if he asked for Kellogg's Shredded Wheat I would give it to him.

RE-DIRECT EXAMINATION.

If a customer merely asked for shredded wheat I would certainly give him the product that has been on the market for years and it is a well-known product. If a customer asked me for Kellogg's Shredded Wheat, I would give him Kellogg's. That is what the clerks have been instructed to do—not to sell people what they want to sell them, but to sell them what they ask for.

RE-CROSS-EXAMINATION.

I know we handle Kellogg's Corn Flakes but I do not know what other kinds we handle. If a person ordered Corn Flakes I would give them Kellogg's because that is the only one I know. I do not know the other corn flakes at all.

HARRY O. PLANZ.

Testimony taken at Detroit, Michigan, December, 1932.

Direct Examination.

I am a retail grocer and have been in business for myself about eight years. I have been connected with the grocery business for nineteen years. I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat which I have been familiar with all my life. I think the form, appearance or shape of it has remained just about the same, as far as I can remember.

When a customer asks for Shredded Wheat we naturally go to that style of package with the picture of Niagara Falls on it. In fact, that style of package has remained just about the same for the last eighteen or nineteen years.

The words "shredded wheat" to the housewife, in my opinion, is that particular serving. A lady would not know what to ask for if she did not ask for Shredded Wheat. I have never heard it called anything else.

Q. 17. Would you say, Mr. Planz, or would you be able to characterize for us this expression "shredded wheat" and the position that it holds, if any, in the minds of consumers?

A. At the present time, my idea is that the customer has in mind that there is only one Shredded Wheat that there is only one package of that type there, and that they are sold on that idea, that that is what they want. If that very same item there were put under another name, I doubt whether you could sell it. It is Shredded Wheat. It has been that product and it is sold as Shredded Wheat, if that is what you mean.

I do not think the sale of a product that was put out under slightly different name; say, "Whole Wheat Biscuit," which was made with a similar appearance to

Plaintiff's Exhibit No. 1 would be near as good as Shredded Wheat. To sell such a product you would have to use the words "shredded wheat" or say it was the equivalent of Shredded Wheat or like Shredded Wheat.

I recognize Defendant's Exhibit No. 6. I do not recall in the advertising of the Shredded Wheat Company the use of a dish with biscuit in it. If I saw this package with the name obliterated I would say it looked like Shredded Wheat.

CROSS-EXAMINATION.

We handle Kellogg's Whole Wheat Biscuit. We do not recognize this in our store as Shredded Wheat. We just call that Whole Wheat Biscuit, what it says on the package. If the picture were not on there it would not be possible to tell for the first time what was in the package. It might be one of six or seven different products. Of course, people would not buy it until they knew what was in there; but I would never recommend to the salesmen to sell this as Shredded Wheat.

RE-DIRECT EXAMINATION.

By MR. VILAS:

RDQ. 32. Would you consider selling Kellogg's Whole Wheat Biscuit as Shredded Wheat, like Defendant's Exhibit No. 6, as misrepresentation? You say you never misrepresent.

A. We never misrepresent, and I would not want to commit myself as doing such a thing.

RDQ. 33. If it were done.

A. Well, I will just change that question. If the lady says, "What is the nearest thing you have to Shredded Wheat?" we might recommend this, if you put the question that way.

RDQ. 34. Yes, but if she said "shredded wheat," and the grocer or clerk gave her Defendant's Exhibit No. 6, would you call that a misrepresentation?

A. Yes, I would call that misrepresentation, if he gave her this for Shredded Wheat.

MR. VILAS: May we stipulate that W. Cook, Boston and Dexter Boulevard, Detroit, Michigan, if called, would testify that he is a retail grocer in Detroit, that he handles the Shredded Wheat of the National Biscuit Company, formerly made by the Shredded Wheat Company, that he has known it for several years, and that, when customers ask for shredded wheat, the order is always filled with the product of the plaintiff?

MR. CLARKE: Yes, without prejudice to my objection that the subject matter of it is irrelevant and immaterial. And may it be further stipulated that said witness would also testify that customers who ask for corn flakes mean Kellogg's Corn Flakes in practically every instance, and that, where a customer asks for corn flakes, the grocer gives them Kellogg's?

MR. VILAS: Yes, subject to my objection.

MR. CLARKE: Certainly.

MR. VILAS: The taking of the depositions at Detroit is closed.

STANLEY A. MICHALAK.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am an accountant and have been doing work for the Western Electric Company.

I have been familiar with Shredded Wheat for a good many years because it is the brand that we have always used in our home.

I often order Shredded Wheat and cream for my lunch in restaurants. Recently, at Pixley & Ehlers, a restaurant located at 68 South State Street, Chicago, I asked for a bowl of Shredded Wheat and a cup of coffee. The counter clerk reached down under the counter (I had noticed that it had not been the National Biscuit Shredded Wheat that I had been receiving—it was a different type of package) and as he was doing that, he seemed to try to conceal something. He had his back facing me. Just as he slit open the package and was going to empty it into the bowl, I said, "Hold everything. That does not look like the thing I want."

The clerk tipped it out in the bowl, and he said, "Sure, that is the thing." And then he tried to explain to me what the difference was. He said that was Shredded Wheat and that was the thing.

I got hold of the menu card and I told him, how come that they have Shredded Wheat on the card, and then when you ask for Shredded Wheat you get some other brand. He started to tell me something about the patent and the rights expiring on some particular patent, but I did not get all of the paraphernalia.

I took away the menu card and on the back thereof wrote a brief story of what I had witnessed. I also took away the carton. (The slip referred to was received in evidence and was marked "Plaintiff's Exhibit hibit No. 53-A"; and the carton referred to was receivedin evidence and was marked "Plaintiff's Exhibit No. 53-B.")

A thing I have often thought about is the infringement on the good-will of National Biscuit Company. Let me explain—I understand—in fact I know—that National Biscuit Company has put out a product of good quality and worked up a good name and received the good-will of the people. And, naturally, a customer goes into a restaurant, and in a place of that kind he

asks for Shredded Wheat, and if they give you some else, it looks rather bad. It is more or less of an infringement, I think.

I know that the National Biscuit Company has conducted a rather extensive campaign advertising Shredded Wheat. I think that other people have also noticed this campaign. I also think that other people would rather have that than any other brand. I think if I was in another line of goods I would rather have the National Biscuit than any other item; I have tried other goods and naturally I always go back to the National Biscuit, because I know they carry a good line of goods.

CROSS-EXAMINATION.

THE WITNESS: I have never tried any of the Kellogg's cereals. No matter what kind of breakfast food I try, I always go back to National Biscuit Company's Shredded Wheat.

A personal friend of mine, Mr. Camphausen, who is connected with the National Biscuit Company, asked me to make this purchase at Pixley & Ehlers.

I called the matter of substitution to his attention and he asked me to come here as a witness.

The only time I have seen the Kellogg biscuit was the other day when the waiter tried to show me a slight difference between the two.

When I say shredded wheat biscuit I mean Shredded Wheat Biscuit made at Niagara Falls.

MR. CLARKE:

XQ. 62. Do you now know that the product which I call shredded wheat biscuit is coming from two different sources of manufacture? Have you not had experience with at least two different makes of shredded wheat biscuit?

A. 64. Two products alike; but, as far as the product itself is concerned, I do not know—that is—the

make-up of the thing, whether it is the same or not. It may have a different taste. I do not know. One may be more crisp than the other, and things of that kind.

THE WITNESS: It is a fact that I have encountered these two different products which look alike, served in packages which do not look alike, but I always associate Niagara Falls with the brand that I have always used.

Mr. Camphausen paid the bill at the restaurants we frequented for lunch.

Until recently I had never heard that there was another product known as Kellogg's Whole Wheat Biscuit. The Kellogg carton and the name "Kellogg's Whole Wheat Biscuit" would not tell me what sort of product was inside the carton.

RE-DIRECT EXAMINATION.

THE WITNESS: If I saw Defendant's Exhibit No. 6 with the name covered up but the picture visible, I would doubt whether it was Shredded Wheat Biscuit because it is a different picture on there that is unlike the Shredded Wheat picture.

When I hear the expression "shredded wheat" I have in mind just that—that is—that with the Niagara Falls on it—meaning Plaintiff's Exhibit No. 1.

MISS EVELYN LOUGHLIN.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am an accountant and reside at 111 East Chicago Avenue, Chicago, Illinois.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat Biscuit. I have Shredded Wheat every morning for breakfast and have been eating it since 1920, when the doctor ordered it for me.

When I order Shredded Wheat in restaurants and in stores I always ask for the Shredded Wheat that I am accustomed to having, and I expect to get it. I generally always receive what I ask for, but yesterday there was an exception. I went to the Y. M. C. A. on Chicago Avenue, to the grill, and ordered Shredded Wheat. They brought me Shredded Wheat in a dish, and I ate it; then I asked for another package to take out with me and they brought me this package of Kellogg's. (The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 54.")

Mr. Elson, a salesman of National Biscuit Company, asked me if I would go in and order Shredded Wheat for my breakfast at this particular Y. M. C. A., yesterday morning. He said he would like to know what they were serving as Shredded Wheat. They served the Shredded Wheat to me in a dish—I did not see the carton—so I asked for another carton to take away with me.

CROSS-EXAMINATION.

THE WITNESS: The biscuit served to me were a little harder and a little drier than the Niagara Falls product.

I always notice the picture of Niagara Falls on the Niagara Falls package because I went through the Niagara Falls factory.

If I should learn to prefer Kellogg's product I would say that I wanted Kellogg's Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: Inasmuch as yesterday was the first time I had Kellogg's Whole Wheat Biscuit, I cannot exactly say whether I prefer one or the other. But, as long as I have used National Biscuit's Shredded Wheat so long, I would probably ask for that.

If the grocer sent me the Kellogg product instead of the National Biscuit Company product in an order I had telephoned to him I would send it back and would not expect that mistake to happen again. No woman would expect her regular grocer to send her a brand that she did not want more than once. On the other hand, if I found that, when he sent me this Kellogg brand of shredded wheat, I liked it better than the Niagara Falls product, I would then retain it, and, in the future, I would order it by the Kellogg name.

OSCAR RAYMOND HOLMER.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a distributor of check writers and reside at 1657 Edgewater Avenue, Chicago, Illinois.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have been familiar with Shredded Wheat as far back as I can remember because we have always used it in our home, and I have sold lots of it, too. I was a clerk in a retail store in Chicago, and when a customer asked for Shredded Wheat I always supplied her with Shredded Wheat, meaning Plaintiff's Exhibit No. 17. I never gave customers anything else but Shredded Wheat because I did not know that there was anything that could be substituted for it.

When customers ask for Shredded Wheat they expect to receive Shredded Wheat, the same as when they ask for anything else by its trade name. It is something that they have been using for years and for that reason they will ask for it, if that is what they want.

Yesterday, at one of Raklio's Restaurants, I had my first experience of substitution. I went in there,

and among other things, I ordered Shredded Wheat. I saw the package that the clerk picked up, and it did not look familiar to me. I asked him what it was. I said, "I asked for Shredded Wheat. Don't you have Shredded Wheat?"

He said, "No, we do not." He said, "We carry Kellogg's Whole Wheat Biscuit, which is the same thing." And, of course, I took it.

MR. VILAS:

Q. 25. Did you take the package?

A. Yes.

I also took a printed card which I found on the counter of the restaurant. (The card referred to was received in evidence and was marked "Plaintiff's Exhibit No. 55-A;" and the carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 55-B.")

I stopped in another one of Raklio's Restaurants for a cup of coffee, and I noticed they had shredded wheat on the menu. I asked for a package of Shredded Wheat to take out with me and they gave me another package that was exactly the same as that one there. (I am referring to Exhibit No. 55-B.) I also took away one of the menus with me, on the back of which I wrote exactly what happened in the restaurant. (The menu card referred to was marked "Plaintiff's Exhibit No. 56.")

CROSS-EXAMINATION.

THE WITNESS: The clerk gave me the impression that he did not want me to see the package.

I never noticed Kellogg's advertisement of Shredded Wheat. I have seen Kellogg's Corn Flakes and All-Bran and so forth.

MR. CLARKE:

XQ. 51. Assuming that they were advertised, would you then think that the restaurants would be ashamed to put them on display?

A. It would not be a matter of being ashamed to put them on display. The way I looked at it, the Shredded Wheat people having introduced this product and created a demand for it and spend all that money advertising, and so forth, they certainly should be permitted to sell that product and not have somebody coming along and offering something as a substitution and reaping the benefits of years of advertising that the Shredded Wheat people had been doing.

I knew that after Corn Flakes was well established it ran into a flood of competitive corn flakes, but if a customer asked for Kellogg's Corn Flakes she always received Kellogg's Corn Flakes.

Mr. Arnold, who is connected with The Shredded Wheat Company, asked me to make the purchases and be paid for the products.

At the time I was connected with the grocery business I did not give any thought to the competition directed against Kellogg's Corn Flakes.

Since yesterday I know that there are two different makes of biscuit known as shredded wheat biscuit on the market.

I have always associated Niagara Falls with Shredded Wheat. As a kid, I used to sit—while I was eating breakfast at home—and read all the different things on the outside of the package.

After I had seen the biscuit taken out of the carton in the restaurant I knew right then it was not Shredded Wheat. After I had seen it out of the package, I knew it was made by the Kellogg Company. Judging by the appearance, I thought it looked like Shredded Wheat. I, of course, am used to eating Shredded Wheat in the longer biscuit, and would see the difference in appearance. I did not notice any difference in taste between the Kellogg Shredded Wheat Biscuit and the Niagara Falls biscuit.

From my experience in the grocery trade, it is fair to say that the Kellogg Company is a large advertiser of its various products, and it always had a very high reputation for fair dealing with the grocery trade.

At the time I was in the grocery business the average grocer was not dealing with the Kellogg people. They were dealing entirely through the jobbers. However, the grocers were always looked after and any goods that were not sold would be returned.

I would say that 50 per cent. of our customers who had asked for the Niagara Falls Shredded Wheat or the Kellogg Shredded Wheat product and who did not want the other product would send it back to the grocer.

During my experience in the grocery trade, the introduction of the new products competitive to old products was handled in the same way as they do today—that is—they usually sent a crew of men around to distribute samples, and gave them an introductory offer when they came into the store. Some of the customers might take advantage of that, and in that way they might break in.

I would not have any idea that this Kellogg package could be handed to any average customer who wanted the Niagara Falls Shredded Wheat, with the thought in the grocer's mind that she would accept this Kellogg's Whole Wheat thinking that that was the package she had been getting all along.

It does not look as if the Kellogg Company were trying to imitate the Niagara Falls product. You would recognize the Kellogg package the same way you would recognize the Shredded Wheat package.

RE-DIRECT EXAMINATION.

THE WITNESS: If the Kellogg biscuit were served to me in a restaurant in the dish, outside of the package, I would immediately think that the Shredded

Wheat people are making their biscuit into a smaller size.

When I say that there is no effort on the part of the Kellogg Company to deceptively imitate the package, yet I think the biscuit is capable of substitution, independent of the package.

I regard Corn Flakes as purely a descriptive expression like ginger cookies or soda crackers. I do not regard Shredded Wheat in the same category. I know there are several kinds of Corn Flakes on the market. I did not know there was anything, even an imitation of Shredded Wheat, until yesterday.

JOHN FRED MEGGELIN.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am in the retail grocery business at 1100 South Cuyler Avenue, Oak Park, Illinois. I have been in the grocery business for the past twelve years.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat Biscuit. I have been familiar with it ever since I was a young boy and I have handled it since I have been in business.

When a customer asks for shredded wheat I always give her Shredded Wheat Biscuit. That is the only thing I handle (pointing to Plaintiff's Exhibit No. 1).

CROSS-EXAMINATION.

THE WITNESS: The first time I heard of the Kellogg product was about two months ago, when a salesman of the Kellogg Company called at my store. He told me it was a shredded wheat product, but I did not stock it. Since the salesman spoke to me a month or so back, I have known that there were two kinds of

this whole wheat product on the market—one made by the National Biscuit Company of Niagara Falls and one made by Kellogg at Battle Creek.

If a demand were created in my store for Kellogg's Whole Wheat Biscuit, I would stock it.

Kellogg's Whole Wheat Biscuit looks to me like an imitation of National Biscuit Company's Shredded Wheat Biscuit. The physical difference that I see between the two products is that one is shorter than the other.

I buy the Niagara Falls biscuit direct from the National Biscuit Company and the Kellogg's products through the Central Wholesale Groceries. The man at the Central said, "I have a new product coming on the market, and I would like to have you try it."

I said, "I am very sorry, but people know what Shredded Wheat Biscuit is, and they know what the picture is and everything." I said, "I don't care to try to stock two of the same kind of product."

I have never had any trouble with the National Biscuit Company. I was not concerned in any way with the trouble they had with independent grocers some years ago.

Mr. Camphausen, a salesman of National Biscuit Company, asked me to testify about my experience with Shredded Wheat Biscuit.

HARRY E. SCHLOESSER.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a grocer in Chicago, operating four stores.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat and have been familiar with it as long as I can remember.

When customers ask for shredded wheat, we supply them with a package like that (pointing to Plaintiff's Exhibit No. 1).

During the period of years I have known the biscuit supplied in cartons similar to Plaintiff's Exhibit No. 1, it has never been altered to my knowledge.

I am not familiar with Kellogg's Whole Wheat Biscuit. It has never been stocked in any of the four stores.

CROSS-EXAMINATION.

THE WITNESS: I was never solicited to buy Kellogg's Whole Wheat Biscuit.

I learned of the Kellogg product through the trade journals.

I have known for two years that I could get Shredded Wheat from at least two manufacturers of cereal goods, although I have never seen the Kellogg product.

Our four stores do not belong to any buying chains or voluntary chains.

I always associate Niagara Falls with Plaintiff's Exhibit No. 1. I have never heard it referred to as the Niagara Falls Shredded Wheat, but I have heard it called National Biscuit Shredded Wheat.

If we found a demand for Kellogg's Whole Wheat Biscuit, we would certainly stock it, although we would not stock it on solicitation. There are so many items coming out and they come out so fast that retailers—and particularly ourselves—find it difficult to have what the people do want and so we try to feed it from the other end—that is—find out what the people want and get the product.

I have from time to time introduced competitive products and in doing that it is customary to describe the advantages that there are for the newer product. I would not say that is like the old product, but cheaper

in price, because I have not found that very advantageous. My practice is to say that there is a larger content, that it is more for the money, or that the quality is better. In some instances, where I am getting better value for the customer, I regard myself as performing a service to the customer to that extent, in introducing the new product into the trade. We would follow the same procedure if we were introducing Kellogg's Whole Wheat Biscuit.

I would not be willing to say that the Kellogg product was another Shredded Wheat. Shredded Wheat to me is a biscuit, a whole wheat biscuit, in a certain shape. When I go to the restaurant and occasionally ask for Shredded Wheat, that is what I expect to get, and I have always received it. We have served people for twenty-five or thirty years in one or two or three or four locations, and people ask us for shredded wheat and we give them Shredded Wheat. It would be foolish for us to tell them that something else was better or just as good, when they have a different product in mind.

Looking at the Kellogg product, I would say it was Shredded Wheat. Assuming that a customer asked for shredded wheat and I sent the Kellogg product I would expect her to think I was attempting to substitute.

I do not think the Kellogg Company could build up a business by expecting that the grocers would substitute their product for the Niagara Falls package.

If a housewife asked for Shredded Wheat, by which I would asume she meant the Niagara Falls Shredded Wheat, and I sent her one of the Kellogg's packages, her cure for the whole situation would be to send it back. I would not send it to her again. I think the longer grocers are in the business, the less they will want to substitute.

RE-DIRECT EXAMINATION.

THE WITNESS: If I were induced to take the Kellogg's Whole Wheat Biscuit as a line, and a customer called up and asked for shredded wheat, I would send her the product that comes from the factory at Niagara Falls.

I think that what Frigidaire has come to mean to electric refrigerators, Shredded Wheat has come to mean to products of that type—just as a Kodak applies to cameras and Kellogg is a special name for Corn Flakes.

My wife, of course, practices substitution on me sometimes but I eat what is put before me because I have not had any occasion to examine it.

RE-CROSS-EXAMINATION.

THE WITNESS: If I had not seen Kellogg's Whole Wheat Biscuit I would expect to find cookies or crackers in the package instead of Shredded Wheat.

RE-DIRECT EXAMINATION.

THE WITNESS: If I looked at only the picture on the Kellogg package I would think that Shredded Wheat was in it.

CAROLINE RISTIG.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a bookkeeper and reside at 4318 West Cullerton Street, Chicago, Illinois.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have known and used it for ten or twelve years.

When I purchase Shredded Wheat I expect to receive the only Shredded Wheat I have known and which I recognize by the shape of the box and the picture thereon.

Wednesday, of this week, I went into Mr. Prinz' store at 323 Leavitt Street and asked for a box of Shredded Wheat. The woman handed me a substitute and when I asked her why she did not carry Shredded Wheat, she said, "That is the thing."

I said, "Are you sure it is the same?" And she said it was identical.

(The carton was offered in evidence and marked "Plaintiff's Exhibit No. 57.")

The National Biscuit Company salesman filled out the slip of paper pasted on the carton.

CROSS-EXAMINATION.

THE WITNESS: Mr. Petri is the name of the National Biscuit Company salesman who asked me to make this purchase. I am a friend of Mr. and Mrs. Petri, and have been for years.

Mr. Petri did not refund the cost of the package to me—he evidently forgot to do that.

Mr. Prinz's store is not my regular store—Mrs. Petri took me there.

On another occasion I went to a National Tea Store to purchase Shredded Wheat, and they said they were out of it.

The only time I have ever bought or seen the Kellogg product was this one instance that I related. I have never eaten any of the Kellogg product. When the package was handed to me I knew by its appearance that it was not Shredded Wheat. I knew that it was an entirely different package than that which I had had.

MRS. BEATRICE M. KORSEN.

Deposition taken at Chicago, Ill., December, 1932.

Direct Examination.

The Witness: I reside at 3224 Beach Avenue, Chicago, Ill. At the present time I am not working, but I was secretary to a lawyer.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have been buying and eating it right along.

Wednesday night, at the request of a representative of the National Biscuit Company, I went to the Food Shop located at 4302 North Crawford. Among other things I asked the clerk for Shredded Wheat and he offered me this other package. I noticed it was a different package and asked the clerk if that was what I usually used. He said it was just as good, only the biscuit were a little smaller; the package had 15 biscuit and they charged less—or something like that.

I took the box he offered me and wrote my initials on it. I also filled out the paper that was pasted on the end and gave both to the representative of the National Biscuit Company who told me to go to that store.

(The carton referred to was received in evidence and marked "Plaintiff's Exhibit No. 58.")

Cross-Examination.

The Witness: Mr. Damler is the name of the representative of the National Biscuit Company who asked me to go to this particular store. He waited outside for me in a cab while I made the purchase. They did not have National Biscuit Company Shredded Wheat in this store.

I accompanied another representative of the National Biscuit Company, named Mr. Weisselman, to a store in the neighborhood before I made the purchase

at the Food Shop. This was the only experience I had of getting the Kellogg product.

I know now that there are two different manufacturers putting out a shredded wheat product.

MRS. RUTH RACHLIN.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a housewife residing at 4423 Sheridan Road, Chicago, Illinois.

I am related, very indirectly, to Mr. Golden, a member of the sales department of National Biscuit Company.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat, which I always buy. I have known it for many years because we always used it at home. Every time I buy Shredded Wheat I think of the picture of Niagara Falls on the box.

I do not recall the picture of a dish on the end of the package, marked Plaintiff's Exhibit No. 10.

On December 6th, at Mr. Benz's store, 4101 Potomac Avenue, Chicago, I was given Kellogg's Whole Wheat Biscuit when I asked for Shredded Wheat. When the storekeeper handed me the Kellogg package I knew it was not what I had usually received, but she told me it was just the same as Shredded Wheat. I asked her if it was Shredded Wheat, because I had never had that before, and she told me it was.

The writing on the piece of paper pasted on the package which I purchased is mine.

I could see the ends of the biscuit through the piece of glassine that covers what appears to be a hole in the package, and they resembled Shredded Wheat to me.

If I were to see a package such as that (referring to Defendant's Exhibit No. 6) with the name covered up, and only showing the panel with the picture on it, I would say that the product in that package was Shredded Wheat.

(The carton referred to above was received in evidence and marked "Plaintiff's Exhibit No. 59.")

CROSS-EXAMINATION.

THE WITNESS: Mr. McLean is the name of the man who asked me to make the purchase at that particular store. He told me to take whatever they gave me. I did and turned it over to Mr. Golden, who, in turn, gave it to Mr. McLean.

The store where I purchased the package of Kellogg's Whole Wheat Biscuit is not the one I regularly deal at.

If I were to order shredded wheat over the phone and receive the Kellogg product, I would call the grocer and ask why he made the substitution. If I were to find out that I liked the Kellogg product better than the National Biscuit Company product, I would probably become an adherent to the new product.

I always associate Shredded Wheat with the National Biscuit Company, because that is where the Shredded Wheat I have known comes from.

When the storekeeper handed me the package of Kellogg's Whole Wheat Biscuit I saw right away that it was a different kind of package.

WILLIAM FRANK RITTER.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a printer and reside at 2240 Augusta Boulevard, Chicago, Illinois.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat and have been familiar with it for about eight years.

On December 16th a salesman of the National Biscuit Company asked me to go to a store at 2418 North Halsted Street and purchase a box of Shredded Wheat. They had sold their last box of Shredded Wheat at that store and the man asked me if I would like some other kind of cereal. The girl showed me Kellogg's and told me it was just like Shredded Wheat. I decided to try Kellogg's and had the package wrapped with a bottle of milk which I had also purchased.

I put my initials on the carton and also wrote my initials and the date. (Card received in evidence and marked "Plaintiff's Exhibit 60.")

MRS. BESS GOLDEN.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a housewife residing at 4423 Sheridan Road, Chicago, Ill.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have been familiar with Shredded Wheat all my life, as far as I can remember.

Recently, at the store of T. Benz, on Potomac Avenue, I asked for a package of Shredded Wheat and

the girl brought me this package. (The package referred to was received in evidence and marked "Plaintiff's Exhibit No. 61.") I looked at it and told her that I wanted Shredded Wheat, the package of Niagara Falls. She told me that this was just the same as Shredded Wheat and I took it.

I put my initials on the carton and also wrote the slip of paper which is attached to the carton.

CROSS-EXAMINATION.

THE WITNESS: My husband is with the National Biscuit Company.

GEORGE H. WARREN.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, operating a store at 1000 Beloit Street, Forest Park, Illinois. I have been at this particular store eight years, and in the grocery business twelve years.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have been familiar with it for a good many years—and we have had it in the store as long as I have been there.

I am quite sure Plaintiff's Exhibit No. 10, with the picture of a dish on the end of it, is what I know as Shredded Wheat. It also has a picture of Niagara Falls on the other end. That is the only package I really know as Shredded Wheat.

When a customer asks for Shredded Wheat I supply her with a package like Plaintiff's Exhibit No. 1. To the purchasing public, as I know them, the term "Shredded Wheat" means the product put out by the National Biscuit Company. At one time we carried

another package in the store—I do not remember the shape—but the only one we could sell was the National Biscuit Company package. We had to return the Kellogg biscuit to the wholesale house.

We have quite a little telephone business and when an order comes in for a package of shredded wheat, it is the National Biscuit Company package that is wanted.

If I were carrying the two products today and a customer telephoned for shredded wheat, I would send her the National Biscuit Company product. I regard the words "shredded wheat" as designating the National Biscuit Company product.

I recall that before National Biscuit Company put out Shredded Wheat it was put out by another company, but I do not remember the name of the company. I do know, however, that the shape of the package has not changed at all. It is the same shaped box that always designated Shredded Wheat to me.

CROSS-EXAMINATION.

THE WITNESS: I know of no other name than shredded wheat for Plaintiff's Exhibit No. 1.

With the illustration covered on Defendant's Exhibit No. 6, I would think that the name "Whole Wheat Biscuit" meant some by-product of whole wheat, but I really would want to have it opened up before I would decide what was inside of it. But if the package said "Kellogg's Wheat Biscuit" I would expect it to contain the pillow-shaped affair, known to me as Shredded Wheat.

I would be surprised to learn that Defendant's Exhibit No. 6 contained Shredded Wheat Biscuit similar in texture and in shape to the biscuit manufactured by National Biscuit Company. I have never seen the inside of the Kellogg package.

MR. CLARKE:

XQ. 58. I ask you to look at the product inside of that package and say what you would call these.

A. Well, the first impression——

XQ. 59. Suppose you were asked to give a name to——

MR. VILAS: Let him answer. Your first impression?

XQ. 60. Yes, your first impression.

A. Well, it would look to me like someone was doing some copy work. Right off the bat, to see a product which is a seller, and a product that I know, looking at it, to me personally, it looks to me like somebody had done some copying work.

THE WITNESS: In texture it is similar to a Shredded Wheat Biscuit, but I would not call the Kellogg biscuit Shredded Wheat.

In our store the name "Kellogg" is always associated with Corn Flakes.

Mr. McLean, of the National Biscuit Company, asked me to come down here today and testify.

RE-DIRECT EXAMINATION.

THE WITNESS: The biscuit in Plaintiff's Exhibit No. 1 is known to me as whole wheat biscuit. It is known as Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: When the chain store was figuring Plaintiff's Exhibit No. 1 so fine that I could not meet the price I tried to sell the Kellogg product to my customers, but it did not sell.

When I substituted the Kellogg product on telephone orders and the customers returned it, I would not do that again.

LAURENCE SKEWES.

Deposition taken at Chicago, Ill., December, 1932.

Direct Examination.

The Witness: I am a musician residing at 1511 Walnut Street, Wilmette, Illinois.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. It has been my breakfast food for many years and my mother has eaten nothing but Shredded Wheat for the last three years.

When I ask for Shredded Wheat at the grocery store I expect to receive the package with the picture of Niagara Falls on it, and the building there, which I have been through. When I think of shredded wheat I do not think of any other product. It is quite original with me. I was not aware there was any other like product until a few days ago, when Kellogg's Whole Wheat Biscuit was substituted to me.

At Davie's Lunch, on Forty-seventh Street, Chicago, I asked for Shredded Wheat as it was listed on the menu. Two small biscuit were served to me in a dish. After I had eaten one of the biscuit I discovered it was not the original Shredded Wheat. I purchased another package to take away with me, and I put my initials on it. (The box referred to was received in evidence and marked "Plaintiff's Exhibit No. 62.")

Cross-Examination.

The Witness: Mr. Davidson, a salesman of the National Biscuit Company, asked me to go to Davie's Lunch and make the purchase. I recognized right away that the carton was not a Niagara Falls carton.

There was no attempt made to conceal the carton while the biscuit were being placed in a dish.

There was a difference in appearance between the two products. The Kellogg's biscuit was harder baked

and tougher, something that I would not eat as a regular diet. I recognized that I was eating biscuit made of shredded wheat.

Since that experience I know there are two concerns making that product.

BEN ZIEGMUND.

Deposition taken at Chicago, Ill., December, 1932.

Direct Examination.

The Witness: I am a wholesale grocer doing business at 2855 Lincoln Avenue, Chicago, Ill. I have been in the grocery business about twenty years—ten in the retail and ten in the wholesale.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat, made at Niagara Falls. That is the original package I have been selling for twenty years. I have been selling that in the retail grocery business and also in the wholesale grocery business.

If someone sends in an order for shredded wheat we supply them with Shredded Wheat, the original package. We do not know anything else. Shredded Wheat has a reputation among the general public. When customers ask for Shredded Wheat they expect to receive the original package coming from Niagara Falls.

I also carry Kellogg's Whole Wheat Biscuit, and when customers ask for the Kellogg product they always receive Kellogg's Whole Wheat Biscuit.

Cross-Examination.

The Witness: On one occasion I opened a package of Kellogg's Whole Wheat Biscuit and noticed that it was made up out of the same kind of shreds as Shredded Wheat Biscuit, but I could tell the difference on account of the size.

OSCAR WILLIAM ZUEGEL.

Deposition taken at Chicago, Ill., December, 1932.

Direct Examination.

The Witness: I am a wholesale grocer doing business at 725 West Randolph Street, Chicago, Illinois. I have been in the grocery business twenty-eight years—fifteen years in the retail and thirteen years in the wholesale business.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have known Shredded Wheat a long time. When I was a young boy going to business college they had a plant here demonstrating Shredded Wheat and I used to go and watch them make it after school.

In my mind, the Shredded Wheat Biscuit has never been associated with any other product. As far as I have known it, there is only one made at Niagara Falls. When a customer gives me an order for Shredded Wheat I give her a dozen of the product from Niagara Falls.

The picture of the dish with two biscuit in it has always been featured on the Niagara Falls package. It has been a slogan of theirs for years, as I remember it.

If I saw a package like Defendant's Exhibit No. 6, with the name of the product covered and the illustration showing, I would think, from the shape of it, that it was Shredded Wheat.

I have carried Kellogg's Whole Wheat Biscuit, but not during the last several weeks.

Cross-Examination.

The Witness: When retail grocers sell the Kellogg product they specify it as Kellogg's Whole Wheat Biscuit.

HENRY J. TEXTOR.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer doing business at 5718 West Madison Street. I have been in the grocery business fourteen years.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat and have been familiar with it as long as I have been in business.

When customers ask for Shredded Wheat I give them packages like Plaintiff's Exhibit No. 1. So far as I am familiar with the consuming public, they mean the Niagara Falls product when they ask for Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: We carry Kellogg's Whole Wheat Biscuit at the present time, but I do not know how long we have been carrying that product.

GEORGE M. GOTWALT.

Deposition taken at Chicago, Ill., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I have been associated with the wholesale grocery business for thirty-eight years. During that time I have not only traveled throughout the country, but I have worked in different parts of it in the grocery business, principally wholesale. I organized Butler Brothers grocery department and also worked with Montgomery Ward as a buyer. At the present time I work as buyer for the Thrift Food Stores, which I organized. I have been organizing voluntary organizations for the past few years.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat, the trade name by which it is known throughout the trade. During the course of my experience, I have bought and sold everything that is handled in a grocery, including Shredded Wheat.

I judged the expression "Shredded Wheat" to be wheat made into biscuit form, and that Shredded Wheat was really a coined name. Wheat, of course, is a common word for a cereal, but the two words hooked together always appealed to me as a coined name or word denoting that particular product.

Defendant's Exhibit No. 6 appears to me to be Plaintiff's Exhibit No. 1 in shorter form. The contents of Defendant's Exhibit No. 6 appear to me to be an imitation of Plaintiff's Exhibit No. 1, except as to size.

If I were to see Defendant's Exhibit No. 6 on a shelf with the name of the maker and product obliterated, so as to show just the picture on there, my impression would be that that is about the same kind of a dish that used to be on plaintiff's package.

I would think that the contents of Defendant's Exhibit No. 6 were Shredded Wheat, only Shredded Wheat looks longer than Defendant's Exhibit No. 6.

I recognize Plaintiff's Exhibit No. 10 as one of the first cartons used by The Shredded Wheat Company. It was used for quite some years.

CROSS-EXAMINATION.

THE WITNESS: I have heard of shredded codfish and shredded cocoanut and I would expect to find this type of product in shreds.

I think "Whole Wheat" is a good name for the Kellogg product. Of course, as the Kellogg product is a new one, they would have to use various kinds of publicity in order to tell the public what their product was.

I remember that when Mr. Kellogg put Corn Flakes on the market he gave away many samples. It took quite a while to get the public eating Corn Flakes.

RE-DIRECT EXAMINATION.

THE WITNESS: The public has been educated to know Shredded Wheat, by the people who packaged it and put it on the market, as Niagara Falls. If you stopped a hundred people on the street and asked them what shredded wheat was, they would immediately think of that item there (Plaintiff's Exhibit No. 1).

MR. VILAS:

RDQ. 62. What would you say if a similar product, such as is seen in the Kellogg box there——

A. Yes.

RDQ. 63. —in front of you——

A. Yes.

RDQ. 64. —were put on the market and referred to as Shredded Wheat.

A. I would say it was an imitation, a rank imitation.

RE-CROSS-EXAMINATION.

THE WITNESS: Even if the Kellogg product was listed in big letters as Kellogg's Shredded Wheat, I do not think that would change it any. They would still be using the trade name of the Niagara Falls product.

The biscuit can be in round form or square form or any other form, and you would still use the word "biscuit." But to add the words "shredded wheat" to it seems to me to be an exact copy of the Niagara Falls product.

After all, if I were the man that had built up the Shredded Wheat, I would not want a man coming along and imitating it.

I do not think that other manufacturers should be prevented from making that pillow-shaped biscuit

out of shredded wheat, but I do think that they should be prevented from using that trade name.

I have never handled the Kellogg product. I do not know what business the Kellogg Company has built up in some other part of the country, but I know that it is not common in Chicago.

JAMES A. FENCL.

Deposition taken at Chicago Ill., December, 1932.

Direct Examination.

The Witness: I am a wholesale grocer doing business at 4011 Ogden Avenue, Chicago, Ill. I have been in the wholesale grocery business for twenty years. I carry a full line of standard wholesale groceries, including cereals.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have been familiar with it ever since I have been in business.

When customers ask for shredded wheat I always give them the Niagara Falls product.

I recognize Plaintiff's Exhibit No. 10—the carton with the picture of a dish on the end—as one of the first cartons used by The Shredded Wheat Company.

I believe Shredded Wheat Biscuit is known generally to the purchasing public because it has been advertised extensively.

When the expression "shredded wheat" is used among consumers and dealers it means the product contained in Plaintiff's Exhibit No. 1.

Cross-Examination.

The Witness: I do not know any other name for shredded wheat than Shredded Wheat. However, Shredded Wheat, to me, is a trade name.

I would not have any idea as to the nature of Kellogg's Whole Wheat Biscuit from the name. If I heard there was a product on the market under the name Kellogg's Whole Wheat Biscuit, I would think it was wheat in the form of shreds.

RE-DIRECT EXAMINATION.

THE WITNESS: I think a whole wheat biscuit put out in a shape similar to the shredded wheat in Plaintiff's Exhibit No. 1 would be infringing on the party who started to make the biscuit first.

I repeat that Shredded Wheat is a trade name and and that the public understand it as such. When the public want shredded wheat they expect it in that form (Plaintiff's Exhibit No. 1) and they know this trade name. They do not expect anything else in a biscuit like it.

ELMER J. KLEEMANN.

Deposition taken at Washington, D. C., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am in business for myself, doing special investigation and collection work for finance companies.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have been familiar with it ever since I have been a child.

To me the expression "shredded wheat" conveys the impression of a product made at Niagara Falls, that comes in a package with a picture of the factory on the front of it, like Plaintiff's Exhibit No. 1.

Last week I went into the Ennis restaurant, which is located on "F" Street, by Seventh, and ordered a portion of Shredded Wheat with bananas. After a

consultation with the counter man, the waitress came to me—I was sitting at the counter—and said, "We do not have any." I said, "You do not have any what?" She said, "Bananas." "Well," I said, "I will take the Shredded Wheat with milk." She went to the rear of the restaurant, behind this same counter, and came back with two biscuit in a bowl of milk; but they neither looked like Shredded Wheat nor tasted like it to me. I asked her what she had served me. She said, "Shredded Wheat."

And I said to her, "This is not Shredded Wheat."

Well, she said, "That is what we always call shredded wheat."

I said, "I would like to see the package."

She said, "Oh, I have thrown the package in the waste-basket."

I said, "Well, I would like to see the package, anyway." So she went back to the kitchen and she came back with a small squarish package that bore the name of Kellogg's Whole Wheat Biscuit. I kept the package there for a while and I tasted the biscuit, and they did not taste like Shredded Wheat. But I had ordered and paid for them, so I ate them, and that is about all there was to it.

MR. VILAS:

Q. 14. Did you finally obtain the carton?

A. Yes, she gave me the carton that she had taken the biscuit from which she had served me.

Q. 15. Have you got it with you?

A. Yes, I have.

(The carton referred to was received in evidence and was marked "Plaintiff's Exhibit No. 63.")

Q. 17. That is all that took place in reference to this shredded wheat transaction?

A. I had just mentioned, casually, that I did not feel that they should serve a product and claim that it was something else, because I did not care for it as much as I did for Shredded Wheat, and I felt that the substitution was totally unwarranted; and, in fact, I rather resented the substitution.

CROSS-EXAMINATION.

THE WITNESS: Mr. R. L. Taylor, who is connected with the National Biscuit Company, asked me to go to Ennis Restaurant and make the purchase. Mr. Taylor is a friend of mine of long standing. He asked me that in the event I was served any substitute for Shredded Wheat, at any time, to get the carton for him.

As soon as the biscuit were served to me in the plate, I recognized right away that they were not the Niagara Falls product.

It seems to me that I had seen or heard that the Kellogg Company was making a wheat biscuit in shredded form.

FREDERICK A. DODGE.

Deposition taken at Washington, D. C., December 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer. I have been associated with the business for the past forty years, thirty-three of which I have been in business for myself.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have handled Shredded Wheat ever since there has been any sale of it in stores in Washington. When I first went into business I do not think I remember Shredded Wheat; but it has become a store name

with us, just the same as anything else. During the time I have known Shredded Wheat there has been no change in the form or appearance of the biscuit—or at least not to any consequence.

When customers ask for shredded wheat I give them a package similar to Plaintiff's Exhibit No. 1. There is no question about shredded wheat having a reputation with the buying public—I think it speaks for itself. During the last twenty years I do not believe I have been without a stock of Shredded Wheat.

I believe the sales of Shredded Wheat have remained constant. I would not say that Shredded Wheat is selling now as well or as much; but that might be due to other cereals. There are so many other cereals coming and going that, of course, it affects the sale of Shredded Wheat. For the last twenty years there has been a steady demand for Shredded Wheat.

The picture of a dish on Plaintiff's Exhibit No. 10 was used by them up until a few years ago. I remember the picture well because I used to buy Shredded Wheat in large quantities. I had to pile the boxes on the shelves and I would place one row with that end out and one row with the other end out—I can remember that well.

I have never handled Kellogg's Whole Wheat Biscuit.

If I were to see a package like Defendant's Exhibit No. 6 standing on a shelf with the name obliterated, I would think it was Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: I never saw Kellogg's Whole Wheat Biscuit until a while ago. I recognized them as shredded wheat, but they were much smaller in size than the Niagara Falls product.

RE-DIRECT EXAMINATION.

THE WITNESS: If the Kellogg product and the Niagara Falls product were put on a dish in front of me without any carton, I would say that the Kellogg product was Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: If I saw Defendant's Exhibit No. 6, without the illustration, I would have to open it to determine what was in it. I would not associate that package with the Kellogg product for the simple reason that I remember Mr. Caton, the getleman who represents the Kellogg organization, giving me a package of flat square biscuit. That was some years ago. I took that package home and we ate it. I remember that distinctly. We sold a few of those—not any great amount—it was Whole Wheat Biscuit as I remember. It was not pillow-shaped like Shredded Wheat—it was a little square and kind of a sweetened biscuit.

GEORGE R. WASHINGTON.

Deposition taken at Washington, D. C., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I own and operate a retail grocery store at 229 Upshur Street, N. W., Washington, D. C. I have been in the grocery business for about thirty-three years. My store is known as a Nation Wide Store, a member of a voluntary chain.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat. I have known and been familiar with Shredded Wheat ever since it has been on the market—about thirty-eight or thirty-nine years. I have always sold it at my stores. When customers ask for Shredded

Wheat I give them the product I have always known; I have not had a call for the other one at all.

MR. VILAS:

Q. 21. Would you say whether the expression "shredded wheat" has any meaning to the buying public?

A. Well, I—just—I figure this way: If a person walked in and asked me for a box of shredded wheat, I certainly would give him the original Shredded Wheat,

THE WITNESS: I certainly would not give them the whole wheat package for Shredded Wheat—that is one thing I would not do.

If a customer asked for Kellogg's Shredded Wheat I would ask them which kind they preferred as I was carrying two kinds.

I recognize the dish on the end of Plaintiff's Exhibit No. 10.

CROSS-EXAMINATION.

THE WITNESS: If I had a package like Defendant's Exhibit No. 5 in stock and a customer asked for Kellogg's Shredded Whole Wheat I would give it to them.

LOUIS RICHARD SCHMIDT.

Deposition taken at Washington, D. C., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I reside at 602 Gilford Avenue, Hagerstown, Maryland.

I have been familiar with Shredded Wheat all my life as my mother always had it for our breakfast.

If I go into a store and ask for shredded wheat I expect to receive Shredded wheat Biscuit; I mean the product that is made at Niagara Falls.

The other day I went into Fisher's Store, on Salem Avenue, Hagerstown, Maryland, and asked for a package of Shredded Wheat. The man went to the shelf, got me this package (pointing to package) and wrapped it up. I asked for a bill, which he gave me. I put my identification on the package.

(The slip referred to was received in evidence and marked "Plaintiff's Exhibit No. 64"; and the box referred to was received in evidence and marked "Plaintiff's Exhibit No. 65.")

Later in the evening I had a similar experience. I went into Mrs. Dixon's restaurant on North Johnson Street, Hagerstown, and ordered Shredded Wheat. I watched her as she opened the package and put it into a dish for me. After finishing eating this package, I asked her if I could have one to take along and she said, "Sure." She fixed me one to take along, and this is the package. I was seated at the counter and could see the packages as they were in front of me. The bill is attached to the package, with her signature. I made this purchase at the request of National Biscuit Company.

(The bill referred to was received in evidence and marked "Plaintiff's Exhibit No. 66"; and the box referred to was received in evidence and marked "Plaintiff's Exhibit No. 67.")

CROSS-EXAMINATION.

THE WITNESS: I made these two purchases at the request of Mr. Wyan of the National Biscuit Company. He was with me when I went to Mrs. Dixon's restaurant, but stayed outside. He did not tell where to go when I purchased the package marked Plaintiff's Exhibit No. 67.

On previous occasions, before I knew Mr. Wyan, I have bought Shredded Wheat for my home and always received the Niagara Falls product.

In both of those instances when the Kellogg package was handed to me I recognized at once that it was an entirely different package than I had been buying before.

I did not notice any difference in the size of the biscuit that were served to me in Mrs. Dixon's restaurant as the biscuit were broken up in the dish.

Those are the only two instances of the kind that have ever happened to me.

WILLIAM LAIRD LUDWIG.

Deposition taken at Washington, D. C., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I reside at 284 Lincoln Way, West, Chambersburg, Pennsylvania.

I have known Shredded Wheat all my life as it has always been used in our home as a breakfast food.

When I go to the store and ask for shredded wheat I expect to receive that particular biscuit. (Pointing to Shredded Wheat.)

On the 19th of December I went into Martin Brothers Store, in Chambersburg, and asked for a package of Shredded Wheat. He handed me this particular box and I asked him to bill it to me. I have reference to the box with the pencil notations, the slip and the stamp on it. The pencil notations are my identification, the slip is the bill and the stamp is the stamp of the store.

(The bill referred to was received in evidence and was marked "Plaintiff's Exhibit No. 68"; and

the box referred to was received in evidence and was marked "Plaintiff's Exhibit No. 69".)

I had another experience yesterday when I went into Vanderew's Restaurant, in Chambersburg, and asked for an individual serving of Shredded Wheat. The girl handed it to me and I asked her for a bill and she said I would have to get it from the man at the desk in the restaurant. The man happened to be one of the sons that is in business with his father; he gave me the bill and I paid for it and went out. (This is the package and bill I received in that restaurant.) The pencil marks on the box are my handwriting.

(The bill referred to was received in evidence and marked "Plaintiff's Exhibit No. 70"; and the box referred to was received in evidence and marked "Plaintiff's Exhibit No. 71.")

CROSS-EXAMINATION.

THE WITNESS: I did not tell Mr. Vanderew's son what to put on the bill. I asked for a bill for the box of Shredded Wheat and that is the bill he gave me.

Mr. Cowden, one of the National Biscuit Company's men, asked me to make this purchase. Mr. Cowden is a friend of mine. I have known him for some time. He did not talk to me about the case—he asked me as a favor to go in and ask for a box of Shredded Wheat Biscuit.

Mr. Cowden took me with him in his car and he asked me if I would go around and get a box of Shredded Wheat for him. As we were driving around he stopped at a number of different stores. I did not go into these stores—I think he was taking orders as he went in with his order book.

As we reached Martin Brothers' Store I went in first and Mr. Cowden came in after me. I did not

speak to him but the man I bought the package from knows that I know him. I do not know why he came into the store.

When we reached Vanderew's Restaurant, I went in alone. I was in there and getting the bill when he came in, went back of the counter and bought something to eat. He was back there about ten minutes.

Mr. Cowden gave me the purchase price of these goods.

I never had any experience before of asking for Shredded Wheat and receiving the Kellogg product.

I have never seen the Kellogg product, only the picture. I did not open the package. According to the picture I would say it was shredded wheat.

ELMER R. JONES.

Deposition taken at Washington, D. C., December, 1932.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer located at 3404 Eleventh Street, N. W., Washington, D. C. I have been in the grocery business for about twenty-two years, located at the foregoing address for the last twelve.

I recognize Plaintiff's Exhibit No. 1 as Shredded Wheat Biscuit. I have known it as long as I have been in the grocery business. When my customers ask for shredded wheat I know exactly what they mean—they mean the Shredded Wheat Biscuit that I know, that I have just seen (referring to Plaintiff's Exhibit No. 1).

During my experience with the purchasing public, if a customer or any member of the public asks for shredded wheat, they do not mean anything other than the biscuit in Plaintiff's Exhibit No. 1.

From my experience I would say that the name "shredded wheat" has acquired a reputation among the purchasing public. When the purchasing public ask for Shredded Wheat, they know what they are asking for. How they know is probably not for me to say. It might be probably through advertising purposes, the same as they would ask for a certain brand of canned goods, like the Del Monte brand. They have probably tried or seen it through the advertisements, or it might be a by-word on their tongue, like when anybody asks for a cracker, they would ask for a package of Uneedas.

I am carrying Shredded Wheat at the present time but there were times when I have not carried it. I was not on very friendly terms with the National Biscuit Company and had not bought any products from them for about eight years. At the time National Biscuit Company took over The Shredded Wheat Company, I was under the impression that I could only get it from the National Biscuit Company. At that particular time my jobber happened to be out of it—for what reason I do not know—and he suggested Kellogg's Whole Wheat Biscuit. I did not know anything about that product, but he told me that, as far as he knew, it was practically the same thing; but there were fifteen biscuit to the package.

I thought I would try it, and I put in the Kellogg's Whole Wheat Biscuit. When a customer asked for Shredded Wheat we knew what they wanted and I told them that we were temporarily out of them, but that Kellogg's had a Whole Wheat Biscuit that I thought was the same thing, but there were fifteen biscuit in a package. I sold them the Kellogg's Whole Wheat Biscuit and I continued to sell them for a considerable length of time.

The only comments that I could positively say I had received were that some people liked it because

there were fifteen biscuit in the package and the biscuit were a little smaller than Shredded Wheat; they liked it for that reason. I had one customer who had tried the Kellogg product but who insisted upon Shredded Wheat, and I would go to a neighboring chain store and buy a package of Shredded Wheat to fill that particular order. Outside of that, I do not believe I had to buy a package for anybody, because I suggested the Whole Wheat Biscuit.

I never tried to sell Kellogg's Whole Wheat Biscuit as Shredded Wheat. The customers got in the habit of asking for Shredded Wheat all the time, and we would tell them that they were the Kellogg's Whole Wheat. They said, "Well, that is what I mean. That is all right." And they asked for Kellogg's Whole Wheat Biscuit by the shredded wheat name. I am now carrying Shredded Wheat because in the last two months I am purchasing from the National Biscuit Company.

In my opinion the salability of any product depends entirely upon the method of merchandising and advertising that it is given and the method by which it is sold. In my opinion the considerations or elements that move the public to purchase Kellogg's Whole Wheat Biscuit is probably because of Shredded Wheat being on the market so many years, or probably through advertising or probably because it is a shredded wheat biscuit.

I can also say this: That, in regard to cleansers, people will ask for Old Dutch Cleanser, because, when they think of a cleanser, they think of Old Dutch Cleanser, as a rule.

Now, when they think of shredded wheat biscuit, they think of the Shredded Wheat Biscuit, because they know it is shredded wheat biscuit. They do not know it by any other name. I am not handling Kellogg's Whole Wheat Biscuit now. It is not because I do not

think it is a good product, because I have not given that any consideration at all. But I am not having anybody asking for Kellogg's Whole Wheat Biscuit.

All my customers ask for shredded wheat, and if I did not have Shredded Wheat in today I could sell them the Whole Wheat Biscuit. I do not believe they have any objections to using it.

I have never heard any comment from the trade regarding the reputation of Kellogg's Whole Wheat Biscuit being comparable to that of the Shredded Wheat Biscuit. I have had comments, as I stated before, that some of the trade liked it because it was a smaller biscuit and fifteen in a package, which was probably looking at it from an economy standpoint.

Q. 29. Let me have your opinion as to whether or not, if there had never been such a biscuit as Plaintiff's Exhibit No. 1, and Kellogg's Whole Wheat Biscuit came on the market as it has, whether it could be sold in quantities with the methods that have been so far been used?

A. In my opinion, if there had never been a biscuit made as the Shredded Wheat, I think it would take considerable advertising and a long time in order to promote a big sale.

Now I do not know the quantities sold of either Shredded Wheat or Kellogg's Whole Wheat Biscuit; but I have an idea that there is a great deal of it sold. And I have known Shredded Wheat from, I believe, the time I have been in business—that is, I cannot remember the time when I did not know of Shredded Wheat. And, when Shredded Wheat was spoken of, my idea was just of the biscuit form in which it is made.

Q. 30. Do you think that the presence on the market for so long a period of years that you have known it of the Shredded Wheat product has anything to do with the sale of the Kellogg's Whole Wheat Biscuit?

A. In my opinion, I think absolutely that the sale of Shredded Wheat, being on the market the length of time it has, and the popularity it has obtained, has a great deal to do with it.

CROSS-EXAMINATION.

THE WITNESS: There has been no change in the rate of discount given me by the National Biscuit Company that induced me to shift back to them. During the years I refused to deal with the National Biscuit Company I dealt with the Maryland Biscuit Company. A little matter came up that I just do not feel should be disclosed, I got sore at them and I called up the National Biscuit Company and gave them an order. And I have been buying from the National Biscuit Company ever since.

I did not feel that it would be embarrassing and a little difficult to handle the National Biscuit line without buying Shredded Wheat from them because I took it on before I came back with them. I know positively that I have not bought any from the National Biscuit Company since I have been buying back from them; but I have been buying it through my wholesale jobber.

A new product like Kellogg's Whole Wheat Biscuit would have to be suggested by the grocery men in order to sell it. By suggestion, I mean that I would say it was a new shredded wheat product, having fifteen biscuit to the package.

Sometimes customers have a natural curiosity about new products or new kinds of old product and are ready to change, but they have them right before them continuously. A man comes around with a new product that I do not know anything about and I have never heard of it before, and, ninety-nine times out of a hundred, I would not put his product in for the simple reason that I would have to use my own sales effort to put it over, unless it is nationally advertised. A ma-

rity of the products that I put in that are new are tensively advertised as, for instance, Bisquick—I t it in because it was advertised extensively and ople asked for it.

I have known of the Kellogg Company for many ars and have always had favorable dealings with em and their products. I know they would always and behind any product they sold me and that, if it id not sell, they would take it back. These sales ethods might make it easier to introduce a new prod- ct into the grocery trade, much more so than any ther concern you did not know anything about, but ou would not use so much sales ability because you ave so many articles to sell in the store you would ot stop to think of every article you have to sell.

My experience with the Kellogg Company has been hat they are wide advertisers. I will state this right ere, too: that, when anybody thinks of corn flakes—hen I do, and I feel that the public in general do—hey think of Kellogg's Corn Flakes. If a customer sked for corn flakes, I would understand her to mean Kellogg's Corn Flakes.

I would not be surprised if you were to tell me hat, in certain sections of the country where they ave what are known as self-service stores, where Kellogg's Whole Wheat Biscuit is put up on the shelf, considerable number of customers walk in there and ick that product up. I am not very familiar with that ind of business. I do not know what the attitude of he buying public is to buying in that kind of a store. The majority of my business is a telephone business but I have a lot of store trade, too. I was with the A. & P. Tea Company for many years and as a young boy I managed a store in York, Pennsylvania. I had chain store experience up to the time I went into busi- ness for myself. But, as far as a customer picking this up for himself is concerned, I haven't any idea

what the attitude of the public is toward products of any kind. I do know that, in chain stores, where there are different products of the same kind, and where it depends on price, that price tags and prices are a big factor in selling any articles; I do not care what it is.

XQ. 53. And if, in that type of store, the Kellogg product was advantageously displayed and priced, you would expect that people would ask for it on account of those displays?

A. Yes. There are people that would always buy, you understand, a new product, no matter what it is; but I will consciously say that the Whole Wheat Biscuit that was sold in my store was sold through Shredded Wheat, that is, by a customer asking for Shredded Wheat.

I would tell the customer that we had a new product that Kellogg put out, that I understood was just like Shredded Wheat, and asked them to try it. And they tried it under my recommendation.

I think that was a perfectly ethical way for me to sell that product. They asked for Shredded Wheat and I did not have it. We never tell a customer we are out of an article, that is, if we are out of an article and have something else that we substitute for it, we suggest it to them; and, if they won't try it, we tell them we will get the product they want. The reason we do this is that if my customer calls up and orders five or six items from me and she asks for an article that I have not in stock, and if I won't get it for her, she is obliged to go out to some place and buy it. Well, it is my business to keep her away from some other store.

I see nothing improper in my telling customers I was out of Shredded Wheat and suggesting they try Kellogg's Whole Wheat Biscuit. I have the article on sale and if I did not sell it that way it would probably be lying on my shelf yet.

RE-DIRECT EXAMINATION.

THE WITNESS: From my experience with the purchasing public it is my observation that there is a certain class of people who come into stores looking for bargains and looking around for suggestions; but I have found that the general public that go to chain stores buy the specials, and, of course, they buy other things, too. They are close observers of newspaper advertising, particularly.

If a customer in a self-service store or a chain store, having in mind that she needed Shredded Wheat, saw that package there with the picture of the dish on it and two biscuit in the dish (Defendant's Exhibit No. 6) I would think it possible that the customer, or any average customer, would be led to pick up that package thinking it was Shredded Wheat—a lot of them would. I would say that others would ask "Is this the same as Shredded Wheat."

RE-CROSS-EXAMINATION.

THE WITNESS: When I say that customers come into chain stores and ask for specials, I mean advertised specials—they are newspaper ads. By picking up almost any paper you will find that, with their distribution of stores, they can advertise effectively through newspapers because it reaches all sections of the city.

If Kellogg's Whole Wheat Biscuit were featured in the paper, in my opinion, the demand for it would depend entirely on the price at which it was advertised, or how well they knew the product.

I would not say that my customers now recognize the fact that there are two different makes of this pillow-shaped biscuit, this Shredded Wheat, because I have not had anybody, to my knowledge, ask for Kellogg's Whole Wheat Biscuit since I have been out of it. They do not know it by that name. When they

asked for Shredded Wheat I would tell them I was out of it but was carrying Kellogg's Whole Wheat Biscuit and they would say "that's all right."

I do not know of any other name for the product than shredded wheat or shredded wheat biscuit. If a customer came into my store and asked for a package of soda crackers I would not necessarily give them Uneeda Biscuit. Many of my customers use the Maryland products and call for "Wynnebrook Soda Crackers." If anybody asked me to describe Shredded Wheat I would say it was a shredded wheat, wheat cut into shreds, and formed into a biscuit. That is what I understand by Shredded Wheat.

RE-DIRECT EXAMINATION.

THE WITNESS: The name on the Kellogg package is Kellogg's Whole Wheat Biscuit. I do not know what a whole wheat biscuit is. I know that Plaintiff's Exhibit No. 1 contains the pillow-shaped biscuit that we know as Shredded Wheat—we do not know it by any other name. On the bottom of Exhibit No. 1 is the slogan "One hundred per cent whole wheat." I do not think that plaintiff would advertise that slogan unless the product was one hundred per cent. whole wheat.

In my opinion it is fair to say that the product in Plaintiff's Exhibit No. 1 is whole wheat biscuit that is called shredded wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: I would say that the biscuit in Plaintiff's Exhibit No. 5 was a pillow-shaped biscuit. It looks like just what I would call a shredded wheat biscuit, but it does not look as large as the Niagara Falls product.

When I come in here today, Mr. Vilas came outside and talked to me for about two or three minutes.

PAUL R. WATKINS.

Deposition taken at Washington, D. C., December 20, 1932.

Direct Examination.

The Witness: I am a retail grocer, operating a store connected with the Nation Wide, a voluntary chain organization. I have been in the grocery business seventeen years the twenty-fourth of September. I never was in it before.

I recognize Plaintiff's Exhibit 1. That is Shredded Wheat, the only one I know about. I have known that article fourteen or fifteen years. Being born and raised in the country, I knew nothing about it until I came to the city.

If a customer asked for Shredded Wheat, she would naturally want Shredded Wheat and nothing else. She expects that box right there, Plaintiff's Exhibit 1, with Shredded Wheat on it, the one you just showed me. If you tried to give her anything else, I think she would put up an argument, because she wants nothing else.

When a person speaks or thinks of Shredded Wheat, they have in mind that biscuit right there.

Cross-Examination.

The Witness: If she asks for Shredded Wheat, she wants Shredded Wheat. She does not want anything but Shredded Wheat. I mean that box right there, Plaintiff's Exhibit 1. When you go to get it off the shelf, she expects you to bring down a box just like that. There is supposed to be shredded wheat in it, a long pillow, about that long, like bran. I do not know what it is made of. It is a pillow-shaped biscuit. I know nothing about any biscuit of that sort made by Kellogg Company. I never knew any shredded wheat biscuit

except that biscuit, that package. Nobody has ever tried to sell it to me. I would not have bought it if they had; because shredded wheat is Shredded Wheat.

I have handled Kellogg's Corn Flakes and Post Toasties, but no other brand of corn flakes. I had no experience with corn flakes other than Kellogg's. Post Toasties is different.

I talked with Mr. Frank, the National Biscuit Company salesman, who asked me if I would come here today. I did not have time. I asked him what it was. He said something about having a lawsuit and he wanted me to testify about something, that it would be a favor to him. I said all right. He called me a little while ago. I did not know what I was coming down here for, because I had never seen the Kellogg biscuit before I came in here a while ago. Nobody showed it to me. I happened to see it outside. I met somebody in the office. I do not remember who the gentleman was. I guess it was Mr. Savage I talked with. He did not say anything about the case in particular. He said they were trying to sell that for Shredded Wheat Biscuit.

XQ. 36. He said they were trying to sell that Kellogg's biscuit as the Shredded Wheat Biscuit?

A. That is what he said. He asked me if I thought it was fair. I said, "No, I do not think it is fair." I do not think it is fair for another man to come on the market with the exact same shaped biscuit, outside of it is a little tiny bit shorter, that a restaurant can serve for exactly the same thing. I do not think it is fair.

THE WITNESS: He did not open up the package. He did not talk about the case, but simply said the Kellogg Company was trying to sell their shredded wheat biscuit as the National Biscuit product. He did not say anything about its not being fair. I said I did not think it was fair.

RE-DIRECT EXAMINATION.

THE WITNESS: If I wanted shredded wheat, I would naturally buy your Shredded Wheat. I would not buy Kellogg's, because I do not know anything about it. I do not eat it, because I do not eat that brand at all. When you are working hard, it does not stick by you. Sometimes I cannot eat dinner or lunch until one-thirty or after.

RE-CROSS-EXAMINATION.

THE WITNESS: I do not think they have the right to call that shredded wheat. That is not shredded wheat. That is the National Biscuit Company's Shredded Wheat. That is what I think about it. I think they have a trade name, Shredded Wheat; and I do not think there should be another biscuit made that looks anything like it. That is what I think about it.

RXQ. 43. Do you know any other name for shredded wheat biscuit than shredded wheat biscuit?

A. No, that is the only name I think of, as Shredded Wheat.

THE WITNESS: That is the only name anybody can think of. I know very well what Uneeda Biscuit are. It is Uneeda Biscuit. I would say I do not know any other name for it. I do not know that it is a soda cracker. I do not know what is in it. It might have soda or arrow-root in it. If a man in my store asks for Uneeda Biscuit, he gets Uneeda Biscuit, because I think it is the same as that everybody's sausage meat is not alike. Naturally, if they want mine, they will not want somebody's else. Many different people make sausage meat, but all does not have the same things in it. I would be in favor of one person having the sole right to call his product sausage meat. If he is making and putting out one particular kind of sausage meat, I think he should have the right to call it that kind of

sausage meat. If he had it patented, for instance, in a certain package, I think nobody else should be able to make it up in that shape package. As shredded wheat is made in the pillow shape, I do not think anybody else has the right to come along and make that biscuit in that shape. I do not think it is fair.

RE-DIRECT EXAMINATION.

RDQ. 54. I take it from what you say, Mr. Watkins, that you regard shredded wheat as a trade name, do you?

A. That is it exactly. It is Shredded Wheat. You cannot call it anything else.

RE-CROSS-EXAMINATION.

THE WITNESS: Assuming it is a trade name, I could not suggest any other name like soda cracker for Uneeda Biscuit. That is the only thing I know. I do not know what is in it. I do not know what Uneeda Biscuit is, except what you tell me. I have never seen it made. It might be different made from any other biscuit.

I like to be fair. If I have two brands, including my own, I am not fair to my own brand. If we have another brand, I am not fair to them. I am not fair to myself or them. So I feel it is unfair to have two brands of the same product in my store; because I think that is the only brand of shredded wheat you can really buy. I do not know whether there is anything unfair about having two kinds of corn flakes in my store. In one way, I think Post Toasties is not exactly like Corn Flakes. Post Toasties is a thick flake. Corn Flakes are thin. They have an altogether different flavor. Those who like Post Toasties might not even like Corn Flakes. There is a difference. I carry only one kind of ketchup, Heinz's. I would not carry Snider's. If

here are two of the same quality, what is the use of arrying both? A man is crazy to carry Snider's, if is the only one quality for two. Why should we carry wo of the same grade?

I call your Corn Flakes Kellogg's Corn Flakes. When they ask for Post Toasties, they get Post Toasts. When they call for corn flakes, they get Kellogg's.

CHARLES EDWARD JOHNSON.

Deposition taken at Washington, D. C., December , 1932.

Direct Examination.

The Witness: I recognize Plaintiff's Exhibit 1, Shredded Wheat, with which I have been familiar r some time. At the request of District Sales Mana- er Cooper of National Biscuit Company, I visited to- y a restaurant at 33 East North Avenue, Baltimore. placed an order for Shredded Wheat. I sat at a table. was served two biscuit in a saucer. I asked the aitress to let me see the package. Plaintiff's Exhibit is the package the waitress brought down to me. I d not see the package before they were served to me. e brought them to me in a dish.

I told her that was not Shredded Wheat. She id, "That is the only kind I know of," and then she ought me the package. Plaintiff's Exhibit 72 is the les slip the waitress gave me.

Cross-Examination.

Mr. Cooper asked me to make the purchase. He ok me there and waited outside. He took me to one her place, they served me the National Biscuit Com- ny Shredded Wheat.

FRED A. SCHWARZ.

Deposition taken at New York, N. Y., January 4, 1933.

Direct Examination.

The Witness: My business is retail grocer, at 16 Essex Market, Newark, New Jersey. I have been there fourteen months. It is my own business. My previous connection was with a delicatessen for twenty-two years, in the Public Market in Newark. In the course of my experience I did not have occasion to handle cereals, but I do now. I recognize Plaintiff's Exhibit 1 as Shredded Wheat. I have been familiar with Shredded Wheat about thirty-five years. I have been a user of it in my home. I recognize the contents of Plaintiff's Exhibit 1. I call it Shredded Wheat. During the thirty-five years I have been familiar with the product, the expression shredded wheat has not meant to me anything different from Plaintiff's Exhibit 1 or its contents.

In my own mind, this package is the only shredded wheat I have known of. Being in business at the present time, if a customer asks for shredded wheat, that is my idea of what they want. During the period of time I have been a user of Shredded Wheat, when I went to a store or restaurant and asked for Shredded Wheat or Shredded Wheat Biscuit, I expected to get that item there. In a restaurant, I would not know what they were serving.

Q. 20. Would you say whether or not, in your opinion, the expression shredded wheat has, in the mind of the public, as you know it, any significance as to the origin of the product?

A. From experience, I would say that—my personal experience of the public up to date, this exhibit here expresses the mind of the public as to what shredded wheat means, Plaintiff's Exhibit 1.

Q. 21. What do you say as to whether or not the expression shredded wheat is regarded by the public as a proprietary name or trade-mark?

A. Well, I do feel that it is regarded as a trade-mark name, the same as many other of our cereals, and that people, I do not believe, have any particular knowledge of the process or anything like that. They are interested in a certain package; and I would think that the words shredded wheat would identify this package more than anything else.

Cross-Examination.

The Witness: Referring to Plaintiff's Exhibit 1, I recognize the Shredded Wheat Biscuit by the picture itself. I have not heard, or I had not until a few days ago, of any other shredded wheat biscuit besides the Niagara Falls product. Then I heard there was another one on the market, made by Kellogg's. I have not seen it.

Re-Direct Examination.

The Witness: I remember seeing Plaintiff's Exhibit 10 package with the picture of the dish on the end of the package. I cannot say definitely how long that was in use. I believe it has been beyond the fourteen months I have been in the business. I do not remember seeing that picture since I have been in the business. I have seen it prior to the time I was in the grocery business.

If I saw a package like Defendant's Exhibit 6 on a shelf or in such manner that the name was obliterated and I could just see that picture, it would convey to my mind Shredded Wheat.

Re-Cross-Examination.

The Witness: What Shredded Wheat is made of, I do not know. The appearance I do know, and that is

that pillow-shaped biscuit. I would assume, from the use of the word *wheat*, it is made of wheat. I have heard of shredded codfish and shredded coconut. Those products are put up in shredded form.

RE-DIRECT EXAMINATION.

THE WITNESS: I never heard of shredded coconut put up in the form of a pillow-shaped biscuit. Shredded coconut is usually sold in bulk. Shredded codfish is also just in bulk, no particular shape or form, as far as the fish itself is concerned. It is just codfish turned into little shreds.

W. A. DOYLE.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am the same Mr. Doyle who testified in Boston. Since that time, I have put in some time in connection with this case. I have had experiences in my investigation. I secured witnesses to come in regard to substitutions and also good competent grocers to testify to their actions in connection with Shredded Wheat. I myself had experience with substitutions. I made four actual purchases in Kalamazoo, Michigan, and two purchases in Battle Creek, Michigan, both substitutions for the original product of Shredded Wheat that I asked for.

On the nineteenth day of December, about 8:30 A. M., I went into the Lull grocery store, 410 East Dutton Street, Kalamazoo, Michigan, and asked for a package of Shredded Wheat. The grocer handed me Plaintiff's Exhibit 74. I replied, "That is not Shredded Wheat." He said, "That is shredded wheat. See the biscuits in the dish?" I took it and went out. I wrote

on the package, so as to identify it. I took the two biscuit out of the package and folded it up.

My next call was the same day, about half an hour later. I went to the Sunshine Grocery Company, 838 Hull Street, Kalamazoo, Michigan. I asked the proprietor for a package of Shredded Wheat and was handed the package, Plaintiff's Exhibit 75. I replied, "That is not Shredded Wheat." He said, "That is shredded wheat." Those were his exact words. I had no further talk, took the package along with me.

On the same day, I went to Red and White Store, Fred Klopp, proprietor, East North Street, Kalamazoo, Michigan. I asked for a package of Shredded Wheat. The proprietor's wife brought me this package. I protested to her it was not Shredded Wheat. She said, "It is exactly the same." I said, "Suppose I take that package home and my wife tells me I did not get the right thing?" She said, "You won't have any difficulties that way. That is Shredded Wheat." Plaintiff's Exhibit 76 is the package I got there.

On the same day, at the store of Hoover & Barrett, East Avenue and Gayle Street, Kalamazoo, Michigan, I asked for a package of Shredded Wheat. The clerk handed me this package, Plaintiff's Exhibit 77. I replied, "That is not Shredded Wheat." The clerk said, "That is the shredded wheat we carry."

On December 20, 1932, I went to the store of A. L. Olmstead, 747 Capitol Avenue, N. E., Battle Creek, Michigan, and asked for a package of Shredded Wheat. The clerk brought me Plaintiff's Exhibit 78. I replied, "That is not Shredded Wheat." The answer was, "That is shredded wheat."

December 19, 1932, I went to the store of P. L. Mehan, 456 Capitol Avenue, S. E., Battle Creek, Michigan, and asked for a package of Shredded Wheat. The

clerk handed me Plaintiff's Exhibit 79. I replied, "That is not Shredded Wheat." He said, "Sure, it is shredded wheat."

I also made several other calls in and around Battle Creek. In these particular cases, when I asked for Shredded Wheat, I was asked which shredded wheat I meant, Niagara Falls or the original Shredded Wheat, or Kellogg's. They held up both packages. I made the answer I never knew there were two Shredded Wheats. The clerk replied, "We always like to push our home product." That was on three different occasions that same day, December 20th. I did not make the purchase, because they had both packages. The pencil markings on the tabs of the exhibits just offered were written by me and were memoranda of the conversations, so I would remember just what was said in each case. They were put on there at the time I made the purchases.

CROSS-EXAMINATION.

THE WITNESS: I was in Michigan from Sunday night the eighteenth of December until noontime the following Wednesday. We had a little gathering at Chicago that Friday. I stayed over Saturday and left Sunday for Kalamazoo. The only two stops I made were there and Battle Creek. I have told you all the stores I made inquiry at in Kalamazoo. There was another case, the restaurant in the hotel, New Burdick, a cafeteria, downstairs. I ordered Shredded Wheat one morning for breakfast. The girl passed out just a dish with two biscuit in it. I told her I would like to have it in the original package. She said they did not serve it that way but just in the dish. They had the small biscuit of shredded wheat. I recognized them as Kellogg's biscuit, as far as I could judge by the shape. I know they were not our biscuit. I knew right away they were not National Biscuit Company's Shredded Wheat.

Mr. Vilas and Mr. Savage instructed me to go to Kalamazoo and Battle Creek. They did not ask me to go to any other towns. I went alone. I went to the agency manager in Kalamazoo. He gave me a list of the stores to go to. That was so, also, in Battle Creek. I went to all the stores on his list. I did not go to other stores; but there was no list at all in Kalamazoo. He drove me to the stores, and I went in myself. He did not come in at all. He selected the stores I was to go to. Being a stranger, I thought that would be possibly the easiest way. He wrote a list of stores I was to go to in Battle Creek. He and his wife drove me to Battle Creek. Then I came to New York. They did not take me to the cafeteria at the New Burdick Hotel. I was stopping there. I looked the hotel up in the regular hotel catalogs. I am not familiar with it in any shape or manner. I met the local representative of the company at the agency in Kalamazoo.

At some of the stores I told them I did not know there were two kinds of shredded wheat until then. I still do not know it. I just made that statement, not meaning that that created in my mind that there were two kinds, because it did not. I did not mean to say I did not know about the Kellogg product or that I did not think it was made of wheat or that I thought it was made of rye or anything else than wheat. I do not know anything about the process of making the Kellogg biscuit. I have seen the shredded wheat made at Niagara Falls. I am sure I know nothing about Kellogg making it. My conversation in the stores was I did not know there was any other kind of shredded wheat except the Niagara Falls.

RE-DIRECT EXAMINATION.

THE WITNESS: In the hotel where I had breakfast, I did not notice where the waitress got the biscuit. All

the cereals were in little individual dishes. It was cafeteria style and you helped yourself. They were all set up. There were no packages visible. They had Kellogg's other cereals in some little individual packages there, but the biscuit were out of the package.

The stores where I made the purchases did not also have Shredded Wheat. Some of the other places I visited had both kinds.

RE-CROSS-EXAMINATION.

THE WITNESS: When I asked the restaurant girl for the package, she just said they were not served in the individual packages. I imagine she meant they took them out of the packages before they were served. She did not exactly say that. I presume she meant that, because all the other cereals were in the original package. I just asked her if I could have the original carton they were in. That is all I had to say. Her answer was that that was the only way they were served. I did not pursue the matter further.

RE-DIRECT EXAMINATION.

THE WITNESS: I had no reason to infer that the biscuit served to me were taken either from an individual package or a large package. I did not even take them. I knew from the size of it that it was not shredded wheat. They were not just what I wanted, and I did not bother taking them.

There was more than one dish on the counter of the cafeteria. They run them in rows. There were probably three rows of dishes with the biscuit in them and three rows of other cereals, quite a display there. I think I am correct in saying there were three dishes with biscuit in them.

RE-CROSS-EXAMINATION.

THE WITNESS: I do not know how restaurants are serviced. I am not familiar with that particular end of it. In my travels around the territory, I have seen the individual packages of Kellogg's Whole Wheat Biscuit in various parts of the country, and in restaurants, stacked up on the counters. The restaurant in Kalamazoo is the only instance I have known of in which these biscuit were served in that particular way. That is the only one I visited myself.

RE-DIRECT EXAMINATION.

That is the only one I visited in Kalamazoo at that particular time. In my travels, I have observed the Kellogg biscuit in various other places set off in dishes without the package, frequently. I have noticed a number of different cases where they have not displayed the package at all. It is usually just two biscuit in a saucer. I remember in Chicago a particular case of that kind, where they did not have individual packages. They served it out of the package that way. It was not a cafeteria but a regular lunch room. The packages were under the counter. When I asked to see the package it came from, they showed it to me.

I think in Raklio's restaurant in Chicago they had biscuit displayed just the same as in the New Burdick. I am almost sure that is the place.

RE-CROSS-EXAMINATION.

THE WITNESS: In Chicago they were not displayed in the plates. She took them out from under the counter and put them in a dish. They were not up on display. I had no conversation with her as to why she was using the big package instead of the individuals. That is my particular experience. That is the only one I recall now. As far as my experience has been,

it is safe to say that both the National Biscuit Company and the Kellogg Company apparently endeavor to push the sale of their product to the restaurant trade in the small packages, especially the Kellogg Company, because, in almost every case, you get it in the individual size.

TRUMAN A. DEWEESE.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: 247 Park Avenue is my city address. I live in Scarsdale now. That has been my address since I was at Niagara Falls with Shredded Wheat. Until recently, I have been connected with the Shredded Wheat Company or with the National Biscuit Company as director of publicity, controlling all promotion work except sampling.

I was on the staff of the *Chciago Times Herald*, later the *Chicago Herald*, as an editorial writer. Having started my education as a physician, I was much interested in foods and dietetics. I used to do some writing for a magazine What to Eat, in our building and finally became the editor of it on the side, retaining my other editorial work. I once wrote an editorial there on white flour, taking the Government's analysis and showing that, by the modern roller process, they were throwing away the best part of the wheat grain. That editorial came to the attention of Mr. Perky, in Niagara Falls, who was evidently a subscriber to What to Eat. He wrote me, somewhere about 1904. In his letter he complimented me on the editorial and said he considered it very brave of me to write and publish such an editorial, that he was very much interested in that kind of work, the work he was doing,

making a whole wheat product, and he would be glad to see me sometime. I answered him. To make a long story short, he came to Chicago and telephoned me to see him at the Auditorium Hotel, which I did. He told me how he came to invent Shredded Wheat, and that my editorial had interested him very much. He asked me if, the next time I came to New York, I would stop off at Niagara Falls and see the Shredded Wheat plant. I said I would. In the meantime, I sent him suggestions for Shredded Wheat advertising, as I was already familiar with the product. I wrote two or three articles for him, one on domestic science, which he signed and paid me for. My name did not appear in connection with it in any way.

A short time after, I stopped off at Niagara Falls, visited the plant, ate Shredded Wheat, visited Mr. Perky, and stayed all night with him. He lived right across the road from the factory at that time. I went back to Chicago with my work.

In the meantime, he told Mr. Rankine and Mr. Porter, officials of Shredded Wheat Company about me. He was an eccentric fellow and got into a great many arguments with them. They were the financial men, and they would not do all he wanted them to do. He said, "There is only one man who really understands all about Shredded Wheat. His name is DeWeese, and he lives over in Chicago." A little while after that, I was made director of special publicity for the World's Fair at St. Louis. I resigned my job in Chicago, went down there, and put through my little plan of publicity which had been adopted by the Board down there as one of the most feasible and practical of the plans to get publicity for the exhibition.

In the meantime, I received a telegram from Mr. Rankine, of the Board, who was New York Commissioner and at that time a big financial man in the

Shredded Wheat Company. They were evidently trying to get it away from Mr. Perky and reorganize it, form a stock company, issue bonds, and so on. I met him down there and had lunch with him. Then and there, I made a contract with him to go to the Shredded Wheat Company immediately after the Fair closed, which I think was December 31, 1904, because I went with the Shredded Wheat Company the following year, 1905. I may be off a year there. At that time, it was called the Natural Food Company. Mr. Rankine told me: "Mr. Perky says you are the only chap who really understands shredded wheat. I want you to take care of the promotional end of it." Mr. Perky had left them about a month before that, I believe.

When I went to Niagara Falls, I immediately assumed duties in charge of promotional advertising and was in full charge of that branch of the business from then on, except the sampling. I did not have much to do with that. At first, the promotional work was largely demonstration. That had been Mr. Perky's idea of advertising, to show the biscuit to people, how to use it, and how it was made. That demonstration was to show the culinary uses of the biscuit. Mr. Perky had the idea that Shredded Wheat was a food to be combined with other foods, like creamed vegetables, meats, and so on. However, after being there awhile, I began to shape the advertising in a different direction, toward its being a breakfast cereal or food, retaining a good many of the more popular combinations with fruit and other things it combined well with, to carry out this demonstration idea, which we continued in a small way for a while.

He had some young women graduates of Oread Institute, a domestic science school he bought and founded in Worcester, Massachusetts, where the first factory was operated. They were kept in an apartment building in New York; and their job was to go

out and give luncheons in private homes and show the uses of Shredded Wheat. For instance, if a woman wanted to give a luncheon to repay her social indebtedness, she would allow these girls to come in. They would take hold of the luncheon and serve shredded wheat in a great many combinations, like creamed oysters, and such as that.

The other demonstration idea was carried out in the factory, where they took thousands of visitors through every year. They saw the process, were served Shredded Wheat generally in a simple way, with sliced bananas, or something like that. The average number of visitors per year was about a hundred thousand. Sometimes it was a hundred and twenty-five thousand or more. That continued all the time.

The demonstration idea was carried out in a more complete and extended way in what we call the mechanical exhibit, which was continued many years after Mr. Perky left. They were simply miniature Shredded Wheat factories, set up in different stores in cities and towns, where we installed the actual machinery and made Shredded Wheat Biscuit, serving it to the crowd, with a lecture on Shredded Wheat. Those were operated in all the large cities at different times of the year. We had one very extensive one in Atlantic City during the summer. One of the first was at One Hundred and Twenty-fifth Street in New York, visited by Mr. Darius Mills at one time. He became infatuated with Shredded Wheat, began eating it, and finally became the principal stockholder of Shredded Wheat Company, acquiring 51 per cent. of the stock, including a good deal of Mr. Perky's when he left. The idea was we could not take everybody through the factory, so we took the factory to them. We operated miniature factories in different parts of the country. Those were attended by thousands of visitors who

were served Shredded Wheat. It was a part of the demonstration plan, advertising Shredded Wheat.

That series of demonstrations lasted, I would say, roughly, fifteen years. They were finally abandoned as we began to get into national advertising. We realized Shredded Wheat was getting a distribution making it necessary to do a far-reaching style of advertising. We abandoned the demonstrations by the young ladies, closed up their apartments, sold out the furniture, and stopped the mechanical exhibits, or abandoned them for the time being; but we continued putting little shredders in windows of grocery stores and restaurants, instead of putting in the full exhibit. They started that fifteen-year period of demonstration about 1905 when I first went there.

One of our earliest forms of advertising was the lantern lecture, entitled "Wonders of Niagara," consisting of motion pictures, devoted half to Niagara Falls and half to Shredded Wheat. The idea was to use Niagara Falls to draw the crowd. After that, we would lead them into the Shredded Wheat factory. From there on, they were pictures of the process of making Shredded Wheat. They were shown in all the larger cities, wherever we could get into a church or Y. M. C. A., and so on. We would furnish the lantern, the lecturer, and the pictures free. We allowed the society or church to charge an admission of twenty-five cents or whatever they chose. That was done generally throughout the country, continuing for about ten years after I went with them. They were finally abandoned as expensive and reaching so few people at a time. It carried out Mr. Perky's idea of using Niagara Falls to attract attention to Shredded Wheat Biscuit. As we began to abandon these forms of demonstration, we began to advertise more extensively in magazines and newspapers, black-and-white publicity. In 1910, our newspaper advertising became nationwide.

Until then, it had been local where we were working a town. By 1910, we were, I think, in all leading newspapers in the different cities and towns of the United States, Canada, and Great Britain. I wrote the copy in those days.

When I first went there, I think they were in some few magazines. Mr. Parky had been. We continued in magazines very extensively, until 1910, when we began to drift out of magazines into newspapers, feeling that we had a larger distribution there which fitted a little more into our work. For instance, where we were sampling, having special sales, or a mechanical exhibit, the newspaper in that town could do local advertising for it in that city, which could not be done in a magazine.

The earliest magazine advertisements were lithographed inserts, showing Shredded Wheat with strawberries and other fruit, in colors. We drifted later into black-and-white advertising and had many full pages in *Saturday Evening Post, Leslie's, Collier's,* and so on. The Associated Sunday Magazine was a weekly Sunday supplement of many newspapers, probably twenty-five or thirty leading papers. We took full pages in that, sometimes back covers. We were in all the leading magazines of those days, *Munsey's, Harper's, Scribners, Century,* and *World's Work,* that type. We drifted out of them into newspapers I think about 1915.

The distribution of Shredded Wheat was getting to be very general about that time, 1910, 1912, along there, when we went into the newspapers, for the reason that it reached a larger number of cities and towns more intensively than we could in the magazines. Finally, we went out of the magazines for a long while, retaining back covers or full pages in a good many weekly magazines, and began spending four or five hundred thousand a year in the newspapers. We got

a lot of free advertising. It used to be my job to writ news articles, which the newspapers would print, s long as we advertised in them. They were educationa articles. In fact, all our advertising was of an edu cational nature. As a guess, I should say we adver tised in fifteen hundred newspapers at that time. Ou expenditures in them were from three to five hundre thousand a year, depending upon the appropriation Several times, it ran up to seven hundred thousand i a year. In this advertising, we continued to emphs size Niagara Falls and associate it with Shredde Wheat. We hardly ever printed an advertisemen without mentioning Niagara Falls. When the othe factories were built, we put them all in the advertis ing. We would feature Niagara Falls as the home o Shredded Wheat, and then we would mention thes other factories, across the river in Niagara Falls Canada; Oakland, California, and one in England.

I had been there but a few years when I suggested the change of name from Natural Food Company t Shredded Wheat Company, because we were losing so much advertising in the words *Natural Food Company* whereas, if we changed it, we would get advertising every time the corporation's name was mentioned. We had the name changed over the entrance from Natural Food Conservatory to Home of Shredded Wheat, cut in stone over the arch, and we began using that as the corporate name. That was long after Mr. Perky left. He would not have stood for that.

We were in street-car advertising very extensively in the larger cities and in elevated stations and sub ways for at least ten or fifteen years in the early part of the promotion; but, when we got into newspapers extensively, we got out of street-car advertising for a while. We used street-car advertising in New York City, Philadelphia, Brooklyn, Boston, Chicago, cities of that type; more extensively, of course, in New York,

where we went into subways and elevated stations. We had what we called single-sheet posters in all those places, in colors. We took those street-car cards, after they had been used, framed them, and put them in restaurants and grocery stores. They were all in colors, mostly illustrating the fruit combinations.

We got up a great many booklets under various titles, distributing them by the million all over the United States and Canada; by our sales agents in sampling campaigns, and many of them by mail in response to answers to advertisements, carried in many of the magazines, with an invitation for them to send to us for these booklets. Many of our sales agents were largely samplers. They took a State, organized it for sampling, and went right through from one end to the other. As our product went to the wholesaler and jobber, there was little else for them to do but distribute samples throughout the United States, from house to house. Everywhere they handed in a sample, one of those booklets went. The booklets were usually published in lots of one to five million. Some of them were called:

More Light; The Vital Question Cook Book; A Family Affair; Of Vital Interest to Mothers; Shreds of Life; For Old and Young; Come and See Us Make Shredded Wheat; A Way to Save; More Life; An Easy Road to Health; Shredded Wheat Dishes, a cookbook; Life and Health; The Bread of Health; Wonders of Niagara; Make It Your War Bread, gotten out during the World War; A Happy Way to Health; Health From the Whole Wheat; Fifty Ways to Serve Shredded Wheat. I wrote all those booklets except More Light, the Vital Question Cook Book, and A Family Affair, which were written by Mr. Perky before I went with the company. I wrote: Health in Every Shred. I will add to that: Ask Your Doctor, a special booklet used in a campaign with doctors.

These booklets all described the process of making Shredded Wheat and gave its nutritive food value, the reasons for the process, making whole wheat grain digestible, the different popular and easy ways of serving it. They were given out by our samplers, and we gave them to visitors at the Home of Shredded Wheat, Niagara Falls, and in many other ways, all of which I cannot recall now.

Our biggest distribution of literature, perhaps, was our four-page leaflets, printed, I think, in ten-million lots; a leaflet devoted to Shredded Wheat and showing some of the culinary uses of it. For many years they were handed in the doors with samples, with a cook booklet, also.

We furnished Shredded Wheat menu cards to restaurants free of charge, with the biscuit in a dish at the top, with strawberries, perhaps, or fruit of some kind, depending on the season we gave them to the restaurants. They were used by restaurants quite extensively in cities and towns all over this country and Canada. I figure we had used, up to 1926, twenty million of those.

In addition to the leaflets and menus, we supplied restaurants with a glass globe, filled with Shredded Wheat Biscuit, to put in the window, like Plaintiff's Exhibit 36. They would not all take them; but, where they would, we gave them. They put them in a show window or on the counter. That began about ten years after I came with them. I do not know exactly the number distributed, but it was considerable. Every once in a while, Mr. Meek, the purchasing agent, would order so many thousand globes from a glass concern. Biscuit were not served out of those globes. They were supposed to be refilled from time to time, but the restaurant men neglected it. I think you will find a lot of those globes still around in stores and restaurants. We had no other glass containers that I know of, used by restaurants in serving biscuit.

Our store advertising consisted of lithographed cut-outs for windows, such as picture of a woman serving a child Shredded Wheat Biscuit, and other forms which were set off in the window in the form of an easel, generally two or three feet high and two or three feet wide. Sometimes they were strips pasted on the sides of windows, with biscuit falling out of a carton, and all sorts of pictures we had the grocers put in the windows, wherever they could be persuaded to use them. Our agents would start right in at one end of the State and carry it right through to the other, with a certain number of cut-outs in a wagon or automobile, putting them in stores wherever we could induce them to put them up. We also used what we called street-car cards or hangers, to hang up in the stores, in colors, showing various uses of Shredded Wheat; with strawberries, in the strawberry season. In November or December, we would show sliced peaches; in winter, always sliced bananas. That was done very extensively throughout the United States and Canada.

We issued blotters by the millions. They were given with samples at certain times of the year, always a lady's blotter, that she could use with her secretary, with a picture of Shredded Wheat and an invitation to visit the factory if they came to Niagara Falls. To say we used easily a hundred million blotters would be well within the truth.

Post cards were used in the foyer of the factory at Niagara Falls. Visitors would sit down at the desks in the foyer of the factory there and write home on them. Sometimes I would get out postcards that had a message something like this: "We have just gone through this Home of Shredded Wheat . . . and eaten the biscuit, and it was delicious. Wish you were here," leaving a place for them to sign.

We had school charts, dimensions about two by two and a half feet, illustrating the process of making

Shredded Wheat from the whole grain. It started at the top with a view of a wheat field or farm, then a reaper reaping the wheat, then a threshing machine, then on down to its coming to the Shredded Wheat factory and being made into Shredded Wheat Biscuit, all illustrated; then a number of dishes printed on it, the food value of whole wheat, embracing a chemical analysis of Shredded Wheat, showing the two were just alike, very little difference: the analyses of whole wheat and Shredded Wheat. That was in the center of the school chart. They were sent to public school teachers all over the country, who would hang them on the wall to demonstrate the food value of whole wheat, and, incidentally, how Shredded Wheat, being a whole-wheat product, was made.

That was done in considerable quantity. We started in selling them at ten cents apiece, and we finally sent them free to anybody who could ask for them. When a teacher got one, she spoke to another teacher who would write in for it. If our samplers would go past a schoolhouse, they would go in and leave a school chart.

Quite a feature I originated when I was there consisted in getting up various contests. First, there was a recipe contest, where we advertised through magazines and newspapers cash prizes of thirty-five hundred dollars to women who would send in their favorite ways of serving Shredded Wheat, what they thought was the best way for serving it. Those prizes were awarded by judges selected at Niagara Falls, domestic science teachers and two others. I think we must have gotten about a half million recipes, at a conservative estimate, which had to be looked through by the company. One woman sent in a roll of a thousand all written on brown butcher's paper. Finally, we sifted fifty of the best ones out. There were a great many repetitions. The woman who wrote them on brown paper had

de up a lot of fanciful combinations not practical at
. We did not select them. We selected fifty, which
re published in a little booklet, entitled: Fifty Ways
Serving Shredded Wheat.

The next contest was an essay contest, where we
vited school children to write essays on Shredded
heat. For the best twenty essays, we brought twenty
pils, each with a teacher, to Niagara Falls and enter-
ned them for two days at the expense of Shredded
heat Company, showing them all the sights in the Ni-
ara Falls region, putting them up at the finest hotel,
e Niagara. Each pupil had to be accompanied by
s or her teacher. We did that twice, in two successive
ars; took pictures of the pupils and their teachers.
estimate we had about half a million essays on
redded Wheat from these two contests in 1926 and
27.

We had special campaigns. One of our booklets,
itled Building Better Babies, was sent to the mother
a baby about a week or two after the baby was born.
e got the names through boards of health in different
ties and towns, furnished to us through a firm in Chi-
go which made a business of gathering them. Two
eeks after the baby was born, we sent that mother
is booklet and a letter, calling her attention to the
ct that, if perhaps, the baby could not digest mother's
lk or did not have it and could not digest cow's milk,
redded Wheat baby food had saved thousands of
bies. That was a special campaign, kept up all
ound the year, every year, the whole year continu-
sly.

We carried special advertising in trade papers, that
ppealed to our retailers. I always took the position
at Shredded Wheat was a consumer and not a trade
roposition, that we had to sell it before it went on the
elves, and all the grocer had to do was to hand it out
hen it was called for. So we did not value trade

papers very highly; but we did it as a matter of trade policy; always with some special talk to the grocer.

In all the various kinds of advertising I have been describing, Shredded Wheat was pictured as the product. The advertising was all built around Shredded Wheat. I always figured we were selling not whole wheat but the process of making a whole-wheat grain digestible. That is what we had to get across, and that is how I came to originate that slogan, "It's All In The Shreds." I figured that came pretty near telling our story. We featured it in magazines and newspapers for a good many years and ran it on the cartons. It is on Plaintiff's Exhibit 10.

I see also on that exhibit the picture of a dish with two biscuit in it. About 1908, I went to Mr. Porter, then vice-president, and suggested that hardly anybody was satisfied with one biscuit to a serving, that it had been my experience that people ate two biscuit. I always ate two in my home, and why should we not change all our advertising to show two biscuit in a dish instead of one. Prior to that we had always had one biscuit in a dish. Mr. Porter did not see any objection to it. It looked like a good scheme for doubling the consumption of Shredded Wheat. We always advertised, after that time, about 1908, two biscuit in a dish as a proper serving, on the carton, and, after that, in the advertising. The two-biscuit picture has continued up to this time.

The bundle of papers, entitled Summary of Advertising and Promotional Work during the period from 1895 to July 31, 1927, consists of data made up under my direction. They must be substantially correct, because they were taken from the records of the company. The last few sheets contain a list of a number of publications, which I recall are publications in which advertisements of Shredded Wheat appeared. This was a newspaper schedule for one particular year, typical or illustrative of the wide range of our newspaper ad-

vertising and the kind of papers we used in different cities and towns. Plaintiff's Exhibit 83 is the schedule.

I remained with the Shredded Wheat Company from along in 1904 or 1905, when I assumed the position of advertising manager, about twenty-five years, or up to the time the National Biscuit Company took over our business. Then, through an arrangement with Mr. Tomlinson and Mr. Grossmore, and others of the National Biscuit Company, I went with Frank Presbrey Company, an advertising agency which had handled this advertising with the National Biscuit Company for a number of years. I understood I was to continue with handling the advertising of Shredded Wheat. That lasted until the present year. I retired during the year 1932. Sickness took me to a hospital for an operation and many months in a sanitarium. During that time, another agency came in and got the advertising. Anyway, I retired.

Plaintiff's Exhibit 84, a compilation consisting of several typewritten sheets pasted together, entitled Advertising and Promotional Expense in the United States, Canada and England, was made up from records of the company kept under my supervision. It shows, for the years indicated, from 1895, including 1926, the expenditures of the Shredded Wheat Company for advertising of various kinds, as set forth in the exhibit. Those figures are taken from the records of the company, and I think they must be correct.

The effect of this continual advertising of Shredded Wheat upon the expression *shredded wheat* was to make it a sort of household word, as if you would speak of starch or potatoes, as differentiated or distinguished from proprietary foods, like Grape-Nuts, or Mello-Wheat, or any of those foods in those days. You would not expect to find any of them mentioned in any book on dietetics, for instances, or in a book by a physician; but they mentioned Shredded

Wheat as if it were a commonly accepted well-known name of a food. For instance, Walter Page, in his books giving his experiences during the World War, mentioned Shredded Wheat in one of them. He said that, if his shredded wheat lasted, he would get through all right. There were references like that in a great many books, where they would not think of mentioning any other proprietary article.

Plaintiff's Exhibit 85, now shown me, is the extract from Walter Page's book I referred to where he mentions Shredded Wheat, being a letter from Walter H. Page to his son, dated London, April 7, 1918, copied from the Life and Letters of Walter H. Page, Volume II, page 369.

Plaintiff's Exhibit 86 is a list I prepared, after reading books on dietetics and other subjects, of references to shredded wheat.

MR. BYRNE: I am willing the record should show that, in the book from which Plaintiff's Exhibit 85 is copied, the words *shredded wheat* are not printed with capital initials; whereas, on Plaintiff's Exhibit 86, in respect to the same book, the expression *Shredded Wheat* has capital initials.

THE WITNESS: I recognize the dozen or more books on the table beside me as albums containing records of Shredded Wheat advertising. I kept Plaintiff's Exhibits 87 to 112, inclusive, as part of my official records, these albums, containing tear sheets and other samples of advertising used by the company. They are records which were in my office, kept under my direction.

The dates on the samples contained in these various volumes, either printed or written, are the correct dates upon which those ads respectively appeared. Some of the books, for example, Plaintiff's Exhibit 87,

contain newspaper clippings of a date prior to the time I went with the Shredded Wheat Company, beginning with, for instance, December, 1900. That volume and other similar volumes on this list of exhibits were in my custody during the twenty-five years I was at Niagara Falls, as part of the records of the Shredded Wheat Company. I identify and recognize these volumes as such. I have seen them before. This was all publicity given to Mr. Perky when he went to the Falls and started to build this factory.

(The witness was temporarily withdrawn and resumed the stand the following day, January 5, 1933.)

THE WITNESS: The three volumes marked Plaintiff's Exhibits 2, 3 and 4, for identification, purporting to contain samples of cartons, are familiar to me. The cartons contained in these books are samples of cartons used from time to time by Shredded Wheat Company. I do not think I could give you the dates of them. I know they are the Shredded Wheat cartons in use from time to time, and the carton on page 38 in Plaintiff's Exhibit 4 for identification was changed to two biscuit about 1908. I would say this carton was probably used prior to 1908. I made changes from time to time, in different years, in the phraseology of this reading matter on the back of the carton. The carton was substantially the same until we changed it and had the two biscuit here.

Cartons such as the one appearing on page 24a were used very early in the game, just as I was taking over the advertising of the Niagara Falls. We got the goddess Ceres off the carton, and Niagara Falls was substituted. She also appeared on the wooden cases.

The cartons in the back part of Plaintiff's Exhibit 4 for Identification, marked volume one, were some of

the oldest cartons in use, before I went with them. On page 2d is 1903. I should say that is probably correct. I saw some of those cartons when I was there. I do not know just how long they were used.

There is one of the Cereal Machine Company, Worcester, Massachusetts. Perk's idea was he would make more money out of selling cereal machines, like coffee grinders. Noting in volume two, Plaintiff's Exhibit 3 for Identification, page 44, a carton bearing a copyright legend 1911, I should say that would tend to fix in my mind the probable date of use of that carton. There is only one biscuit in the dish. To 1909, I think, we were using one biscuit in a dish.

The Chinese package on page 56 of Volume Two was used for export. That carton on the other page represents the same thing, copyrighted in 1916, Canadian Shredded Wheat Company.

On page 19 of Plaintiff's Exhibit 2 for Identification, marked volume three, there is an English carton containing two biscuit, which was subsequent to ours. That is carton number 134 on page 19, and there is a copyright date, 1911. I would think it was about 1910. On pages 16 and 17 of the same book are cartons, 1926. We began with the two biscuit a long time before that.

(The books, "Plaintiff's Exhibits 2, 3 and 4 for Identification," were received in evidence.)

CROSS-EXAMINATION.

THE WITNESS: On copy of trade-mark registration No. 52858, of the Natural Food Company, registered May 22, 1906, I recognize the picture of the woman as what I call the goddess Ceres that appeared on the cartons of the Natural Food Company, described as follows: "The trade-mark consists of the representation of the mythological character Ceres, represented

as holding a lighted torch in one hand and a sheaf of wheat in the other.' I have seen that lady on some of the cartons of the plaintiff's predecessors, and on the wooden cases.

I identify the Ceres woman as being on both ends of number one carton in book number one, marked Cereal Machine Company, office and factory fifty-three to sixty-nine Jackson Street, Worcester, Massachusetts. Underneath her are the words *trade mark*, shown on both ends of the carton.

Mr. Perky's first idea was to sell the little shredding machines that looked a great deal like coffee mills to the housewife and let her do her own shredding of the wheat, so she would shred the wheat in her own home. He thought there was more money in making the machine than the biscuit. I think that only lasted a year or so.

The same Ceres trade-mark appears on the second carton in the book, at both ends of the carton. The product is referred to on one face of the carton as Shredded Whole Wheat Biscuit, and on the other as Shredded Wheat Biscuit.

On the carton appearing on page 2a, marked in pencil 1901 and 1902, the name of the manufacturer is The Natural Food Co., and the Ceres woman still appears, marked *trade mark*, on both ends of the carton. On this carton, the name of the manufacturer, the Natural Food Co., Niagara Falls, New York, is succeeded by the words Successors to the Shredded Wheat Co. On this carton, the product is referred to in several places as Shredded Whole Wheat. The plaintiff's biscuit shown on this carton is considerably different from the biscuit as it now appears. It is the split biscuit. One of Mr. Perky's favorite ideas for serving Shredded Wheat was to run a knife through, split the biscuit, and toast it.

The Ceres woman still appears on both ends of the following carton, on page 2b, marked noticeably with the words *trade mark.*

It is also true of the carton appearing on page 2c, marked 1901, that the Ceres woman appears on both ends of the carton.

On page 2d there is a carton marked 1903, in which the Ceres woman appears only on one end of the carton and the words *Shredded Whole Wheat* on the other end. On the front and back panels of this carton, the product is referred to as Shredded Wheat. On the bottom, when the flaps are folded, it would appear as Shredded Whole Wheat. The phrase *Shredded Whole Wheat* has taken the place of the Ceres woman on one end of the carton. This is a carton of Natural Food Co., still marked Successor to the Shredded Wheat Co., Niagara Falls, New York.

The part on page 3, marked 1903, is generally similar to the next preceding carton. The Ceres woman appears on one end of the carton, and the words *Shredded Whole Wheat* are on the other end. I would say that the words *trade mark* on this Ceres woman end of the carton were very much smaller from the ones in the inscription *trade mark* on the earlier cartons.

These 1903 cartons appearing on pages 2b and 3 contain a rather prominent notice on top, reading:

"September 17, 1895, PATENTED October 15, 1895," and an inscription, reading: "This food, the process of making it, and the machinery used in the manufacture, are under the protection of the United States Government, by virtue of nineteen patents of recent dates. Patents have also been taken in the principal foreign countries. The Natural Food Co. Successor of the Shredded Wheat Co., Niagara Falls, New York."

The next carton, on page 4, marked 1903 in pencil, is generally similar to the immediately preceding car-

tons, the Ceres woman appearing on one end and *Shredded Whole Wheat* on the other. The manufacturer's name is still "The Natural Food Co., successor to the Shredded Wheat Company, Niagara Falls, New York." Mr. Perky was rather fond of the name Natural Food Co. and held on to it until we finally changed. We did not know at the time that it was ever the Shredded Wheat Co. I did not know they had ever used that prior to that time.

The carton appearing on pages 5-6 is a sample carton, marked *free sample*. On one side of the sample carton is the Ceres woman, beneath her being the words Manufactured by The Natural Food Co., Niagara Falls, New York. On the other side of the carton is Free Sample of Shredded Wheat. Judging by the size of the carton, I would say it held at least two biscuit. It looks like a very narrow carton, compared with the individual cartons used later on. The carton at the right of the page is marked Offices: Six & Eight Eastcheap, London, E. C., evidently for use in the English trade. The carton at the left contains under the picture of the Ceres woman the words "Manufactured by The Natural Food Co., successor to the Shredded Wheat Co., Niagara Falls, New York."

On the following carton, on page 6 of volume one, is marked in pencil "In 1905." I saw a picture of this carton some years after that, when we took off the picture of the goddess Ceres. They were using it when I went there. The carton shows the goddess Ceres on one end and the words *Shredded Whole Wheat* on the other end. At the top of the one panel are the words *Directions for using Shredded Wheat:* "Place biscuit in oven to renew crispness. Consists of the entire wheat grain (nothing added) made light and short by mechanical shredding and thorough cooking." Under that: "Keep the teeth and mouth in order, as a

natural food, by exciting proper and complete action in the natural way." That follows out the idea of the corporate name, Natural Food Co. That was Mr. Perky's idea.

Referring to the individual carton appearing on the pages marked 8-8 and 9-9, these two individuals are marked in pencil, the left-hand one, December 17, 1904, to July 25, 1905. That coincides with my recollection of the use of that carton, the two-biscuit sampler. It seems to be a little thicker individual carton than the ones we last referred to; also containing the name The Natural Food Co., successors to The Shredded Wheat Co., Niagara Falls, New York, the picture of Ceres on one end, and the words Shredded Whole Wheat on the other end, also the inscription on the top as to the product being patented.

The carton on page 10 contains Ceres on one end and the Shredded Whole Wheat inscription on the other, and, under Ceres, "Manufactured by the Canadian Shredded Wheat Co., Ltd., Niagara Falls, Ontario, made in Canada." I recall the use of that carton by the Canadian Company around that time. That was about the time I went with them.

On the carton 10-a, marked 4/8/05, the picture of Ceres is on one end, above her, the phrase Shredded Whole Wheat, and under her, the phrase The Natural Food Co., Successor to the Shredded Wheat Co., Niagara Falls, New York. The inscription under Ceres has become very small now. On the carton, above the words *Whole Wheat* and under the word *Shredded*, appears the word rather prominently in brackets, *trade mark*. The words *Shredded* and *Whole Wheat* are more prominent than *trade mark*. This marks the time when the printing ink on the carton was changed from black to purple, about that time, 4/8/05, trying to make the carton more attractive without destroying the orig-

inal design. This is the first carton on which the words *trade mark* have been associated with the word *Shredded.* The immediately preceding cartons on pages 7 to 4, contain the expression *Shredded Whole Wheat* but not the words *trade mark* under the word *Shredded,* as in carton 10-a.

The carton on page 11 is a very old one, marked in pencil *after April 8, 1905,* which looks as if it had been used from April, 1905, to April 22, 1908. It is printed in black ink and still carries the manufacturer's name as The Natural Food Co., successor to The Shredded Wheat Co., Niagara Falls, New York. It is fair to say that the words *trade mark* under the word *Shredded* on one end of the carton is several times as noticeable and prominent as the words *trade mark* have now become under the Ceres woman on the other end of the carton. This carton apparently used up to 1908, still contains the explanatory phrase "Consists of the entire wheat grain (nothing added) made light and short by mechanical shredding and thorough cooking."

The carton on page 12, marked April 30, 1907, appears to be a sample. It is marked *Sample.* It is a complimentary sample. On the end is Shredded (trade mark) Whole Wheat. It appears to be the first use of the phrase "It's All In The Shreds." It refers on the bottom to the product as Shredded Whole Wheat and on the front and back panels as Shredded Wheat. On one end panel, the only language used is: Shredded (trade mark) Whole Wheat. "It's All In the Shreds." On the other end panel are the words Shredded Whole Wheat, and under that the picture of Ceres and the phrase "Manufactured by the Natural Food Co., successor to the Shredded Wheat Co., Niagara Falls, New York."

The carton on page 12-a contains the notation March 5, 1906, and is printed in purple ink. We ex-

perimented with a lot of cartons. It is more blue than purple. It is generally similar to the previous carton, containing picture of Ceres on one end and Shredded (trade mark) Whole Wheat. It's All in The Shreds, on the other end.

Carton number 15 is a generally similar carton, marked for Canadian Shredded Wheat Co., Ltd.

Carton 16 on page 16 contains the notation July, 1907, is in blue ink, and generally follows the description of the last carton, having the words Shredded (trade mark) Whole Wheat It's All In The Shreds on one end, and the words Shredded Whole Wheat, the picture of Ceres, the small inscription trade mark under her, and the words The Natural Food Co., Successor To The Shredded Wheat Co., Niagara Falls, New York; and, on the bottom, the words: Shredded Whole Wheat. Open At The Opposite End. This 1907 carton still contains the phrase: Consists Of The Entire Wheat Grain (nothing added) Made Light And Short by Mechanical Shredding and Thorough Cooking.

Carton 16-a is the same type of carton, except it is a sampling carton, marked on the top: "Complimentary Sample." It still carries the Ceres picture, marked as a trade mark on one end, and on the other end, Shredded (trade mark) Whole Wheat. It's All In The Shreds.

Carton 17 is a carton of the Canadian Shredded Wheat Co., Ltd., of Niagara Falls, Ontario, marked "To January 1, 1909, Folding Box Co.," a full-sized carton, marked "Made In Canada." On one end it has the words "Shredded Whole Wheat," Ceres, marked trade mark, and the words "Manufactured by Canadian Shredded Wheat Co., Ltd., Niagara Falls, Ontario, Made In Canada." On the other end appear the words: Made In Canada. Shredded (trade mark)

Whole Wheat "It's All In the Shreds." Made in Canada. You will notice that these are folding cartons, instead of cartons with the strips pasted on.

Carton 18 is the same kind of carton we have just described, but made for The Natural Food Co., Successor To The Shredded Wheat Co., Niagara Falls, New York, and marked in pencil: Started running January 5, 1907. It contains Ceres marked as a trade mark on one end, and the words: Shredded (trade mark) Whole Wheat. "It's All In The Shreds" on the other end.

Carton 18-a is marked in pencil 11/5/07, and in pencil at the upper left-hand corner: "Reg." It also contains Ceres as a trade mark on one end and the words Shredded (trade mark) Whole Wheat. "It's All In The Shreds" on the other end. The Natural Food Co. still appears on the carton as Successor to The Shredded Wheat Co., Niagara Falls, New York. The carton contains on the top the patent notice previously referred to.

Carton 19 has a pencil inscription below it 4/22/08, and contains on the top a certain list of patents, dates, and numbers; the words "Patented, September 17, 1895, October 15, 1895. This Food, The Process of Making It, The Special Machinery for Its Manufacture, are Under The Protection of The United States Government By Virtue Of Many Patents, as follows:" (57 numbers follow.) The carton still carries Ceres, marked with the very small words *trade mark* on one end, and, on the other end, the words Shredded (trade mark) Whole Wheat. It's All In The Shreds.

The reason for the slogan "It's All In The Shreds" was that those five words seemed to embody everything there was to say about that whole wheat; It's All In The Shreds meaning that the whole wheat grain, all the whole wheat grain was in the shreds;

and then the other meaning conveyed was that the virtue of the product was in the shredding process, you see. So we meant to have those five words convey all there was to say about Shredded Wheat.

The following printed matter appears on the carton:

On the front face: "Guaranteed under the Food and Drugs Act June 30, 1908, Serial Number 6579.

"'TELL ME WHAT YOU EAT AND I WILL TELL YOU WHAT YOU ARE'

"Fine White Flour Products, such as Bread, Biscuit, Buns, Rolls, Doughnuts, Cookies, Crackers, Cakes, Pies, etc., are unnatural and impoverished food; and in the process of making, and serving, other heat-making products, such as Butter, Lard, and Sugar are largely used, forming a one-sided diet. Those who live on this so-called 'Staff of Life' have Weak Muscles, Weak Stomachs, Poor Digestion, Poor Nerves, Bad Teeth, and Poor Health generally.

SHREDDED WHEAT

contains all the elements of the Whole Wheat—a Perfect Food—and is made Light and Short without Yeast, Baking Powder, Soda, Saleratus, Cream of Tartar, Alum, or other foreign substances, and without the use of Salt Raising, Lard, Butter, Cottolene, Cotton-seed Oil, Oleomargarine, or other Greasy Materials, or substitutes therefor. It is a Fresh Food and is Free from all animal life. The thoroughly washed and cleansed Whole Wheat Grain goes into the hopper of the shredding machine and comes out Light and Short, without being touched by human hands.

"THE SHREDDED WHEAT COMPANY HEREBY GUARANTEES that Shredded Whole Wheat Biscuit and Tris-

cuit contain the entire wheat grain (nothing added), made light and short by thorough cooking and mechanical shredding. The Shredded Wheat Company hereby agrees to save all dealers who sell said goods harmless from all penalties under the Pure Food Laws, State and National, by reason of selling said products, —The Shredded Wheat Company.

THE SHREDDED WHEAT COMPANY
Formerly THE NATURAL FOOD CO.
NIAGARA FALLS, N. Y., U. S. A.

London Agency

THE SHREDDED WHEAT COMPANY
10 EASTCHEAP, LONDON, E. C.

Open at Opposite End SHREDDED OPEN AT OPPOSITE END."

On each side: "PLACE BISCUIT IN OVEN TO RENEW CRISPNESS."

On the rear face: "Guaranteed under the Food and Drugs Act June 30, 1906, Serial Number 6579."

DIRECTIONS FOR USING SHREDDED WHEAT.

PLACE BISCUIT IN OVEN TO RENEW CRISPNESS

"Consists of the ENTIRE WHEAT GRAIN (nothing added) made light and short by mechanical shredding and thorough cooking.

"Combines with the necessary bulk, all the food properties requisite for thorough nourishment.

"Easily digested—but not 'predigested.'

"Especially beneficial for those who suffer from indigestion, constipation, and kindred complaints.

"Promotes thorough mastication, as required in the digestion of all food, especially cereals.

"Keeps the teeth and mouth in order as a natural food should, by exciting proper and complete action in the natural way.

COOK BOOK OF RECIPES
FOR SHREDDED WHEAT MAILED FREE

"May be eaten with butter, fruit, syrup, jelly, milk, etc., or in a sandwich form, with meat, eggs, or cheese. As a breakfast cereal, moistened with milk, hot or cold, it cannot be surpassed. Made without salt, it may be seasoned to taste. For milk or cream toast the shredded wheat is most desirable. Being especially porous and absorbent, it forms for dishes made of jellies, blanc mange, creams, or other semi-liquid substances, a foundation of highly-nutritious and pleasant character. Opened and prepared with layers of berries, slices of juicy fruits or sauces, the shredded whole wheat forms a palatable and nutritious combination.

"With a layer of cheese between the halves and toasted, so that the cheese permeates the shreds, an excellent lunch dish is made.

"All cooked vegetables which have a flavored liquor, or are of moist character, such as spinach, peas, tomatoes, cauliflower, parsnips, etc., can be served therewith to marked advantage, as it will take up the flavor and liquor without becoming mushy and soggy.

"Baskets can be made by cutting a cavity in the top, which can be filled with minced meats, juicy vegetables, berries, mushrooms, cooked clams, oysters, etc., thereby forming attractive dishes.

AWARDED GOLD MEDAL, PARIS, 1900."

On one end: "SHREDDED

(Trade Mark)

WHOLE

WHOLE"

"IT'S ALL THE SHREDS"

On the other end is: "SHREDDED WHOLE WHEAT

(Picture of Godess Ceres)

Manufactured By

THE SHREDDED WHEAT Co.

Formerly THE NATURAL FOOD Co.

NIAGARA FALLS, N. Y."

I also recall the use of the following words

"THE SHREDDED WHEAT COMPANY HEREBY GUARANTEES that Shredded Whole Wheat Biscuit and Triscuit contain the entire Wheat Grain (nothing added), made light and short by thorough cooking and mechanical shredding. The Shredded Wheat Company hereby agrees to save all dealers who sell said goods harmless from all penalties under the Pure Food Laws, State and National, by reason of selling said products.—The Shredded Wheat Company" on cartons at that time. Apparently, this carton 4/22/08, is the first so far in which the company name is the Shredded Wheat Co., marked as formerly The Natural Food Co., Niagara Falls, N. Y., U. S. A. I think that was used about that time, in 1908.

Carton 19a is a sample carton, marked on the top Complimentary Sample, and containing, on one face: "Directions For Using Shredded Wheat: Place Biscuit In Oven To Renew Crispness. Consists of the ENTIRE WHEAT GRAIN (nothing added), made light and short by mechanical shredding and thorough cooking." It also contains on one end the words Shredded Whole Wheat, below that a picture of Ceres, and, under that the little phrase *trade mark,* and then the words Manufactured By the Shredded Wheat Co., Niagara Falls, New York; and, on the other end, the words: Shredded (trade mark) and a picture of a plate containing a spoon and one biscuit; below the plate the word Wheat, and below that the phrase It's All In

The Shreds. This is the first carton which we found that contains the picture of the biscuit in the dish, steam cooked. This carton still carries the picture of the Ceres woman and the phrase on one face "Consists of the ENTIRE WHEAT GRAIN (nothing added), made light and short by mechanical shredding and thorough cooking." On the end opposite Ceres, it contains the words Shredded (trade mark) and, below that, a picture of a plate with one Shredded Wheat Biscuit in it, under that Wheat, and below that It's All In The Shreds.

The large carton 20 seems to differ from previous cartons only in having the lock end, with the notations of all patents on one flap of the carton instead of two.

I remember carton 20-a, in which the panel on one end has the words Shredded Whole Wheat, and the picture of Ceres; on the other end, Shredded, under that in brackets trade mark, and under that the words Whole Wheat, and under that It's All In The Shreds.

I also remember carton 21, Complimentary Sample, the two-biscuit sampler, containing Ceres on one end and the single biscuit in a plate on the other, marked from 6/30/08 to 1/6/09. According to that carton, up to January 6, 1909, they were still using the goddess Ceres on one end and the words Consists of the ENTIRE WHEAT GRAIN (nothing added), made light and short by mechanical shredding and thorough cooking."

Carton 22 seems to be the same type of carton, without change, using Ceres on one end and the words Shredded (trade mark) Wheat, It's All In The Shreds on the other end, with the picture of a single-biscuit plate and spoon.

On page 22-a, there are cartons marked 22-a and 22-b. This is a complimentary sample carton, containing on one end a picture of Ceres with the words Shredded Whole Wheat, and, on the other end, Shredded (trade mark) Wheat, It's All In The Shreds,

with a picture of a single-biscuit plate and a spoon; marked 5/28/10. I remember a carton like that being used. It also contains the statement Shredded Wheat is Made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking. Carton 22-b is the first carton in this book which carries a picture of the factory on one face. My recollection is that the picture of The Home of Shredded Wheat first came on the cartons about 1910.

Carton 23 is a large-sized carton carrying a picture of the plant on one face and How to Serve Shredded Wheat on the other; Ceres on one end, and a picture of the single-biscuit plate on the other end, with the words: Shredded Wheat and It's All In The Shreds.

Carton 24, dated 8/8/10, is the same type of carton, also carrying the picture of a food factory, "The Home of Shredded Wheat" on one face, and Ceres on one end, and the words Shredded (trade mark) Wheat, It's All In The Shreds, with the picture of the single-biscuit plate on the other end. It also contains the phrase: Shredded Wheat is Made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking; and the carton also carries various patent numbers. The first sentence there is different. The phrase: Shredded Wheat is Made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking, has been slightly changed over some of the previous cartons. That change has been in there for several cartons.

Carton 24-a is a complimentary sample carrying a picture of the food factory on one face, the goddess Ceres on one end, and the words: Shredded (trade mark) Wheat. "It's All In The Shreds," with the picture of the plate and one biscuit in between the words *trade mark* and the word *wheat*, on the other end.

Carton 25 is the same general type of carton as the last one referred to, October 31, 1910.

Cartons 26 and 27 are Complimentary Sample cartons. I recall the use of those cartons at about that time, October 31, 1910. Carton 26, the one on the left of the sheet with no picture of the factory, is a Canadian carton. Carton 27 carries a picture of the plant, the Home of Shredded Wheat, on one face, and a picture of Ceres on one end. They are two-biscuit sample cartons.

Carton 28 is apparently the first carton we have come across shown in colors. There is no notation of a date. I cannot recall just when that change was made. I should say it was somewhere near 1915 they began to use a carton printed in several colors as shown on page 28 of volume one: red, black, and blue. The carton still carries the phrase: Shredded Wheat is Made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking. The plate of biscuit, on one end, still carries one biscuit.

Cartons marked 29, 30, 31, 32, and 33 are of the same general type as 28, with Ceres on one end, shown in blue and red, marked as a trade mark, Manufactured by The Shredded Wheat Co., Niagara Falls, New York. My best recollection is that these cartons were used somewhere near 1915.

Carton 34 is marked 1911 and carries a picture of Niagara Falls on one end and the Shredded Wheat plate on the other end. I recall the use of that carton. The reading matter on one end of the carton is: Shredded (trade mark)—then a space and the plate with the biscuit and spoon—then the phrase: Copyright 1911 by The Shredded Wheat Co.; then, in large red letters under that: Wheat. It's All In The Shreds. That is the first carton on which we find the words: Copyright 1911 by The Shredded Wheat Co., and the first carton on which we find, in place of Ceres, a pic-

ture of the Home of Shredded Wheat with a picture of Niagara Falls, I think. I thought the introduction of colors came a little later. I might be wrong. That is 1911. Possibly whoever made up this scrap book might be mistaken. It seems to me the full colors, red, blue, black, and green, came after that. I think the Falls took the place of Ceres. When she was taken off, she was not used again, except there may have been a stock on hand to be used. When the supply of old Ceres cartons was exhausted, nothing but the Niagara Falls picture was used. Mr. Perky's idea in building the factory at the Falls was advertising, to cash in on the fame of Niagara Falls, which was visited by a million or so people every year. He wanted to identify and connect up the Shredded Wheat factory with Niagara Falls. So, beginning at least as early as 1911, Niagara Falls was put on one end of the carton and has been kept there ever since. Since that time, Niagara Falls has been strongly associated with that package of Shredded Wheat. It was carried even after the other factories were built, and it was still referred to as Niagara Falls Shredded Wheat.

Carton 35 is a Complimentary Sample, generally similar to the preceding carton. The picture of Niagara Falls has displaced Ceres.

Carton 36, marked 1911, is generally similar to the last carton and contains, under the picture of the factory, the words, "The Cleanest, Finest, Most Hygenic Food Factory in the World," and "Copyright, 1911, by The Shredded Wheat Co." On one end of the carton there is a picture of Niagara Falls, with the words: The Home of Shredded Wheat, Niagara Falls, N.Y. On the other end are the words: Shredded Wheat with berries or other fruits in season, with a picture of one biscuit in a plate, covered with strawberries. Those were used in the strawberry season. It still carries the

phrase: Shredded Wheat is Made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking. It also contains the phrase: The crispness of its shreds promotes thorough mastication, which is the first process in the digestion of all food. I remember putting on, also, the line: The only breakfast food made in biscuit form. I do not know just what date that was.

According to carton 37, that same form of package was apparently used through 1912. I remember that carton, which appears to have been marked Copyrighted 1911, but it is dated in the book 1912, carrying generally the phrases just read for carton 36.

Carton 38, also marked: Copyrighted 1911 by The Shredded Wheat Co., has gone back and contains the plate with the single biscuit, without any strawberries. They used the strawberry carton in the strawberry season and the one without any berries the rest of the year. They tried to use some of those during the spring only, but they overlapped. It depended on how fast the grocer moved them. We might have some strawberry cartons in December, always figuring they had an advertising value, no matter when they were used.

I remember the Complimentary Sample carton 39, marked February 2, 1912, which is apparently another one of the thin or flat sample cartons, with the Niagara Falls picture on one end and the words: Shredded (trade mark) Wheat. It's All In The Shreds on the other end. From around 1911, the cartons were, as I recall, continuously printed in two or three colors.

Carton 40 is about the same type of carton as we have just discussed, and so is carton 41, except it is a Canadian carton, showing a picture of the Canadian plant instead of the Niagara Falls plant; I guess, the first one of the Canadian factory.

Carton 42 is a Canadian carton similar to 41, except the plaintiff's Shredded Wheat is shown with strawberries on the biscuit.

Carton 43 is the same general type, but it is American, showing strawberries on one end, and The Home of Shredded Wheat and a picture of Niagara Falls on the other end.

Referring to Plaintiff's Exhibit 3, volume two, carton 44, is the same general type, carrying a picture of the plant on one face, Niagara Falls on one end, a picture of the plate with one biscuit on the other end, and a series of patent numbers on the bottom.

Carton 45, marked 1913, is the same general type, printed in colors, with the Niagara Falls picture on one end, a plate with one biscuit on the other, the factory on one face, the other face containing, among others, the phrases: Shredded Wheat is made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking; and: The crispness of its shreds promotes thorough mastication, which is the first process in the digestion of all food. I recall the use of that carton in 1913. It is marked 9/25/13.

Carton 46 has on it the phrase, written: This carton in use January, 1915. It is still colored, containing the picture of plate with one biscuit on one end and a picture of Niagara Falls, with: The Home of Shredded Wheat on the other; and the factory on the other face, the words Shredded Whole Wheat on the top. This carton still carries the two phrases: Shredded Wheat is Made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking; and: The crispness of its shreds promotes thorough mastication, which is the first process in the digestion of all food. I recall the use of that carton about that time.

Carton 47 is the same general type of carton, marked for Canadian Shredded Wheat Co., and containing the picture of the Canadian plant.

Carton 48 is an individual carton of the same general type, carrying the same general matter, a reproduction of the large carton.

Carton 49 is an American Complimentary Sample, marked in use January, 1915, of the same general type of carton as I have just described.

Carton 50 is the Canadian carton in use about that time, complimentary sample. These were single biscuit samples. There were two kinds of carton, one thin, holding one biscuit; the other a double carton, holding two biscuit. Where the ends of the carton show just about the thickness of a one biscuit, they are single-biscuit cartons. Where the end panel is double that thickness, it is a two-biscuit carton.

Cartons 51 and 52 are United States and Canadian complimentary sample cartons of the same general character. They are used in sampling, but those are individuals the way they are served in hotels. They were made, I think, as individuals for sale, of the same general type of carton as the samples but not marked so. Carton 52, dated April 13, 1915, still carries on one face the phrase: Shredded Wheat is Made of Whole Wheat and is made digestible by steam cooking, shredding, and baking; also the phrase: The crispness of its shreds promotes thorough mastication, which is the first process in the digestion of all food; and, on one end, It's All In The Shreds.

Going back to carton 51, it contains on one face a picture of the factory, and on the opposite face: Individual Shredded Wheat for use in hotels and restaurants; and: Wholesome, nourishing, and satisfying for any meal. To serve the biscuit, pour hot or cold milk over it, add a little cream, then salt or sweeten to suit taste; and: Being in "little loaf" form, shredded wheat makes wholesome combinations with berries, sliced bananas, sliced peaches, prunes, baked apples, or other fruits. Cover the biscuit with the fruit, then pour

milk or cream over it, and sweeten to suit the taste. I recall the use of that carton, marked: First run, February, 1915.

Carton 53 is a large-sized carton containing those same phrases and also carrying the phrase on the end: It's All In The Shreds.

Carton 54 is the same type of carton, containing a Chinese label pasted to it. I do not recall just how it was fixed. I suppose the Chinese label is a translation of that reading matter. Whether it was finally printed on a carton I do not know. I think the Chinese trade did not justify printing a carton for it, so they just printed the label. It is my recollection that the package began to go into the Chinese market in some small quantity about that time. I composed the reading matter on carton 54 under the heading: How to Use Shredded Wheat. It took the place of what was originally on the carton, simplified, more understandable and direct. I thought it would help in the sale of the food to tell them it was made of whole wheat, made more digestible by steam cooking, shredding, and baking, and so forth. We continued to use those phrases in all our advertising, so I had them put on our cartons. I think they are still using them. I may have made a few little changes in them in the last few years I was there. I think this was used almost continuously after I changed the carton.

Those cartons run generally in the same character through 56, a complimentary sample with a Chinese label, and 57 and 58.

Carton 59, individual service of Shredded Wheat, a Canadian carton, is in a little different form. I do not remember why that was changed. It is for restaurants in Canada, a white carton, printed in black ink, containing no picture of the factory or of Niagara Falls. I am afraid I cannot recall when it was used. The picture just shows one biscuit in the plate in attempted natural

colors. The carton was for two biscuit. It says, "This package contains two biscuit." The front face contains: This package contains two shredded wheat biscuit.

Carton 62 is the same type of black-and-white individual or sample carton.

Carton 63 is a one-biscuit sample carton, with the picture of the factory on the front face, reading matter on the back, a picture of Niagara Falls on one end, and the single-biscuit plate on the other end.

Carton 64 is again a colored carton, also 65 and 66. I never could quite agree on the use of the word *biscuits*. I have always used the word in the plural, *biscuits*. The carton manufacturer always used the word *biscuit*, no matter how many were in there. In all my advertising I made it *biscuits*.

Carton 68, Canadian, is the first carton containing on one end the reading matter: Net Weight of Contents twelve ounces, Shredded (trade mark), a picture of a single-biscuit plate, the phrase: Copyrighted, 1911, by The Shredded Wheat Co., and then the large word *Wheat*, then the phrase: Twelve Biscuit, and, under that: It's All In The Shreds. I am not really positive why the reference was put on to twelve biscuit; but it seems to me it happened when some other attempts were made to manufacture Shredded Wheat Biscuit in cartons containing a different number. We put that on to make certain they knew there were twelve biscuits in there. That was a reaction to some form of competition, as far as I recollect.

Carton 69, marked 11/23/16, the Pacific Coast carton, there appears on one end: Net Weight Contents Twelve Ounces, and the carton also contains a list of various patents. It is an individual service carton, marked as being made by Pacific Coast Shredded Wheat Company, Oakland, California.

Carton 70 is dated January 15, 1917, a Canadian individual sample, containing a picture of Niagara Falls on one end and a single-biscuit plate on the other, and on the bottom: Patented May 27, 1898. This food, the process of making it, and the machinery used in the manufacture, are under the protection of the Government of the Dominion of Canada. Patents have also been taken out for the principal foreign countries.

Carton 71 is a three-color carton of the American Company, containing the same phrases we have referred to heretofore: Shredded Wheat is Made of the Whole Wheat and made digestible by steam cooking, shredding, and baking; and: The crispness of its shreds promotes thorough mastication, which is the first process in the digestion of all food. I recall that around that time.

It seems to me that the first attempt of Kellogg to put on a shredded wheat biscuit, which was finally abandoned, was about the time we began putting on: Net Weight of Contents Twelve Ounces, Twelve Biscuit, and so on. I think Ross was putting out a biscuit around that time. Anyway, this was a sort of reaction to competitors; an attempt to call attention to the fact we had twelve biscuit in the carton and that they weighed one ounce to a biscuit. A fellow over in Chicago started to make what we called Birds Nests, but I do not think that had anything to do with this.

Carton 75, dated 4/23/17, contains on the end, with the picture of the single-biscuit plate: Net Weight of Contents Twelve Ounces; Metric Equivalent 340 grams. Shredded (trade mark) Copyright, 1911, by The Shredded Wheat Co. Wheat. It's All In The Shreds.

Carton 77, dated 6/20/17, contains on the front face a representation of the Oakland factory of Shredded Wheat Company. It stills carries the two phrases: Shredded Wheat is made of the Whole Wheat and is made digestible by steam cooking, shredding,

and baking; and: The crispness of its shreds promotes thorough mastication, which is the first process in the digestion of all food.

Carton 78 is the same type, with the picture of the Niagara Falls factory. Twelve Biscuit and Twelve Ounces have been emphasized on the cartons and in the advertising since that date, and, as far as I know about the advertising, it is still emphasized.

I recall the use of carton 82, dated January 22, 1918. That is the same form of colored carton, containing the phrases previously referred to and Twelve Biscuit, and It's All In The Shreds, with the picture of Niagara Falls. That picture was used on every carton of the plaintiff and its predecessors since it was first put on, no matter what factory, and in the advertising. That is The Home of Shredded Wheat. No matter where it is made, that is still the home of it. That is the idea it was intended to convey, that it was Niagara Falls Shredded Wheat.

The numbered dates on cartons 84 and 85 were, I think, approximately the dates when those cartons were printed or put into use.

Carton 86, dated 9/9/18, still contains the picture of one biscuit in a plate and the phrases previously quoted. On cartons 86 and 87 the list of patents has dwindled down to a very short list, five; and seven patent numbers on carton 89, dated 10/10/18. The cartons were ordered in considerable numbers. It was hard to keep an exact supply on hand.

Further Direct Examination.

The Witness: Roughly, I should say the Shredded Wheat Company began to print its own cartons about ten years before I left there, about 1920 or 1921. At that time, they put in their own printing plant. Since then, they have printed their own carton blanks. Those printing plants are running continuously.

CROSS-EXAMINATION resumed.

THE WITNESS: Until that time, cartons were printed outside in very large quantities and sometimes carried over for several years. Some cartons were printed in 1915 that still carried the 1911 copyright on them. One floor there in Niagara Falls was almost entirely occupied by cartons already printed. My recollection that the Ceres woman may have been used up to 1915 is probably correct. As we used the cartons from that floor, we kept the supply piling up, against the general protest and complaint of everybody. They could not see any reason for piling them up that way, away ahead of demand.

I think the carton on page 102 of volume three was just a proof from the printer. I do not think it represents any cartons. It is just a color proof. The finished carton would be something like carton 103, complimentary sample. On one end panel of carton 103 is a picture of Niagara Falls, The Home of Shredded Wheat. On the other panel, reading matter under the picture is arranged as follows: At the top: The Original Shredded Wheat. Under that, a plate containing an illustration of one biscuit and a spoon in a dish. Under that: Copyright, 1911, by the Shredded Wheat Co. Some distance under that, in brackets: trade mark. Under that is: It's All In The Shreds. The words *The Original* above Shredded Wheat were also a reaction to competition of some sort and were put on there because another shredded wheat was being made. We wanted to identify this Niagara Falls Shredded Wheat as the original one. That was used for a while, and, I think, abandoned. That was, however, the reason for putting it on.

Carton 104 has on one end panel a picture of Niagara Falls arranged in a new way from any of the others, preceding it. That picture of the Falls has, I

think, always been in this same general form. On the other end of the carton are the words: Net weight of contents 12 ounces; metric equivalent 340 grammes. The Original Shredded Wheat. Below that: a dish with one biscuit. Under that, the words: Copyright 1911 by The Shredded Wheat Co. Under that in brackets: trade mark. Under that the word *twelve* and the numeral *12* in brackets, and *biscuits*, plural, and the phrase: It's All In The Shreds. I recall using that. The reference to Twelve Biscuit and The Original Shredded Wheat were a reaction to competition, again, put on there to tell people to look for the original Niagara Falls Shredded Wheat. That carton, dated March 6, 1921, still carries: Shredded Wheat is made of the Whole Wheat and is made digestible by steam cooking, shredding, and baking; and: The crispness of its shreds promotes thorough mastication, which is the first process in digestion of all food.

Carton 106, marked Spring of 1922, is the same general type of carton we have been talking about, with the additional phrase: As made for twenty-five years, which appears also on carton 104. That was a new phrase which I think was added about the time Kellogg's biscuit first appeared on the market.

Carton 107, sample biscuit carton, also contains in large letters above the words Shredded Wheat, the words *The Original*.

Carton 112 contains on the dish end the words: The Original Shredded Wheat. The phrase: trade mark has been moved down below the dish, and the phrase: Copyright 1911 by the Shredded Wheat Co.

Getting to carton 119, the patent notices have entirely disappeared off the cartons. They had expired. They have been off the cartons for some time. Carton 117, marked 1923, has no patent notices on it. On carton 119, the trade mark expression is underneath the plate, under the words: Copyright 1911 by The

hredded Wheat Company, and above the words: welve Biscuit. At the top of the panel are the words: he Original Shredded Wheat.

Carton 130 has directions in Hebrew on the rear ace, and the words in English: Shredded Wheat is e Whole Wheat, and is cooked in steam, shredd nd baked. And "Kosher," with the Rabbi. Under- eath that: Shredded Wheat is a clean, strictly Kosher od, and here is the Rabbi's seal. It says: It may be aten with milk or meat throughout the year, except ring Passover.

Carton 131, not dated, also 130, are the first car- ns in which the end panel with the dish has a little ifferent reading matter, as follows: Net weight, 12 nces. Metric equivalent 340 grammes. Original rade Mark Shredded Wheat Reg. U. S. Pat. Off. hen, the representation of a dish with one biscuit. opyright 1911, by The Shredded Wheat Co. Twelve 12) Biscuit. It's All In The Shreds. I remember all ese changes; but I could not fix any definite date for em.

Such matters as the trade mark expression being own under the dish, as in carton 121, were decided an executive committee of the board, Mr. Porter d Mr. Mitchell. In a carton like that, the executive mmittee put that expression trade mark down at the ttom of the panel. Those were matters of company licy which we originated and discussed. We usually ent all over them at our Tuesday luncheons and de- ded all those things.

It was following that policy that the words: The riginal were put above Shredded Wheat and the rds Reg. U. S. Pat. Off. were placed below on carton 1. It was along about 1926 when the registrations re made, or later. I remember that package being ed some date after 1926. It carries: Shredded Wheat one hundred per cent. Whole Wheat and is made

digestible by cooking in steam, shredding and baking. Competition also suggested that one hundred per cent, which is not on previous cartons. The carton also contains: The crispness of its shreds promotes thorough mastication, which is the first process in digestion. It leaves off the word *food*. Made of Whole Wheat. Those little changes were made after discussions at our Tuesday meetings and I know they had in mind competition of some kind.

That would dictate the difference between carton 117: Shredded Wheat is made of the Whole Wheat and is made digestible by steam cooking, shredding and baking; and carton 131: Shredded Wheat is one hundred per cent. Whole Wheat and is made digestible by cooking in steam, shredding and baking. That was a reaction to competition, for fear there might be some question as to whether we used the whole wheat grain. Lots of people thought we did not. Every once in a while we would meet people who thought we had discarded a part of the whole wheat, did not use the bran.

Carton 132 still contains the expression: It's All In The Shreds. The expression: trade mark has been moved up from the place underneath the plate to the place above Shredded Wheat and under the words: The Original.

On the English carton, 134, the end panels are different from the American cartons. One end panel shows a package spilled out so as to show eight biscuit. The panel at the other end shows: Net weight 12 ounces; metric equivalent 340 grammes, and the words: The Original Shredded Wheat, a plate showing two biscuit in a dish, and: Copyright 1911 by The Shredded Wheat Co., Ltd., and: Twelve (12) Biscuit, and: It's All In The Shreds. That was used over there. That was the basis we used. They just took that. That was based on an American panel. The carton

was designed in Niagara Falls but used in England. It says: Copyright 1911 by the Shredded Wheat Co., Ltd., but the English carton has no reference to trade mark. I remember making this change on this one.

Carton 135, in volume three, is marked: Copyright 1926, by the Shredded Wheat Co. on the back panel; and, on the front panel, above the picture of the factory, under the words Shredded Wheat, is: trade mark, Reg. U. S. Pat. Off. On the back face, the language has been changed to read: Shredded Wheat, trade mark, Reg. U. S. Pat. Off.; made of the Whole Wheat—nothing added, nothing taken away. Contains in a digestible form all the elements for building muscles, bone and brain. Ready-cooked, ready-to-eat. It also contains in red very prominently the phrase: All the bran in the Wheat. That was also a reaction to competition of a bran product, Kellogg's Bran, and the other bran foods, of course. This carton has eliminated those expressions about being made of whole wheat and containing shreds in digestible form to get in this display. We wanted to emphasize all the bran in the wheat and twelve biscuits or twelve ounces. In order to give them proper display we had to condense all this, so we took off some of the reading matter. That, again, was a reaction to competition against shredded wheat. Those changes were the result of conferences between the executive committee and the rest of us. On that carton we dropped the expression: The Original. I do not know why. We arrived at the conclusion it did not amount to anything, that we did not gain anything by it and several things were much more important. I never liked the expression, but some of the rest did. It has still continued to be known as the Original Shredded Wheat. As a result of the advertising, the product, since at least 1911 has been generally known as Niagara Falls Shredded Wheat. Much of

our trade has been connecting it with Niagara Falls. It has advertising value, of course. It is even on the Pacific Coast cartons, Niagara Falls being emphasized. From the 1926 cartons onward we have continued to display the picture of the factory and of Niagara Falls. We are still using the term: It's All In The Shreds. It seems to me that this red line was: As Made For Thirty Years, instead of: As Made for Twenty-five Years. That was put on the 1926 carton when they got into use a year or so later and was used continuously since during my connection with the company. As Made For Thirty Years was to emphasize the fact it was the original Shredded Wheat.

Noting the two-biscuit plate on carton 142, marked Copyright 1926, I thought that was displayed before 1926, but perhaps it was not. A number of these cartons have the two biscuit in the dish. 1926 is probably correct.

The French carton, dated 5/9/30, has pasted thereon a slip reading: Subject: Canadian Shredded Wheat carton. Approved: Legal department. Date: 5/9/30. File Number: Blank. Sample finished job, new, C. A. V. and H. J. S. That is the approval of the new carton. It is stamped with a green stamp marked: Legal department received May 10, 1930. I was not connected with the company when that carton was approved or put out. The change was made in the picture of the biscuit across the face of the carton. From that date on I would not know anything about them.

I would not, I think, know anything about the putting of the phrase: Made since 1893, on the next carton, approved by the legal department 4/13/30. It seems to me we varied that expression a little, putting that instead of saying thirty years. The carton is marked: Copyrighted 1929, by The Shredded Wheat Co. I knew of this being done with the carton, but it was not under my direction. These changes were made

after the National Biscuit Company took over the company. I knew about them and was familiar with them, because I saw Mr. Oliva almost every day. I still handled the Shredded Wheat business, but through the Frank Presbrey Company. My connection with the cartons ceased.

The carton marked: Shredded Wheat carton, legal department, approved June 19, 1929, is the last carton we find containing a picture of Niagara Falls on one end and the two-biscuit plate on the other. The next carton, marked approved 4/30/30, above that carton, contains on each end the picture of Niagara Falls with: The Home of Shredded Wheat; and, across the face of the carton, the large picture of the shredded wheat biscuit.

I recognize the letter, Defendant's Exhibit 9, and the enclosure regarding the first attempt of Kellogg to make the shredded wheat biscuit. It was a letter dated August 16, 1927, addressed to News Editor State Journal, Springfield, Illinois. A number of letters like that were sent out to the newspapers which ran our Shredded Wheat advertising. That enclosure was a news item about it. It was the 1928 lawsuit against the Kellogg Company; and the enclosure marked: "Please do not publish before August 22nd," is the one referred to in the letter. It was part of my job to get all the free advertising we could. We asked them to print that as a news item. Letters like that were sent out generally to publications in which the Shredded Wheat Company advertised, with the request that they reproduce the news release.

I identify this enclosure as a sheet of a newspaper containing a reproduction of one of the articles prepared and sent out by me as vice-president of the Shredded Wheat Company. They were sent out to publications generally in which the Shredded Wheat Company advertised. We sent one to every newspaper

carrying our advertising, and, perhaps, other newspapers. It went to our list, as it often did when we wanted to get anything across. We used these newspapers as much as we could. One object was to get a correct statement of the case, and another, to get the advertising; and, also, to have the suit as widely known as possible, to have the fact of the filing of the suit by the Shredded Wheat Company against the Kellogg Company as widely published as it was possible to have it.

(The second enclosure, newspaper article, referred to, was marked "Defendant's Exhibit 10.")

Defendant's Exhibit 9 is as follows:

"The Shredded Wheat Company, Niagara Falls, N. Y., August 17, 1927.

Truman A. DeWeese, Vice-President in Charge of Publicity.

The News Editor, State Journal, Springfield, Ill.

Dear Friend: I am sure you will agree that the enclosed item, referring to our suit against the Kellogg Company, has enough news interest to justify its publication in your paper. The item will no doubt come to you through the regular news channels; but, as it vitally concerns the interest of this Company that has been a consistent advertiser in the newspapers for thirty years, I am sure you will appreciate our efforts to give you the exact facts. I know you will not want to show any prejudice in the matter, and yet I am sure you will want to be fair to this company. For this reason, I have confined the news article to the claims made in the complaint which was filed in the United States District Court. The matter of editorial comment is left entirely to your good judgment. We would like to have it printed just as it is written, but, of course, you are at liberty to make any condensations

that will better adapt it to your columns and your policies. We are sure we can depend on you not to print it before the date on which it is to be released. Needless to tell you, any courtesies you may show us in this matter will be greatly appreciated by our Company, as well as by the writer. Very truly yours, T. A. DeWeese, Vice-President in Charge of Publicity. TAD-M."

The enclosure for release is as follows:

"Please do not publish before August 22d.

THE SHREDDED WHEAT COMPANY SUES KELLOGG

The Company Asks the Court to Restrain Kellogg from Manufacturing an Imitation of Its Product and from Appropriating its Trade Name and Goodwill.

A lawsuit involving issues of far-reaching importance to manufacturers of food products was started when The Shredded Wheat Company filed a complaint against the Kellogg Company of Battle Creek, Michigan, and certain grocers, alleging unfair competition and unlawful appropriation of its trade name and its good-will. The suit was filed in the United States District Court at New Haven, Connecticut, on Monday, August 22d. The occasion for the complaint is the attempt of the Kellogg Company and some grocery jobbers and retailers to market a biscuit which is an imitation of the product of The Shredded Wheat Company under the name Shredded Whole Wheat Biscuit. The filing of this complaint by the Shredded Wheat Company is notice of its intention to enforce its rights and claims for damages against any manufacturer, wholesaler, or retailer manufacturing or distributing any product that is an imitation of its product.

The complaint covers in detail the growth and development of the business of The Shredded Wheat

Company, the various methods employed to educate the public regarding the food value of the product, and the money expended in creating consumer demand and building good-will all over the world. It places the value of this good-will and trade name at millions of dollars and asks for an injunction against the Kellogg Company. The complaint alleges that for 34 years The Shredded Wheat Company has given its biscuit a distinctive form, size, and shape, and, by extensive advertising has so fixed this form, size, and shape in the public mind that, even when the biscuits are displayed separate and apart from the carton, they are recognized by consumers as a product only of The Shredded Wheat Company. They have employed the words Shredded Whole Wheat Biscuit and Shredded Wheat, not as descriptive of the process of manufacture, but as fanciful and distinctive designations, identifying their particular product and indicating the source of manufacture. The complaint avers that The Shredded Wheat Company has expended over $24,000,000. in all kinds of educational work, until these terms or words have grown to be trade names of their product with only one meaning in the public mind in the United States and foreign countries, and that these names have not been used in respect to any other article of food for human consumption. Among the educational methods mentioned in the complaint are advertisements in newspapers and magazines, booklets, leaflets, lectures, store cards, and the distribution of millions of samples from house to house. It is also stated that an average of 100,000 persons have passed through the home plant in Niagara Falls every year for twenty years, to the end that customers now invariably associate the names Shredded Wheat Biscuit and Shredded Wheat with the one product made by The Shredded Wheat Company.

While much of the complaint stresses the unfairness of this sort of competition and the damage done to The Shredded Wheat Company through the appropriation of their trade name and good-will, a large portion of the complaint is devoted to calling the attention of the Court to the deception and fraud that will be practiced upon consumers who purchase the Kellogg Biscuit under the impression that they are getting the original Shredded Wheat Biscuit made by The Shredded Wheat Company, the only product associated with the words Shredded Wheat. Attention is also called to the fact that the consumer seldom sees the carton or container, hence he is easily led to believe that The Shredded Wheat Company is manufacturing a biscuit reduced in size and containing less wheat. The complaint alleges in fact that, in many instances, the Kellogg biscuit has been passed off as the Shredded Wheat Company's product. The complaint recites the fact that, in 1915, The Shredded Wheat Company brought a suit in equity against the Ross Food Company and certain grocers to restrain them from manufacturing and marketing an imitation Shredded Wheat. An injunction was issued restraining the defendants from making Shredded Wheat Biscuit, and this injunction afterwards was affirmed with some modification by the Court of Appeals.

It is further alleged in the complaint that the Kellogg package contains nine ounces of food as against the twelve ounces in the Shredded Wheat Company's package and is sold at less price as an additional means of deceiving the consumer who asks for Shredded Wheat and is given less weight under the impression that he is getting the real Shredded Wheat made by the Shredded Wheat Company. It is further claimed that, if Kellogg is not restrained, he will proceed to flood the market with imitation biscuit, relying upon the

market for Shredded Wheat Biscuit created throu years of advertising. The complaint asks that Kell be restrained from infringing upon the rights of T Shredded Wheat Company, from manufacturing imitation of their product, and from putting on th carton improper and misleading terms, thereby confu ing the product of the Kellogg Company with the re Shredded Wheat Biscuit. The Shredded Wheat Co pany asks for damages to be assessed and an injun tion issued."

THE WITNESS: At the time I referred to Mr. Rankine trying to get Mr. Perky out, about 1905, the Shredded Wheat business was still a very small busi ness. Mr. Perky had built this wonderful, expensive factory at Niagara Falls, and the contractors threat ened to close in on him. It looked kind of bad for him. Mr. Rankine and Mr. Porter and other members de cided the business would have to be reorganized finan cially and Mr. Perky eliminated. That was just pre vious to my going in. I knew all about it. We offered him a salary of ten thousand dollars a year, and he could still be president, if he would withdraw his ac tive interest in the business. He refused. He said he would not be in any business he could not run. His stock was mostly taken by Darius Mills, of New York. After that, the inscription in stone over the door of the Niagara Falls plant was changed from Natural Food Conservatory to: The Home of Shredded Wheat. Mr. Perky would not have consented to that change. Nat ural Food Conservatory was his idea. He originated the corporate name Natural Food Company. We also changed the name to The Shredded Wheat Com pany. Mr. Rankine was the man who had the real financial interest in the power company at Niagara Falls. When that was developed, they had to bring

dustries there to use the power, which is how the hredded Wheat Company was induced to move there rom Worcester, Massachusetts, and probably the eason that Niagara Falls was emphasized through the dvertising, making the product known as Niagara alls Shredded Wheat. Mr. Perky realized there were million or more visitors there every year. If they ent through the factory, they would be our greatest dvertisement.

If a customer went into the grocery store and aked for Niagara Falls Shredded Wheat, I should hink the grocer would know right away what was eant by that.

The little machines or mechanical exhibits I spoke f, for manufacturing shredded wheat, showed the hreds being drawn out into shred form and then being ut into shape as biscuit. The idea of that was to show he whole process by which the wheat was cooked by team and drawn out into little shreds through grooves, ou know, and baked. In some miniature factories the ntire process was carried out; in others, they just howed the shredding process, because the shredding ad a little novelty to it, and it attracted sightseers. hat was all to show that this wheat was drawn out nto shreds or strings and put into biscuit form. The echanical advertisements were used for about ten or ifteen years.

The Niagara Falls idea was emphasized. Some llusion may have been drawn into magazine adver- isements occasionally to the fact that you got power rom Shredded Wheat.

The glass globes were still being used here and here at the time the National Biscuit Company took it ver, but they did not issue them in any amounts. ome restaurants here and there had some of those lobes; and Mr. Carr, the general sales agent, distrib- ted some of those during his administration, which

was about until National Biscuit took over. If some one asked for a globe, we would still give them. It has been about four or five or six years since they ceased to be a feature. They simply dropped them as an important or valuable feature, but continued to supply them whenever they were wanted.

During all my connection with the company, the product was always referred to at the same place on the carton as Biscuit, and Twelve Biscuit. In other places, we just say Shredded Wheat.

Shredded Wheat means that pillow-shaped biscuit made out of wheat and put up into shredded form. With my experience and knowledge, it means the Shredded Wheat made at Niagara Falls.

I think that, in the last few years, when Mr. Carr became sales manager, occasional orders were given for the glass globes. I am pretty sure Mr. Carr put out some; because I know we discussed the question of changing the globes to a square container and finally decided to keep the round globe. So there must have been some distribution. I would not say they were dropped ten or twelve years ago. They continued putting them out; but it was not such a prominent or valuable factor. I think some of the sales agents carried them around to supply the restaurants; but it was not pushed as hard as it had been. The agents used other methods of getting into restaurants, cafes, etc.

The plaintiff and its predecessors have used the individual style of biscuit for furnishing the restaurant trade a great many years. As far as I know, the policy of the company has been to push in every way the sale of these individual cartons for use in the hotel and restaurant trade. There has been no effort on their part to hold back or retard the sale of the biscuit in the individual cartons, that I know of. It has been the policy of both the companies, as far as I could judge, to create all the demand they could for individual car-

tons for use in the restaurant and hotel trade; and, as far as I could tell, the Kellogg Company has also tried to sell its individual cartons as far as it could. As far as I know, both companies have discouraged the practice of taking the biscuit out of the large carton in selling them in hotels and restaurants; but there were certain classes of restaurants, big restaurants, that would sell them only out of the big carton. They had to do it ahead, some of them, and it was quick service. They did not want to open the cartons, for counter restaurants and other places. They still stick to the big carton. In the better class of restaurants, cafes, and hotels, they are served in the individual cartons. I believe the great bulk of the restaurant, cafe, and hotel trade now serve them in individual cartons.

RE-DIRECT EXAMINATION.

THE WITNESS: Refreshing my memory by looking at trade-mark registration 216593, August 17, 1926, with two biscuit in the dish, and observing the affidavit states that has been continuously applied to said goods since November 15, 1909, I am able to state that they began using the picture of two biscuit in the dish about that time, on the ends of the cartons and in all our advertising. This particular special application for trade-mark I do not recall. It was done by Charlie Brown, treasurer. I know that is about the date we began using two biscuit in the dish. If the sample cartons in Plaintiff's Exhibits 2, 3 and 4 do not show that, I would say that was a complete history of the cartons.

RE-CROSS-EXAMINATION.

THE WITNESS: Noting registration of the Shredded Wheat Company 85186, January 30, 1912, and the representation of a single biscuit, I remember the use of one biscuit in the plate from September 15, 1909 on.

In going through the cartons today, while we were n
able to produce or find any illustration or carton sho
ing a plate containing two biscuit, until sometime aft
1926, I think the use of the two biscuit in the dish ce
tainly antedated 1926.

MRS. CAROLINE CAVALIER.

Deposition taken at New York, N. Y., January
1933.

Direct Examination.

The Witness: I live at Stamford, Connecticut
and am a housewife, keeping house. I recognize Plain
tiff's Exhibit 1, Shredded Wheat, with which I hav
been familiar seven years in connection with my house
hold. I have to be a user of Shredded Wheat. I hav
known it longer than that. My husband was put on a
diet seven years ago. The expression shredded whea
has no meaning for me other than the article in Plain
tiff's Exhibit 1. I purchase Shredded Wheat at any
store I can get it. Sometimes I come through New
Haven and stop at different stores, and the A. & P.

I recently had an experience in purchasing
Shredded Wheat in a store in South Norwalk on East
Avenue, A. Greene's. I asked for Shredded Wheat,
expecting they would give me Shredded Wheat, but
they gave me Kellogg's Whole Wheat. I did not stop
to think or look at it until I got home. I saw the pack-
age when it was handed to me. I was buying three or
four items at the time. When I got home, I noticed it
was Whole Wheat. Plaintiff's Exhibit 80 is the pack-
age. That is my only experience of that kind. I had
never seen Kellogg's Whole Wheat Biscuit before. I
did not open this package.

I recognize the article taken by Mr. Vilas from De-
fendant's Exhibit 6 as Shredded Wheat, but I cannot

tell what kind it is. It looks the same as Shredded Wheat, and is the same shape and texture; but the other is just a little bit darker, I think. I never saw this biscuit before. If I saw this package as the one I have described in South Norwalk and the printing were obliterated except the picture, by those biscuit, you could not really tell the difference in the biscuits; but the box is different. The picture on the package looks like Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: The first time I noticed this Kellogg package was when I got the groceries home. I had never seen Kellogg's Whole Wheat before. The minute I saw the package I recognized it right away as a different box.

I did not open it, because there is a National Biscuit man, a friend of ours. My husband sells automobile parts. He happened to be there this morning, going to New York, stopped in, as always, for some equipment. I had just laid the things on the table. He wanted to look at that package and asked me if he could have it. Two days later, he told me there was a lawsuit and would I tell where I bought it and what the fellow said when I bought it. That was the only time I ever received this kind of biscuit, because I have been getting it at the A. & P., right around the corner. I happened to be at New Haven and stopped at the economy store for some groceries.

MRS. LEON E. TUTTLE.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I keep house. I have been a nurse. I recognize Plaintiff's Exhibit 1 as Shredded Wheat,

with which I have been familiar about twelve years. During that period, I have used it and purchased it from time to time. The expression shredded wheat does not convey to my mind any other product than the product contained in Plaintiff's Exhibit 1. I buy it at different places.

I have recently had an experience in purchasing Shredded Wheat, at the store of Frank Connolly, on Elm Street, in Stamford, Connecticut. I made a couple of purchases, asked for Shredded Wheat and was handed this box. I did not make any remarks to the grocer, and he did not say anything. I just accepted that along with my other purchases. This was December 30, 1932. Plaintiff's Exhibit 82 is the box and the cash slip that went with it. I was asked by the National Biscuit manager in Stamford, Mr. Beddell, to make this purchase. I did not go to any other stores. I paid for the items indicated on the slip, Plaintiff's Exhibit 81.

CROSS-EXAMINATION.

THE WITNESS: I knew right away, as soon as I saw this Kellogg package, it was not the Niagara Falls package I had been getting. I never had seen any of the biscuit inside the Kellogg package; but I have seen it since. I did not open up one of the packages, but I have seen them in Stamford and I saw one downstairs this morning. They all look much alike. I noticed the difference in size, Kellogg's being the smaller. I came down this morning from Stamford with Mrs. Cavalier. Mr. Beddell brought us, the National Biscuit general manager, who asked me to make this purchase. He told me to take whatever the clerk gave me.

RE-DIRECT EXAMINATION.

THE WITNESS: On the purchase slip appears, among other items, "One Sh. Wht." That is one Shredded Wheat. I paid twelve cents for that.

RE-CROSS-EXAMINATION.

THE WITNESS: That is the only experience I have had with the Kellogg biscuit. I buy Shredded Wheat right along. I have never seen the Kellogg product anywhere except in this one store.

CHARLES BERMAN.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, in the business five years; with no experience in the grocery business before. I recognize Plaintiff's Exhibit 1 as Shredded Wheat, with which I have been familiar a long time. We used to use it in the house, have used it for several years. We carry it in the store.

If a customer asked me for Shredded Wheat, I would give her Shredded Wheat, never had any other kind. I never knew of anything else under that name. I never had Defendant's Exhibit 6. If I saw the package with just the picture, without the name, I would say it was Shredded Wheat. To compare it with Plaintiff's Exhibit 1, I would have to look at the inside to see what it looks like. Otherwise, I would not know. The biscuit taken out of Defendant's Exhibit 6 looks like Shredded Wheat. There is a resemblance between the contents of Plaintiff's Exhibit 1 and the contents of Defendant's Exhibit 6. They look alike, except in size. If a customer asked me for Shredded Wheat and I had Defendant's Exhibit 6 in stock, I would not give them to her; because, if she asked for Shredded Wheat, I would have to give her Shredded Wheat.

Q. 20. Would you recognize Defendant's Exhibit No. 6 as Shredded Wheat? Is that what I understand you to mean?

A. I could not.

Q. 21. Do I understand, then, that you understand Shredded Wheat as a term applicable to one product only?

A. Yes.

THE WITNESS: I do not know what to think of a product like Defendant's Exhibit 6, looking like Shredded Wheat. I never had it and never heard of it before until the other day from a woman. She came in and asked for a package of Shredded Wheat. I took it off the shelf. She said, "No, I do not want that." I said, "What do you want?" She said, "It is a little smaller than this." She did not know the name or who made it. She is a customer of mine. She said, "They come in a little small, square package." I said, "I never heard of it. I can ask the salesman tomorrow." The next time he came, I asked him and he gave me a square package of—I forget the name of them; not like Defendant's Exhibit 6. It was a square biscuit. It was Triscuit he sent me. She came in. I showed it to her. She said, "No, it is not that. I will get you the empty package." The salesman lives near me. I asked him, and he said, "No, I have no other kind but these two." She brought me the package and showed me that, which was the first time I saw it. I had never heard of it. I did not see the biscuit. She is the only one I ever had a call from for this other biscuit. I have had people ask for the Niagara Falls product, some of them—always Shredded Wheat most of the time. Some people come in and say, "Give me a bale of hay." When they say that, I know what they mean. I always have it on display.

CROSS-EXAMINATION.

THE WITNESS: We handle corn flakes, no bran flakes. I have heard of shredded codfish and shredded coconut. I handle them. I have Post Toasties, which

is a corn-flake product. I do not know any other name for Shredded Wheat, except Shredded Wheat. If anybody asked me what a Post Toasty was, I would say it was a corn flake. If anybody asked me what shredded wheat was, shredded wheat is the only name for it I know.

There are several different kinds of whole wheat biscuit, so I would have to see a picture of Whole Wheat Biscuit to know what it was like. Looking at Defendant's Exhibit 6, if I saw that package for the first time and could not see the plate, I would have no idea what was in the package. I would have to open it to find out. To that extent, it is purely a blind package, as to telling the contents of the package from the name.

RE-DIRECT EXAMINATION.

THE WITNESS: If I saw the picture of the dish on the package, that would be a different story. I could then tell what was in the package.

RE-CROSS-EXAMINATION.

THE WITNESS: It is a common practice in the food line and most of the canned products and packaged products I have carry a picture of a plate with some of the food shown therein.

RE-DIRECT EXAMINATION.

THE WITNESS: I never saw shredded coconut or shredded codfish made up in a pillow-shaped biscuit, just loose in a package or box. I used to wonder why they called this Shredded Wheat, anyway.

HANNAH BENDER.

Deposition taken at New York, N. Y., January 4, 1933.

Direct Examination.

The Witness: I know Shredded Wheat and have known it for about two years, but I do not have it so often now. I recognize Plaintiff's Exhibit 1. That is what I know as Shredded Wheat. Plaintiff's Exhibit 113 is a package I have brought with me. I happened to walk into Sixty-eighth Avenue, B. Weiss. He handed me a package of Shredded Wheat. I looked at it. It did not seem so nice a box, from my standpoint. It was dirty. While I looked at it, he told me he had a small size of the same thing he can give me. I said all right and asked him if that was the same. He said, "Yes, that is the same thing." He gave me Kellogg's Whole Wheat, this package I have brought here. I took it because he told me it was the same. I did not use it. I gave it to one of the National Biscuit Company salesmen. This happened December 5th, 1932. That is the only time I received a package like that. Prior to that, when I asked for Shredded Wheat, I expected to receive Shredded Wheat, like Plaintiff's Exhibit 1.

Cross-Examination.

The Witness: The National Biscuit salesman I gave the package to I just know as Benny. I cannot remember his second name. He told me to go in that store and ask for Shredded Wheat, and to take whatever they gave me. The only reason I did not was I thought it was a dirty package. While I looked at it, he said, "I have the smaller size, if you care to have it." Benny had told me before that there were two kinds of shredded wheat on the market; but I had never before seen Kellogg's. He told me there was another kind of

Shredded Wheat; but I did not know it was Kellogg's. That is not my regular store. I take anywhere I go, when I feel like, because it is in the market. Benny told me to go to just that one store, no other. I never did open up a package of Kellogg's before, and I do not know what it looks like inside.

NATHAN SALBIN.

Deposition taken at New York, N. Y., January 4, 1933.

Direct Examination.

The Witness: I am a grocer located at 104 Orange Street, Newark, New Jersey. I have been in the grocery business twelve years, no experience in it before that. I am in business with my father.

I recognize Plaintiff's Exhibit 1. I call it Shredded Wheat, with which I have been familiar ever since I have been in business. When our customers ask for Shredded Wheat, I give them a package of that style, like Plaintiff's Exhibit 1, with a picture of Niagara Falls on it. I do not know anything else my customers would have in mind when asking for Shredded Wheat. When customers come in for Shredded Wheat, I know what they mean and what they want. When they ask for Shredded Wheat, I give them the package with the Niagara Falls picture on it. They ask for Shredded Wheat, and that is really the only one I have. We do not handle the other. When I supply them that package, I never have had them bring it back and say it is not what they want.

I have seen a package like Defendant's Exhibit 6. I do not handle it. If I saw a package like Defendant's Exhibit 6, with the name covered up, it would be pretty hard to say what was in the package. I see a picture there. It is a biscuit in some form. I never saw any of

Kellogg's Whole Wheat Biscuit until today. I hav had salesmen come in and talk to me on it; but they never showed it to me, because I told them I was no interested in it. I had no trade for it whatever. I never had anybody come in and ask me for Kellogg's in the last few years. If they come in and ask for Shredded Wheat, I give them Shredded Wheat. I give them what I have.

GEORGE OLIVA.

Deposition taken at New York, N. Y., January 4, 1933.

Direct Examination.

The Witness: I am assistant advertising manager of the National Biscuit Company. I was advertising manager for some years. Since the National Biscuit Company acquired the Shredded Wheat Company, I have been in charge of Shredded Wheat advertising. I have brought with me samples of advertising which have been used since I have charge of it.

I identify Plaintiff's Exhibit 108 as one of the volumes containing some of the samples of advertising used by the National Biscuit Company for Shredded Wheat in 1932. At the request of Mr. Vilas, I have prepared table of amounts expended by the National Biscuit Company in advertising Shredded Wheat during the years the company has had the Shredded Wheat Company. Plaintiff's Exhibit 114 is a tabulation of the figures of 1927 and 1928, secured from our general office and the statements of the old Shredded Wheat Company, old Shredded Wheat books in the custody of the company. They are absolutely a correct transcript of the books, as far as I know.

Plaintiff's Exhibit 115, consisting of four sheets, shows the expenditures by media from 1929 to 1932,

inclusive, for different kinds of advertising, which expenditures were made under my direction. The pencil note in 1932 indicates that sampling was started again in 1932, approximately three hundred thousand dollars expended for it, which should be added to the total appearing on the fourth sheet for 1932.

After the National Biscuit Company took over the Shredded Wheat Company, the advertising policy of the old company was practically continued, with some slight, not very noticeable changes of media, although the copy theme has been more or less the same. Colonel DeWeese continued to write advertising copy for Shredded Wheat all the time up until 1932.

I have with me samples of store cards, hangers; and the magazine and newspaper copy is in Plaintiff's Exhibit 108.

Plaintiff's Exhibit 116 is a floor cut-out, in which the actual packages are inserted. It stands up like an easel. The packages hold up the exhibit. We ordered fifty-one thousand, all of which are or have been in use. Plaintiff's Exhibits 117 and 118 are cut-outs, on which there were two runs, fifty-one thousand for each run; with the picture of Niagara Falls, used with packages, similar to the previous one.

The four pieces marked Plaintiff's Exhibit 119 are price cards, printed out of the waste coming out of the previous cut-outs. They were used in stores for the display of the product, Shredded Wheat. We had fifty-one thousand of each of those pieces.

The eight carton inserts marked Plaintiff's Exhibit 120 are slips placed in the National Biscuit Company varieties. The total number of these carton slip inserts used is twenty-eight million five hundred and sixty thousand. They are mechanically inserted in the packages of biscuit when they are put up.

Plaintiff's Exhibit 121 is a window poster, to be pasted on the grocer's window. Fifty-one thousand

of those were ordered, and practically all have been used. That is recent, the hundred and ninetieth edition.

Plaintiff's Exhibit 122 is a three-sheet poster, approximately forty-one inches by eighty-two inches, placed on the elevated stairways in New York, Brooklyn, and the Bronx. We have used seven hundred of those. In addition, we have a one-sheet poster, with the same design, which goes on the delivery equipment of the National Biscuit Company all over the country. We ordered two thousand seven hundred and fifty of them.

Plaintiff's Exhibit 123 is a shopping bag which is distributed at food shows. We ordered twenty thousand and have used about fifteen thousand.

Plaintiff's Exhibits 124, 125 and 126 are hanger cards, to be hung in grocery stores. Of the carton inserts mentioned before, added to Plaintiff's Exhibit 120, we have used eighteen million three hundred and sixty thousand. Of Plaintiff's Exhibit 124 we have used twenty-five thousand; of 125, seventy-two thousand; and of 126, seventy-six thousand five hundred; all distributed.

Plaintiff's Exhibit 127 is a price card to go with a stack of Shredded Wheat in cartons. We have ordered fifty-one thousand of those, and they are all out.

Plaintiff's Exhibit 128 is also a price card, red. We have had fifty thousand of those.

Plaintiff's Exhibit 129 consists of four broadsides we send out to our salesmen, telling them about our Shredded Wheat campaign that happens to be running at the time. We use three thousand of each of those.

Plaintiff's Exhibit 130 is a recipe book, being used currently. We have ordered five hundred and twenty-three thousand. Practically all of them have been used. We are right at the end of the book.

Plaintiff's Exhibit 131 is a restaurant hanger for restaurants, lunch rooms, and drug stores, supplied by us to them. Ten thousand seven hundred were ordered, and they have all been used.

Plaintiff's Exhibit 132 is a restaurant menu of the kind now supplied by us. Since March, 1929, we have purchased approximately eight and a half million. Our predecessors used millions of them before we took over. They are still being distributed. They have been changed slightly. This is one at present in use.

Plaintiff's Exhibit 133 are three window posters. The combined order of the three was approximately 200,000.

Plaintiff's Exhibit 134 is window posters, designed to be pasted on the window, suggesting the sale of Shredded Wheat, with strawberries. We had fifty-three thousand seven hundred of those, all in 1932.

Plaintiff's Exhibit 135 is a price window poster, sixty thousand of which have been used.

Plaintiff's Exhibit 136 is a panel poster, fifty-one thousand of which were ordered. The distribution is going on now. It is used in the store window right alongside a wall.

Plaintiff's Exhibit 137 is one of the postcards which are distributed to visitors at the Niagara Falls factory. A hundred and fifty thousand of those have been used; but we have had previous orders, of which we have no record. They are in use at the present time.

Plaintiff's Exhibit 138 is a letter and circular which were distributed with free samples of Shredded Wheat from house to house. In the last six months of the year, sampling was done in a national way, from coast to coast. Practically nine million of these circulars were distributed with small sample packages, the individual-size package, with two biscuit in it, the standard large-size biscuit. The National Biscuit Company has continued to make use of the picture of a dish with two

biscuit in, as shown on some of the exhibits I just handed you. Every time we use an illustration with biscuit in the dish, there are always two of them.

The large volumes or bundle I have here, three bundles, marked Plaintiff's Exhibit 139, are newspaper schedules, a list of the papers in which our advertisements for Shredded Wheat appear, showing the dates.

(The examination was continued until the following day, January 5, 1933.)

CROSS-EXAMINATION.

THE WITNESS: The representation of Niagara Falls as on the large cut-outs and store cards has been a prominently displayed feature of the plaintiff's advertising since I have been connected with it, more recently, within the last two years. But Niagara Falls has been very strongly featured in connection with Shredded Wheat. On some of the large cut-outs we have prominently featured Twelve Full-Size Biscuit. That type of expression has been prominently featured in that way in the last year. The plaintiff has some smaller-sized biscuit, the individual restaurant size, a little smaller in length than the Kellogg biscuit, possibly. I do not know. I never measured them. They are slightly smaller than a full-sized Niagara Falls biscuit, what we call an individual or restaurant-sized biscuit. I do not think our standard-sized packages have ever contained more or less than twelve biscuit to the package. We pack thirty-six packages to the case, which has been standard practice, except we have put up some bundles. I think there may be four in a bundle. All cases have contained thirty-six, as far as I know the practice of the plaintiff.

As long as I have been connected with plaintiff, the term: The Home of Shredded Wheat, with the Niagara Falls factory, has been featured strongly in con-

nection with the packages, on all packages. All our advertising copy is submitted to the legal department before it is released. That has always been done. Every piece of copy prepared has been submitted to the legal department.

I was with plaintiff's organization when Plaintiff's Exhibit 10 was changed by dropping the picture of the plate with two biscuit on one end and substituting therefor Niagara Falls. I do not know the particular reason for that. It was not done to emphasize the picture of Niagara Falls on both ends; but I am not able to suggest any other reason. It was done about two and a half or three years ago. At the same time, the large picture of a shredded wheat biscuit was put on the front face of the carton. I do not know, but I think It's All In The Shreds was dropped sooner. Looking at Plaintiff's Exhibit 10, I see that that expression appears under the plate on the end. If that is the only place it appeared, that would tend to refresh my recollection, because that whole panel was changed. That is only on the large package. It still appears on the small individual package. I know the plaintiff at the present time is marketing two sizes of individuals, one with the standard size biscuit, and the other a smaller sized biscuit.

In explanation of the heading: Advertising Salaries, on the advertising statements I submitted, the old Shredded Wheat Company charged certain advertising salaries to advertising expense. I think it consisted of salaries of girls who mailed out literature, direct advertising. I know it did not include the advertising manager's salary, because that was 1928 and 1929. That practice has since been discontinued. In our system of bookkeeping, salaries are not now included under the advertising account. We do not charge any salary of demonstrators, samplers, or salesmen to advertising. Advertising items include simply straight

items of expenditure, either for space or material, or the like.

I have looked the books of sample cartons here in evidence over. I know there have been a number of changes. I did not make the books up. The cartons were changed very often, previous to my time. Since I have been with them, I think the most important change we made was putting the biscuit on the carton. I would not say that the substitution of Niagara Falls for the plate was so important. The biscuit was put on there to add a little attractiveness to the package and show the contents of the package. I would not regard the illustration as being foreshortened in any way. It is the actual size of the biscuit. It does not create the impression of the biscuit being any shorter than it actually is. It was put on to improve the appearance of the package in general. As an advertising man, I would regard that biscuit, insofar as it blots out part of the representation of the factory and the large phrase, The Home of Shredded Wheat on the old carton, as an æsthetic improvement of the carton and its appearance.

RE-DIRECT EXAMINATION.

THE WITNESS: It is the practice of the National Biscuit Company to feature on a large proportion of their cartons a picture of the goods contained in the carton. It is at the present time the general policy to do so. That includes such items as soda crackers, ginger snaps, and cookies of various kinds.

RE-CROSS-EXAMINATION.

THE WITNESS: I would not say that the practice of illustrating the product itself on the outside of the carton is very old. More of it has been done in recent years. I would be surprised if told Mr. Clarke went to a grocery store and picked out many dozens of cans

and packages, all of which had representations of goods in a dish. I do not think there are many in a dish. I do not recall any offhand. It is not an uncommon practice to illustrate the product in an edible and appealing way on the outside of the package. My experience with the plaintiff does not go back to a discussion whether one or two biscuit should be featured in a plate. That was before my time.

RE-DIRECT EXAMINATION.

THE WITNESS: The plate with two biscuit in is still in use by the National Biscuit Company in all our advertising material. We still use it on the small carton. It is on the latest large carton, which has not yet come out.

RE-CROSS-EXAMINATION.

THE WITNESS: On Plaintiff's Exhibit 136, the biscuit do not look longer than the actual biscuit itself. That package to me is a little larger than the actual sized package. So the illustration of the biscuit would be larger. In every one of the four places in which biscuit had been illustrated on the package, the question of length is fully represented actual size. The carton shown at the bottom of Plaintiff's Exhibit 136 is in the actual colors of the carton. Plaintiff's Exhibit 1 is not the same package. That is the new package that is being run at the present time, the one with deep blue background, as appears on Plaintiff's Exhibit 136. The illustration of the carton on Plaintiff's Exhibit 136 is not an accurate representation of the carton of the plaintiff as it is being marketed at the present time. That particular package is not out yet. It is being prepared for marketing by the plaintiff. In that package, the factory is exactly the same factory, the same position of it. You are looking at the one on

your left in perspective, and it distorts it a bit. The factories should be exactly alike. They are not different in detail. The background is changed, and some little lines have been removed. One is a lithographed reproduction, which always brings out the colors a little better than the printing on the carton itself.

HENRY W. STENECK.

Deposition taken at New York, N. Y., January 4, 1933.

Direct Examination.

The Witness: I am now a wholesale grocer, located in Brooklyn, and have been in the wholesale end about four years, always in Brooklyn. I was in the retail grocery business in Brooklyn for about forty years. I recognize Plaintiff's Exhibit 1, Niagara Falls Shredded Wheat. I have known and think I have been selling Shredded Wheat something like thirty years, at retail as well as wholesale. The purchasing public mean, when they ask for Shredded Wheat, Niagara Falls Shredded Wheat, like Plaintiff's Exhibit 1. When the public hear the expression shredded wheat, they think of Shredded Wheat. That is wheat that is shredded. That is about the only way you can bring it out. When customers asked me for Shredded Wheat, I never gave them anything else except the product represented by Plaintiff's Exhibit 1.

I am a little familiar with Kellogg's Whole Wheat Biscuit, such as Defendant's Exhibit 6. I have carried it in the wholesale business. Kellogg's salesmen came to us with shredded wheat and asked us to take twenty-five cases. We did not want to, but they explained they would sell it for us and have their wagons come and pick it up. The wagon came down

and back, sometimes two packages, sometimes five cases out at a time. They would sell them, come back, and take more. We got rid of the first twenty-five, and he induced us to take another twenty-five. We have not sold any direct, ourselves, only through the wagon, what they came and took away.

Looking at Plaintiff's Exhibit 10, particularly in reference to the dish on the end of the package, I am familiar with it and have been quite a long while, probably longer than ten years. They had thirty-six in a case, I believe. Looking at Defendant's Exhibit 6, with the name obliterated and the picture exposed, that suggests Shredded Wheat to my mind.

CROSS-EXAMINATION.

THE WITNESS: I do not know how many packages to a case now of Niagara Falls Shredded Wheat. We do not sell many now. The National Biscuit Company sells it all direct to our customers, the delicatessens. It was, I believe, at one time, packed thirty-six to the case. I have not seen any lately. We only have a few on hand, unless once in a while one of our customers asks for it. We have a case of Shredded Wheat on hand to send them. Very little is distributed through wholesale grocers.

We have some Kellogg's Whole Wheat Biscuit in our store. The Kellogg product looks like a shredded wheat biscuit. There is a difference in size. It looks the same as Shredded Wheat. Since the Kellogg product has been on the market, I understand there are two different manufacturers producing shredded wheat biscuit: Kellogg and the Niagara Falls people. The Kellogg people have sold their product that was in my warehouse, by their specialty salesmen; through just what channels I do not know.

RE-DIRECT EXAMINATION.

THE WITNESS: I would not sell a package like Defendant's Exhibit 6 as Shredded Wheat. I would ask the customer what she wanted. If a customer asked for Shredded Wheat, I would know what they wanted and give them the Niagara Falls Shredded Wheat.

I have seen the Kellogg biscuit today, but not before. It is similar to Shredded Wheat, except in size. Otherwise, it looks like Shredded Wheat, only I think it is a little browner than Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: If a customer asked me for Kellogg's Shredded Wheat, I would send her the Kellogg biscuit.

JAMES T. McKINNEY.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer in Brooklyn and have been in that business just forty years last April, all the time in the Flatbush district, a service grocery, with charge accounts, telephone orders being about 75 per cent. of our business.

I recognize Plaintiff's Exhibit 1. It is Shredded Wheat. In 1905, I think we had our first convention at Niagara Falls in the Shredded Wheat Building. We handled Shredded Wheat before that time. I was established in 1892. That is about the first product we had. It is a lifelong article, you know. We have handled it probably as long as it has been on the market.

When customers ask for Shredded Wheat, the only thing they can ask for is this package, like Plain-

tiff's Exhibit 1, that they expect to get. If a customer telephones and asks for Shredded Wheat, we send her Shredded Wheat, never anything else. The expression shredded wheat has, of course, a definite meaning with the purchasing public. My own mother used it, and my wife uses it. We use it in the home, for breakfast. People have been to Niagara Falls and have seen this Shredded Wheat made. They come back and say, "Gee, that is the finest thing I have ever tasted. I have seen it made. We will have some of it. Is that Shredded Wheat? Yes." That is the way some people feel about it. The advertising, of course, that you put forward there, made a sale for it, like all cereals. To my knowledge, Shredded Wheat has been extensively advertised.

With Defendant's Exhibit 6 held so I can see the picture on it but not the name, I would say that looks something like Shredded Wheat. I remember Plaintiff's Exhibit 10, with the dish on the end of the carton, somewhat similar to that. I think that would have been on there all the time, as far as I know, one side Niagara Falls and the other side Shredded Wheat in that plate.

I do not handle Kellogg's Whole Wheat Biscuit. I never saw it until today. I saw the biscuit. It resembles Shredded Wheat exactly in appearance, except in size, I would say.

CROSS-EXAMINATION.

THE WITNESS: We do have whole wheat flat biscuit in the shape of saltines. Uneeda Biscuit, the soda crackers, are called biscuit. The name Whole Wheat Biscuit, in itself, would mean nothing to me, unless I saw a picture of what was meant by that particular whole wheat biscuit. As a rule, most of them have a picture of the cracker on the package, something like Shredded Wheat.

If I had never seen Defendant's Exhibit 6 until today, I would have no idea at all what Kellogg's Whole Wheat Biscuit looked like. It would be what might be called a blind package. I would have to open it up to see what was in it. That is the way I feel about it. If anybody told me the biscuit in the package was a shredded wheat biscuit, I would know what it would look like. I would imagine it would look like the Shredded Wheat Biscuit, that pillow-shaped biscuit that looks as if it were made of shreds, the way I have seen it made in Niagara Falls, the way I have seen it in the package, the way I have eaten it. That is the only way it comes. I do not know any other way. I do not know any other name that would describe it than shredded wheat biscuit. I have never seen it any other way. I am not able to suggest another name.

FRANK H. NEWS.

Deposition taken at New York, N. Y., January 4, 1933.

Direct Examination.

The Witness: I am a retail grocer, have had my own store for the past there years. Before that, I was in Bohack's seven years. That was my entire experience as a grocer. I recognize Plaintiff's Exhibit 1. That is what I would call real Shredded Wheat, with which I have been familiar for the past fourteen years, because I went through their plant the time I was married, and I ought to know. I took a trip to Niagara Falls. When I said that is real shredded wheat, I understand these other wheat biscuit came out and were supposed to be the same; but I do not believe they are.

I have had Kellogg's Whole Wheat Biscuit in the store one time about eight or nine months ago. I got rid of it; but it took me a long time. I just put it down

and got rid of it that way. I did not give it to customers who asked for Shredded Wheat. They just told me to give them that biscuit up there, and I did. If a customer asked me to give him Shredded Wheat, I would give him the package with Niagara Falls and the building on there. A customer asks for Shredded Wheat, and I give him that package. That is the only package I ever knew for Shredded Wheat. My customers asked for Shredded Wheat. When I gave them Shredded Wheat, they never brought it back.

JOSEPH WISHNIE.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, in business about fifteen years, of which the last four years was for myself. My store is cash-and-carry. I recognize Plaintiff's Exhibit 1 as Shredded Wheat, with which I have been familiar ever since I have been in business. When a customer asks me for a package of Shredded Wheat, I give her Shredded Wheat with Niagara Falls on it. We never carried anything else.

I am familiar with Kellogg's Whole Wheat Biscuit. We never carried it; but a man came around in a little flivver and tried to sell it. We told him we carry nothing unless a customer calls for it, for the simple reason that, if we carried everything, we would have to have a department store like Macy's. If they call for it, I can order it for the jobber. I never got a call for it.

If I saw a package like Defendant's Exhibit 6 and saw just the picture on it with the name obliterated, I would say Shredded Wheat was in the package.

CROSS-EXAMINATION.

THE WITNESS: If they asked for Kellogg's Shredded Wheat, naturally, I am in the business to make money, and I would sell them that. If I carried Defendant's Exhibit 6, and the customer said, "I want Kellogg's Shredded Wheat," I would give her the package, if she asked for it. She would have to say Kellogg's. If she said Shredded Wheat with the Niagara Falls on it, I would give her that. If she said Kellogg's Shredded Wheat, I would understand she wanted Defendant's Exhibit 6, naturally.

I understand there are two concerns making shredded wheat: Niagara Falls, and Kellogg. So I see, the way you brought it down to me.

RE-DIRECT EXAMINATION.

THE WITNESS: If a customer asked me for Shredded Wheat, I would give her the one with Niagara Falls on it, because I know what it is. I eat it myself.

RE-CROSS-EXAMINATION.

THE WITNESS: I have never eaten the Kellogg product.

ALLAN H. FAGAN.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a structural steel erector, construction man. I am familiar with the product known as Shredded Wheat and have been between twenty-five and twenty-eight years. I come from Niagara Falls, Canada, where it is made. I was through the American Shredded Wheat plant about fifteen or twenty years

ago. I have also been through the Canadian plant and have seen it going through the process. I have been a user of Shredded Wheat, but use it now only once in a while. If I go to a grocery store and ask for it, I expect to get the National—what they called the Shredded Wheat before the National took it over.

In a restaurant in Newark on the twenty-ninth of December, 1932, I asked for Shredded Wheat, at the Waldorf Restaurant, 738 Broad Street. I went in there, had breakfast, asked for Shredded Wheat, and the waitress served me one of those small packages, which I believe has two shredded wheat in it. I said "This is not Shredded Wheat." She said, "It is." I took it and ate it. I brought the carton away with me. Here it is. Plaintiff's Exhibit 140 is the carton served to me in that restaurant. Up to the time I had this experience, I had never seen the product known as Kellogg's Whole Wheat Biscuit, and I was not familiar with it.

CROSS-EXAMINATION.

THE WITNESS: The Kellogg product was brought to me in the carton. After I ate it, I had no further discussion with the restaurant people, did not try to tell them any more it was not a shredded wheat product. I could not say there was any difference between it and shredded wheat made by another concern. I did not notice any. As soon as the little package was handed to me, I knew right away it was not Niagara Falls Shredded Wheat, by the box. When I took the biscuit out of the carton I noticed it was a small biscuit.

ALEXANDER AITKEN.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I will be fifty-two this month. I am a retail grocer, and I have been engaged in the grocery

business all my life, never did anything else. I was born into the retail grocery business. During the conduct of my retail grocery business, I have had occasion to sell Shredded Wheat Biscuit for quite a number of years back, at least twenty-five years, during which time I have handled the Niagara Falls Shredded Wheat Biscuit in my store all the time, like the package marked Plaintiff's Exhibit 1, which I have picked out from among those on the table.

I know the package of the Whole Wheat Biscuit put out by the Kellogg Company, and the size of it. The biscuit is smaller in size, although I have never eaten it. I know quite a few people who come in contact with it and do not want it, because it is not the kind of biscuit they have been acquainted with, the Niagara Falls biscuit.

The biscuit just taken from Defendant's Exhibit 6 is, I think, the Kellogg biscuit to which I have referred. That is it. The Niagara Falls biscuit is a larger biscuit. As to taste, I would not swear, because I, personally, have not eaten it. I think it is quite different in form and appearance. It is a little longer biscuit. The Shredded Wheat Biscuit is a shade longer than the Kellogg biscuit. It seems to me the Kellogg biscuit is a little higher and the Niagara Falls is flat. They are both substantially pillow-shaped. When people come to my store and ask for Shredded Wheat, they have in mind Niagara Falls Shredded Wheat.

I have been familiar with the picture of a dish with biscuit in, as shown on Plaintiff's Exhibit 10. If I saw that representation without any printing, I would think it was Niagara Falls Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: Within the last month I have known there are two different manufacturers of shredded wheat, the Kellogg Company and the Niagara Falls

people. That is the first I had known there was another shredded wheat on the market. A representative of Kellogg came into my store and wanted to sell it to me from the wagon. I refused to take it in.

Assuming I had never seen Defendant's Exhibit 6 before, with the illustration of the plate concealed, just seeing the words Whole Wheat Biscuit, that, in a way, would not say anything about it, unless I would see what sort of diagram these packages carry. If I would carry a package, I would want to know what was inside. Whole Wheat Biscuit might be one of six or eight different kinds of products, a flat biscuit, a pillow-shaped biscuit, or a rosette-shaped biscuit, to me. If, however, the package carried the name Kellogg's Shredded Wheat Biscuit, I would expect to find shredded wheat. I would know it was shredded wheat; meaning, by that, a pillow-shaped biscuit made out of wheat in shredded form.

The term Niagara Falls has always been very actively advertised in connection with Shredded Wheat since I first saw it. You see a picture of Niagara Falls in a great many bill posters that advertise it. It says specifically on it: The Home of Shredded Wheat.

RE-DIRECT EXAMINATION.

THE WITNESS: I refused to take Kellogg's Whole Wheat Biscuit from the salesman, because, in all my experience in the grocery business, I did not want to have any shelf-warmers. I want them to go out of that store, so I can utilize whatever money I have in them somewhere else. I cannot do that, if I have it on the shelf. That is the only reason I refused to have it in my place.

RE-CROSS-EXAMINATION.

THE WITNESS: If customers asked me for Kellogg's Shredded Wheat, I would stock it, but I am afraid they

would have to ask me more than three or four times for it. If they asked for it in large enough quantity, I would. We must not forget that, if a woman came in and asked for Shredded Wheat, and if I gave her a package of Kellogg's biscuit and she brought back even one package of it and told me she did not like it, I would take it and ship it back to Kellogg immediately at their own expense. I would refuse to keep it in my store.

RE-DIRECT EXAMINATION.

THE WITNESS: I would say the term Shredded Wheat as well as the picture of Niagara Falls, has been advertised very extensively. I am a great fellow, going along, you know, to see the placards in the bus or railroads. That is what I am going by. I see Shredded Wheat, The Home of Shredded Wheat, a picture of Niagara Falls, the waterfall there.

MRS. IDA MUND.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I reside in New York City. I am familiar with the food product known as Shredded Wheat and have been for a considerable period of time.

I attempted to make a purchase of Shredded Wheat and another product was handed to me, November 30th of last year, at the store of Mr. Klee, 279 East Thirty-ninth Street. I went there and asked for Shredded Wheat. Plaintiff's Exhibit 141, the package of Whole Wheat Biscuit, was handed to me as Shredded Wheat. That is my signature on the package, by which I identify it as the package I purchased.

One of the National Biscuit Company salesmen who knows my husband asked him to send me to make

this purchase. My husband told me to ask for Shredded Wheat and to take whatever was handed me as proof of what he sold me for Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: That store is in my neighborhood, but I very seldom go there. That is the first time I asked for Shredded Wheat there. My husband asked me to go just to that one store. I asked the grocer if that was real Shredded Wheat. He told me it was just as good but put up by another company. He did not tell me it was Shredded Wheat. I asked him if it was real Shredded Wheat because he gave me this package, which I do not regard as Shredded Wheat. Plaintiff's Exhibit 1 is the only package of real Shredded Wheat. He said right away it was not the Shredded Wheat, but it was put out by a different company. I was not asked to and did not go to any other store. I never had this happen anywhere else.

SAMUEL A. LEONARD.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am seventy-five. I know of Shredded Wheat. I have had it in my home from time to time. I recently went to the store of V. Pettrolala, Belleville, New Jersey, and said: "I would like to have a box of National Biscuit Shredded Wheat." He was standing behind the desk. In back of him there was a well-dressed fellow, Italian, and he began to look around. My son, who was with me, said he did not have any in the place. The fellow who stood on the opposite side of the desk said: "Right up there." He said,

"Oh, yes," and pulled down one of these Whole Wheat packages.

I said, "That is not the National Biscuit, is it?" He says, "Yes." "Well," I said, "it does not say so." Well, he says, "It is Shredded Wheat." "All right," I said, "I will take a box of it."

I think that was Wednesday of last week. My son, who is a salesman out there at that place, took the package down to Mr. Ehrlach. It was the same package as Defendant's Exhibit 6. I went to the store at the request of my son, who is connected with the National Biscuit Company. That is the only store I went to. I asked for National Biscuit Company's Shredded Wheat and received a package like Defendant's Exhibit 6, took it away with me, and delivered it to my son. The date was on the package. I do not have the package with me. I did not visit any other store.

CROSS-EXAMINATION.

THE WITNESS: The grocer said it was National Biscuit. When I pointed out to him that the National Biscuit name was not on it, he said it was Shredded Wheat. He said just that it was Shredded Wheat, not anything about it being made by another manufacturer. I said, "That is what I want. I will take it."

I saw right away, when he handed me the package, that it was not Niagara Falls Shredded Wheat. I noticed the name Kellogg's on there. I did not open the package. I have used some of Kellogg Corn Flakes, but never used any of their shredded wheat; and I never used any of it since. I never saw any of it opened until today. There was one of them opened down there. They did not say anything about it.

RE-DIRECT EXAMINATION.

THE WITNESS: When I spoke to the storekeeper and told him this was not made by the National Biscuit

Company, all he said was it was the National Biscuit Shredded Wheat. I did not see any other man except this man who stood in front. It was a small store. There was a little fellow with him, a clerk, or probably his son. He did not want to wait on me. I think the proprietor of the store waited on me. In fact, I know it was, because my son had just been in there. He had his salesman's book. I met him on the next corner, and he said it was the proprietor.

JESSE W. PARNELL.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am thirty years old, manager of the Hempstead branch for the Firestone Tire & Rubber Company. I am familiar with the edible product known as Shredded Wheat. I have eaten it for years.

At the restaurant of Otto Steuer at Hempstead, when I asked for Shredded Wheat and milk, he substituted Kellogg's. I told him it was not Shredded Wheat. He said it was just as good and the same as Shredded Wheat. I knew by the box, Niagara Falls, and he substituted this and called it Shredded Wheat to me. Plaintiff's Exhibit 142 is part of the package he handed to me, the upper part. The other part he took before I had a chance to take any more of it. I saw right away it was not Niagara Falls Shredded Wheat. He said it was just the same. I told him Shredded Wheat had a picture of Niagara Falls on it and that is what I wanted. This did not have a picture of Niagara Falls. There were two biscuit in the package. I ate one and brought one here. This is one of the two biscuit that were served to me as Shredded Wheat.

(Stipulated between counsel that the witness produced a Kellogg's Whole Wheat Biscuit.)

Quite often they have tried to substitute Kellogg's. I would not take it if I could purchase Shredded Wheat. It was substituted in this instance. He said he served me this as regular Shredded Wheat, that he sold it as Shredded Wheat. This occurred just two or three days ago. I went to that restaurant at the request of a National Biscuit Company salesman. I eat there regularly every day. He asked me if I ate Shredded Wheat. I told him I did. He told me to ask for some Shredded Wheat, some of his product. That is the only restaurant I went to and asked for Shredded Wheat, obtaining Kellogg's Whole Wheat, on that particular day. I remember it has been submitted to me quite often, not necessarily in this particular place but in more than one place. After this occurrence, I reported back to the salesman who asked me to make the purchase.

CROSS-EXAMINATION.

THE WITNESS: I never made a note of it in any other restaurant. I cannot recollect it to give you the name as sworn testimony. I might have been in lots of places but not know the names they were conducted under. I do not take particular notice of a place when I come out.

I knew right away this was not the Niagara Falls Shredded Wheat I have been getting, because I am used to noticing Niagara Falls on the box. The shape of the biscuit was different, because it was smaller.

RE-DIRECT EXAMINATION.

THE WITNESS: The Kellogg biscuit is a different type of biscuit, duplicated to the point the taste is not exactly the same. The shape is patterned after Shredded Wheat, only a smaller biscuit. As I see it, it is the same shape, except the Kellogg biscuit is smaller, because I am not in the bakery business and cannot find out.

C. WAYNE TUTHILL.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am of mature age. I am familiar with the product known as Shredded Wheat. I have been through the factory and have eaten quite a lot of it. I have been familiar with it for about twenty years.

On the thirty-first of last December I went into an Italian delicatessen and grocery at Seaford, Long Island, and asked for some groceries. The last article I asked for was a package of Shredded Wheat. He says, "You mean Bisc'?" and I said, "Yes, the biscuit." He went to a shelf and handed me Plaintiff's Exhibit 143. That is my name on the package. He said, "This is all I have." I said, "No. Haven't you the other package of Shredded Wheat, the old package of Shredded Wheat?" He said, "That is coming in this afternoon. This is the same thing." I said, "If you haven't the other, I will take that." He said, "That is the same as the other," and handed me a package of Kellogg's Whole Wheat Biscuit.

I went to the store again yesterday. I had never eaten this kind, and I wanted to try it. I asked him if he had a package of Shredded Wheat. I wanted to see if he had the other. His wife, this time, got another package off the same shelf, with the same material. Yesterday, I got another package of Kellogg's Whole Wheat Biscuit.

Mr. Slocum, a National Biscuit salesman in our territory, asked me to go to that store and make this purchase. From my own curiosity, not because he told me, I went back to the same store and got another Kellogg package. He did not even offer me the original Shredded Wheat as I know it, which is manufactured in Niagara Falls. He evidently did not have it in the

store, referring to a package, like Plaintiff's Exhibit 1, with which I have been familiar for some considerable time. I am in the restaurant business. I have occasion to sell it sometimes. I carry Shredded Wheat there a package at a time, not in large quantity, because I am a buyer of National Biscuit products from the branch in Hempstead. To keep it fresh, we buy it in the store.

I never sold any Kellogg's Whole Wheat Biscuit in my restaurant. The first time I ever saw it was when I went to this Italian store of C. D. Gaetano. That is the first time I ever did know of it.

CROSS-EXAMINATION.

THE WITNESS: I ate the second package of Kellogg biscuit. I should say it tasted like Niagara Falls Shredded Wheat; but I think it was a little bit stale; because the edges were a little tough and did not dissolve like Niagara Falls Shredded Wheat. It may have been stale. Otherwise, I do not think I can tell the difference. I knew right away on both occasions that I was not getting the Niagara Falls package. The first time I said to the man I wanted Niagara Falls Shredded Wheat. I asked him if he did not have the original package. He seemed to know what I meant, because he said they were getting them in that afternoon.

WILLIAM JOHN BOHNET.

Deposition taken at New York, N. Y., January 4, 1933.

DIRECT EXAMINATION.

THE WITNESS: My business is meat and groceries, in which business I have been about fifteen years. We have had places in Amityville and Mineola. Twenty-five years ago, we used to operate one of the largest

places in Hempstead. We have another place at Roosevelt, Long Island, now.

During the time I have been in business, I have been familiar with Shredded Wheat of Niagara Falls. Picking out the package to which I refer it is right here, Plaintiff's Exhibit 1. I have been familiar with the shape and appearance of that particular biscuit for a considerable period of time, and have sold it in my store. When people call at my place of business or order Shredded Wheat from me, I understand they mean the Shredded Wheat they have been buying for years, with Niagara Falls on the side of the box. That is what they always look for. The kiddies say that, also the women. I have not visited the Niagara Falls plant.

A considerable portion of my orders are taken over the telephone, and people come to my store to place their orders. I do not handle any other whole wheat product. I am not in any manner familiar with any other whole wheat edible product. It seems to me there was a man around trying to sell me some biscuit like you hold in your hand. I had some on hand then, and I did not want any more. I asked him to let me see the biscuit, what it looked like. I opened up an original Shredded Wheat Biscuit, and I said, "How is it they have the same kind of biscuit as the original Shredded Wheat?" I do not remember what he said; but I knew there was a difference right there and then. Nothing was said about it, and I did not buy any. He has not been around to see me since. I do not know who he was or with what store he was connected. The package he showed me at that time was a tall square package like Defendant's Exhibit 6. The salesman opened the package and showed me one biscuit. I remember that, because I took one out of my stock, opened the biscuit, and compared them. I did see at that time that the Kellogg Whole Wheat Biscuit was a lot shorter than the Shredded Wheat. I thought it was Shredded Wheat Biscuit they had on there. I do

not know now or see what it is; but I remember it was shreds. I was wondering how they could work in conjunction with Shredded Wheat. Nothing was said after that. He discontinued the conversation after I started asking some questions about it. I did not know just what to think of it at that time. I thought it was quite strange they were putting out a biscuit like this one. I thought I would find out soon what it was all about. They never came around any more or tried to sell it, so I never asked any more about it. There is a difference between the two biscuit. One is larger than the other. The shape is generally the same, the thickness of it.

I think, in a lot of places, they can pass off Kellogg's Whole Wheat Biscuit for Shredded Wheat Biscuit, if they have it on hand and shove it over, saying it is the same thing. Some women are shrewd buyers. They can see right away or when they get it home that it is not the same thing. I think there is a possibility of a grocer passing it off one for the other.

CROSS-EXAMINATION.

THE WITNESS: For the time being a woman might take a Kellogg package, such as Defendant's Exhibit 6 and think she was getting a package like Plaintiff's Exhibit 1, being familiar with the latter, until she got home and saw it was not the same package. Assuming she looked at it when she got it, I think there would be a possibility of her taking the one package and thinking she was getting the other. A lot of people do not know of Kellogg's biscuit as it is put up there, as they do Shredded Wheat Biscuit. If I gave a lady one of Kellogg's, she would ask me what is the difference and how long the Kellogg's biscuit are going to be on hand. If I just had them in, I would say I had just got them. I would inform her that there are two kinds of shredded wheat biscuit.

MISS BESS EVANS.

Deposition taken at New York, N. Y., January 5, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am familiar with Shredded Wheat, have eaten it for years and years. I am familiar with its package. I identify Plaintiff's Exhibit 1 as a Shredded Wheat package. I had occasion to attempt to make a purchase of Shredded Wheat recently when something else was given me.

I went in a store, got some other groceries, and asked for Shredded Wheat. He said it was twelve cents a package. I told him there was a sale at chain stores, two for nineteen. He said, "We do not have sales. Here is a new shredded wheat on the market, twelve cents, just the same as Shredded Wheat, and I really like it better. Won't you try a package?" I said, "I do not know. I think this is an imitation." I purchased this package, Plaintiff's Exhibit 144, last Friday, December 30, 1932. The name of the store is written on there, Midtbo, on Forty-second Street, Brooklyn. I think he is German. He said it was just the same as Shredded Wheat, and I purchased it.

I went to that store at the request of Mr. Dunton, a representative of the National Biscuit Company. I was employed two Saturdays demonstrating Shredded Wheat for the National Biscuit Company in June, I think, at Rogers Avenue and Lincoln Road. I said to Mr. Midtbo, "Where is your Shredded Wheat?" When he first said it, he had Kellogg's out there. He had the other back. He said, "Why don't you try this? It is the same thing and I really like it better."

I was just a demonstrator two days for Shredded Wheat; but I have been a demonstrator for the A. & P. before they broadcast, for months, three or four days a week, about a couple of years ago.

During the time I have been purchasing Shredded Wheat, I have been familiar with the form of the biscuit. I would know a Shredded Wheat Biscuit by its form, also by the package in which it is contained. I have not eaten any of the Kellogg biscuit which I purchased, yet. I had two boxes of the other shredded wheat given to me by a neighbor who was going on a vacation. I thought I would eat what was good. I did not know anything about the other.

The biscuit you hold before me (taken from Defendant's Exhibit 6), looks like an imitation to me, because Shredded Wheat is much longer than that. I would not say that the form of the Shredded Wheat Biscuit and the Kellogg biscuit is the same except as to size. It looks like an imitation. It does not look like Shredded Wheat to me. Shredded Wheat is longer.

During the time I have been demonstrating, I have been familiar with names on different articles of merchandise that have been sold. The names applied thereto have value in identifying the products. I have demonstrated, for instance, Mazola Oil. I have seen other articles demonstrated which were identified by trade names. I demonstrated a tooth brush copied from another product. We had trouble with it because it was an imitation.

It is my experience and observation that, when people call for or desire Shredded Wheat, they desire the product of a particular concern. When a person gets used to a product and it has been used for years and years, if they put something like it on the market, it is an imitation. You know it does not come up to the original product. I have purchased and eaten Shredded Wheat twelve or fifteen years. I suppose since it has been out. The first time I knew of the Kellogg Biscuit as in Plaintiff's Exhibit 144, I had seen it occasionally on the shelf in a store but never

paid any attention to it; just like My-T-Fine or some other product you would not care to use.

CROSS-EXAMINATION.

THE WITNESS: As soon as I saw the Kellogg package, I certainly knew it was not the Niagara Falls package I had been buying. They told me it was the same thing. You would be surprised just the two days of demonstration my sister and I did for just two Saturdays, to see how many cases of Niagara Falls Shredded Wheat it sold, also to know how many people we told about Shredded Wheat who had not been using it or had not known about it before and get it now. I am two years out of a hospital for an intestinal trouble operation, and Shredded Wheat has made my health very much better. There were many people we found who had heard of it but they would not eat it because they thought it was like hay or straw. You would be surprised at the people who buy it in our neighborhood. My sister and I are never without it. If I am out of it in the morning, I get dressed right away and go around the corner and get it, because I have to eat it every day. Those people we introduced it to said they did not know about it. They ate other cereals before. If we spoke so highly of it, they would try it out.

I personally never knew of Kellogg's Shredded Wheat before, except I got a box of it to try. Then a friend of mine went off for a week-end and gave me two boxes of National Shredded Wheat. I thought well, we know what this is and we will eat it first. This was the first time a grocer ever tried to introduce a new product to me by saying it was the same kind as the old product but made by a new manufacturer. I never had a grocer say, "We have got a new make of the old product," because I have been buying at

chain stores. They very seldom introduce anything except something of their own they want to push. In the old type grocery stores, I know they will often introduce new products by saying it is a new manufacturer in the field and they think it is a good product and they would like me to try it.

I suppose I will eat the box of Kellogg biscuit I have. What is the use of trying it out? There is Royal Pudding. They have another lower priced. They cannot even get me to try it. I will not even taste it. My sister and I do southern pastry cooking by order. We do not do much right now, because people will not pay the price. My prices are like Schraffts'. When you have a good product and know how to cook them, you know what they are, and you know what an imitation is, too. You can make a delicious cooked cereal out of Shredded Wheat with just warm water and cooking, if you like it warm.

The National Biscuit Company representative did not repay me for this package. I just brought the package in there and gave it to them for nothing. I made the purchase in that store; and the man told me it was the same thing and he really liked it better. The National Biscuit salesman, Mr. Dunton, really did ask me to make the purchase and expected me to let him have the package. I went to one other store, asked for Shredded Wheat, and got the Niagara Falls product. He told me to go to that store, too.

RE-DIRECT EXAMINATION.

They had Kellogg's at both stores. At Dutson's store, the second store, they had both Shredded Wheat and Kellogg's Whole Wheat. I asked for Shredded Wheat. I said, "Aren't you having a sale? The chain stores are two for nineteen." He said, "No, they are twelve cents." I said, "Give me a box." He said;

"Why don't you try this Kellogg's? Do you want to try it?" I said, "No." He said, "It is just the same thing," so I bought the package.

I paid twelve cents for that one and ten for the other. The package I got at Dutson's was like Plaintiff's Exhibit 144, which I purchased at the first store where they told me they did not have sales. At the second store they had both products, and he told me did run sales. I purchased the Kellogg product at a less price than I could have purchased Shredded Wheat, which was twelve that day, and he sold me that package there for ten.

RE-CROSS-EXAMINATION.

THE WITNESS: Both the grocers made the same explanation about its being a new product and they would like to have me try it. One man said it was the same thing, and he really liked it better.

NORA G. EVANS.

Deposition taken at New York, N. Y., January 5, 1933.

DIRECT EXAMINATION.

THE WITNESS: I have given my name and address. I am familiar with the food product known by the name of Shredded Wheat and have been familiar with it for at least fifteen years. I eat it every morning and sometimes at night. I have purchased it myself. I am a sister of Miss Bess Evans who testified a few minutes ago.

I have ordered Shredded Wheat in restaurants. I recently had an experience in ordering Shredded Wheat and obtaining something else. I went into a cafeteria and ordered Shredded Wheat. They brought

this Whole Wheat and fixed it in the bowl, where it looked like a long biscuit. I said, "That does not look like Shredded Wheat to me. Bring me the box. I want to see." She did not bring the box. I suppose she told a story and she did not want to get caught. After I tasted a little bit, I said "Bring another one and bring the box with it." She brought the box. I said, "That is not Shredded Wheat. That must be a new biscuit that is put out. I never saw it before." She said, "It is just the same." I said, "You are mistaken. It is not." This was at The Meadow Cafeteria, 72 Henry Street, Brooklyn. With me then were my sister, Miss Bess Evans, and Mr. Dunton, who is connected with the National Biscuit Company. It was at luncheon time. Mr. Dunton asked me to go to this restaurant. I placed the order with the waitress. I said, "I want an order of Shredded Wheat Biscuit." She brought this Whole Wheat Biscuit. I did not know what it was at the time. She had it in a bowl. It looked just like the original Shredded Wheat. She did not bring the original container I called for. I ordered another order of it, and then she brought another container, which I have produced here, Plaintiff's Exhibit 145. I ate part of one, and the other biscuit is in there. The biscuit I first had and this are the same biscuit.

(Stipulated that the biscuit produced by the witness is a Kellogg biscuit.)

I never have made any other purchases of Kellogg's Whole Wheat Biscuit. I never used it. I always use the other, the Shredded Wheat.

I did not like the Kellogg biscuit in the cafeteria as well as the Shredded Wheat, because it seemed harder than the other and did not seem to me to have the same flavor.

I demonstrated Shredded Wheat for the National Biscuit Company for just a short time in Brooklyn, in

the A. & P. and in Wamselles', in Flatbush; just two days, in June, 1932. Before I demonstrated Shredded Wheat for them, I was familiar with their product. That is why Mr. Dunton wanted us to demonstrate it; because we knew Shredded Wheat and knew what it does for you. I feel it is a good, edible product and it does the system real good. It is wonderful. I eat it every day and sometimes at night. When I feel I need a laxative, I take Shredded Wheat instead, and it is marvelous. My sister has made demonstrations of products for other stores. I have not. When I order Shredded Wheat in a store, I expect to receive Shredded Wheat, the original kind. If I received the other, I would send it back. I always use the same brand of everything. From my experience, the name of a product has importance, because people would say: "What kind of Shredded Wheat is that?" I would say, "The original, with Niagara Falls on it." A lot of people feed that to their children. If you use Pillsbury's Flour, for intance, you would not use any other brand. I use Royal Baking Powder and would never use any other, no matter what people told me. I have always used that, and I think it is the best. When I go to a store, I ask for Royal Baking Powder. Sometimes they put out Davis, which is a cheaper brand, the same size. They tell me that. I do not take it, because I think Davis does not have cream of tartar but some stronger chemical.

CROSS-EXAMINATION.

THE WITNESS: I tried Davis Baking Powder, but I did not like it. I had it in somebody's else house. I do not use it. I do not like prepared flour, because I think it is not nearly as good for baking. I use Swans Down Flour for cakes. I do not know what other baking powders have, but it is not light like Royal, and

it makes the cake heavy. I tried Presto, but it is heavy and I do not like it. I very seldom try anything new, because I like standard kinds and brands of things that are all right. I do not use anything but standard kinds of cereals. I do not like corn flakes, or Rice Crispies. I do not like anything new. I have tried them, eaten them in different places. I meet people who have them. I always have Shredded Wheat. I always have it. It is really a meal when you eat it. When I have Shredded Wheat for breakfast, I have a real meal there. That and a piece of toast is about all I eat. I am typical, in that I do not like new things and I like old things. I have tried different things at other people's houses, sort of by accident. If they bring you a certain cereal, naturally, you are going to eat it. A great many people, however, do like to try new things. I do not. I want to go and order what I know about. I use a certain brand of coffee. I like the old brand, and I do not try new. What is the use of taking something you do not know what you are getting, if you have something you are satisfied with. I do not recall any instance of trying a new product, finding it better and being glad I changed. I use Gold Medal Flour and Swans Down Flour for cakes. I used Presto, but I did not like it.

When I saw the Kellogg biscuit in the plate, I knew right away it was not Niagara Falls Shredded Wheat, as soon as I saw the package. I thought it was a sample. Shredded Wheat looks the same. I thought it was a sample when they brought it. I knew I had not seen any of the samples of Shredded Wheat they put out except the original size. That is why I knew it was not the same thing. When I saw the outside of the little package with Kellogg on it, I knew it was not the original Shredded Wheat, not the trade mark.

RE-DIRECT EXAMINATION.

THE WITNESS: They had a menu at the cafeteria when I was there. Here it is, Plaintiff's Exhibit 146, last Friday. It says Shredded Wheat, milk, ten, meaning ten cents. It was not Shredded Wheat at all.

I am familiar with the shape and form of Shredded Wheat Biscuit. When she brought the package, I thought it was a Kellogg sample, because I knew the samples of Shredded Wheat when I had demonstrated were larger than that. When the dish with two biscuit placed end to end was before me, I did not at that time know that Kellogg was putting out a Whole Wheat Biscuit. I asked for Shredded Wheat. I would say the Kellogg biscuit is substantially the same as Shredded Wheat, except as to size. It does not seem as fine as Shredded Wheat. It is coarser. The shape is just the same.

RE-CROSS-EXAMINATION.

THE WITNESS: As soon as I came in contact with the Kellogg biscuit, it is fair to say I knew there are two shredded wheat biscuit on the market, one made by the National Biscuit Company, and one by Kellogg. In ordering shredded wheat from now on, I would specify whether I wanted the Kellogg or the Niagara Falls product. When I demonstrated on Shredded Wheat, I had a great number of people who had never tried the Niagara Falls product, and who, through my demonstration, I succeeded in getting to try it.

JOHN F. L. McCRUM.

Deposition taken at New York, N. Y., January 5, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am thirty-five unemployed at this time. I was with a Wall Street broker's house. I made

a visit recently to a store and asked for Shredded Wheat, at 222 Rochester Avenue, near St. John's Place, Brooklyn. I received a box of Kellogg's Whole Wheat Biscuit, Plaintiff's Exhibit 447. I went into the store, asked for a small can of evaporated milk and a box of Shredded Wheat. He put them in a bag and handed them to me. The grocer did not say anything to me. I went to the store at the request of Mr. Dunton, of the National Biscuit Company. After I had made the purchase, I told him about it.

CROSS-EXAMINATION.

THE WITNESS: I saw the package he took down from the shelf, that it was a Kellogg package, when he put it on the counter. I recognized then right away it was a Kellogg package. I have been eating National Biscuit Shredded Wheat, and I was familiar with the appearance of the package of Niagara Falls or National Biscuit Shredded Wheat. I knew right away, when I looked at it, that it was not the package the grocer was handing down to me. I did not ask him anything.

Mr. Dunton had asked me to go to that particular store, ask for Shredded Wheat, and take what was given to me. He gave me a list of two other stores, but I had no trouble there. They handed me the right National Biscuit Shredded Wheat. I have never tried Kellogg's Shredded Wheat. I never had heard of it before. I do not know now there are two kinds. The only one I ever heard of was National Biscuit Shredded Wheat. I did not open this pckage to find out whether there was any shredded wheat in it. Looking at the contents of Defendant's Exhibit 6, I really could not tell you whether that looks like Shredded Wheat. It does not look like the National Biscuit Shredded Wheat. Now that you show it to me, I can see that it looks like

Shredded Wheat Biscuit. It is hard to say if it looks like the National Biscuit Company's Shredded Wheat Biscuit. I could not tell you. All I know is that there is one National Biscuit Shredded Wheat. I do not know whether the Kellogg biscuit is shredded wheat or what it is. I cannot tell by looking at it. It does not look to me like National Biscuit Shredded Wheat. The three stores I have testified about were the only ones Mr. Dunton told me to go to and were the only three experiences I have had in buying Shredded Wheat.

RE-DIRECT EXAMINATION.

THE WITNESS: Plaintiff's Exhibit 1 is the Shredded Wheat box with which I have been familiar.

GEORGE OLIVA, recalled.

Deposition taken at New York, N. Y., January 5, 1934.

Further RE-CROSS-EXAMINATION.

THE WITNESS: Plaintiff's Exhibit 148 is one of the new cartons of plaintiff. The phrase: It's All In The Shreds is still used on some of the cartons of the plaintiff company. I cannot say why it is not on all. That is the latest carton that was put out for the large or grocery-store size. It has been left off, for no reason I know of. I presume I left it off. I would say I took the initiative. I left it off. I had no reason for leaving it off, only that whole panel was left off. It happened to be on that panel.

The French carton indicated, made in the Canadian Home of Shredded Wheat, approved by the legal department 5/9/30, does not carry the phrase. The Canadian carton for the French trade carries it, but we left it off this one. This carton, approved by the legal de-

partment 4/30/30, carries the phrase: It's All In The Shreds. That carton is still in use to the restaurant trade, lunch rooms, and drug stores, individual cartons.

It is the policy of plaintiff company to foster and push and encourage the sale of individual cartons in the restaurant and lunch-room trade. It is doing everything it can to promote the sales of them. I would not say it is doing anything to hold them back or discourage the sale of them. I do not know any reason why they should. Those cartons are pushed, pressed, and promoted in every way to get every restaurant and hotel that wants to handle their biscuit that way to handle and serve them in individual cartons. It is to our interest to carry that advertising material on the carton right through to the consumer, to have that carton go with the name Niagara Falls and: The Home of Shredded Wheat on it, right on through to the ultimate consumer.

It is served in different ways. Most hotels serve them loose. We sell to the hotel trade with the idea they will use them in individual cartons. Some of them take them out of the carton, quite a few of them. We have no way to persuade them to stop doing that, except through our selling force, which, as a whole, is out to promote the sale of individuals in that trade.

The carton marked Approved by legal department June 19, 1929, carrying: As Made Since 1893, and: It's All In The Shreds, is not now in use. It was discontinued, I should say, about two or two and a half years ago. This carton approved April 30, 1930, replaces that, to the best of my knowledge, and omits the two phrases: As Made Since 1893, and: It's All In The Shreds. I took them off. Evidently, it was approved with them off. I wanted to repeat Niagara Falls on both ends, not to make a double emphasis on Niagara Falls, but to make it uniform, one side to look like the other. In doing that, I chose Niagara Falls rather than

the two-biscuit plate. That led me to put on both ends: The Home of Shredded Wheat, Niagara Falls. Since April 30, 1930, that type of carton for the grocery trade has had those two pictures of Niagara Falls, one on each end.

We also represented on this carton of April 30, 1930, the big biscuit partly covering the front face of the factory; and, on the rear face, the expression: As Made Since 1893. We also left off that carton the reference to twelve ounces and twelve biscuit which had been on the previous carton. It was later put back again, although I do not remember why. I believe it was because of the requirements of Federal laws to state the weight and number of the biscuit.

The carton approved March 27, 1931, a Canadian package, has the Twelve Biscuit in relatively small type at the bottom of the face of the carton. On the American carton of the same date, it is just in connection with the name, twelve biscuit; with no reference to ounces.

The carton marked C. A. V. August 28, 1931, contains a reference to Twelve Biscuit and Twelve Ounces; and the copyright notice was changed from 1929 to 1931.

The British carton, marked originally as approved 4/21/31, then marked not approved, contains on one panel the words: One Dozen Original Shredded Wheat, a picture of a plate containing two biscuit; under that: Shredded Wheat (nothing added, nothing taken away) It's All In The Shreds. That language is still used on that British carton. They are made at Welwyn Gardens in England. The only place on the American or Canadian cartons where It's All In The Shreds is now used is on individual cartons.

On carton approved 2/26/32, appear on both end panels, under The Home of Shredded Wheat, the In-er-Seal trade-mark of Uneeda Bakeries. That is still used on present cartons, and we put down as manufacturer

of the product, National Biscuit, and, under that, Uneeda Bakers, Twelve Biscuit, Twelve Ounces. The phrase: Twelve Full-Sized Biscuit is used in display advertising, on some car cards, along with Niagara Falls.

On the cartons which carry the Uneeda Biscuit In-er-Seal trade-mark, we put prominently on the face, opposite the face which has the factory picture, the phrase: Shredded Wheat Bakeries, Niagara Falls, New York, Oakland, California, The National Biscuit Company, Uneeda Bakers. There have been no changes in the signs on the Niagara Falls factories. It is still called The Shredded Wheat Bakeries.

The two cartons to which you refer, stamped legal department received June 15, 1932, are Canadian cartons, with reading matter on one of them for French Canada. The others are used, one in English Canada, and one in French Canada; although some of the English are also using some of the French Canadian, in the Quebec territory. Those Canadian cartons do not have the In-er-Seal trade-mark, nor do they carry the phrase: Shredded Wheat Bakeries, National Biscuit Company. The name there is Canadian Shredded Wheat Co., Ltd. So, at present, the biscuit, on opposite sides of the American-Canadian line, are being marked in Canada by The Canadian Shredded Wheat Co., Ltd., Niagara Falls, Ontario, Canada; and, on this side of the line, under the name: National Biscuit Company, Uneeda Bakers.

The sample carton marked Approved 8/18/32 does not contain the phrase: It's All In The Shreds. That is distributed from house to house in the United States.

The other two cartons on the same page, both approved 6/14/32, contained in the same place on the end panels the term: As Made Since 1893, and the phrase: It's All In The Shreds. Those are used in sales to dining cars, restaurants, and for individual service in

general. There is no other difference between the sample cartons and the individual cartons, that I know of.

I do not know why the sample carton has merely: Made Since 1893, and the individual carton has also: It's All In The Shreds, unless it was just to fill out.

The last carton is Plaintiff's Exhibit 148, which, as far as I know, has been approved by the legal department as a United States carton for the regular grocery trade. On the end panel is: The Home of Shredded Wheat, Niagara Falls, and, under that: The National Biscuit Company, In-er-Seal mark, slightly differently arranged from prior cartons, the words run together; and the National Biscuit name, instead of between Shredded Wheat and Niagara Falls, is under: Niagara Falls. That was done just to improve the design. This carton is the first grocery trade carton in about two years with the dish with two biscuit in it. We put that on the back face of the carton with the words: Trade mark, Reg. U. S. Pat. Off. At the bottom is: All the Bran and the Wheat. Elsewhere on the carton we have: One hundred per cent. Whole Wheat, and: Nothing added, nothing taken away, and: A hundred per cent. Whole Wheat, all the bran and other food substances. We have not emphasized it. It is all copied on the back. It was just put in that way for a layout. That is part of the message; but there are other messages on there also important.

Under the biscuit, on the front face, we have rather prominently: One hundred per cent. Whole Wheat. It is fair to say that the five or six features on there of the name Shredded Wheat, the picture of the factory, of the biscuit itself, and the phrases: The Home of Shredded Wheat; under that: Twelve Biscuit, Twelve Ounces; and, under the picture of the biscuit: A Hundred Per Cent. Whole Wheat, are the features we have given to the front panel of that carton.

RE-DIRECT EXAMINATION.

THE WITNESS: The Company has absolutely not ceased or cut down its efforts to sell its Shredded Wheat in packages containing twelve biscuit. It sells all the individual biscuit it can, and, when they are sold to lunch rooms or elsewhere, there are no strictures on the benefit purchaser that they must take it to the table of the consumer in the package. That is a matter of choice for the lunch room keeper. The company does not endeavor to get any advertising that way, having the carton brought to the table of the consumer with the biscuit in, and the company has neither issued any strictures in regard to it nor offered propaganda in any way whatsoever as to that.

RE-CROSS-EXAMINATION.

The company has no control in the restaurant, as to whether biscuit are served to the consumer in or out of the carton. All it does is supply the biscuit in individual cartons. That is where the control ends, so far as how the biscuit is going to be served is concerned.

The biscuit are not served in individual cartons in our own restaurant here. I do not know what carton they come out of; but they are not served in the carton in the restaurant itself.

MICHAEL WEINSTOCK.

Deposition taken in New York, January 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am in the wholesale grocery business of A. Krasne, 845 East One Hundred and Thirty-sixth Street, carrying a full line of groceries wholesale.

We cover a territory of Brooklyn, New York, Long Island, New Jersey, up-state New York and New England. We employ ninety-eight salesmen and have twelve thousand customers, being one of the largest wholesale grocers in New York.

I recognize Plaintiff's Exhibit 1 as a Shredded Wheat package. I have been familiar with Shredded Wheat ever since I was a youngster. We carry it now and have done so for fifteen years.

In the trade, the expression "Shredded Wheat" has the significance of a trade name, as to a particular product of particular origin. The way I understand it, it is an item that has been named as Shredded Wheat, and the name has been registered. That is my understanding of the meaning of the expression Shredded Wheat in the minds of the purchasing public. Shredded Wheat is made at Niagara Falls and has association in the general opinion of the public with Niagara Falls.

I am familiar with the whole Wheat Biscuit manufactured by the Kellogg Company. We carry it in our store. I remember the dish in the picture on the end of the carton, Plaintiff's Exhibit 10. It has been used as long as I can remember. As long as I know the package, I remember seeing that on the package, and I have seen it in connection with other advertising matter of the Shredded Wheat Company.

The Shredded Wheat Company has been an extensive advertiser of its product, and the result of that advertising on the minds of the public is that, when it was advertised, it was more in demand.

When I receive an order from a customer for Shredded Wheat, I fill that order with Niagara Falls Shredded Wheat. If they ask for Shredded Wheat, I give them Shredded Wheat.

The picture of the two biscuits on Defendant's Exhibit No. 6 is similar to the picture on the Shredded

Wheat package and a person casually seeing that picture would figure it is the same as Shredded Wheat.

I identify the biscuit contained in Plaintiff's Exhibit 1. It has been exactly the same thing during the time that I have been familiar with it.

Grocers have remarked to me several times that they did not see how Kellogg could put out the same item as Shredded Wheat. The appearance of the Kellogg biscuit as contained in Defendant's Exhibit 6 is almost identical with Shredded Wheat, except that it is shorter than Shredded Wheat. Its shape is exactly similar.

If a woman is accustomed to buying Shredded Wheat right along, she would buy it according to the appearance of the package; but, if the grocer has not Shredded Wheat in stock and has Whole Wheat Biscuit instead, he will try to use his high-pressure salesmanship in selling Whole Wheat Biscuit, going so far as to open the package to convince her it was the same.

I would say it would be possible for a grocer to sell an unwary customer Whole Wheat for Shredded Wheat.

I carry the Kellogg product but very seldom sell it. The only time it sells is when they do specialty work from store to store and their salesmen come to our warehouse and take it to the grocer. That is the way most of the Kellogg stock moves.

The public in general ask for the product in Plaintiff's Exhibit 1 by asking for a package of Shredded Wheat. That is quite general.

The wholesale price of the Kellogg product is a trifle lower than Shredded Wheat. As to retail price, they can sell it two cents a package below Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: I have known the Kellogg Company for quite a while, not as to the Whole Wheat Biscuit, but their corn flakes is an old item. Their reputation in the trade for fair dealing is very high.

I recognize the Whole Wheat Biscuit package shown me as being a distinctive Kellogg package, similar in color, shape, etc., to all the rest of the Kellogg family, such as corn flakes.

The high reputation of the Kellogg Company for fair dealing would help in introducing new products into the channels of retail trade.

The Kellogg Company is a very large advertiser of its product, ranking fourth or fifth among national advertisers of grocery products. I have seen advertisements of Whole Wheat Biscuit in newspapers, on car cards, store cards, and displays of that kind. All that sort of business depends on continued advertising. If either of the companies ceased to advertise, their business would practically vanish in four or five years time.

I would not be surprised and would credit the statement that two of the National Biscuit Company demonstrators who testified here a few days ago said they reached hundreds of people who had never tried Shredded Wheat before. The National Biscuit Company is digging up new customers of Shredded Wheat every day; and any idea that it is established for all time and would just roll along with no advertising is erroneous.

The Kellogg Company would have to do the same for Whole Wheat Biscuit, stir up the trade with specialty salesmen, and look for new customers.

I personally know of self-service stores, where a customer takes a basket and picks the goods out. I have not noticed whether they carry both the products.

If a customer asked for Kellogg's Shredded Wheat, I would send the Whole Wheat Biscuit. If anybody asked me what a shredded wheat biscuit was, I would describe it as a pillow-shaped biscuit, made out of whole wheat in shredded form. When I speak of being familiar with shredded wheat, I mean that type of biscuit, a shredded whole wheat biscuit in pillow-shaped form.

I would say that there has been very general knowledge through the grocery trade for several years that the Kellogg Company was making a shredded wheat biscuit. While, up to several years back, there has been competition with Shredded Wheat, it has been a product like it but smaller and a different shape altogether.

The Whole Wheat Biscuit is sold in distinctive Kellogg packages.

It is fair to say that a considerable proportion of people dealing with the grocery trade are experimental and like to try new products. Upon hearing of a new kind of shredded wheat on the market, there would be a tendency of most people to try it, to see whether they liked it better or whether it was different.

Constant advertising by the Kellogg Company of its Whole Wheat Biscuit would tend to arouse curiosity and interest in the new product on the part of many people.

"Whole Wheat Biscuit" or "Whole Wheat" would suggest to me any one of ten or fifteen kinds of products that would be all whole wheat.

If I looked at the Kellogg package without the picture of the biscuit on it and had never seen that before, I would not have any idea of what was inside. Whole Wheat biscuit might be in different shapes. National Biscuit Company's product, Uneeda Biscuit, is called a biscuit, and it is a soda cracker, an entirely different sort of thing from this. Quaker Muffetts is

referred to on the carton as "Whole Wheat Biscuit," and is an entirely different kind of product from shredded wheat.

I know that the current name of a product like Uneeda Biscuit is soda cracker and rolled oats is oatmeal. There could not be any other name than shredded wheat biscuit or shredded wheat to describe Shredded Wheat, that product. Any other name that could be used for this whole wheat biscuit would not describe it, but shredded wheat or shredded wheat biscuit does describe it exactly.

It is a fact that the restaurant and hotel trade is usually serviced by and the great bulk of that trade is supplied through special hotel or restaurant jobbers.

My concern does not handle the individual type of carton of shredded wheat with two biscuit in the package. That would go through the restaurant and hotel jobbers.

I would say that Shredded Wheat and Shredded Wheat Biscuit of the National Biscuit Company and of the Kellogg Company are both subject to increasingly severe competition from other forms of whole wheat products, such as wheat flakes and puffed wheat; and, insofar as the public would be induced by advertising to use those other forms of wheat products, that would tend to affect the sales of shredded wheat.

In my opinion, the sale of shredded wheat by both the National Biscuit Company and the Kellogg Company or either of them is less rapid than it used to be. I attribute this to competition by other forms of whole wheat products, or what the public regards as more attractive forms, or new forms.

I regard the name "Kellogg's" on Defendant's Exhibit 6 as just as prominent as on the rest of the Kellogg family of packages, and that is as big as they

make their name. As far as those cartons go, Kellogg is the dominating name of the product.

It is a fact that it is a very common practice in the food line to put a dish on the package with some of the contents in the dish, whether it is spinach or baked beans, and it has been a common practice for a number of years to display a product in some attractive form in a dish on the package. That is a common advertising device to let the public know what the product looks like

I have not, in recent years, seen any package like Plaintiff's Exhibit 10, but I have seen packages with the plate on. In recent years, the package has been like Plaintiff's Exhibit 1, with a picture of Niagara Falls on each end, and the dish has vanished off the package.

I have not seen any of the Shredded Wheat packages like Plaintiff's Exhibit 148. On that exhibit, the words "Shredded Wheat" have been printed in red ink on both sides of the carton; whereas, in Plaintiff's Exhibit 1, the words "Shredded Wheat" are printed in red ink on the front face and in blue ink on the rear face of the carton.

Until about 1929, the National Biscuit Company just had a sort of cracker or biscuit line. It had no product like Shredded Wheat or shredded wheat biscuit. At about that time, it added the Shredded Wheat to the National Biscuit Line.

Since then, I have not heard of any attempts at the beginning to get the cracker line into grocery stores by saying, "If you want Shredded Wheat, you must buy the whole cracker line." I do not know anything about that either way.

The principal competitors of the National Biscuit Company, in the cracker line, are Sunshine, made by the Loose Wiles Biscuit Company. They have no shredded wheat product of any sort, that I know of. They have a cracker line and dog biscuits, Austins.

The National Biscuit Company have a dog biscuit, also, called Bennett's Milk-Bone.

It is a fact that a great many grocers carry the Loose Wiles Biscuit line rather than the National Biscuit Company's cracker line, for a particular reason. Some grocers are prejudiced against the National Biscuit Company. If they could not get the Niagara Falls Shredded Wheat except through the National Biscuit Company, it would be possible for the National Biscuit Company to say, "If you want Shredded Wheat, we want you to put in the National Biscuit line." That is mathematically true, but is not true in actual practice. I have not heard of it. I do not know anything about its being actual practice. I never heard of it.

I do know however that competition is very keen between the National Biscuit Company and Loose Wiles. I also know that many grocers would like to handle just one brand of each line. For instance, they would like, if they could, to have just one good brand of baked beans, and of shredded wheat biscuit and of corn flakes. They do not like to load up with two or three different kinds of corn flakes.

RE-DIRECT EXAMINATION.

THE WITNESS: I do not mean to be understood as saying that there are now two brands of shredded wheat. As I understand, there are two brands of shredded wheat biscuit. I wish to be understood as testifying that Kellogg is making a shredded wheat biscuit similar to the Shredded Wheat. I mean by that that the Kellogg wheat biscuit is similar to the Shredded Wheat, as to the looks and appearance of the biscuit that it sells, except for size.

When my customers refer to Shredded Wheat, they ask for it, and they get the item "Shredded Wheat." It is manufactured by the Niagara Falls plant.

Until the Kellogg Company put up its Whole Wheat Biscuit like Defendant's Exhibit 6, there was another cereal, in addition to Shredded Wheat, made of whole wheat and put up in biscuit form, called Muffetts, manufactured by the Quaker Oats Company, put up in a package like Defendant's Exhibit 11, made of whole wheat filaments similar to Shredded Wheat filaments. Muffetts could not be readily passed off as or confused with Shredded Wheat on account of the shape of the biscuit.

It is usual or customary in the trade, when one product has been carried in a picture on the carton, like Plaintiff's Exhibit 10, for another manufacturer of a similar product to feature his product in the same manner, two biscuit in a dish, I find that in other products besides Shredded Wheat, where one manufacturer imitates another.

I do not know, offhand, of any other product than Shredded Wheat and Kellogg's, where the manufacturer of a product illustrates the product on the package, putting it in a dish and another manufacturer has come along with a similar product and put it in a similar picture. That is the only one I have in mind now, Kellogg's and Shredded Wheat Biscuit, where the picture of two biscuit in a dish is substantially the same.

It is the custom of all cereal manufacturers to advertise extensively. I would attribute what I say as to some falling off in the distribution of Shredded Wheat wholly to the competition of other cereals and not partly due to the economic conditions generally in the country. The present economic depression has nothing to do with the falling off of sales.

The diminution of distribution of Shredded Wheat that I have noticed in recent years I would figure as about thirty per cent. Shredded Wheat has been a very steady seller for a great many years. It increased

regularly for many years in its distribution. It has been falling off for the past three or four years. That is a conclusion I would draw from my own experience. I do not know whether or not that is general throughout the country.

The proportion of people who are of an experimental type of mind, as contrasted with the portion of the purchasing public who prefer to continue with what they know is, I believe, about twenty-five per cent. of the people who use cereals. The others would be more or less conservative.

RE-CROSS-EXAMINATION.

THE WITNESS: I would say only a very small proportion of customers, like invalids, use Shredded Wheat year in and year out for any considerable number of years. Most people will use a product like that for just a year or so and then they will go to some other cereal; but there will be a few invalids or special cases who have had it prescribed and will eat it year in and year out. The great bulk of the people come in and out frequently. That is why concerns like the National Biscuit Company and Kellogg Company must advertise so constantly and give out samples, so as to constantly recruit users of their products, so that every time a user steps out, a new user will come in.

I know of other shredded food products, such as shredded codfish and shredded coconut.

In a line like baked beans, or canned spinach, or canned corn, I would say that there is an almost universal practice on the part of all those manufacturers of showing their product on a dish on the outside of the package.

I have not heard of Ross Shredded Wheat Biscuit.

If a customer asked for Kellogg's Shredded Wheat, I would send this Kellogg product, Whole

Wheat Biscuit. I would say that that would be a general practice in the trade.

From time to time, there have been a great many brands of corn flakes on the market made by different producers. That was probably truer some years ago than in recent years. Still, some of the large chain systems have their own brands of corn flakes. The common current name for that product is corn flakes. Many of those producers refer to the product as corn flakes or toasted corn flakes.

RE-DIRECT EXAMINATION.

THE WITNESS: I never heard of anyone taking what they call shredded codfish or shredded coconut and making it up into a pillow-shaped biscuit. It is usually just in bulk, loose in the package.

People like a variety in the cereals they eat and do not, as a rule, eat one constantly day in and day out. They have some variety.

RE-CROSS-EXAMINATION.

THE WITNESS: It is true that not all the customers of a grocer are set on any particular brand. They would specify the brand. In the majority of cases, they specify the brand. In the case of baking powder, they would be apt to say that they wanted Royal Baking Powder or Davis Baking Powder, or some other.

It is fair to say that people who had seen the Kellogg advertisement and had tried the Kellogg's shredded wheat, would say, "I want Kellogg's shredded wheat." And it is fair to say that, during practically the whole time that I have known this National Biscuit Company or Shredded Wheat Company's Shredded Wheat, I have known it as Niagara Falls Shredded Wheat; and Niagara Falls has always been associated with that product strongly, on the package

and in the advertising; so that, if anybody spoke of Niagara Falls Shredded Wheat, I would know instantly that they meant Shredded Wheat.

I would not say that it would be practically impossible for the Kellogg Company to expect to build up any kind of business by having the grocers just try to substitute its product, without explanation, for the Niagara Falls product. I would say that, if a person asked for the Niagara Falls Shredded Wheat and the grocer wanted to sell them Kellogg's, he would say, "Here is a new shredded wheat that we would like you to try," and that, if he did not do that, if he simply sent the Kellogg product on a telephone order, he would expect to have it come right back to him. The great bulk of the customers would send that product right back.

If the grocer would explain to some customers who asked for shredded wheat that the Kellogg Company was putting out a shredded wheat, that there are fifteen biscuit to the package, and that he would like them to try it, that would produce a certain number of customers who would try it, and they would know they were getting a new product. None of them would think he was getting the Niagara Falls Shredded Wheat. It would be true that a certain proportion of them would thereafter say, "I want Kellogg's Shredded Wheat." That is, they might. If they asked for Kellogg's, they would get Kellogg's. If they had tried the Kellogg product and found out that they liked it, they would, in re-ordering it, say, "Give me Kellogg's Shredded Wheat," no doubt.

I have never seen any of the small shredded wheat biscuit that the National Biscuit Company are putting out.

RE-DIRECT EXAMINATION.

THE WITNESS: In introducing or putting up Kellogg's Whole Wheat Biscuit, as defendant's counsel has just been asking me, it would be possible for the grocer to sell it as a substitute for Shredded Wheat or as a form of shredded wheat.

I never heard a customer ask for Niagara Falls Shredded Wheat, just in those words. They ask for Shredded Wheat. In answer to counsel's questions in which he spoke about Niagara Falls Shredded Wheat, I did not mean to infer that people ask for it in that way.

CHARLES E. DUNLAP.

Deposition taken in New York, January 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am controller of the National Biscuit Company and have been connected with the accounting department of that company since I took charge of that department in August, I think, of 1916. Since that time, I have been responsible for the methods of accounting of the National Biscuit Company and its subsidiaries. That is true of companies subsequently acquired, like the Shredded Wheat Company.

When the National Biscuit Company acquired the Shredded Wheat Company, it took over the accounts and books and all the records of that company, all the books of account and audited such books, which auditing was done by me and by assistants under my direction.

Included in those records and in the audit so made were records of annual sales of Shredded Wheat. I have had prepared, at Mr. Vilas' request a transcript of the sales of Shredded Wheat, by cases of thirty-

six packages, beginning with the year 1896 and concluding with the year 1932. The paper shown me contains that transcript, taken from the books of the Shredded Wheat Company and for subsequent years from the National Biscuit Company's books. Those books are under my control and the figures are correct, to my knowledge.

(Plaintiff's Exhibit No. 149.)

The records of expenditures for advertising, account of Shredded Wheat Company, have likewise been audited by me and kept in my department. I am familiar with Plaintiff's Exhibit 84. I have, at Mr. Vilas' request, caused the advertising expenditures in the United States to be abstracted from said exhibit and carried along in parallel columns by years with the figures in Plaintiff's Exhibit 149. The paper I now have before me is an absolutely correct transcript of those figures, combined from the two exhibits, and these figures have been used for our own purposes in figuring advertising costs per case for all those years.

(Plaintiff's Exhibit No. 150.)

CROSS-EXAMINATION.

THE WITNESS: Referring to the years 1929, 1930, and 1931, I have a star, with the footnote that these advertising totals do not include sampling and field expense; but that, in 1932, the total of $973,581.76 includes three hundred thousand dollars for sampling. My reason for not including sampling in the 1932 total is the difference in the accounting methods, as between the National Biscuit Company and the Shredded Wheat Company.

The Shredded Wheat Company handled all of that through a special account; but, when the sales department of the National Biscuit Company took Shredded

Wheat in, it ceased to be handled from Niagara Falls, but was handled from here.

Wood was brought down here, and his men who were doing that same sampling work, which Shredded Wheat had done previously, were all handled on the sales department payroll. Without someone identifying each man and going back over all expense vouchers and seeing what part of their traveling expense and so forth was allocable to sampling work, it would be impossible to bring it in there without inflating those figures, if it was in there altogether. It is difficult to say how much, but I would say it probably would add three hundred thousand dollars to those figures; that is, for 1929, 1930, and 1931, those years that are low. While it is a fact that the field work and sampling were discontinued shortly after the National Biscuit Company took over the Shredded Wheat Company, it is not so much due to that as to the fact that we utilized those men in various ways and did not figure it was all a proper charge against advertising. We did our promotional work in a different manner.

I did not, in 1932, figure any expense for sampling crews. We did not have those crews in 1932. We went at it in a different manner. The three hundred thousand dollars for sampling in 1932 was for a special sampling campaign; covering the cost of the samples, and the cost of distribution through various concerns who make a specialty of that, such as the Postal Telegraph Company, and Campon & Company, over in Brooklyn. We believed it was cheaper to use people like that who had made a specialty of distribution and had the equipment. Then, when you had finished and were through with it, you were through, instead of having a lot of equipment on your hands. It would include the equivalent of salaries, but paid instead to the Postal Telegraph Company. We used whatever equipment they had, in the campaign.

The sampling was not kept up from 1929 down to 1932, and it was not resumed in 1932, which was a special campaign, along slightly different lines than the Shredded Wheat Company had done. It was a house-to-house sampling campaign, instead of having grocers put it in the baskets, as they used to do. It was not a full-sized package but a sampling package, with two biscuit in it, an individual sample, two biscuit to the carton. In one very limited locality, in the neighborhood of Fitchburg, Massachusetts, we had full-sized carton samples. Other than that, 90 per cent. of the sampling was individual-sized samples.

In Fitchburg, Massachusetts, there was an idea that there were some particular stores whose good-will had been lost for some reason I do not know; and the National Biscuit field representative recommended that we try it out, with the idea that it might be changed in the next sampling campaign. It was experimental. We bought from the groceries in Fitchburg, which was a more expensive form of sampling than the other; depending, of course, entirely on what results were secured.

Advertising expenditures on Niagara Falls Shredded Wheat are kept separate from the biscuit line of the National. There is no intermingling or overlapping of those expenditures in any way whatever. They were different crews. Our people had absolutely nothing to do with it, except to warehouse them, to be called for by these sampling crews. But the direct deliveries are made as joint, common deliveries. The same trucks or wagons pick up the cracker line and Shredded Wheat and make those deliveries.

Since the National Biscuit Company took over the Shredded Wheat Biscuit line, that product has mostly been distributed direct by the National Biscuit Company, rather than through jobbers or wholesalers; but,

of course, in some instances, we ship direct from the National Biscuit Company to the warehouse of the wholesaler or jobber. The great bulk of our delivery is now direct. There never was a time when the jobbers were absolutely cut off for a while; except that the effect of the taking over of the Shredded Wheat Company by the National Biscuit Company would naturally eliminate the jobbing business. If any jobber wanted to buy, however, he could always do it. In fact, we went after it. Not only could they do it, but we wanted it; that is, the two methods of delivery; our own trucking people and the jobber. The effect of our own delivery has naturally been to cut off the jobber in communities where we have quick service and delivery, if they want it. The jobbers may come and take orders here. I do not know how often. In that way, jobbers would regard our delivery service as in direct competition with them. I do not know whether they would consider it better service than their present service, or quicker; but they certainly would consider it competition.

I know, in a vague way of the marketing by the National Biscuit Company of a type of biscuit that is even smaller than the Kellogg Biscuit; that something of the sort was done some time back, I believe, for the restaurant trade; just as we bring out a Uneeda Biscuit for the restaurant trade and a graham for the restaurant trade. I do not know whether they are still on the market or not. I would not be surprised if Mr. Clarke told me that he bought some at the Union Station in Washington, within the last six weeks or a month, or that he could not. I do not know whether the National encourages or pushes the sale of its biscuit in individual cartons to restaurants. I am not in the sales end of it. All I am interested in is how much money we can make.

RE-DIRECT EXAMINATION.

THE WITNESS: What I have stated on cross-examination about the distribution of Shredded Wheat going away from the jobber and being done by the company would naturally result in a decreased volume by any jobber, in Shredded Wheat. It would be a rare exception if it did not. It would have to be some jobber who was located or had his business in such an isolated section that he practically controlled the business. I do not know of any such section in the country, today.

For instance, the effect of the National Biscuit Company's policy in the last three or four years would be to appreciably diminish the volume of a jobber in New York City who has been accustomed to handling Shredded Wheat in large quantities. With the National doing its delivery direct, I cannot see how the jobber could do any business, especially in New York City.

It is a fact that the National Biscuit Company, while still selling some Shredded Wheat through the jobber, does distribute it to the retail grocers direct, along with its crackers and other merchandise; so the National Biscuit salesmen who visit grocers and take orders for crackers also take orders for Shredded Wheat, just as if it were any other item of biscuit.

It is a fact that Shredded Wheat is now sold in bundles of twelve packages, and a grocer can buy a dozen packages without having to buy a whole case. Twelves, however, are not sold through jobbers. I do not say a jobber could not get twelves. I do not know of any reason why he could not have them if he wanted them; but I could not see how would want them.

RDQ. 70. Plaintiff's Exhibit No. 149 shows that, beginning in 1928, the curve of sales in cases appears to be declining. To what do you attribute that?

A. Well, there is no question; it is competition.

RDQ. 71. Competition of other cereals, do you mean?

A. Competition of Kellogg's Shredded Wheat, of which I am well aware.

RE-CROSS-EXAMINATION.

THE WITNESS: If Mr. Weinstock testified this morning that some of the falling off was due to competition with other cereal products made of wheat, I would have no way of contradicting that testimony, except that up to 1928 or 1929, along about that time when we acquired Shredded Wheat, there were just as many good cereals on the market as there are today. I do not see why competition of those same cereals or similar cereals—because there is a new one coming in and an old one going out all the time—could have had any more effect in 1928, 1929, and 1930, than it had previously.

I do not know whether the Kellogg Company was putting out its shredded wheat when the National took over The Shredded Wheat Company or not. That acquisition was at the end of 1928, 1929 being the first year that it was operated as a National subsidiary. That is my recollection.

I did not know that there was a suit pending by the Kellogg Company against The Shredded Wheat Company, Inc., prior to and in the early part of the year 1928, until after we had acquired Shredded Wheat, when I knew it in a very vague way. The only way I found out about it was that we had to make payments to a firm of attorneys. If we had not had to do that, I would not have known anything about it.

The reason for the National putting out bundles of twelves is not necessarily that wholesalers would break up the thirty-sixes and distribute them in small

lots to customers. In fact, it is not the prime reason, as I understand it. I do not know about the wholesalers selling to retail merchants in less than thirty-six-package cases. I know that our reason for putting it out in the smaller package was so that the smaller stores would have fresher stocks.

I do not know whether the jobber would break the case; but, if he did, then our service would be somewhat paralleled by the wholesaler; except that he would destroy the keeping qualities by breaking it up. The case helps to preserve the packages. I would not think that the wholesaler would break a case and sell twelve of them if the other twenty-four were going to remain on his shelves very long.

I would have to refer to my records, but it is my recollection that, in the year 1932, there was a falling off of about 248,000 cases over the preceding year in the sale of Niagara Falls Shredded Wheat, according to Plaintiff's Exhibit 149. If that figure is about 11 per cent., I guess it is right.

WILLIAM E. MacKAY.

Deposition taken in New York January 11, 1933.

Direct Examination.

The Witness: I am a law student connected with the legal department of the National Biscuit Company.

I am a user of Shredded Wheat and have had occasion to order it in a restaurant recently. About nine-thirty on the evening of October 3, 1932, I went into a restaurant called the Hanover Cafeteria, on Lexington Avenue between Fortieth and Forty-first Streets, and asked for Shredded Wheat. I turned my back and looked around the restaurant. When I turned around again, the clerk was opening this package of Kellogg's and turning out the Whole Wheat Biscuit.

I said, "That is not Shredded Wheat." He said, "Yes, this is Shredded Wheat." We had some other conversation. I said, "That is not the kind of Shredded Wheat I know." He said, "Yes, this is Shredded Wheat. It is a new kind. It is much better than the old." That is the substance of our conversation. I accepted the product. The carton now before me is the carton that the biscuit was taken out of at that time.

(Plaintiff's Exhibit 151.)

CROSS-EXAMINATION.

THE WITNESS: When I said that, I meant that it was not Shredded Wheat. I did not mean by that to tell the clerk that it was not a wheat product that I got. I simply meant to tell him that it was not Shredded Wheat—at least, what I had in mind when I asked for Shredded Wheat. I really do not know what the Kellogg product is. I have looked at it, and, judging by the appearance, I would say that it was a wheat product. I do not know how it is made. I do not know by appearance whether there are shreds in it or not. I know that our product is made of shreds. I do not know how the Kellogg product is made. Judging by the appearance of it, it looks that way. It is a noticeably shorter biscuit than the Niagara Falls biscuit; but it is generally a pillow-shaped biscuit; it is similar.

I knew what the clerk was trying to convey to me when he said that this was a shredded wheat product made by a new concern. He was trying to tell me that it was physically a shredded wheat biscuit, but that it was made by the Kellogg Company.

Sometimes I go into a restaurant at night and order Shredded Wheat before going to bed. When I am handed any of the Kellogg's products, it is not my practice to say "Oh, that is not Shredded Wheat." I might do it, though. Being associated with the Na-

tional Biscuit Company, I might engage the attendant in conversation about it. I would try to boost my own company's product. I would not go into any statement that the Kellogg's product is not a shredded wheat product, I think, with an attendant or waitress, because that sort of conversation does not usually mean much to them.

This restaurant was a cafeteria. You go up to the counter and ask for things at the counter. He got the package from underneath the counter, I believe. I turned around, and, when I turned back again, he was opening this package. That was in my full sight. I knew right away that it was not the Niagara Falls Shredded Wheat that I had been accustomed to getting.

I have known that the Kellogg people had a package like that on the market since June of 1932, when I became connected with the legal department of the National Biscuit Company.

I had another experience in the same place in just the same way, when they took the package from under the counter and started opening it up. In that case, I ate the Kellogg product. It tasted harder, more brittle, and not so palatable as the Shredded Wheat. I do not remember exactly what it tasted like. I remember it was harder and more brittle, as if it were baked more and more brittle.

CHARLES T. WARD.

Deposition taken in New York, January 11, 1933.

Direct Examination.

The Witness: I am president of Francis H. Leggett & Company and have been connected with them for forty-two or forty-three years. They are in the wholesale grocery business, being wholesale distributors of food, also manufacturers. We have been, during that entire period, distributors of cereals and other foods.

I am familiar with the product known as Shredded Wheat, having known it about thirty years. Our house has handled it during that time. The term Shredded Wheat means to me a proprietary item of some sort, or brand, owned by the Shredded Wheat Company formerly, I think, and now by the National Biscuit Company.

By the term "proprietary article" I mean to convey some item that is owned individually by somebody. I have been familiar with the appearance of the Shredded Wheat package and with the article itself.

I recognize the package, Plaintiff's Exhibit 1, and the contents thereof. I would say that, during my knowledge of it, the appearance of the biscuit known as Shredded Wheat Biscuit has remained substantially the same as I see it in this package, in every way.

We have orders for this item, in my experience, from time to time. They ask for it as Shredded Wheat. When a customer asks for Shredded Wheat, we supply that item, Shredded Wheat, Plaintiff's Exhibit 1, the only one I know of, that Shredded Wheat right there.

From my experience as a merchant in dealing with the purchasing public, I would say that, undoubtedly, the expression "Shredded Wheat" has a definite meaning to the public generally. It means that Shredded Wheat there, Plaintiff's Exhibit 1.

I am familiar with the fact, also, that the Shredded Wheat Company has extensively advertised the product for a good many years, and the effect of that advertising has been to identify it as a proprietary article.

In my opinion as a merchant, I do not think there is any question in my mind about the fact that the advertising and the sales of Shredded Wheat, as I know it, resulted in identifying Shredded Wheat as a proprietary article.

I am slightly familiar with the Kellogg's Whole Wheat Biscuit. We carry that, also. I recognize the package, Defendant's Exhibit 6. If the name were obliterated on that package and I could see only the picture on the package, I would think it was more or less of an imitation of Shredded Wheat.

Q. 33. Look at the biscuit contained in Defendant's Exhibit No. 6, which is the Kellogg's biscuit.

A. Yes.

Q. 34. What do you say as to the appearance of that biscuit, as compared with the Shredded Wheat in Plaintiff's Exhibit No. 1?

A. Well, do you mean the impression it gives me?

Q. 35. Yes.

A. Or the physical difference?

Q. 36. No, the impression you get from it.

A. Why, I would think it was made to imitate Shredded Wheat.

THE WITNESS: It is a similar shape, a little different, and of similar appearance as this pillow-shaped biscuit, and is made of what appears to be threads or shreds of wheat. It is a little different in size.

CROSS-EXAMINATION.

THE WITNESS: I would not identify Kellogg's product, Defendant's Exhibit 6, with what I know as Shredded Wheat Biscuit. I do not think I am qualified

to answer as to whether it is just as much a shredded wheat biscuit as this product from Niagara Falls. Do you not think it would take an expert to tell that?

I have talked to Mr. Vilas about this before I came upstairs. We discussed this matter of proprietary products in general but not so carefully before I came up. Mr. Vilas asked me a lot of questions about it. It means only the Niagara Falls product to me, Plaintiff's Exhibit 1.

Shredded Wheat means nothing to me but that product right there made by those people. I could not possibly identify it except by that.

If people asked me what a shredded wheat was, I could tell them it was a biscuit made of wheat. I could not tell them it was made of wheat run out into shreds, because I have never seen it manufactured. I would identify it with Plaintiff's Exhibit 1, in my mind; that package right there. That is the only one, in my mind, Plaintiff's Exhibit 1. That (referring to Defendant's Exhibit 6) looks like an imitation to me. By that I mean I think it is something calculated to deceive whoever buys it. I cannot identify that as a wheat product. I cannot look at a thing and say "It is made out of wheat." I am not a cereal expert. How can I say that.

I say the product in Plaintiff's Exhibit 1 is Shredded Wheat. I have no doubt about that being what they say it is, from the long period of advertising of the product that I have seen in the magazines, of their advertising. It is good advertising.

XQ. 58. Have you any doubt about its being shredded?

A. Well, if that is what you call shredded, it is shredded.

XQ. 59. Does not the word "shredded" mean anything to you?

A. As shredded wheat, yes. If you associated "shredded" and "wheat," there is only one thing that

comes to my mind, and that is that biscuit right there, Plaintiff's Exhibit 1. If I went into a hotel or restaurant and asked for Shredded Wheat, I would expect that thing right there, that I have seen for years.

If we got an order for Kellogg's Shredded Wheat, we would say that we do not have such a thing as Kellogg's Shredded Wheat. We would not argue with anybody. In the way we do business, if a man would order a case of Shredded Wheat, he would get that, Plaintiff's Exhibit 1. If the salesman were taking the order, he would not take that for Shredded Wheat. Any of our salesmen would know better. But, if an open order came to us for Shredded Wheat or Kellogg's Shredded Wheat, they would get that for Shredded Wheat, Plaintiff's Exhibit 1. In Kellogg's, we do not have any such thing as Shredded Wheat; it is a Whole Wheat Biscuit.

If an order came to us for Kellogg's Shredded Wheat, if it was an order for Shredded Wheat, and we thought that they wanted Shredded Wheat, that is what they would get, Plaintiff's Exhibit 1.

If an open order came to us for Kellogg's Shredded Wheat, we would undoubtedly send it back. I would ask him if he wanted Kellogg's Whole Wheat Biscuit or Shredded Wheat. That is probably what would happen. Until he returned the order to me as Kellogg's Whole Wheat, it would not occur to me that he would want the Kellogg product. If he said Shredded Wheat, including Kellogg's, I would think he was mistaken and wanted Shredded Wheat.

If I had the product as named on Defendant's Exhibit 5 for identification in stock and an order came for Kellogg's Shredded Wheat, I would deliver, undoubtedly, Shredded Wheat; no question about it. That is Kellogg's Shredded Whole Wheat Biscuit. Now, if a man asks for Shredded Wheat and associated the name

of Kellogg or any other name with it, I would think they wanted that, Plaintiff's Exhibit 1. And we would go back and find out what he had been getting. If it was Shredded Wheat that he used before, that is what he would get.

If we were carrying Kellogg's Shredded Whole Wheat Biscuit, and he would send in for Kellogg's Shredded Wheat, we would not fill that order. We would think he was mistaken somewhere in his mind.

I would imagine we carried the Kellogg's Shredded Whole Wheat Biscuit at some time. I have no idea. I am president of Francis H. Leggett & Company. There are thousands of orders come in there. I do not know every order that comes in. But, if there was an element of doubt as to what the man wanted, we would not ship it. If a man said Kellogg's Shredded Wheat, we would think he had that in mind, Plaintiff's Exhibit 1; so we would raise the question to find out. No experienced salesman of our own would send in an order for Kellogg's Shredded Wheat. If he wanted Kellogg's Whole Wheat Biscuit, that is what he would specify.

I do not know how many different brands of corn flakes we carry. I know there are several. We have our own brand, Premier Corn Flakes. It never has occurred to me that there was anything unfair about that, as far as the Kellogg Company was concerned.

I do not know that, in ninety-nine cases out of a hundred, when people ask for corn flakes, they mean Kellogg's. I will tell you, for your own information, that probably the first people to use the word "Flakes" in this country were the Leggett & Co. people. It used to be known as *rolled oats*, and we coined the name, or so we thought, as "Oat Flakes." So Kellogg's does not have any priority to the word "flakes." Corn flakes simply means a cereal.

The Kellogg Company may have tried to establish proprietary rights in toasted corn flakes in suing the Quaker Company. I have never seen any papers on it that I know of.

I would say there are more brands of corn flakes today than there were ten years ago. Among certain people, the non-proprietary name of the Uneeda Biscuit is soda crackers. I suppose some people call it biscuit. Oatmeal is not referred to as rolled oats by anybody who knows the difference. If you take an oat and roll it, it becomes what we call a flake; whereas oatmeal is oats ground up, some fine, some coarse, and some medium. It is not sold in a meal.

The only name that is associated with Plaintiff's Exhibit 1, in my mind, is the proprietary name, Shredded Wheat. If I were in America and asked for a non-proprietary name of Uneeda biscuit, I would say that it was a soda cracker or a saltine cracker, I guess; but, if I were in England, I would probably call it a biscuit. Soda cracker would be a non-proprietary name for Uneeda Biscuit, a name that everybody or anybody would use. I cannot suggest any name like that for Shredded Wheat Biscuit. I know it simply as Shredded Wheat. That is the only name for it, for over a period of thirty years, at least. During that time, I have never known of any other manufacturer of shredded wheat biscuit, except the Niagara Falls Company. I never heard of the Ross Biscuit. I do not think I ever heard of the Williams Biscuit. The reason I say Plaintiff's Exhibit 1 is Shredded Wheat is that that is the only concern I have heard of. Based upon my experience, I should think they have a monopoly on all biscuit in that form. The competition of corn flakes is quite different. There is no comparison between corn flakes and shredded wheat. Shredded Wheat is single. There are hundreds of brands of corn flakes.

I know only one manufacturer of Shredded Wheat; that is the Shredded Wheat Company of Niagara Falls. Their successors are still making it. Because no other manufacturer has made that for a number of years, I would not think that any other manufacturer could properly make it or lawfully make it.

I think we handle the other Kellogg's products, like corn flakes. To be positive, I would have to go and see the stock; but I will say yes. I am pretty sure of it. I will change that and say we do handle them, Kellogg's Corn Flakes.

I would also say that Francis H. Leggett & Company handle some of the other Kellogg products: Whole Wheat, Bran, Pep and several like it.

To my knowledge, I think the Kellogg Company have been quite unfair in their dealings with the grocery trade. Many years ago, we, like others, had a corn flake; and they sent out bulletins, at a time when a man named Murphy had charge of their sales, saying it was unfair for another jobber to have a corn flake. I think that was decidedly unfair. It did not leave any feeling in my mind; but I think it was unfair. I did not, at that time, regard it as wrong for wholesalers to be, at the same time, pushing a manufacturer's brand and a private brand of their own. All the people in the trade would not agree with me on that, and I do not want them to.

We carried Niagara Falls Shredded Wheat at that time. We still sell it. I could not tell you what the policy of the National Biscuit Company is as to distribution direct. I know we handle it, like many other jobbers. I do not know anything about their cutting the wholesalers out by distributing it to the retail trade direct or giving better service. I do not know what the sales of Niagara Falls Shredded Wheat are, as compared with what they were. It could have fallen off

twenty-five or thirty per cent. or increased the same amount, and I would not know it.

There is not usually a special type of jobber or wholesaler who services hotels and restaurants. Our men, some of them, have both hotels and restaurants. They generally handle that trade in the same way and at the same time. A man might call on a retail grocer at this corner and there might be a hotel customer right around the corner. I know that of my own personal knowledge

I do not know whether Francis H. Leggett & Company carry either the Kellogg's or the Niagara Falls Shredded Wheat in individual cartons. If there is a demand for Shredded Wheat in the individuals, we surely have it. I do not know whether we carry them or not; but, if there is a demand for it, we do carry it. We carry everything there is a demand for.

I have never identified Kellogg with Shredded Wheat, by any means. I have known of Kellogg's Whole Wheat product, I would say, just a few years. If anybody asked me now whether or not more than one concern was making this shredded wheat biscuit, I would still answer that there is only one Shredded Wheat, in my opinion. I would have to answer there is only one known as Shredded Wheat. My answer still would be that there is only one concern making shredded wheat biscuit.

My idea is that the words "Shredded Wheat" are a proprietary trade-mark; although the package is marked " "Reg. U. S. Pat. Off."

I do not know anything about any falling off in demand for Shredded Wheat. I would not know if it had increased or decreased thirty per cent.; although, if there was any decided falling off of Shredded Wheat, the probabilities are that the buyer of that department might say something to me about it.

I do not think I have ever seen Kellogg's Whole Wheat Biscuit advertised. I study the grocery trade business pretty carefully; but I do not think I have ever seen any newspaper or magazine advertisements of Kellogg's or any in grocery stores or any car cards or store cards.

I have seen the Niagara Falls Shredded Wheat advertised in magazines. I do not think I have ever seen any car cards or store cards or anything like that. I may have; but I do not think I have ever seen it in any store. I am not very apt to go around in retail stores.

There is no objection in our concern as a general policy, to have more than one kind of a proprietary product, as many kinds as there is a demand for. I would not think there was an objection among the grocers. I would not be surprised if grocers had testified here that they would like just one kind of corn flakes, one kind of white flour, and so forth. I think they would be very foolish to testify that way, if there was a demand for more than one. I think a man who is a good merchant is foolish to take that stand, if there is a demand for something else. I think that, as a good grocer, he should welcome any additional brands that there is a demand for.

I do not favor monopoly. I do not consider Shredded Wheat as a monopoly. If there is only one concern entitled to Shredded Wheat who may manufacture it and distribute it, I do not think that is a monopoly, Shredded Wheat. I think they are entitled to it. Shredded Wheat means only one package, to me, only one thing, and that is Plaintiff's Exhibit 1.

I would not consider it an absolute monopoly if the National Biscuit Company would be the only concern in the country that could make this pillow-shaped article and call it Shredded Wheat. I would consider

this Kellogg product, put out under the name of Whole Wheat, as an imitation. I would think that it is unfair for them to put it out as shredded wheat, Whole Wheat Biscuit. I do not think there is anything unfair as to the name, Whole Wheat Biscuit; but I certainly do with respect to the style of package. I think that is a very deliberate way of imitating Shredded Wheat. If they did not, they would have put it in some other shape. They must have thought there was some value to putting it out that way.

I would have to see both our package of corn flakes and the Kellogg Company package of corn flakes to know whether they differ in shape. If they were or were not, it would not make any difference to me. I would not regard that as an imitation of anybody else's package. I do not think that makes very much difference.

I would not call the Kellogg Whole Wheat package a fair package. In the second place, it is, in my opinion, an imitation package. If Kellogg had something good, he would give it an entirely different name. I could suggest a package for that product other than a rectangular package. For instance, put it in a round package, if you want, like the Muffetts. You could put them in that. That is one shape. It would not be so close a following of that one, the first one there, Plaintiff's Exhibit 1.

I have heard of such products as shredded codfish and shredded coconut. The original shredded codfish was Beardsley's. Shredded codfish is codfish drawn into small shreds, torn apart, in bulk and in packages. Shredded coconut is the same thing, torn apart. Neither one of them would resemble that, however, as a shredded product. You can call them shreds if you want to.

RE-DIRECT EXAMINATION.

RDQ. 215. Let us just go a little bit further in comparison of these packages. In response to Mr. Clarke's cross-examination, I think you said that you still regarded Defendant's Exhibit No. 6 and the biscuit in it as an imitation of Shredded Wheat. Now, you were examined at length upon the question of fairness and unfairness. I ask you to look at Plaintiff's Exhibit No. 147. I call your attention, in the first place, to the window on the front of it, showing the ends of the biscuit. I call your attention to the legend on one end of the package, "Kellogg's Whole Wheat Biscuit; Shredded Wheat in its most delicious form," and, on the other end, "Kellogg's Whole Wheat Biscuit, a shredded wheat product." What do you have to say as to the fairness or unfairness of that package, as compared with the plaintiff's package?

A. Taking in both sides of the panel and the window front, and the printed statement and the two sides there, I think it was intended to create the impression that it was the original Shredded Wheat, like that that you have over there, Plaintiff's Exhibit No. 1.

RE-CROSS-EXAMINATION.

THE WITNESS: I would not attach any significance at all to the word "Kellogg's" on the package. I would assume that you follow it with significance as to what I just testified to there as Shredded Wheat.

With regard to a distinction between the imitation and the thing itself, I would not look at something that was not an automobile and tell you that that was an automobile and say that it was an imitation. If it were a child's automobile and it looked like a big automobile, I would call it a toy.

With regard to Shredded Wheat Biscuit, I have always known that one, Plaintiff's Exhibit 1, as Shredded Wheat. It is what I consider a proprietary name owned by the Shredded Wheat people. I do not know Defendant's Exhibit 6 as Shredded Wheat; although I do say that the shape and the wording here would tend to deceive me that it might be the Shredded Wheat that I have always known as Shredded Wheat. I say it looks like an imitation. I would not think it was the same thing as Shredded Wheat. It certainly does look a little different to me. The shape is different, I think. And I think you will find that yours is toasted on both sides, and Shredded Wheat is not. In those respects, I regard it as tending to make one think it is Shredded Wheat, which, in my opinion, it is not.

If I got hold of the specifications of machinery, with my manufacturing ability, I could turn out a biscuit which would be a shredded whole wheat biscuit; but I would not do it that way. Legally, if I could do it. I do not think I could turn out a shredded wheat biscuit. I would not turn that out and call it shredded wheat biscuit. I can assure you of that. Even if I could, I would not.

Mr. Clarke says that the product in Defendant's Exhibit 6 is not an imitation, that it is shredded wheat biscuit. I will not concede that it is shredded wheat. If anybody asked me what a shredded wheat biscuit is, I would have to tell them that that is the only Shredded Wheat Biscuit that I know, Plaintiff's Exhibit 1. I base that on at least twenty-five or thirty years contact with that item. At one time, I was a buyer of Shredded Wheat. If anybody came to me with that and told me that was Shredded Wheat, I could not believe it, referring to Defendant's Exhibit 6.

RXQ. 235. But it looks like an imitation of shredded wheat, you say, and not shredded wheat itself?

A. I would say it was an imitation of Shredded Wheat.

RXQ. 236. By "imitation", you could conceivably mean the same thing under another name?

A. No, I would mean something that was gotten up tending to deceive, to mix the buyer up.

RXQ. 237. Suppose I told you frankly that the Kellogg Company was trying its best to make a shredded wheat biscuit; would you doubt that it could do it?

A. Well, I do not know whether they could or not. I suppose the verdict in this case will show whether you can or not. But I will say that, according to my notion, I should think they could not call it Shredded Wheat. And I think, if they called it Shredded Wheat, they were trying to get the benefit of what I call Shredded Wheat.

That one there, Plaintiff's Exhibit 1, is the only one that I know as Shredded Wheat, by seeing it, by eating it, by seeing it advertised, and by buying and selling it, and, when that comes along, Defendant's Exhibit 6, I cannot place that as Shredded Wheat. I say it looks like Shredded Wheat. It would not fool me, between the two, for a moment. Assuming that that is Kellogg's, I would know that that was not, to my mind, Shredded Wheat, that I have learned after all these years of contact.

RE-DIRECT EXAMINATION.

THE WITNESS: Kodak is a camera made by the Eastman people. If somebody else, a stranger to Eastman, manufactured a camera and called it a kodak, it would not, to my way of thinking, be a Kodak. I know what a Cadillac is, a kind of automobile. If somebody else should make a car that would look like

a Cadillac and should call it Cadillac, it would not, to my mind, be a Cadillac.

Somebody might make a biscuit out of wheat and make it look like the biscuit, for instance, in Defendant's Exhibit 6, the Kellogg package here. In my opinion, however, it would certainly not be Shredded Wheat.

The biscuit taken from Plaintiff's Exhibit 1, Shredded Wheat, has, to the best of my recollection, always been of similar appearance, the same size, shape, and appearance. That has been the same for many years, as I can remember it.

RE-CROSS-EXAMINATION.

THE WITNESS: Kodak is a camera identified with Eastman. If I would think of Kodak, I would think of two things: Eastman and camera. If I contemplated going into the camera business, I could call my camera a Ward's camera. I think I would go to the same lengths on Eastman. I would call it Kodak. And I would call it Filmo; but, if either of those two were meant, you would not call them the one thing. I know a Kodak is a camera, and I know it is an Eastman's Kodak, but it is a camera. If you would say you had your Filmo, I would know you were talking about a camera made by the Filmo people.

I think the National Biscuit Company has established a name for their own product. They have established "Uneeda" for their soda cracker. I would look upon Shredded Wheat as a descriptive name. It was a name which was intended to be a descriptive name. I think, originally, in the minds of the people that started that, they had coined the proprietary words "Shredded Wheat". I think Shredded Wheat is a proprietary brand. A descriptive name for Plaintiff's

Exhibit 1; you have it, Shredded Wheat. I think it is a proprietary brand, Shredded Wheat. The name is descriptive, that it is made of wheat. I think you could coin a descriptive word for that. Yes, you could coin another proprietary word. For a descriptive word, I would have to go to work and do a lot of things if I wanted to establish that as Shredded Wheat.

Leaving off the trade name or trade-mark, I cannot suggest any other descriptive name for that product.

RE-DIRECT EXAMINATION.

THE WITNESS: Except that it is made out of wheat. It does not tell me what kind of wheat, either. It might be soft or hard; I do not know.

RE-CROSS-EXAMINATION.

THE WITNESS: It might be whole wheat, or it might be wheat with something taken out. It could not possibly be wheat in shredded form. I do not know what process it goes through in the making of it. I have not the remotest idea.

DEFENDANT'S EXHIBIT UNDER RULE 46.

A—Proceedings in the Patent Office	III	2021	Not printed	

Proceedings in the United States Circuit Court of Appeals are included in Vol. 3-A

JOSEPH F. BECK.

Deposition taken at New York, January 13, 1933.

Direct Examination.

The Witness: I am connected with the advertising business, with the Federal Advertising Agency. I am in no way connected with the National Biscuit Company and never have been. The Federal Advertising Agency is not at the present time connected in any way with the National Biscuit Company. My only interest, let me say, would be the fact that I know both Mr. O'Brien and Mr. Ed Hughes, both in your sales division.

I am quite familiar with the product known as Shredded Wheat, also with the package; and I have used it, I suppose, for probably twenty years. I have been a user and purchaser of Shredded Wheat. It is always on the shelf in the pantry at home. As I do a lot of traveling, I suppose I average three or four Shredded Wheat breakfasts a week, and also at home.

I recognize Plaintiff's Exhibit 1 as the Shredded Wheat package, and, also, the individual one. I also know the color scheme when I see it, and so on. I recognize Plaintiff's Exhibit 21 as the individual package.

The expression "shredded wheat" does not convey to my mind any other product at all. Shredded Wheat, to my mind, is a trade-marked brand, and that trade-marked brand I connect with the product, Shredded Wheat Biscuit, made in Niagara Falls.

About three to four times a year, I make a complete round on a campaign of merchandising advertising, for a number of our clients. That is a trip that usually takes me to Chicago at my first stop, or, possibly, to St. Louis, and then to Kansas City, and Fort Worth, Tulsa, New Orleans, Atlanta, and back home. I have made that complete circuit three times this past

year; and then, I would pick up a piece of it and have been just in connection with one particular account alone for just about three years.

In the course of my travels, I have had occasion to order Shredded Wheat at hotels and restaurants regularly; usually, the better class of hotels, where the individual package is brought out.

As to my experience, while traveling, with respect to ordering and receiving Shredded Wheat, I first took real notice of it, I believe, in July of last year, on one of these complete circuits, in Waco, Texas. I believe it was the Hilton Hotel, or maybe it was the Waco. It is one of that Hilton chain of hotels, which are all throughout Texas.

I took particular notice of that incident, because it was in one of the chain hotels; and I figured it might be well to call that to Jim O'Brien's attention and see that he got it cleared up.

I ordered Shredded Wheat for breakfast; and the waitress brought me, not the Shredded Wheat package that I insisted on, but she came out with the Kellogg package, with the top off, a package like Plaintiff's Exhibit 71. This was in a little sort of coffee shop, a little restaurant connected with the hotel. I was seated at a table. I ordered Shredded Wheat. I do not recall whether Shredded Wheat was shown on the menu. I usually do not look for it there. I have my mind made up as to my regular breakfast. The waitress brought a package like Plaintiff's Exhibit 71. I had no conversation with her at all, not a thing, not in that particular case.

That was not the first time this had occurred to me. This happened right along. As I say, the only reason I took particular notice of that was that it was a chain hotel. I thought, if other people were experiencing the same thing in other hotels of that chain,

Mr. O'Brien was missing a pretty good bet, and he might want to look into it and get the business he was asking for.

This was not the first time. That is the only time I really took particular interest in the fact, because it was a chain of hotels. I do not know how many times it had happened to me before. Any number. Let me say about twenty or twenty-five times, that I know of; not in any specific way; but let me say that I do know that it has happened about that number of times; starting usually about Kansas City. That is usually my first or second hop.

After my experience in Waco, Texas, I reported it to Mr. O'Brien. I said that he probably would want to look into it and see that they were getting the business that they were entitled to. He did look into it; but I do not know what happened.

On this last trip, I think our first stop was Chicago on October 31, 1932. I spent a couple of days there and went on to Kansas City. We were there about the third, fourth, and fifth, and then to Tulsa, at the Mayo Hotel in Tulsa. I am pretty sure it was the seventh of November.

I, along with two other fellows who were having breakfast, ordered Shredded Wheat, in the little coffee shop right off the main lobby. I just asked for Shredded Wheat, and the package that was brought out was that particular Kellogg package, with just the top off, like Plaintiff's Exhibit 71.

I remarked to the waitress that I had ordered Shredded Wheat and that was all that came back to me. Her little comment was "This is Shredded Wheat." So I let it go at that. There was no time for arguing with her. We were in a hurry. That happened at Tulsa, I believe on Sunday and Monday, two days. The second day, I merely ordered Shredded

Wheat and had the idea that I would get the same package with a different waitress, and it did happen. I said nothing more about it. I did remark to both my traveling companions that this was just another one of those cases of brand substitution, a well-advertised trade-marked brand being substituted for another well-advertised one. We were all in the advertising business, and that was our interest in it.

The next stop was at Forth Worth, at the Blackstone Hotel, I believe, on November 9th. They also have this little coffee shop, counter, and tables set up there right off the lobby. Again I ordered Shredded Wheat, and this Kellogg package was brought out. Nothing was said about it. One of the reasons I said nothing was, of course, that the Blackstone Hotel is a favorite of mine; and I would not say anything that might involve any particular young lady or anybody else in the hotel. That was the only time at the Blackstone.

We hopped out of there in a hurry. The next stop was Roosevelt Hotel, New Orleans. We had adjoining rooms, and our breakfast was served in the room. I ordered Shredded Wheat, and the waiter brought up the entire breakfast and an unopened package of Kellogg's, a package like Plaintiff's Exhibit 71. Similar to that. I made no comment about it to the waiter; but it involved a discussion of about ten minutes with one of my partners there.

I did not, on any of these occasions or on any occasion when I ordered Shredded Wheat and the Kellogg package was delivered to me, have occasion to look at the menu card. I knew what I was going to order. As I say, for years I have just had this same idea of about three breakfasts of Shredded Wheat a week. I follow that up every other day, and sometimes I go three or four days in a row with it. I rarely look for Shredded Wheat on the menu; but I know what

I want and I look for that particular package, and I want to get that particular delivery; or, at least, I seem to have a taste for Shredded Wheat.

Those are the specific cases that I remember. I had other cases, but I made no note of them. In fact, the only memorandum that I have of these is this little memorandum right here, which has my expense account and other things on it.

I mentioned it to Jim O'Brien in New York. He said he would like to have me come down and talk to him about it, would like to have the case straightened out down there and get his sales department to work on it. In that connection he introduced me to Mr. Vilas. He wanted to know if I would tell my story to you, which I did. That is the occasion for my being here.

CROSS-EXAMINATION.

THE WITNESS: In all the cases in which Kellogg's was served to me, it was in the individual cartons. Although I might not be able to tell, I doubt very much if it was served in bulk; although I suppose that is the way it goes in lunch places.

In each case when the Kellogg package was brought to me, I recognized right away that it was not the Shredded Wheat package of Niagara Falls, yes. I ate the biscuit in every case where the Kellogg product was served to me. I must say there is a slight difference, in my opinion, and I do not know why, but I will also say that I did not finish the two biscuits in any of the cases. That might also happen with Shredded Wheat.

XQ. 52. In your travels, when you asked for Shredded Wheat, how often were you served the Niagara Falls product?

A. I would say that, in the last year—I have a pretty good idea, just in my travels, in my trips around,

in the last year, say three complete circuits, and all that sort of thing, I would say that, in about sixty per cent. of the cases, I was served Shredded Wheat—no more than sixty per cent.

XQ. 53. And, in the other cases, you were served Kellogg's Shredded Wheat?

A. In the other cases, Kellogg's Shredded Wheat, in that individual package—just in that individual package.

THE WITNESS: I would not say that I would have any other name, any solution for that part of it, other than shredded wheat. Just Shredded Wheat is the only product I ever knew.

If somebody asked me what a kodak was, I would say that was a special Eastman name for camera; and, if somebody asked me what Uneeda Biscuit was, I would say that it was a special or proprietary name for soda cracker. If somebody asked me what a non-proprietary or non-trade-marked name for this product that I had, I would say it would be a shredded wheat biscuit; that would be my idea.

Another name I can give for that product, I would say a whole wheat biscuit, in shreds, whole wheat biscuit shredded, in shredded form. Other than that, or shredded wheat or shredded wheat biscuit, I do not know what it would be. I was very, very much surprised when the waitress, in the case I referred to, said, "Well, that is shredded wheat." I was surprised because of the fact that we were in the merchandising end of the business; and that they, after the amount of money which has been put behind Shredded Wheat—it is the biscuit I wanted—the trade-marked product, Shredded Wheat Biscuit, and, to think that, after the amount of money and time they had spent on the product and the advertising and sales promotion work that had been done, all that money that had been spent on

the public, in getting the public acquainted with their service and getting it over to the public, you see.

It did not occur to me, when the waitress said that that was shredded wheat, that she meant that that was a product made out of wheat in shredded form. Shredded Wheat means only one thing to me. I was astonished when the waitress said, "This is shredded wheat."

I have heard of the secondary meaning of a thing. I know that there is what is supposed to be a secondary meaning; in which the first meaning is that it means the product, and the secondary meaning is that it is a product made at Niagara Falls. I have heard of a double meaning or secondary meaning. I certainly do know that this waitress was talking to me about the secondary meaning or double meaning; but I should think that, after all these years, Shredded Wheat, to that young lady—or, at least, to the manager or someone there, would mean the Shredded Wheat product made at Niagara Falls.

If this young lady had brought me a soda cracker and said, "This is shredded wheat," I would have said, right away, "This is not shredded wheat," surely. And I suppose, to some of these girls, any shredded wheat biscuit to them would be a shredded wheat product. To me, shredded wheat biscuit is made out of wheat, shredded, and put into biscuit form and put up by the Shredded Wheat Company of Niagara Falls. I did not try, in any sense, to tell these people that this was not shredded wheat made by the Kellogg Company at Battle Creek, Michigan. I did not try to argue with them at all. In fact, in several cases, I said, "This looks like Shredded Wheat Biscuit; but it is not the thing that I have ordered."

When I said, "It looks like Shredded Wheat Biscuit," I had no doubt at all, from what I saw of it, that this biscuit was shredded and made out of wheat.

I do not think that a business like the Shredded Wheat business of the Kellogg business would go on unchanged if the advertising were stopped. Ceasing to advertise shredded wheat would mean that there would be a dropping off, I believe.

I realize that there is a great deal of experimentation, as between the many wheat products and corn products and so forth; and that many people do not like those, and that they do not use them year in and year out, throughout their lives; that they use shredded wheat for a while, and then use some other cereal. The facts will prove that. I know that the cereal companies are bringing out demonstrators who are constantly bringing the product to the attention of new users.

It is fair to say that one of the purposes of advertising is to recruit the users who drop out of a product and to put in new users of the article to replace the former users of the product who have dropped out.

I know that the Kellogg Company is a large advertising concern; and I use most of their products, other than this.

I have not seen any of their window displays or newspaper advertising of their Whole Wheat Biscuit, or noticed it. I am in the agency business, doing advertising for advertisers, space and time and marketing work.

If you just put one of either the Kellogg or the National product there, I probably would not notice any difference in size; but I have had enough time to make a comparison; and, to me, the Kellogg biscuit is a bit smaller; that is, it is not as long. I do not know about the other dimensions, as to thickness or height. I would have to see them together. I believe I would notice it in nine cases out of ten, because the first thing I do is to pick it up and break it, like this. In each instance, I noticed the difference in the cartons, of the Kellogg carton from the Niagara Falls

carton. As an advertising man, I would say that that carton was a distinctive carton, as compared with the Niagara Falls biscuit carton.

I am familiar with the Kellogg carton, and I would recognize it as one of the Kellogg family of cartons. I know the name, and I know the style of lettering and so on.

I am conscious of a distinct difference in taste between the Niagara Falls product and the Kellogg product. Of course, I get up with a different taste, as most of us do, on many mornings, just as we do in our shaving habits, and so on.

I know nothing at all about what some of those differences are due to. The difference in taste might be due to the act that we had onions the night before, or broccoli, or something.

I am appearing here voluntarily, not under subpœna. My only interest is to see Jim O'Brien get every piece of business he is entitled to. He is a friend of mine. I mentioned it to him, and he said, "Will you be good enough to tell this to Mr. Vilas?"

I have known of the Kellogg biscuit being on the market for probably three years. Since my first experience with it, it is safe to say that I know this type of product is now being manufactured by two different concerns, the National Biscuit Company at Niagara Falls, and the Kellogg Company at Battle Creek.

I am a constant user of Shredded Wheat. I sometimes try other cereals. If you looked into our pantry, you would probably find Grape-Nuts, Wheatsworth, Kellogg's Corn Flakes, Kellogg's All Bran, certainly Shredded Wheat, and maybe others.

As to trying new products, I used Wheaties once, and Heinz got out a hot cereal three years ago, which I tried. I tried Kellogg's Rice Crispies. I have also used Heinz Rice Flakes, but I have lost my taste for rice cereals.

I hope it is fair to say that advertising of a new product will attract attention and that people will try the new product; otherwise, all this money has been wasted. From my experience around the country, and as an advertising man, I would be firmly of the opinion that advertising of a new cereal product would cause people to try it.

I have heard of shredded coconut. I do not know about shredded codfish.

RE-DIRECT EXAMINATION.

THE WITNESS: I do not know how shredded coconut is put up. We have it at home, a Baker product, I believe. It looks good to me, and it is shredded. It may be, as far as I know, a fresh coconut shredded. I mean by that torn up into small shreds, little pieces.

Mr. Clarke asked me if, when I had the conversation with the waitress, any pillow-shaped biscuit apparently made of wheat drawn out into shreds or filaments would, to the waitress' mind, be a shredded wheat biscuit. In my opinion, the waitress would at once apply that name to such a product because of the amount of publicity and promotion put behind Shredded Wheat and the Shredded Wheat Biscuit in that form.

I saw one of the large-sized packages of the Kellogg product down here this morning, just glanced at it. If I saw the package, Plaintiff's Exhibit 147, with the name obliterated and the window on it, through which the contents are visible, that would convey to my mind just one thing as to the contents of the package, and that is Shredded Wheat.

If, in addition to that, I examined the package and saw on one end the words "Shredded Wheat in its most delicious form," and on the other end, "A shredded wheat product," my reaction, as a merchandising and

advertising man, to that would be that it would be a very easy way to substitute this for the product that I know, Shredded Wheat.

I mean by that that a package of that kind, with the words and appearance indicated on Plaintiff's Exhibit 147, is something in the hands of the dealer to promote easy substitution. I think that putting just that little slant in the hands of the dealer, I believe we have learned from experience would be a very good selling point, a very good merchandising point on the dealer's shelf, to substitute this for Shredded Wheat.

I have seen advertising of Shredded Wheat Biscuit, two in a dish; but I am afraid I cannot say that I would distinguish between the Shredded Wheat advertising and that of Kellogg's. I have seen a package like Plaintiff's Exhibit 10. Looking at the other side of Plaintiff's Exhibit 147, I see a picture of two biscuit in a dish. I would say that it is just a bit misleading. I suppose some of our friends would accept that as a Shredded Wheat Biscuit when they asked for it. We would not. By that, I mean that I think some individuals among the purchasing public would be less careful than others in discriminating between pages. I believe that has also been the experience of Rice Crispies, competing with Rice Flakes.

RE-CROSS-EXAMINATION.

THE WITNESS: If I never had any prior experience with the Kellogg biscuit or package and saw Plaintiff's Exhibit 147 for the first time, with the panel or view of the biscuit removed, I would have the idea that Kellogg's Whole Wheat Biscuit was a biscuit. I would be rather curious to see what it would be. Uneeda Biscuit, a soda cracker, is called a biscuit; very many types of English crackers or cakes are called biscuit; and the little muffin type of product that women bake at home

are also called biscuit. So, having in mind the many definitions of biscuit, if I saw this Kellogg package for the first time without any illustration on it, it would arouse my curiosity as to what kind of product was inside of it; but it would not be a package that would tell me what kind of product was in it until I had opened it for the first time. Of course, there would probably be other descriptive matter on that box.

Assuming, however, that there was no other descriptive matter on it, and taking away that little window there, I believe I would have to open up this package to find out what kind of product was in it. To that extent, without descriptive matter or the picture, it is what you might call a blind package.

The use of a dish with some of the product contained in the package, such as spinach or fruit salad, vegetables or cereals, is, in my experience, a very common advertising device. It is a very common form of advertisement to show the product in a dish served in various ways, with different kinds of sauces or fruits on it.

I have had personal experience with forms of what might be called fraudulent substitution, where one package is made to imitate another package so closely that, when a customer asks for the first package and gets the second, she really thinks she has gotten the first package. I have heard of such cases, although I do not believe I could mention to you just what a case might be; but as in the cases mentioned by Mr. Clarke, where people used to ask for Baker's Chocolate and did not get the original, and where they asked for Waterman Pens and got an imitation, thinking they were getting the original.

I would not, in my own mind, think that any woman who was familiar with the Niagara Falls Shredded Wheat package, such as Plaintiff's Exhibit 1, who was given a package like Defendant's Exhibit 6 or Plain-

tiff's Exhibit 147, would think she had gotten the Niagara Falls package.

If, as Mr. Clarke says, some grocers have testified that, on telephone orders, if they were to send the Kellogg biscuit when people asked for the Niagara Falls biscuit, some customers would send the package right back, I think very few would send it back, not necessarily that they would want to try it, but because of the bother of it all, so much bother that they would not want to send it back.

I have never been in the grocery business myself; although, as I say, I have had some experience along merchandising lines. I have spent a day or two in the grocery store, with mixed and blended coffee, etc., in several stores on Long Island and actually waited on people in the store, although just for a few days at a time, just for the experience.

I am familiar with the old and the new campaigns of the National Biscuit Company and Shredded Wheat Company advertising Niagara Falls Shredded Wheat. The recent or present campaign is a very good one, I think, much better than the old one of just the little ads. In my mind, the name *Niagara Falls* has been associated strongly in connection with all the advertising of that product.

RE-DIRECT EXAMINATION.

THE WITNESS: When I said I thought the majority of people would not return a package like Plaintiff's Exhibit 147, if it were sent them as Shredded Wheat, I meant that was my impression of the average psychology of the purchasers.

As I said to Mr. Clarke, if a customer asked for Shredded Wheat and were given this package, like Plaintiff's Exhibit 147, she would know right away that it was not the Niagara Falls product. I believe

the dealer would say right away. "This is Shredded Wheat Biscuit." I would not be surprised if dealers, in some instances, said "This is the same thing." As I say, I believe those two lines would be a good basis for that kind of selling, on the part of the dealer. As a merchandising and advertising man, I do not approve of that kind of selling.

RE-CROSS-EXAMINATION.

THE WITNESS: If, in self-service stores, where a customer picks up a basket and goes through the store, selecting what she wants from the shelves, I found a substantial number of women who picked out the Kellogg product, I would assume that that is what they wanted, in some cases, probably; but I believe that, with the window idea, which, as I say, I looked over this morning up here, any number of women would pick up that package, wanting the Shredded Wheat or Shredded Wheat Biscuit made at Niagara Falls. That, of course, as I say, is based entirely on the amount of money and promotion effort that has been put behind Shredded Wheat; certainly a whole lot more than has ever been put behind the Kellogg's Whole Wheat Biscuit.

In self-service stores, with a display of both the Niagara Falls Shredded Wheat and the Kellogg's shredded wheat, I think very few women who picked up the Kellogg's shredded wheat would do it because they wanted the Niagara Falls package that was right there on the shelf. I think that, in many cases, the people who did pick it up would pick it up because they wanted that Kellogg package.

RE-DIRECT EXAMINATION.

THE WITNESS: There is no question that, as to self-service stores, the result would depend somewhat on

the way in which the packages were displayed. I am familiar with the Piggly-Wiggly type of self-service store, where a customer has to go in and pass through all the aisles before she can get out. I would say that those customers of poorer education, having in mind purchasing Shredded Wheat, if the Kellogg product was displayed in advance of the Shredded Wheat product in packages with a window like Plaintiff's Exhibit 147, would probably pick that up for Shredded Wheat, quite a few; but, as far as the better classes go, I do not believe they would pick up the Kellogg package if they wanted Shredded Wheat. In foreign language sections and among the poorly educated, I think they would.

Children are frequently sent to the store to purchase such products, and I think the window idea would probably appeal to the youngsters, even though they were sent out to get Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: There are usually a number of competitive brands to products like canned baked beans, ketchup, tomato juice, canned tomatoes, etc. I would expect to find Campbell's Baked Beans and Heinz' Baked Beans, and probably one or two other brands. That is also true of corn flakes, that there are a number of manufacturers making different brands. There are quite a number of private label brands of corn flakes.

I do not know of any other product besides Shredded Wheat, where the claim is made that only one manufacturer has the right to make that product.

I have known for at least three years that there are at least two different concerns making Whole Wheat Shredded Biscuit, that pillow-shaped biscuit. I do not doubt that it may have been before that that I was personally acquainted with them.

RE-DIRECT EXAMINATION.

THE WITNESS: I should think it would be perfectly above-board and legal to make another biscuit; but I have wondered and mentioned the fact that this particular biscuit, being styled the same or looking the same as Shredded Wheat—in fact, I started several years ago to wonder why Kellogg made a biscuit that looked so similar and were able to cash in on some of the merchandising work put behind Shredded Wheat.

I remember the advertising of a biscuit put out by the Quaker Oats Company, called Muffetts. I do not remember what the advertising was like; but I do know the name *Muffetts*. I do not really know what the product appears like. I have never paid any attention to that particular product.

GEORGE SCHAPANSKY.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

THE WITNESS: I have never had any business connection with the National Biscuit Company. I am a salesman in the Frigidaire Corporation through Fisher & Glassford, a hardware and Frigidaire concern in Fresno, California.

I have had experience in the grocery business as a clerk for approximately a year.

I recognize Plaintiff's Exhibit 1. It is Shredded Wheat. I recognize the item Mr. Viles takes out of Plaintiff's Exhibit 1 as Shredded Wheat Biscuit. I have been familiar with Shredded Wheat approximately ten to fifteen years and have been a user of it in my home. I use it right along.

During the period I have known it, it has always been of the same general shape, appearance and size. It is very similar to what it has always been. I used to think, years ago, that the biscuits were joined together. It just seems to me that, a couple of years ago, when I was first acquainted with it, I have at times seen two biscuit fastened together.

The thing in particular by which I identify Plaintiff's Exhibit 1, that I always paid attention to, was the picture of Niagara Falls on the package. In my experience, there has never been anything, other than Plaintiff's Exhibit 1 or the biscuit therein meant to my mind by the term "Shredded Wheat."

When Shredded Wheat is purchased in my home, sometimes I buy it, and sometimes my wife orders it. Shredded Wheat is served at my table at breakfast time. It is brought to the table in dishes, usually with cream and so forth, ready to eat. Very seldom is the package brought to the table. I usually have breakfast first and leave the home. Later on, when the baby gets up, her breakfast is served, and my wife eats with her.

The package is usually delivered on the back porch, where it is brought by me or by the grocery boy. Mrs. Schapansky puts them in their place. When breakfast is served in the breakfast room, it is usually served in a dish as Shredded Wheat.

I very often order Shredded Wheat in a restaurant, where it is served the same way. In one particular case, it was served in a package, cut right before me, very recently, in a little restaurant in Fresno on Van Ness Avenue. I called for Shredded Wheat, and I asked afterwards for the package. He said he had thrown it in the waste basket and I could not take it with me. I saw the package. It was marked "Kellogg's" on the package. It was a regular, small, in-

dividual-size package, like Plaintiff's Exhibit 152. This was approximately a week and a half ago, in Fresno. The waitress got the package right off the shelf in back of the counter; reached underneath and set it on and cut it open, put the biscuits in the plate, and served it with milk, cream, and sugar. At that time I recognized the Kellogg's package. I asked them for it; but he said no, he had already thrown it away and could not give it to me. I did not say anything more; passed it up and just let it go at that. He asked me a question: "Why did you want the package?"

I said: "I am interested in Shredded Wheat. I want to know the difference in the signs." I saw the package. He offered to open another one or sell me a package, but I told him there was no need.

I have had other experiences of a similar nature quite often in restaurants, where I would be served out of the package, never knowing what package it would come out of; and it would be Shredded Wheat to me. On occasions, I have had a biscuit served to me where I never saw the package at all. I was not in a position to know at that time whether the biscuit served were Shredded Wheat or the product of the Kellogg Company.

I cannot tell you, even roughly, how many times that has happened to me, because I do not pay much attention to it. It just happens when I go in a restaurant, what I crave or desire; and I usually order it and forget about it after I am through. But I will say that on an average of once or twice a week I have shredded wheat biscuits in a restaurant. I very seldom see the package, because we usually eat at the restaurant across the street from us now. We either go and sit in a group or we sit at the rear table and converse. The dishes are brought from the back to us with the shredded wheat right in them and ready to

serve, without the package. We never get the package at all, any more.

I have had experience recently in purchasing Shredded Wheat at stores. The other day I went into a grocery store called Black's Package Store, in Fresno. I said to the clerk: "Where do you keep your Shredded Wheat?" He said, "Aisle" so-and-so, "on the center table." That is a self-service store; but I asked the clerk where it was kept. I walked up to that counter, and the first package was one with a little window in it. I looked in there and saw that it was Shredded Wheat. I reached back of it and picked one up, walked right over to the counter. I then recognized that it was the other make, and I went back and exchanged it for Shredded Wheat. It was like Plaintiff's Exhibit 153. The package I picked up was the same package.

The reason I picked up a package like Plaintiff's Exhibit 153 was that, in the first place, there was no Shredded Wheat. This was on special display, possibly featuring it for that particular day. I asked for Shredded Wheat, and he told me that was the place where it was kept. However, on another counter, with all the breakfast foods, etc., the other shredded wheat, the Shredded Wheat as I recognized it, was kept.

When I went through the store after asking where he kept his Shredded Wheat, I went to the table to which he pointed me, and that was the table where Kellogg's Whole Wheat Biscuits were displayed with some other breakfast foods, as specials. There was no shredded wheat on that table, except like Plaintiff's Exhibit 153, which I picked up. I just saw the shredded wheat through the window and reached back of it, because it says on there "Not for sale," and it was just there for display. I reached back and walked up to the counter and started to pay for my groceries. Then I recognized it was Whole Wheat. I said, "I want to ex-

change and get the other." The clerk kind of laughed, and he said, "You seem to be kind of particular what you eat." They know me pretty well in there. I said, "No, it is not that. I just want Shredded Wheat." I walked back and exchanged it and paid the difference.

I went into Reeder's grocery store and purchased and asked for a package of Shredded Wheat. The young lady in the store at the time was very small. Her husband is a good-sized man. He was not there. Naturally, he had the Shredded Wheat on the very top shelf. She said, "Will you help yourself?" I reached up there and took it down. I said, "This is not Shredded Wheat."

She said, "Yes, it is, only in the other package." I took her word for it and walked out with it. The carton, Plaintiff's Exhibit 154, is the one I got at that time. As I reached up to the top shelf, I could not see what I was getting, except that it was either just Shredded Wheat or this food right here. She said, "That is it, right there," and it was the only kind that was in the store. I did not see any other kind on the shelf at all. I did not see any packages like Plaintiff's Exhibit 1, at all.

Reeder's store is on South Second Street, number 532, in Fresno. This took place the latter part of November, 1932. The piece of yellow paper attached to the carton is the cash slip on which I paid for it; and the piece of white paper pasted on there is my memorandum made at the time. That is the conversation that took place.

I was asked to make that purchase of a package of Shredded Wheat by Mr. Weller, the manager there of the National Biscuit Company. He did not say why he wanted it. He is a customer of mine there. He said, "George, will you drive by and get me a package of Shredded Wheat on your way home?"

I said, "Yes, I am off duty at twelve o'clock or so. I will drive by the store and purchase a package of Shredded Wheat for you." He said, "Well, I will be back later and pick it up."

I did not even know that he had Shredded Wheat in his place of business out there. It seemed so peculiar afterwards, why I should go and buy Shredded Wheat, because he was always fooling with us. He would come and ask me to do something on his automobile. It was kind of interesting the way he would do that.

So I purchased that package of Shredded Wheat for him and gave it to him. It did not take very long. When he came in he said, "What took place when you bought this?" I told him approximately what took place. He put it down on a piece of paper and said, "Would you sign that statement that that is true?"

I said, "Certainly. That is what took place; why should I not?" He said, "In that case, then, will you get a sales receipt for me?" I said, "Certainly I can." I said, "I want to get some cigarettes, anyway." So I drove by the store and I asked Mrs. Reeder to give me a receipt. At that time, Mr. Reeder was in. She said, "Mr. Reeder, will you kindly give this gentleman a receipt for Shredded Wheat just like that up there? That is what he purchased a while ago." And he did. He gave me that receipt and I brought it over to Mr. Weller. That is the yellow slip attached to the exhibit.

I have noticed advertising of the Shredded Wheat Company to a certain extent. I have noticed their billboards occasionally, where they have a dish with two Shredded Wheat Biscuits in there, and cream, and a boy ready to eat it, coming up there as if it were for his breakfast, or something to that effect. When I see the dish with two biscuits in it, the only thing I ever think of is Shredded Wheat. The dish on the end of Plaintiff's Exhibit 10 looks similar to the one I refer to as having seen. I do not know how long I have noticed

that. It has only been here in the last year or so that I have paid particular attention to bill-board advertising, for the reason that our company at that time went into it very extensively. Then I began to notice more bill-board advertising than at any time before. I have seen a carton like Plaintiff's Exhibit 10 very often.

If I were to see the package Plaintiff's Exhibit 153 facing me with the sides showing the picture of a dish with two biscuit in it, with the name partially or wholly obliterated, it would bring to my mind Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: Plaintiff's Exhibit 10 is not the package of Shredded Wheat which I have seen right along in the last year. I have seen that for some fifteen-odd years, as far as I can remember back; but I have seen Shredded Wheat packages like that or very similar to it. That is the package with which I am still familiar as Shredded Wheat. Plaintiff's Exhibit 10 is the Shredded Wheat package with which I am now familiar on the market.

Mrs. Reeder I have not known personally at all. I just purchase off and on, here and there, in the neighborhood where I used to work. I know Mr. Reeder only through his son, who used to be junior president of the Chamber of Commerce there and now has had charge of the Fox Wilson Theatre there for a number of years. I have known him quite some time. He is not a friend, just an acquaintance through business. Through him I have known his father who runs this Reeder store. He would drive by my place of business every day with his truck, which says "Reeder's Grocery," a very nice advertisement.

Reeder's grocery is not our regular grocery store; it is just one of the stores I purchase from in the neighborhood where I work. Mr. Weller did not tell me to

go there. He just asked me to purchase a package of Shredded Wheat on my way home. Sometimes I have purchased next door. I do not know which particular place he had reference to. I was on my way; it dawned on me I was to get a package of Shredded Wheat; and I walked into the store and asked for it. Mrs. Reeder met me at the door and talked to me. We conversed a few minutes. I said, "I want a package of Shredded Wheat." She told me to help myself. I reached for it, took it down, paid for it, and walked out.

That afternoon, Mr. Weller came up and asked me if I had made the purchase for him, and I said, "Yes, here it is." He said, "What took place when you purchased this?" He came back later and asked me if I would put it in writing. I told him yes. He took it down, typewrote it out, and put it on the package. I signed it.

Mrs. Reeder said approximately as I have written on there, "That's Shredded Wheat, only it's the other kind," something very similar to that. That is my statement signed by me. It says: "I went to Reeder's Grocery and asked for a package of Shredded Wheat Biscuit. Mrs. Reeder told me to help myself from the shelf, and then I said, 'That is not Shredded Wheat Biscuit, is it?' Mrs. Reeder replied, 'Yes, that's Shredded Wheat; it's the other kind.'" That is just exactly what she said.

I did not know it was the other kind when I took it down from the shelf. I did not pay any attention to it. I never did. I just walked to the shelf, when she said "That is it up there," and I took it down. I never paid any attention to it. I called for Shredded Wheat. She said, "That is it," just pointed it out to me, "right there on top," and I took it down.

I did not make any purchases anywhere else at that particular time, except just that one store. I have purchased Shredded Wheat at numerous other places;

but it has never been called to my attention like it was at that time.

Except for once when my wife bought it and I was not with her so I do not know anything about it, that is the only package of Kellogg's shredded wheat I ever bought. I picked that off the shelf myself, just what she told me. It did not look any different from Niagara Falls Shredded Wheat to me when I took it down off the shelf. She said that was shredded wheat. That is what I wanted.

When she pointed, I did not look to see what was on the shelf, except just what she says, "That's it right there;" and I reached up and took it down; and that was the end of it. I did not look at it, no more than I saw it was the biscuits there, and I recognized that Shredded Wheat immediately, never looking at the name. That was the farthest thing away from me.

I was a grocery clerk approximately a year or a little over, at the E. K. Smith Grocery, Reedley, an independent grocery. I handled Shredded Wheat during that year.

I do want the record to stand, certainly, that, when that woman pointed to that shelf and said "That is Shredded Wheat," I did not see anything there except the plate with the two biscuit in it. I recognized it as Shredded Wheat; by that, I mean a pillow-shaped biscuit shredded out into shreds and put in the form of a biscuit. When I say that I recognized it as Shredded Wheat, I mean I thought those pillow-shaped biscuits made out of shredded wheat were in that carton.

When she pointed out this package of Kellogg's to me on the shelf, there was no window on the package. This was on the shelf there just like that, and I reached up and took it down.

All I saw was just the plate with the Shredded Wheat biscuit. I did not see the name Kellogg's. I did not even look at it, did not even pay any attention

to it. After I got it down, I said, "Is that Shredded Wheat?" Then I did look at the package, and I turned it around a couple of times and walked out with it, after I had paid for it and said no more about it.

When I looked at it, it just seemed like it was just a different package all at once. To my own mind, I said, "I guess they have changed packages and changed the size of their package," never making any statement to anybody.

I did not recognize this Kellogg package. As a grocery clerk, I have handled Kellogg's Corn Flakes. I may possibly have handled other Kellogg products, but I do not recall them now. I never noticed that their packages are predominantly green and red. I do not recognize any family relationship between the Kellogg's Whole Wheat Biscuit package and the Kellogg's Corn Flake package; because the box is so much different than the other one. Kellogg's Corn Flakes is a tall box, and this is a square box, very similar to the Shredded Wheat box. That is the only difference between Kellogg's Whole Wheat Biscuit and Kellogg's Corn Flakes that I recall now, as a grocery clerk.

When I went back to ask for this receipt or bill of sale, I asked for a package of cigarettes, and I asked her if I could have a sales receipt on the Shredded Wheat and the package of cigarettes both. She says, "Yes, certainly," and it was written out. Mr. Reeder wrote it out. Mrs. Reeder asked Mr. Reeder to give me the bill of sale. The only reason I did that was because Mr. Weller asked me to go back and get a bill of sale. I said, "I want the cigarettes anyway; I might just as well get it all at one time." I could have asked them to leave these cigarettes off, as far as that is concerned. It made no difference to me.

I had never had any experience with Kellogg's Whole Wheat Biscuit before that day. I did not even know they were on the market. I really cannot say

how long I have known Mr. Weller. Possibly about six months in the service station business there. I met him one day when he bought a new Pontiac. I do not remember whether he refunded me the money on this purchase. The only written statement I made of the transaction is the one on the package. I did not make a statement to anyone other than Mr. Weller about the purchase of it. I have never had any memorandum taken down as to this transaction. In fact, at the time, I did not even know what it was all about. The only experience I have ever had with Kellogg's Whole Wheat Biscuit is this one instance in the Reeder store. It would be hard for me to say how many instances in restaurants, eating out regularly. I have only had Kellogg's served to me in a carton in a restaurant once.

I have had the Niagara Falls product served to me in restaurants in cartons, in individual packages. That is the way it is served in restaurants. I have never had it served in dining cars in that carton. I do not use diners. The usual way in small restaurants, I would say, is to have the Niagara Falls product or the other product served in the cartons. When, however, you purchase it in a larger restaurant, it always comes in the dish. If I request it, they will have it heated, with cream, or they will serve it in a dish with milk or cream on the side, and I never see the package.

XQ. 143. Is the Kellogg's Whole Wheat biscuit just the same kind of a biscuit that the Niagara Falls Shredded Wheat Biscuit is?

A. I have never recognized the difference.

XQ. 144. You have not noticed any difference?

A. No.

XQ. 145. Then, when they were served outside of the carton, how would you know whether you were being served the Niagara Falls biscuit or the Kellogg biscuit?

A. I would not know; I would think I was getting Shredded Wheat.

THE WITNESS: All the biscuit that have ever been served to me in any restaurant outside the carton have been long biscuit very similar to that in Plaintiff's Exhibit 1.

The only instance where I have been served with the Kellogg product in a restaurant was this one instance in which the little Kellogg individual carton was thrown away. At least, that is when I really began to pay particular attention to it, after I knew that there were two different shredded wheats on the market; and I have naturally watched for it to see if I could determine the difference. The only time I determined the difference was when he opened the carton and I looked at the carton and asked for the carton, but he had thrown it away. He asked me why I wanted it, and I told him to let it go at that. He said he would open another package or sell me a full package if I wanted to. I said there was no need. That occurred quite a bit after the Reeder purchase; only about a week and a half ago. That is the only instance in which I know that the biscuit that was served to me in a plate was the Kellogg biscuit, rather than the Niagara Falls product. The only time I have ever recognized that there was a difference was when I saw the carton. When that Kellogg product was shown to me, I recognized that that was a pillow-shaped biscuit made in the form of shreds.

RE-DIRECT EXAMINATION.

THE WITNESS: I am not able to say at this time that I never was served, outside of the package, any of the biscuit manufactured by the Kellogg Company. About a week and a half ago is the first time I have particularly noticed that the Kellogg Company's Whole

Wheat Biscuit that looked like Shredded Wheat Biscuit was served out of the carton, and that it was different than I had been getting.

I cannot tell at the present time whether or not I was ever served, in response to a request for Shredded Wheat, Kellogg's Whole Wheat Biscuit outside of the carton. I do not know. It might have happened, and I did not know it. In other words, if I had gone into the particular restaurant that we go in to eat, our Shredded Wheat is served to us on the plate, never seeing the carton.

DONALD J. SOWLES.

Deposition taken at San Francisco, California, February 8, 1933.

Direct Examination.

The Witness: I am a tile setter. I did some work for the National Biscuit Company last winter, for a day or two a week through the winter, unloading cars. That is my only connection with the company.

I recognize the package, Plaintiff's Exhibit 1. It is Shredded Wheat. I have been familiar with Shredded Wheat as a consumer about the last fifteen years. I have heard of it and have it in my home most of the time. I have a family of four. We keep house. Shredded Wheat is served at our home. I buy it most of the time, and I ask for it as Shredded Wheat.

I eat Shredded Wheat in a restaurant once in a while. About a month and a half ago, in the Hotel Barry Coffee Shop, at Sacramento, California, on Eighth Street, between J and K, I went in and asked for Shredded Wheat. She gave me a package of the Kellogg's Whole Wheat Biscuits. I told her that did not look like Shredded Wheat to me. She said it was Shredded Wheat. I said, "Are you sure that is

Shredded Wheat?" and she said, "Yes." She said, "You know, you have got to take it and shred it all up in your dish, when you eat it." I recognize Plaintiff's Exhibit 154-A as the box that she gave me. The handwriting on one of the inner sides of the carton is not mine. It is, I believe, that of Mr. Minturn, in Sacramento. The date written there refreshes my recollection of the date of the occurrence as being November twenty-third.

I had a similar experience in purchasing Shredded Wheat. I bought some at Anderson's Grocery on Sixth Avenue and Sacramento Boulevard, in Sacramento. I went in and asked the price of Shredded Wheat. That was the first of the conversation. She told me the price of it. I believe the figure she gave me at that time was fifteen cents. I told her it seemed that Shredded Wheat was not coming down any.

She said, "The National Biscuit Shredded Wheat has not come down any, but we have another shredded wheat here, and it has more in the package. That would really be cheaper," and she sold me the Kellogg's Whole Wheat Biscuit for the same as Shredded Wheat. I took the package and turned it in to Mr. Minturn, but I believe he failed to send it in. It was not a package with a window in; but it was a package with a dish with two biscuits in it on each face, like Plaintiff's Exhibit 155.

I have noticed advertising of Shredded Wheat through handling it, through purchasing it. I have seen the picture of a dish, as shown on the end of Plaintiff's Exhibit 10, on packages, ever since I have been buying it, as far back as I can remember. I have also seen the picture of the dish with two biscuit in it on show cards, in the windows and on the counters. If I saw a package with the picture of a dish with two biscuit in it, that would bring to my mind, as it has always, Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: When I received the package like Plaintiff's Exhibit 155, I knew right away that it was a different package from the Shredded Wheat I had been formerly getting. That was the first time that the fact that the Kellogg Company was putting out a whole wheat biscuit was really brought to my mind distinctively. Before that, however, I had had some sort of impression or had heard that the Kellogg Company was making a shredded wheat biscuit, as well as the Niagara Falls concern.

It is fair to say that, since this incident, I know perfectly well that there are two different concerns making these shredded wheat biscuit products; one of them being the National Biscuit Company and the other being the Kellogg Company.

If I should want to buy any more of the Kellogg product, I would have to ask for whole wheat biscuit, I guess, or ask for the Shredded Wheat, and, if I got it, I would turn it down. That is all I could do. I believe I would ask for Kellogg's shredded wheat. If I did, I would expect to get the Kellogg product.

This instance in which I had the Kellogg's biscuit served to me was the only time that I really ever had it served in the carton. I had it once before, and I got the National Biscuit Shredded Wheat. As soon as it was served to me, I recognized it as the National Biscuit Shredded Wheat. I never had any of the Kellogg's shredded wheat served to me before outside of the carton. It has only been three times I have bought it in a restaurant, and once was this morning.

I did that because I was sent by Mr. Weller to make the purchase. He told me to make that purchase in this restaurant that I have told you about. He also told me to go to the California Coffee Shop on Eighth and I. I went there and asked for Shredded Wheat,

and she gave me the Niagara Falls Shredded Wheat out of a large box. I saw the box. She had it in a bin, and I was sitting right alongside of it. She picked it up, took the biscuit, and put them in the dish. It is a little coffee shop connected with the hotel there.

Mr. Minturn explained to me about a lawsuit being on and my being called to testify in this case. I came down to San Francisco alone, at the expense of the National Biscuit Company.

I buy the Shredded Wheat for my family most of the time, and I also buy other groceries for them. The only time that I got the Kellogg product like Plaintiff's Exhibit 155 was the one instance that I referred to. Most of the time I go right to the shelf and get it myself, as I deal more with the Arata Brothers in Sacramento, which is a help-yourself store. I usually buy from them.

Mr. Minturn did not tell me to go to the store where I purchased Plaintiff's Exhibit 155. I went down to the corner from my mother's house, where I had been for dinner at the time I made the purchase. That was at three-thirty in the afternoon. I turned it over to Mr. Minturn about a quarter past four the same afternoon. He did not write. He did not make any memorandum of that transaction. I gave it to him. He said he mailed it down; but I do not know what has become of it. It has been mislaid some place.

Most of the time, when I really go to make a large purchase for my family, I deal with a self-service store. Of course, we deal with the little stores around there. In the self-service store, I walk over to a shelf and take whichever package I want. If I wanted the Niagara Falls package, I would pick that up; and, if I wanted the Kellogg package, I would pick that up.

I have seen Kellogg's biscuit in the self-service stores where I deal. In one of those stores, I saw the Niagara Falls or National Biscuit Shredded Wheat. I

have seen the Kellogg's in several stores. I have seen the Niagara Falls biscuit in pretty nearly all of them. I have seen both the Kellogg's and the National Biscuit Shredded Wheat in most of them. They have both been on the shelves in clear view of anybody wanting to serve themselves, I think, although I just cannot recall that right to the detail. I have noticed both of them in the stores.

The practice in these self-service stores is that you go to the shelves and help yourself and then bring it to the proprietor and pay for it. Everything is arranged within convenient reach of the customer. Some of them furnish baskets, and some do not.

RE-DIRECT EXAMINATION.

THE WITNESS: I asked for Shredded Wheat this morning, and I got Shredded Wheat. I saw the package. It was served in a small package, at Leighton's, right down the street. I do not know just which one it was.

RE-CROSS-EXAMINATION.

THE WITNESS: When I speak of a shredded wheat biscuit, I mean one of these pillow-shaped biscuits made out of wheat in shredded form. That is my understanding of a shredded wheat biscuit. It is fair to say that I now understand thoroughly that that type of biscuit is being made by two concerns, the National Biscuit Company, and the Kellogg Company.

RE-DIRECT EXAMINATION.

THE WITNESS: If I ask for a Shredded Wheat Biscuit, I expect to get Shredded Wheat. If I were given a package like Plaintiff's Exhibit 153, it would not fill my order, not so far as I am concerned, because I have always bought and always got the National Biscuit

Shredded Wheat, and I have always known it as that until this other was put on the market.

RE-CROSS-EXAMINATION.

THE WITNESS: When I take one of these Kellogg packages off the shelf, it is fair to say that I know that I am taking down Kellogg's shredded wheat; that is, a shredded wheat biscuit made by the Kellogg Company.

EARL K. BURKNER.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a salesman employed by the Stockton Paint Company. I have no connection with the National Biscuit Company.

I recognize the package, Plaintiff's Exhibit 1. It is a Shredded Wheat package. I recognize the contents. I have been familiar with them ten or twelve years, as a consumer of them. I purchase Shredded Wheat once in a while and have it at home. I sometimes buy it in restaurants. At home I sometimes purchase the biscuit, or else my wife does.

When we have a package of Shredded Wheat in our home, it is usually served with cream or milk, sometimes with fruit. The package is kept, as a rule, in the kitchen. The Shredded Wheat is served in a dish.

I have noticed advertising of the Shredded Wheat Company in magazines; usually, a picture of Shredded Wheat in a dish with fresh fruit over it, or something like that. I cannot recall it in newspapers or posters. I have never noticed a picture of the dish on the package of Shredded Wheat. Looking at Plaintiff's Exhibit 10, observing the end panel, I have seen that.

When I see a picture of a dish or saucer with two biscuit in it, that brings to my mind Shredded Wheat. When I purchase the item, I ask for Shredded Wheat.

When I ask for Shredded Wheat in a restaurant, it is usually served in a dish, and without the package, as a rule.

I have had experience recently in ordering Shredded Wheat in a restaurant, at Smithie's Coffee Cup, in Stockton, approximately two months ago or three; some time in the fall. I ordered Shredded Wheat, and the waitress served me with Whole Wheat Biscuit; so I called her attention to it. I said, "Hold on; you are not giving me Shredded Wheat." She said, "Oh, yes; I am." I said, "You are not. You are giving me some Whole Wheat Biscuits." She said, "That is all we have. We sell that for Shredded Wheat right along."

So I took it, and I kept the carton that it came in; also took a menu along with me and put it in my pocket. I think I marked the date on the package or the menu, one or the other. The menu card shown me, Plaintiff's Exhibit 156, is, I think, the menu that I took, one just like it.

The carton, Plaintiff's Exhibit 157, is the one in which the biscuit were delivered to me. The slip of paper pasted on there was not done by me. The date on the package, "11/20/32, 8.30 A. M." is in my handwriting. That is the d te on which I made the purchase and is my means of iden ifying the package.

After the conversation with the waitress, I ate the biscuit. As far as I know, that was the only time I have eaten Kellogg's Whole Wheat Biscuit, unless it was served to me at some other time without the package. Shredded Wheat Biscuit is frequently served to me out of a package in restaurants. From my experience in Smithie's Coffee Cup, if, in response to an order from me, a biscuit we e served me in a dish with-

out my seeing the package, I do not believe I would be able to say whether it was Shredded Wheat or Kellogg's Whole Wheat Biscuit.

CROSS-EXAMINATION.

THE WITNESS: This was not the first time I ever had any breakfast food served to me in a little package. I have frequently had corn flakes and other cereal products served to me in little individual packages. That is, recently, perhaps, a common practice in restaurants. At any rate, I have seen them in a large number of restaurants, small packages of corn flakes, Shredded Wheat, or other cereals. I think they are usually stacked up on shalves in back of the counter. I have seen the little individual cartons on display. I cannot say that I noticed any difference in the taste of the Kellogg's Shredded Wheat Biscuit, as distinguished from the National Shredded Wheat Biscuit. I saw right away, on the carton, when this individual package was put before me, that it was not the Niagara Falls or National Biscuit Shredded Wheat.

It was because I instantly recognized that fact that I spoke to the waitress about it and asked whether it was a shredded wheat product. I understand that, by the expression *shredded wheat* is meant one of these pillow-shaped biscuits made out of wheat in shredded form. That is the only way I have ever bought it. I never have had Shredded Wheat in any form other than the form of a pillow-shaped biscuit with shreds showing in the biscuit, that I know of.

Mr. Wagner, who is connected with the National Biscuit Company at Stockton, I believe, went with me into this restaurant. Mr. Wagner and I go fishing nearly every Sunday, when the weather permits. We usually get up early and have our breakfast uptown. On this particular morning, he asked me to go into

Smithie's Coffee Cup and have breakfast in there. He said, "I believe they are putting one over on us on Shredded Wheat."

So he told me that Kellogg's were putting out a Whole Wheat Biscuit and they are serving it in some restaurants as Shredded Wheat. I says, "Fine. Let us go in there and find out." That is the reason we went in there.

We both ordered Shredded Wheat; and we both were served Kellogg's Whole Wheat Biscuits. I saved my carton. I saw the carton served to him. I do not know whether he saved his or not. I also took a menu.

The carton was cut open when it was brought to the table. Before Mr. Wagner told me about it, I had not heard of the Kellogg Company making a shredded wheat biscuit. This experience in Smithie's Restaurant is the only one I have ever had with the Kellogg product. I make a practice of eating Shredded Wheat Biscuit frequently. I had ordered it in restaurants prior to that time, especially before I was married. This is the only experience I have had with the Kellogg product.

PATRICK S. BAIRD.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am an accountant. I am not connected with the National Biscuit Company in any way. I know Mr. McDonough.

I recognize Plaintiff's Exhibit 1. I call it Shredded Wheat, with which I have been familiar for twenty-six years. I recognize the biscuit contained in that package. During the time I have been familiar with it, there has been no change in its shape or size.

I purchase Shredded Wheat. I just ask for Shredded Wheat, and I expect to get Shredded Wheat. I have noticed advertising of the Shredded Wheat Company usually in a plate garnished with fruit, as a breakfast cereal, principally in magazines. I have noticed advertising of the Shredded Wheat Company about ten or fifteen years.

I recognize the panel on Plaintiff's Exhibit 10, with the dish. That is what I had reference to when I spoke of a biscuit in a dish. It is sometimes shown in advertisements with fruit and different things on it. I have noticed that dish with the two biscuit in it possibly five years. I cannot recall it longer than that.

If I see a package not otherwise identified, with a plate on it and two biscuits, as shown on Plaintiff's Exhibit 10, that brings to my mind Shredded Wheat.

Shredded Wheat is served in my home. I use it occasionally for breakfast. I am not a family man, but sometimes I board or batch, myself, and make my own breakfast. I also buy it in restaurants, too. When I order Shredded Wheat in a restaurant, it is served either in the package or in the dish. Sometimes I have had it served in the package a number of years ago; lately, in a dish. At the present time, I could not say what is the practice; because I ate in restaurants very seldom for a number of years. I could not recall what would be the general practice. I imagine the dish now, would be my opinion.

I have ordered Shredded Wheat in a restaurant and had it served to me in a dish without the package. That has happened on more than one occasion, not very many. As I say, I do not eat very often in a restaurant for breakfast.

I have had no recent experience in a restaurant or lunch room recently when I ordered Shredded Wheat, except when I went in to get it in connection with this case. I went to the Foster Lunch System at 366 Geary

Street on November 25th, and asked for Shredded Wheat. They brought out a package that looked different from the other package I had been familiar with. I said I wanted Shredded Wheat. She said, "This is Shredded Wheat." I said, "Have they changed the shape of the package?" She said, "This is the only package I have ever seen it come in." So I said, I want to take it out with me.

Plaintiff's Exhibit 158 is that package or one identical with it. I did not make any mark on it by which I could identify it; but it is identical with the name and the size of the package in every respect.

CROSS-EXAMINATION.

THE WITNESS: Mr. McDonough asked me to make this purchase. He told me to go to that restaurant and ask for Shredded Wheat. That is my usual restaurant for lunch downtown, but never for breakfast. He asked me to take whatever they gave me. He did not ask me to go to any other restaurant; but I personally went to two other places, where I got the Niagara Falls product, which was served in the individual cartons. So, of the only three instances that I remember at the present time, in all three it was served in the carton. In two instances, I got the Niagara Falls Shredded Wheat and in the other I got the Kellogg's shredded wheat. One of them was a grocery store and one was a restaurant. Mr. McDonough did not tell me to go to that grocery store. I went of my own accord. I asked for Shredded Wheat and got the Niagara Falls Shredded Wheat.

Those are the only three instances I recall where I made any effort to get evidence for this case. This one instance, in which I received the Kellogg's shredded wheat product in the little carton, is the only instance I recall, the first instance of any experience with the Kellogg product. That was the first time I had ever heard of the Kellogg Biscuit.

It is safe to say that I now understand thoroughly that there are two makes of shredded wheat on the market; one of them made by the National Biscuit Company, and the other made by the Kellogg Company.

If I wanted the Kellogg Biscuit in the future, I would ask for it by name, as Kellogg's Shredded Wheat. Mr. McDonough was not with me on any of these occasions; but I did this at his request and then reported to him.

RE-DIRECT EXAMINATION.

THE WITNESS: If I were asking for Shredded Wheat and wanted to get Shredded Wheat I would just ask for Shredded Wheat. I would not specify any name unless I wanted this particular make of Kellogg's. If I wanted to get the whole wheat biscuit—well, I do not know the difference. Shredded Wheat is Shredded Wheat, to me.

RE-CROSS-EXAMINATION.

THE WITNESS: If I wanted the Kellogg product, I would now say Kellogg shredded wheat, or Kellogg biscuit. Formerly, I would not. Before talking with Mr. McDonough, I did not know that the Kellogg Company was making a shredded wheat biscuit; but I know it now.

ARNOLD MacCOOL.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a 1932 graduate of the University of California. I recognize the package, Plaintiff's Exhibit 1, as a box or carton of Shredded Wheat. I have been familiar with Shredded Wheat ever since I can remember eating anything. I have had it at home all my life, as far as I can remember.

When it is served at home, we usually help ourselves out of the box. It is not brought on the table in a dish without the box. It is our custom to help ourselves when we want it.

I have seen advertisements of Shredded Wheat, usually displaying the biscuit in a plate with fresh, seasonable fruits; on posters, as a rule. I have also seen it on a package. I recognize Plaintiff's Exhibit 10. The dish shown on the end of that package would be the same, without the fruit. I could not say how long I have been familiar with a package like Plaintiff's Exhibit 10, but I remember it. I just took it for granted; that is all. If I see a package or a carton not otherwise identified, with a picture of a dish and two biscuit, that brings to my mind Shredded Wheat.

I buy Shredded Wheat, asking for it by the name, Shredded Wheat. When I ask for Shredded Wheat, I expect to receive Shredded Wheat. When I asked for Shredded Wheat, I expect to get the brand. I happen to know that there are other similar products. I know that Kellogg has a Whole Wheat Biscuit out.

When I asked for Shredded Wheat, if I am handed a package like Exhibit 153, that does not fill my order. I have recently had experience in purchasing Shredded Wheat, asking for Shredded Wheat in a store. I do not remember when it was. I do not remember where

the last time was. We usually trade with the chain stores in the neighborhood.

Last November, about the middle of the month, I went into a grocery in Berkeley, twenty-three hundred and something. I have forgotten the name of the store. I asked for Shredded Wheat, and the man repeated the name Shredded Wheat after me. He went to his shelf where he has packages grouped and handed me a package of Kellogg's Whole Wheat Biscuit. I asked him if they had changed the name recently. He said no, that this was the same article, that he did not handle Shredded Wheat because he could not sell it. He was quite emphatic that this was the same and that I should be just as well satisfied with it. I took the package. Plaintiff's Exhibit 159 is the package.

CROSS-EXAMINATION.

THE WITNESS: I did not buy the Kellogg product at any other store. I asked for Shredded Wheat in other stores and always got Shredded Wheat. I went to half a dozen other stores. In every one I got the Niagara Falls Shredded Wheat like Plaintiff's Exhibit 1. In just the one store I got the Kellogg product. Mr. Dave Gill, the manager of the Oakland agency of the National Biscuit Company, asked me if I would mind going to these six stores and asking for Shredded Wheat.

At the one store where I got Kellogg's biscuit, the man was quite emphatic in telling me that that was the same product or the same kind of product, but made by another manufacturer. He did not mention it was made by Kellogg's until I asked him, until I noticed the name itself. He said it was just the same kind of product but made by somebody else, and he was quite emphatic about that. He said, "It is the same darn thing." He repeated that continuously; he was very slangy in his expression.

Later I opened the package and looked at the contents of it. It was my first experience with it. I knew nothing about it. When I speak of Shredded Wheat Biscuit, I mean a biscuit in pillow-shaped form, made out of wheat drawn into shreds and put into biscuit shape. Except as to size, the Kellogg product looked like a biscuit made out of wheat in shredded form and put into a pillow-shaped biscuit, very similar. I did understand what the grocer meant when he said it was the same kind of a product made by somebody else, "the same darn thing" made by Kellogg's, as I pointed out to him. That was the first experience I had with the Kellogg product.

I do not think Mr. Gill, of the National Biscuit Company, told me anything about the Kellogg product when he asked me to make the purchases. He told me he was going to ask me to testify in this case, and to see if anybody would try to substitute Kellogg's brand for the Shredded Wheat.

It is fair to say, that he had told me about the Kellogg Company having a shredded wheat biscuit on the market before I actually saw one of the packages. He said he wanted me to go to this store to see whether anybody was trying to substitute that for the National Biscuit product. I do not believe he said anything about the case, because I did not know at that time just exactly what he wanted. I knew they were trying to get evidence to the effect that substitution was being done. Other than that, I knew nothing about it, nor did he tell me. I do not think he knew very much about it himself. That was my only experience of any kind with this particular Kellogg product.

It is fair to say that, since that experience, I know and realize perfectly well now that shredded wheat biscuit are being made by two different concerns, the National Biscuit Company and the Kellogg Company. I did not try any of Kellogg's biscuit.

I am working for the National Biscuit Company at present, as bench boy in the packing department, general helper, in the San Francisco plant. I have been there about a month today. The San Francisco plant is a cracker plant of the National Biscuit Company. I do not work in their Shredded Wheat plant. They have a Shredded Wheat plant in Oakland. I have never been in it. The six stores I went to are all independent stores, separately owned, as far as I know.

RE-DIRECT EXAMINATION.

THE WITNESS: In November, 1932, I was not employed by the National Biscuit Company. I started the twelfth of January.

MRS. JESSIE M. FATJO.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am in the real estate and insurance business at Santa Clara and at San Jose. I keep house for the folks and the children. My family consists of my husband's mother and father and my two children and myself. I am not connected with the National Biscuit Company in any way, neither was my husband during his lifetime.

I recognize Plaintiff's Exhibit 1, a package of Shredded Wheat. I recognize the contents. I naturally call it Shredded Wheat. I have been familiar with that item, I would say, about twenty years. When we were in the grocery business, naturally we sold Shredded Wheat, you know. My husband's family have been in the grocery business ever since 1848. They

are not in the business now; but, up until 1926, they continued in the business, one to the other. That is, the family carried on the business from one generation to the other; and Shredded Wheat was carried in their store. I have been in the family fifteen years. The whole time I was there I have seen it.

The expression Shredded Wheat represents to me the National Biscuit Shredded Wheat, which we have for breakfast. I serve it to the youngsters at home almost every day. I try to change the form of it. One morning I heat prunes and put them over the Shredded Wheat. Other mornings I change, possibly, to apricots or whipped cream. We have even tried lately poached eggs on top.

I take the Shredded Wheat out of the package before I serve it. When the youngsters are served separately, when they go to school, I take a couple out of the package and put it on the plate.

I have obtained Shredded Wheat at different times in restaurants, when I have had the children with me. I do not particularly eat it myself. The children always ask for "that box". They get a small box with two in it, one each for them, as a rule, or sometimes they each get a box. At different times the children have had it without the box, in restaurants, whenever I bring them to the city or take them away from home.

I purchase it at stores, also, I just say "Shredded Wheat." Sometimes I ask for it over the telephone. When I ask for Shredded Wheat, I expect to receive Shredded Wheat.

I asked for a package of Shredded Wheat at Miller's Station, Miller's store, which is on the road from Cupertino to Saratoga. They gave me Kellogg's package. It did not look quite familiar to me, so I asked the woman, "Is that Shredded Wheat?" and she said, "Yes." I had never seen the Kellogg package before, so I glanced at it—I have been so accustomed to get-

ting Shredded Wheat—and said, "Is that Shredded Wheat?" and she said, "Yes, it is." So I took the package. When I started home, I noticed it was not. Plaintiff's Exhibit 160 is the package I purchased on that occasion. There was a figure 13 on the package when I got it. The yellow slip clipped to the package is the purchase slip that was given to me at the same time.

This took place on November 25th, in the afternoon. I did not particularly inspect the package at the time I bought it in the store. I just glanced at it and saw a biscuit on it. I have been accustomed to seeing a biscuit on Shredded Wheat, the picture of a biscuit. I said, "Is that Shredded Wheat?" I thought maybe they had changed their package. She said, "Yes," so I took it. When I got out in the machine, I put it in the back, and the youngsters said, "Mama, this is not the kind of Shredded Wheat we have been accustomed to getting." So I looked at it, and then I recognized it was not. That was my first knowledge that it was not Shredded Wheat. I had no idea anyone else had more or less the same package. When I looked at the package in the store, I did not read the name Kellogg on it. I just saw the biscuit, the wheat biscuit, and then I thought that is what it is.

Prior to that time, I had seen advertising of the Shredded Wheat Company. I have helped put up displays at the store quite frequently. I have always noticed on Shredded Wheat the long biscuit at the bottom of the package, the picture on the face of Plaintiff's Exhibit 1. Looking at Plaintiff's Exhibit 10, I had seen the biscuit and the plate. We had some display cards at the store with that. We used to make up our other part of the display. If we had any children in any pictures, we would put it behind that.

Those displays were furnished us by the Shredded Wheat Company or by the National Biscuit Company.

It seems to me that I recall seeing advertising of Shredded Wheat in a dish like that almost the whole time I have been in the store helping.

If I saw any carton not otherwise identified, like Plaintiff's Exhibit 153, with two biscuit and a dish on the outside of it, that would naturally bring Shredded Wheat to my mind; because I know, when I took that package, I just glanced at it and saw the biscuit. I thought I had Shredded Wheat.

We had some relatives living across from the Shredded Wheat factory in Oakland there. I used to visit them. I know it is also made in Niagara Falls, by the Falls on the box.

I just ate a couple of Kellogg Biscuit out of this package I bought that day. We tried them. I noticed there was a little difference in size between the Shredded Wheat biscuit and the Kellogg biscuit, although the biscuit itself is almost the same thing. I do not know whether I could tell them apart by the taste. We have been so familiar with Shredded Wheat, I think I could, because one is a little larger than the other.

CROSS-EXAMINATION.

THE WITNESS: I did not know anything about the Kellogg Company putting out a wheat biscuit at all, until I bought that package. I have always been fond of Shredded Wheat, and we have always eaten it as youngsters. I serve it to the folks quite frequently. I seldom eat breakfast at all. You have to give little children a change of any breakfast cereal. I do not care what it is. They tire of the same appearance every day. We have always done that with all food for the children. We change off, occasionally to mush. We usually stick to Shredded Wheat. We always have it in the house. Sometimes we feed them poached eggs. As to cereals, the only two that we know anything about in our house are Shredded Wheat and mush.

Of course, we have been in business. I know about other cereals from being in business. In our own house, we have never handled anything but mush and Shredded Wheat, particularly.

The only way I have ever heard of Kellogg's Corn Flakes is through the grocery business I was in. The youngsters never seemed to take to Corn Flakes. I know my sister's children have it quite frequently. My children never seemed to take it. We never serve any other cereal but mush and Shredded Wheat. I do not know that the children get tired of either; but we have always tried to give the children a change of food. We change back and forth from Shredded Wheat to mush and mush to Shredded Wheat. Sometimes we serve them eggs or different foods. As far as cereals are concerned, we have not had many cereals.

I have never worked in the grocery store. At night, the folks took care of the children, and my husband and I went down to the store and got it ready for Saturdays and special days, put up displays ourselves, and things of that kind.

XQ. 84. Did you not say, in the beginning of your testimony, that, when this woman handed you the package of Kellogg's Whole Wheat Biscuit, you noticed something different about it and asked her whether it was Shredded Wheat?

A. Well, I just glanced at the package and I saw the biscuits, and I thought—I do not know exactly what I did see. I thought I saw the plate on the front; but I did not pay particular attention, because I was on my way to Saratoga.

XQ. 85. You were led by something about it to ask the woman whether that really was Shredded Wheat?

A. Yes, I said—well, I just noticed a little change, somehow or other; and I says, "Is that Shredded Wheat?" and she said, "Yes," and I thought, well, there is the biscuit; I have it."

THE WITNESS: When I got in the car, the children read it and said that was not the kind, because they saw the whole wheat on it and it was not Shredded Wheat.

I was asked to make that purchase by Mr. Wadwitz, the manager of the National Biscuit Company in San Jose, whom I have known about a year. During all the fifteen years I have known of this shredded wheat product, the name Shredded Wheat has always meant the National Biscuit Shredded Wheat to me. I was familiar with it and I knew it.

Mr. Wadwitz knows that I tried to sell real estate and write insurance. He phoned me and said, "Are you going anywhere near Saratoga?" It just so happened I was the next day. I said, "I have to see Mr. Boyce in Saratoga." He said, "If you will pick me up a package of Shredded Wheat at this station," and he mentioned the station. I said, "I will do that." He said, "Bring it back to me when you get it." That is all I knew about it. I had no idea there was anything more to it. He just asked me to pick up Shredded Wheat at that one place.

The only experience I ever had with Kellogg Whole Wheat Biscuit was just that one place. That is the only place I know of. When I have seen Shredded Wheat in restaurants, it has been served in individual packages, and it has always been the National Biscuit Shredded Wheat. I have never gotten anything different in restaurants, that I know of. When I came back from Saratoga, I took this package to the National Biscuit man.

GEORGE J. BORN.

Deposition taken at San Francisco, California, February 8, 1933.

Direct Examination.

The Witness: I am in the retail grocery business. I own just one store. I have been in the business about thirty-one years and have had this same store all that time. I was connected with the grocery business fifteen years before that, so I have been actively connected with the business for more than forty years.

I recognize Plaintiff's Exhibit 1. It is Shredded Wheat. I have been familiar with that Shredded Wheat about thirty-eight years. I have carried it in my store or in the stores with which I have been connected, all that time. I think that is nearly ever since it was first made. I first became familiar with it at Pittsburgh, Pennsylvania. I was visiting the Pittsburgh Exposition there. The boss brought it home after an evening there. We all thought it was kind of funny to be eating hay or straw, as we called it then; but we soon began to like it. I think we did not stock it in the store for about three months after we became familiar with it. We have had it ever since that time.

The sales of Shredded Wheat have increased since we first put it in. We sell about five dozen a month now. It has become easier to sell all the time, especially where there are children in the family. I like it so well myself that I think adults like it about as well as children do.

I have observed the advertising done by the company. In my opinion as a merchant, I think that advertising has had to do with the increase in the amount that we turn over. I do not think the appearance of the biscuit through the years has changed at all. Sometimes I think there is a slight change in the package, the cut on the package, but not the biscuit itself.

When our customers ask for this product, they ask for a package of Shredded Wheat. When I am asked for that, I give them Shredded Wheat, referring to Plaintiff's Exhibit 1. I never have given them anything else when Shredded Wheat is asked for. I recall seeing in the advertising a picture of a dish on the end of the panel in Plaintiff's Exhibit 10, and I recall the use of that package. Without a change, I think that must be twelve years or more that they have had that. I have seen it, also, in other advertising of the company during that period, on cuts and placards, also in newspaper and magazine advertising.

From my experience in grocery merchandising and dealings with the public, as to whether this expression Shredded Wheat has any particular association or meaning in the minds of the general public, I think that, in most people's minds, there is only one Shredded Wheat. Nothing else will take its place. It is like Palmolive Soap or Dutch Cleanser that we sell. Those names refer to particular makes of soap and cleanser. I regard Shredded Wheat as a trade name. I guess I mean by that, if people ask for Shredded Wheat, they want Shredded Wheat only.

CROSS-EXAMINATION.

THE WITNESS: Besides Shredded Wheat, we carry a general line of cereals, mostly all the advertised cereals. We carry all the wheat flakes and prepared bran and raw bran, and Wheaties and Puffed Wheat. I do not think the newer cereals have affected Shredded Wheat very much, in my observation. I have not noticed any change in the demand for Shredded Wheat in my store. It is true, however, that the customers of a store shift around. Most customers change from one cereal to another; and to some extent it is also true, I think, that, unless a product is constantly advertised, it

would soon lose its old demand; it would soon lose the old customers and not be getting any new customers unless the advertising was kept up.

I do not think we ever have had a demonstration of Shredded Wheat in our store. I am familiar with what is known as a demonstration. We carried Kellogg's Whole Wheat Biscuit at one time. We do not carry it at the present time. I cannot say that I have seen any of the advertisements of the Kellogg product. I may have. I think we first handled Kellogg's shredded wheat around five years ago or less; maybe three or four years ago. It is fair to say that, since that time, I have known that there were two concerns making this product, the Niagara Falls Company and the Kellogg Company.

When I was carrying the Kellogg product, if a customer asked for Kellogg's Shredded Wheat, I would give them the Kellogg product. When most customers ask for Shredded Wheat, they do not usually say Shredded Whole Wheat Biscuit; they usually say Shredded Wheat. Shredded Wheat has no other current name, as far as I know, than the words Shredded Wheat. Uneeda Biscuit is a soda cracker; but I do not know any other name for shredded wheat or shredded wheat biscuit than the words Shredded Wheat or Shredded Wheat Biscuit. I should say Shredded Wheat is only Shredded Wheat. That is all I have calls for. I would understand a shredded wheat biscuit to be the Shredded Wheat Biscuit that we have known so long.

I do not think it is physically possible for any other maker to make that shredded wheat biscuit than just this one concern at Niagara Falls, if he tries to sell it for Shredded Wheat Biscuit. You can make an article similar to it. If you do not use "Shredded Wheat Biscuit," I would think it would be all right.

If a manufacturer made that product, I do not know any other name that would describe it than the words shredded wheat or shredded wheat biscuit. I would not know what else he would call it. If it were made out of wheat shredded and put up in that pillow-shaped form, I do not think it would be a shredded wheat biscuit. It would not be Shredded Wheat, because Shredded Wheat is Shredded Wheat. I could not suggest any other name by which it could be described. I would not know any other name than shredded wheat biscuit. There was one put on the market not so long ago, called Muffetts. That was not called Shredded Wheat. I think Muffetts are shredded, all right. I know some people make it out of a flat pressed wheat berry and call them whole wheat biscuits. I know a product called Triscuit. That is compressed shredded wheat.

RE-DIRECT EXAMINATION.

RDQ. 67. Why did you cease carrying Kellogg's Whole Wheat Biscuit?

A. Well, we could not seem to keep it fresh. We tried to sell it for a while, but were unable to sell it fast enough to keep it fresh. And then the confusion of the people in wanting Shredded Wheat, and they did not know which to take, so we eventually cleared it up by carrying only one brand.

RDQ. 68. Did you find there was confusion on the part of your customers?

A. Yes, there was.

RE-CROSS-EXAMINATION.

THE WITNESS: Ours is not a self-service store. It is arranged for self-service, but we have been a service store so long that people do not help themselves much in our store.

Mr. Vandervoort, a member of the attorneys for the National Biscuit Company here asked me to testify

in this case. I also know the Sacramento distributor, the agency there. I did not know Mr. Vandervoort before he asked me to testify. He is to pay me for my trip. He asked me whether I was still handling Kellogg's Biscuit and I told him I was not. I came over here by myself.

We did not consider the Kellogg brand as Shredded Wheat. We tried to sell it as a cereal, but it did not sell fast enough to keep it fresh. It had rather limited advertising at that time. I do not know just what it has now. We did not associate it in our minds as being Shredded Wheat; and we could hardly persuade our customers that it was the same thing when we tried to sell it.

While I do not know that the matter ever came up during the time we were handling the Kellogg product; if a customer had asked me whether there was any other make or brand of Shredded Wheat besides the Niagara Falls brand, I would say that there was only one Shredded Wheat and we could not conscientiously sell the Whole Wheat Biscuit as Shredded Wheat. If it was put direct to me, I think I would explain that Shredded Wheat was the only Shredded Wheat. I would not use the expression that Kellogg's was another make of shredded wheat. I would not even say that shredded wheat or shredded wheat biscuit were being made by two manufacturers: one at Niagara Falls and the other at Battle Creek. I would simply tell the customer that, as far as I know, there is only one kind of Shredded Wheat on the market, the Niagara Falls product.

If the customers told me they had seen some of the Kellogg product and it looked like Shredded Wheat and tasted like Shredded Wheat, I would not tell them they had not seen it; but I would tell them it was not Shredded Wheat; meaning by that that it was not Shredded Wheat anyway. I have no doubt it is made

of wheat. I do not know whether the Kellogg product is shredded. We do not call it Shredded Wheat. I am familiar with the Kellogg Biscuit. I always thought it was just a trifle finer shreds than the Niagara Falls Biscuit. It is very little smaller; at least, it was when I sold it. I am not sure if it has the same number of biscuit in the carton as the Niagara Falls product. I think it did have a larger number of biscuits.

I have not talked about the case with anybody besides Mr. Vandervoort, except my brother, that I was coming down here. He is my partner.

When I speak of shredded wheat, I mean a product made by the National Biscuit Company at Niagara Falls or at Oakland. It is not impossible for me to conceive that the same product could be made by another company at another place. I do not think I would look at it that way. I think they could make a biscuit if they did not call it whole wheat biscuit or shredded wheat and make it so much alike. The name whole wheat biscuit does not mean to me the same thing as shredded wheat biscuit.

There are not half a dozen different products you could call whole wheat biscuit. I think the Sanitarium Health Food Company made one here some twenty years ago, I guess; and they pressed the whole wheat berry into a flat-like oat flake and baked it. I forget, now, whether it was exactly square; but they did not call it whole wheat biscuit. They called it Sanitarium Biscuit, I think.

This product in Plaintiff's Exhibit 1 is shredded whole wheat biscuit. That is the same thing that we have always associated with the name shredded whole wheat biscuit.

If a customer asked me for whole wheat biscuit, or Kellogg's Whole Wheat Biscuit, I would say I did not have it. I would not sell the other product as the same product. I think I should tell her that we had shredded

whole wheat biscuit. I do not believe I would try to tell her it was the same article as Kellogg's. I might say it was made out of the same material. I think I would say it was made out of wheat and water.

My brother did not come down with me. The Pittsburgh Exposition that I spoke of was always held in the fall; but I could not say whether it was exactly thirty-eight years ago. It was very early in the history of my recollection of Shredded Wheat. I am just guessing about the length of time. I think it was made before I became familiar with it. I thought it was nearer forty years ago that it was made; but Mr. Vandervoort said it was about thirty-eight years. I sold it just as soon as it was introduced in Pittsburgh. It may only have been thirty-seven years.

RE-DIRECT EXAMINATION.

THE WITNESS: At the Pittsburgh Exposition they had a little machine that showed the process. They put in the wheat berry and brought out the shreds, the same as they used for a good many years afterwards, just about the same kind of apparatus. At that time, it was something new. It was quite a long time ago. I remember it as something that was then being newly introduced.

RE-CROSS-EXAMINATION.

THE WITNESS: I do not remember whether, in the beginning, their idea was to sell the machine and have people make the shredded wheat at home or not. From the table it stood on, the machine was probably about two to three feet high. They put the wheat in on top.

I think it was about three months after that time that we began carrying it in regular package form. The man I worked for, Frank Steinberg, brought home a package. I do not know now whether it was a sample package or regular package. They used to put across

the package: "Tell me what you eat and I will tell you what you are." He ridiculed that phrase and said, "I can tell you what you are without eating that stuff." That phrase naturally stuck in my mind. They discontinued it a long time ago. It was on some of the old packages.

I remember seeing the picture of a woman, the Goddess Ceres, with a sheaf of wheat, on the old packages. I think I remember seeing that on packages up to ten or fifteen years or so ago. I strongly associate Niagara Falls with this National Biscuit Shredded Wheat Biscuit. In fact, I thought it was made there first, but it may not have been. Mr. Vandervoort did not say anything about its being made anywhere else. Of course, I knew they had a branch in Berkeley or Oakland. In all their advertising, Niagara Falls has been very prominently featured. I never have had anybody ask for this article, except by the words Shredded Wheat. If anybody asked me for Niagara Falls Shredded Wheat, I would have no doubt what they meant. Then, of course, I should hand out Shredded Wheat. I carry the rest of the National Biscuit line in my store, their cracker line. We handle a great variety of their line. I handle the rest of the Kellogg line, excepting only the shredded wheat biscuit.

RE-DIRECT EXAMINATION.

THE WITNESS: If anybody asked me for a package of Shredded Wheat, I would have no doubt in my mind what they would want.

RE-CROSS-EXAMINATION.

THE WITNESS: If they asked for Shredded Wheat, I would never give them anything except the Niagara Falls product.

WILLIAM G. EASTMAN.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

THE WITNESS: I operate and own a grocery store in Stockton, known as the Eastman Cash and Carry. I have been in that business thirteen years, always in Stockton.

I recognize the package, Plaintiff's Exhibit 1. I call it Shredded Wheat, original Shredded Wheat. I recognize the contents. I have been familiar with Shredded Wheat like that for some time. The moment I went into the grocery business, I was familiar with it. I used it in my home for quite a few years before that. During my experience with it, it has always been of substantially the same appearance as the biscuit in Plaintiff's Exhibit 1.

I have seen Shredded Wheat advertised a great deal. I do not recall having ever seen a package like Plaintiff's Exhibit 10, with a picture of two biscuit in a dish on the end of the carton. I have seen that dish, however, in advertising of the Shredded Wheat Company. I carry Shredded Wheat in my cash-and-carry self-service store. My customers come in and help themselves to what they want. Sometimes, when strangers come in, we wait on them. Ordinarily, they wait on themselves.

When a customer orders Shredded Wheat, I know she has the original Shredded Wheat in mind, Plaintiff's Exhibit 1. When a customer asks for Shredded Wheat, I supply her with the original Shredded Wheat, the National Biscuit Shredded Wheat. From my experience in dealing with the public, I am able to say whether the expression Shredded Wheat has a definite meaning or association in the minds of the public. When they

ask for Shredded Wheat, they expect to get the original Shredded Wheat, in my mind, by which I mean the Shredded Wheat with the Niagara Falls picture on it. The public feels that way about it through the picture on there and the advertising it has had. I would say that the advertising I have seen done by the Shredded Wheat Company and the National Biscuit Company has had a great effect on the public. They look for that package, the original Shredded Wheat. The name Shredded Wheat has a great influence on the public, the original Shredded Wheat name.

If a customer asked for Shredded Wheat, I would never give her anything else than a package like Plaintiff's Exhibit 1. In my experience and in my opinion, I do not think the public think of any other product or the product of any other person when the expression shredded wheat is used.

I have seen advertising where it was "Shredded Wheat" in large letters, and then "Kellogg's" in small type, in the Stockton paper, within the last three or four months. I think that sort of advertisement is a very misleading thought to the public. It was misleading to me. I read it, and I approached the Shredded Wheat salesman on the price he had it advertised for, which I think was eight and one-half cents. He said it was not advertised. I was so positive about it that he said no, it was not. I said, "I am positive." He looked the paper up and said it was Kellogg's Whole Wheat Shredded Wheat that was advertised. Up to that time, I really thought it was the other. I was so positive about it, and my clerk was also positive; but he looked it up and said it was Kellogg's Shredded Wheat that was advertised.

CROSS-EXAMINATION.

THE WITNESS: I knew that the Kellogg Company did not make the original Shredded Wheat. When I

saw "Shredded Wheat, Kellogg's," I did really think that meant Niagara Falls Shredded Wheat. I did not read far enough down. The "Shredded Wheat" was what confused me and what misled me so much I did not read on down. I took it up with the salesman and he told me the word *Kellogg's* was there. That was the advertisement of the Green Frog Food Emporium in Stockton, which was advertising Kellogg's Shredded Wheat, at eight and one-half cents.

I do not now stock Kellogg's Shredded Wheat. I have stocked it, but I do not any more. Mr. Wagner, the manager of the National Biscuit Company at Stockton, asked me to come down here and testify in this case. I came down on the train. He told me I would be paid for my time in the case. I expect to get a check when I go out of here.

I handle other Kellogg products, the Corn Flakes, and Kellogg's line, a good many of the articles, except Shredded Wheat. My store is operated now as a self-service store. The customer comes in and goes to the shelves and takes down what she wants. It has been self-service for five years, and was service before that.

Up until five years ago, whenever a customer asked for Shredded Wheat, we gave her the Niagara Falls product. Since then, the customer goes to the shelf and takes whatever she wants, if it is there, unless it is a stranger or one of the few who do not prefer to wait on themselves. So far as my store is concerned, for the last five years, with the exception of very few customers, they wait on themselves, do not say anything to me, do not ask for anything; they go and get what they want.

Something I have never done was to substitute. I handled the Kellogg product, and there was very little sale for it. I handled it when it first came out. If a customer asked for Shredded Wheat and I sent her something other than the Niagara Falls product, I

would expect her to send it back, depending on if she was that kind of customer. Sometimes they keep them and sometimes they do not. Sometimes they do not care what they get.

In my store it is the hardest thing in the world to put over something new. They seem to hold to the old. In my particular store, new cereal products do not sell very rapidly. There are some exceptions, I will admit. I believe advertising is a great thing, but it is hard for me to answer as to whether the Shredded Wheat business would die out if they discontinued advertising. I would not like to commit myself on that. I had not thought anything about discontinuing advertising. That they always keep up advertising has, I think, a significance to me.

We have had demonstrators there in the store. Those demonstrators have been trying to introduce new products or introduce old products to new customers. I do not think I would need a demonstrator in there to tell an old customer about Niagara Falls Shredded Wheat. I never had any demonstrators of the Kellogg's Shredded Wheat Biscuit.

I do not know how long ago I stocked Kellogg's Shredded Wheat. I do not know how long it has been on the market. I stocked it, I think, when it was first put on the market. I distinguish one of these products as the original Shredded Wheat and the other as Kellogg's. I have known for about five years that the Kellogg product was on the market in competition with the Niagara Falls product.

I handle Wheaties and Albers Wheat Flakes. The Wheaties are Sperry Wheaties, made by the Sperry Flour Company. They sell very slowly in our store. That is no go.

If a customer asks me for Corn Flakes, I generally understand that as being a particular product or brand, Kellogg's Corn Flakes. If a customer just said "Corn

Flakes," I suppose I would give them Kellogg's. It depends, sometimes, on circumstances. There is only one brand of Corn Flakes, I think. I have Post's, but they are not called Corn Flakes. They are Post Toasties. I think I did handle corn flakes other than Kellogg's or Post Toasties, but it was a good many years ago and I have forgotten the brand. I do not handle it any more.

RE-DIRECT EXAMINATION.

THE WITNESS: I do not carry Kellogg's Whole Wheat Biscuit because the sale was not great enough on them for me to handle them. At that time, we were operating as a self-service store, and the customers just did not take them. I had Shredded Wheat in the store at the same time. I have always had Shredded Wheat, ever since I have been in business.

RE-CROSS-EXAMINATION.

THE WITNESS: In 1927 or 1928, when we had both products, Kellogg's and the Niagara Falls, while we were still a service store, a customer would specify if she wanted Kellogg's. We have not carried Kellogg's biscuit since we became a self-service store.

W. D. VAN ARSDALE.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am manager for L. Hart & Son Company, a department store in San Jose. One of about forty different departments is a grocery department. I have charge of the grocery, the crockery, and the toys. I have been manager of those departments

for seven years. I have been in the grocery line indirectly for about thirty years, and, directly, about nine or ten years in direct charge of groceries. I have been in the crockery and glassware, directly next to the groceries and monkeyed a lot with that, too. It is true that I have been more or less familiar with the grocery line for thirteen years or more.

L. Hart & Son Company is a service store generally, but the grocery department is self-service. I have been connected, indirectly, with the Schaffer Company, at Modesto, who have two departments, service and non-service. L. Hart & Son Company do accept a very few orders over the telephone for groceries.

I recognize Plaintiff's Exhibit 1, and I recognize the contents, as Shredded Wheat. I have known Shredded Wheat since long before 1900. My wife's father was a fiend on Shredded Wheat. He used to eat it with milk and poached egg. I do not remember having it in my home; but that was in my wife's father's home, I saw it and knew about it at that time. It then looked like the present product, as far as I can remember. I do not think there has been any change in shape or appearance.

I recall Shredded Wheat advertising. I think almost every magazine that I have picked up has had a Shredded Wheat in, as far as I can remember. I used to be in the advertising business and have watched advertising a great deal for ideas. When I pick up a magazine, I usually read all the ads, in consequence. I have frequently seen ads of Shredded Wheat. In my opinion as a merchant, I think the effect of the advertising done by the Shredded Wheat Company through the years on the public has been to stimulate the sales of that particular product. The effect on the name Shredded Wheat has been that they come in and ask for Shredded Wheat. My customers ask where

the Shredded Wheat is. We do not serve them there in the store. If they ask where the Shredded Wheat is, we direct them to the section where it is.

When I use the expression Shredded Wheat, I mean only one thing by that. Our cereals are all together; and, if they would ask for any particular cereal, we would direct them to that particular part of the store. If a telephone order comes in for Shredded Wheat, we fill that order with Shredded Wheat. We do not substitute anything in the store.

I recall the package like Plaintiff's Exhibit 10, with the picture on the end. I have seen that dish. I would not be able to say how long I can remember having seen the use of that dish with two biscuit in it, because that package, to my recollection, has been the same ever since I can remember selling Shredded Wheat off the shelf, with the exception of possibly a few little changes in lettering or style.

When a customer asks for Shredded Wheat, he means that particular package. I would certainly say that the public associates the name of Shredded Wheat with this product.

In our grocery department, we set all our cereal products together. All the dry cereals that come to us already cooked ready for eating are kept together, relative to one another. The farinas and cooked mushes are all kept together. We keep corn flakes one right by the side of the other. We keep our farina, cream of wheat, pearls of wheat and Sperry wheat hearts all in one section by themselves. We do that to facilitate the customer in getting what she wants quickly without any confusion.

We carry Kellogg's Whole Wheat Biscuit next to Shredded Wheat, in the same bin, the same part of the store, the same section, with a little partition in between. In the Kellogg's packages we have at present, there is a cellophane display package, just one

in each case. That is our present stock. That package is like Plaintiff's Exhibit 153. That is always kept in the front. We keep all display packages of that nature in the front of our section. The rest of the case consists of packages like Plaintiff's Exhibit 155, with a picture of two biscuit in a dish on each side.

There is one instance I can state exactly. There was a lady sent her twelve-year-old boy for a package of Shredded Wheat. He picked out a package of Kellogg's, with the open face. I do not know that he stopped to read it. He took it home. She called me on the 'phone, told me she was sending him back, that he got the wrong package. We changed it for Shredded Wheat.

I think there have been several other instances. A boy in the store has told me that there have been several other times when packages have come back and been changed. I have noticed sometimes that some of the customers will pick up one of the Kellogg's Shredded Wheat and look at it, talk among themselves, and say no, that is not what they want. Then they pick up the regular Shredded Wheat and take it out. We had an instance just two days ago of a woman who bought both packages and said she was going to try them out and see which was the best.

I think that the cellophane opening feature on Plaintiff's Exhibit 153 is the one that would offer the most confusion, because it resembles the regular Shredded Wheat, the genuine Shredded Wheat. I think the picture of two biscuit also has a tendency to confuse to a certain extent, but not so much as the other one.

CROSS-EXAMINATION.

THE WITNESS: There are very few of the Kellogg packages go out. We sell very, very little Kellogg's biscuit in comparison with Shredded Wheat. We have

carried the Kellogg's, I will say, offhand, about six to eight months.

Mr. Wadwitz, of the National Biscuit Company asked me to come down and testify in this case. He said he would reimburse me just for my expenses. We are very friendly.

Of course, there are lots of times, possibly, when merchandise would come back, that I have no knowledge of, because the cashier has instructions that, if anybody brings anything back, no matter what it is, whether it is their fault or the fault of the merchandise, he is to replace it with whatever they w[redacted]. Those things are not brought to my attention unless there is something radically wrong with it.

I do not think there is anything unfair about the way I have arranged those packages alongside each other. I have no knowledge as to whether people who pick up a package do so because they want that particular package. People who go into a self-service store do pick up one package sometimes when they really want another one that is right alongside of it, if there is a crowd and they are in a hurry. We have many instances in other merchandise when they do that. Rather than wait for the crowd to get away, they take the first one they can get hold of, to get out.

There are two kinds of substitution: one that might be called fraudulent or deceptive, and the other non-fraudulent or non-deceptive. If a customer asks for one kind of baking powder, and the grocer is out of it, some of the grocers will take a chance on sending her another baking powder. We do not. Absolutely every order we fill down there is filled with what they ask for. If it is part of an order and we do not have the article, we immediately telephone them that we do not have it and ask them if we can send something else. We never substitute on our own hook.

If they said they wanted Niagara Falls Shredded Wheat, and I happened to be out of it then and asked them whether they wanted the Kellogg's and sent it along, I would not regard that as substitution. That would be something that the customers picked out themselves. Such practice in the grocery trade is becoming more and more prevalent. That is, grocers are finding out more and more that there is no use sending a woman something she does not want; because, if they do, she will either send it back or quit trading. There are so many places you can get the stuff you want, there is no necessity for substituting. So, to that extent, I think the practice is becoming less and less prevalent all the time, with the legitimate grocers. There are many who are not legitimate, nowadays. Customers very soon get to discriminate between the legitimate grocers and the illegitimate.

If Shredded Wheat advertising were discontinued, I would not expect that business to go on in its present volume; nor would I expect it with any cereal. Practically any business based on advertising requires constant stimulation by advertising. I would not say that the reason for that is customers tiring of Shredded Wheat and advertising bringing in new customers. Demonstration is, to a certain point, for the purpose of recruiting new customers. Advertising is really intended, primarily, to stimulate customers who are new customers. New customers are coming up all the time, because there is a new generation being born every day. You have to educate them. My father-in-law used to eat Shredded Wheat twice a day. I do not know whether they have to advertise to him to keep him buying it. I do not remember. I have never seen any advertisement of Kellogg's shredded wheat product, to my knowledge.

There is still some of the old fraudulent type of substitution, where one package is made to imitate an-

other package so closely that, when the customer gets the imitation package, she really thinks she is getting the original. In that case, there is an actual deception practiced or intended to be practiced on the customer. When the customer gets this imitation package, she actually thinks she has got the thing she ordered and wanted.

I cannot tell you just exactly how long I have known the Kellogg's shredded wheat product, but it was from the first time it was put out. I would not say it was as long as four or five years ago. When it was first put out, the Kellogg salesman approached me. It was ordered and did not come. We did not put it in for some time after that. This Kellogg product is the only other make of shredded wheat besides the Niagara Falls that I know of. Since I was approached by the Kellogg salesman, I have known of these two brands, the Niagara Falls brand and the Kellogg brand of shredded wheat. The salesman who approached me at that time was one of the regular salesmen in that territory, who handled Kellogg's Corn Flakes and the complete line of Kellogg products. He always calls when anything new comes up. Those salesmen, as far as I know, pretty generally travel the trade in that territory. He calls on all the trade down there.

RE-DIRECT EXAMINATION.

THE WITNESS: It is true that there are various grades or degrees in which packages may be deceptive. I think sometimes the packages are put up in a very similar manner because they are possibly made up with the idea of appealing to the customer's eye, when they know the other package has appealed to their eye, and not as a matter of defrauding the customer. At the same time, I think they do defraud them. Any substitute or imitation, I would think, is a fraud.

RDQ. 96. In what category do you put the Kellogg packages, Plaintiff's Exhibits 153 and 155? Do you think that they are calculated to deceive, or that they are——

A. I would judge that that package there, with the open face was calculated to sell shredded wheat biscuit on the strength of the regular Shredded Wheat advertising.

THE WITNESS: In one of my answers I meant to mention still another product, Muffetts. It is a whole wheat biscuit, and I would imagine it is of similar composition to Shredded Wheat. It does not look like Shredded Wheat at all. I never knew of any instances of confusion between that and the Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: I regard Muffetts as a wheat product of similar nature to shredded wheat. I do not know whether it is made of wheat that is shredded. It is a similar-tasting product to the others. That is as far as I can tell. I do not know just how they are made. In fact, I would not be able to tell you how Shredded Wheat Biscuits are made.

I do not know that we have any packages intended for fraudulent substitution for some other package; but we have lots of different products, the labels of which are copied very closely from those of other products.

If somebody brought me a product so nearly like Baker's Chocolate that I could make the customer think she had gotten Baker's Chocolate, with the same lettering, I would not handle it, unless it were a superior product. Even then, if it were a product intended to be fraudulently substituted for another product, our store would not handle it. We will not even practice the non-fraudulent or non-deceptive substitutions. We will not even send out a package where the

customer knows the minute she gets it that it is entirely different from that she asked for, without her permission.

We would call her on the 'phone and say that we did not have Baker's Chocolate but we did have somebody else's. If she said all right, then we would send it along. Our store would not carry a fraudulent product. We would not tolerate it for a minute.

When we stack packages of Kellogg's Whole Wheat Biscuit on the cereal counter, we put them alongside the Niagara Falls or original Shredded Wheat. The reason we do that is that both products are very similar. We do the same thing with all our merchandise down there. We put all the corn flakes together, all the wheat flakes together, all the crackers of different kinds; soda crackers in one place, assorted crackers in another. The same way with the soups. All the fish is in one section. We do that to facilitate the customer in picking out merchandise. For that reason, we would put the Kellogg shredded wheat package right alongside the Niagara Falls Shredded Wheat package. We had Muffetts right along on the other side, when we carried it.

RE-DIRECT EXAMINATION.

RDQ. 116. Mr. Van Arsdale, you were speaking of the package with the display window in it, Plaintiff's Exhibit 153. I now direct your attention to the package, Plaintiff's Exhibit 161 for identification, and particularly to the legends on the ends of it.

On one end it reads: "Shredded Wheat in its most delicious form;" and, on the other end, it reads: "A shredded wheat product."

Compare that with Plaintiff's Exhibit 153 and tell me whether you think that that package, with the wording I have described, and with the somewhat different picture of the biscuit on the reverse side, is a greater or less confusing package.

A. Well, I think that, if a woman was not absolutely familiar with the other box and going to try shredded wheat, and came in and picked up one of these, she would just as naturally pick up this one as she would pick up the other one.

RE-CROSS-EXAMINATION.

THE WITNESS: I would think it is a universal practice of a manufacturer who has any lawful right to make a product, to try to tell, on the outside of the package, what is on the inside of the package. I do not know of any blind package, in which the customer would have to open the package to see what it actually contains, or I would have to say, "Madam, I do not really know, myself, what is in it. You will have to open the package to see what is in it." I do not think I would handle that kind of package. If the manufacturer for any reason wanted to make a product and he had the right to make it, I would think he would show on the outside of the package what was inside the package when it was opened.

RE-DIRECT EXAMINATION.

THE WITNESS: I would not expect him to show on the outside of the package that it was a product made by somebody else.

ELBERT KIRKLAND.

Deposition taken at San Francisco, California, February 8, 1933.

DIRECT EXAMINATION.

My residence is 293 Lowell Street, San Francisco, and my business addresses are 1933 Irving Street and 828 Irving Street. The business is a retail grocery. They are cash-and-carry stores, self-

service. I have been in the grocery business about twelve years. The second store was opened about ten months ago, since last April.

I recognize Plaintiff's Exhibit 1, Shredded Wheat. I have been familiar with Shredded Wheat ever since I can remember; as a youngster. I had it in my home before I was in business. I have carried it in my stores. I have conducted a service store.

I know that the expression Shredded Wheat means to the general public just Shredded Wheat. An experience I had at a service store would probably define it a little better. We carried the original Shredded Wheat, or what people would generally say is Shredded Wheat, and we would give them that.

When Kellogg came out with a product similar to Shredded Wheat some few years ago, maybe four years ago, they came into the store and asked me to try it. I did not like it, because it was apparently confusing.

We had a service store. When people would order a product, we would generally send it out as ordered. If we had to answer a lot of questions, it took up time. We were pretty busy and we did not like to do that. We were trying to keep away from duplications.

After considerable persuasion, we took a case of Kellogg's shredded wheat. We had considerable trouble getting rid of it. They would send for Shredded Wheat, and we would get a package of this to try to shove it and get rid of it. They would take it up and say, "What is this?" We would go on to say it was a new product, that they were coming out with this supposed-to-be improvement, as was suggested to us, over the old product of Shredded Wheat. Kellogg's salesman said it was better than Shredded Wheat.

So we carried it until we got rid of it. I do not think I ordered it a second time. I put it in the first time. We had so much trouble getting rid of it, being sent back, we discontinued it, because of the confusion.

They did not seem to know that one as they did the other one. When they asked for Shredded Wheat, that was the one they seemed to want.

In my experience, I have observed some of the advertising done by the Shredded Wheat Company. As to the effect of that advertising on the expression Shredded Wheat, I would answer as to my own mind, more or less. I think the people have been brought up to recognize Shredded Wheat as one Shredded Wheat in the original.

We never had a call for the Kellogg product, even with the amount of business that we did. We generally advertised Shredded Wheat pretty heavy. I do not remember whether, in the last ad I put out, I stated the kind, whether I put Uneeda on there or not.

As a rule, if Shredded Wheat is on sale, they do not say Kellogg's or Uneeda; they ask for Shredded Wheat and go over and pick up Uneeda Shredded Wheat and are perfectly satisfied.

I regard the name Shredded Wheat as a trade name. If anybody speaks of Shredded Wheat, I do not associate it with anything else but Uneeda. I do not believe the customers do, either, from the way they buy. When the purchasing public speak of Shredded Wheat, they think of Uneeda.

CROSS-EXAMINATION.

THE WITNESS: By the word Uneeda they mean the Shredded Wheat made by the National Biscuit Company. By shoving, I mean, when we had the service store, we had two different pieces of goods on the shelf; If you have something that is not moving we call shoving it getting it out of the way, getting it sold and off your shelves. We would send Kellogg's to some customers who were not too far away if it were returned, or who were more or less easy-going, if they did not spec-

ify Uneeda, until we got rid of it. Some of those customers would keep the product. In the main, there was so much trouble, confusion, and complaint that I stopped handling the Kellogg product. I regarded that shoving as being the same as substitution; but it would not be the same as what might be called fraudulent substitution.

I had not given any thought to whether anybody getting the Kellogg's Whole Wheat Biscuit would think they were getting Uneeda Shredded Wheat. What I was interested in was giving them Shredded Wheat if they asked for Shredded Wheat, if they considered that as Shredded Wheat. The two looked the same. Some would try it and some would send it back without even trying it. If it was close to the store, or if the people were more or less easy-going, we would try to get by until we got rid of it, although we do not make a practice of such things.

I did not tell them to try Kellogg's and, if they liked it, to keep it. We expected them to say they wanted the other but they would keep it this time. I do not remember whether, when they called the next time, they would say they wanted the original Shredded Wheat. Some of them did.

I did not think that a business could be built up in Kellogg's shredded wheat on that kind of shoving. I really had not thought of that. It was a matter of my getting out from underneath of goods that were not going over as they should and confusing in two different lines. That was my reason.

By duplication I mean that I do not like to have two brands of the same kind of product made by different manufacturers, any more than I can help. We have corn flakes and post toasties, very similar; yet, they are two that are pretty generally used. We might have three or four brands of canned peaches; but we do not have two dozen kinds.

The kind of brands in which I do not want duplication is those that do not move or are too many of a kind. For instance, we carry S. & W., Del Monte, and Libby's peaches. The only other peaches we will handle will be some gotten in for a special that we get in and out. They do not find shelf room. Those specials we would sell on price inducements, principally.

There was no demand for the Kellogg shredded wheat product in our store, because I did not keep it long enough, and I simply had one case. If we had kept it longer, possibly there would have been a demand for it. With this one case, there was no such demand as to induce me to buy another case of it. It was something that was not moving. I will say that the fact that we could not handle it by shoving or substitution and that there was so much trouble about it that we could not build up any business that way and just did not want to try it any further was principally the reason. I did not like the idea. I thought that one shredded wheat was plenty and let it go at that. I was not the only one in the store. I did not get all the complaints or hear all the calls. I would say that the practice of shoving is distinctly dying out in all legitimate groceries. They cannot get anywhere by shoving it; but they can induce the customer to buy it. I regard inducing a customer to buy it, saying, "Here is a new product with fifteen biscuit to the package. We would like you to try it. We think it is a good product" as perfectly legitimate. There is no substitution or shoving in that. At least, we regard that as shoving, but not as substitution in any way. If a grocer wishes to take that much trouble, I regard that as a perfectly legitimate thing for him to do, if he tells the customer he has a new make of the old product and asks them to try it.

I do not remember how long I have been familiar with Kellogg's shredded wheat product. I would say

maybe four years. If I took on the Kellogg biscuit again in my self-service store, I would put it right alongside the Niagara Falls product. My reason for doing that would be that I regard those two products as being practically the same kind of product, answering the same demand; to give them a chance to choose which of the shredded wheats they wanted.

I would not put the Kellogg Whole Wheat Biscuit down next to the Corn Flakes or anything of that sort. I would put it in the shredded wheat section of my store. It is fair to say that, for four or five years back, I have known that there were two kinds of wheat biscuit on the market; one made by the Shredded Wheat Company and the other made by the Kellogg Company.

If I were carrrying the Kellogg product and a customer were to say to me that he wanted Kellogg's Shredded Wheat, I would send him the Kellogg product.

I came into the case by a gentleman from the National Biscuit Company ringing me up. He asked me if there would be any expense; and I told him I would have to put a man on for half a day; and, as far as the rest of it was concerned, I did not want anything. He said he would reimburse me for the time. I do not know his name. I did know it, but I cannot recall it. It was somebody connected with the National Biscuit Company.

At the present time, I do not handle the Kellogg product; but, if I had a demand, if I found customers repeatedly asking for Kellogg's Shredded Wheat or Kellogg's Whole Wheat Biscuit, then I would stock it up.

RE-DIRECT EXAMINATION.

THE WITNESS: We find considerable demand for Shredded Wheat Biscuit and sell lots of it. It is pretty hard to say exactly how much I sell a month; but I

imagine it is around twenty-five cases. I buy some directly from the National Biscuit Company, and some we do not. If I am putting in a special, I generally get it through Dunne, the salesman, and have him send them out. Sometimes I ring up the Equitable Cash Grocery and get them from them. As a rule, I buy them direct from the National.

RE-CROSS-EXAMINATION.

THE WITNESS: I handle the other Kellogg products, Corn Flakes, and almost the complete line but I do not handle Kellogg's shredded wheat. The Kellogg salesmen call on me right along. They have not solicited me to buy Kellogg's shredded wheat for a long time. There has been a new man, I think, on the territory since I bought; and they have not even suggested it to me. I have not had one ask me to buy it in, maybe, two years. I have not the slightest idea why that is. I had not thought of it at all. In fact, I had not thought anything about it. They have asked me about the other products, Corn Flakes, and so forth. They come in right along; but they do not ask me about Kellogg's Whole Wheat Biscuit. I had not noticed that particularly until you brought it up. I had not paid any attention to their not asking. I do not think I have had a salesman ask me to buy Kellogg's shredded wheat for at least two years, anyway. They have other products. Two weeks ago, one of the salesmen came in, and I bought some Wheat Flakes, a wheat product. I bought that direct.

Possibly the reason for it is that the Kellogg salesman knows pretty well what Kellogg products I carry. I have no doubt that, if I had been carrying Kellogg's shredded wheat right along, when he came to get my order for corn flakes and bran, he would also ask me about that. They do not come particularly to get my order for different products. They generally come in

and introduce a brand, or sampling, something of the kind. They will come out and offer me samples, occasionally, to sample the trade. When my supply of Corn Flakes runs out, I ring up the wholesale grocer. I do not order through the specialty salesman, unless one happens to come by and I would give him an order.

WALTER JOHNSTON COOPER.

Deposition taken at Los Angeles, California, February 11, 1933.

Direct Examination.

The Witness: My age is twenty-two. I am not employed at the present time. I have never been employed by the National Biscuit Company or by the Kellogg Company. I am acquainted with Mr. Small, manager of the San Diego branch for the National Biscuit Company. I am familiar with a product known as Shredded Wheat.

I recognize Plaintiff's Exhibit 1 as a package of Shredded Wheat. I have been familiar with Shredded Wheat for about seven years, largely as a consumer. While I was at the University as house manager last year, I had control of all purchasing. We stocked quite a bit of dry cereals. In that capacity as house manager, I purchased Shredded Wheat quite often. When I purchased it, I asked for it as Shredded Wheat. When I did so, I expected to receive the Shredded Wheat package that I see before me, Plaintiff's Exhibit 1. I generally received that package.

I am still a purchaser of Shredded Wheat. I am living with my brother and sister. I do most of the marketing at the store, and we get Shredded Wheat about once or twice a week, or three times in two weeks, perhaps. I usually pick it out. I have been buying it at one of these self-service stores. I find it displayed

there. I pick out packages like Plaintiffs Exhibit 1. I have also ordered or purchased Shredded Wheat at restaurants or cafes, probably about fifteen times.

The general practice in restaurants I am familiar with, of serving Shredded Wheat when ordered, is that they bring you Shredded Wheat in a small package that contains two biscuits, I believe, and serve you in that fashion. They open the box before you, or they put the box in the dish and let you open it. I have had Shredded Wheat like the biscuit in Plaintiff's Exhibit 1 served to me in that way, in individual packages. I never have had it served to me out of the package. I had two occasions when I ordered Shredded Wheat Biscuit and did not receive biscuit like that in Plaintiff's Exhibit 1.

Tuesday afternoon, November 15th, I went in Stout's grocery, located at 2548 University Avenue, in San Diego, and asked for a package of Shredded Wheat. The proprietor of the store gave me a package of Kellogg's Whole Wheat Biscuit. I looked at it and said, "Is this Shredded Wheat?" He tapped the package with his hand and said, "Yes, this is Shredded Wheat." At the same time, he gave me a Kellogg's Wheel of Knowledge, for which I paid him ten cents and left. That is, he charged me ten cents for the package. Plaintiff's Exhibit 171 is the carton. I signed it on that date, in longhand. I see my signature on it and identify it. Plaintiff's Exhibit 172 is the Wheel of Knowledge that accompanied it.

I happen to be a personal friend of Mr. Small. We rent the home we are living in from him. I have played golf with him on several occasions, and I know his son. He asked me if I would help him out one afternoon. He merely wanted to find out some facts in a case where they said there was some substitution going on over Shredded Wheat. He dropped me several blocks from Stout's grocery and asked me to go in and get a pack-

age of Shredded Wheat. I did as he requested and received the information I have testified to.

On the same afternoon, I called at the Plaza Cut Rate Drug and Lunch Stand, Fourth and Broadway, San Diego. On this occasion, I went to the lunch counter and asked for a serving of Shredded Wheat. The boy brought forward a small package of Whole Wheat Biscuit. While he was still down the counter, he opened the biscuit, threw the box away, and brought me the Whole Wheat Biscuit in a dish. I could see him open the box and toss it away.

I asked him for a second helping at the same time. He placed the second in front of me with the box right there. I ate the first one and took the box of the second away. I said, "Is this Shredded Wheat?" He touched the box, and he said, "Yes, this is Kellogg's Shredded Wheat." I made no further comment. Plaintiff's Exhibit 173 is the carton he gave me the second time. I signed that one. I identify it. I cannot say that I was directly acquainted previously with the Kellogg's Whole Wheat Biscuit. I had probably seen it on the shelves and various places in stores; but I had never purchased it.

CROSS-EXAMINATION.

THE WITNESS: If the clerk in the store had handed me a package of Corn Flakes and said "That is Shredded Wheat," I would hardly have believed he was telling the truth. When the clerk in the restaurant said, "This is Kellogg's Shredded Wheat," I knew what he meant as far as he went. I did not take any issue with him, as I would have done if he had told me "This is Kellogg's Corn Flakes." Physically speaking, it was not shredded wheat biscuit that was in those cartons. I believe there is a difference. Your whole wheat biscuit is a smaller biscuit, to begin with, and there is a difference in the taste. I would say that it was a smaller

shredded wheat biscuit and of a different taste from the old Shredded Wheat Biscuit. I recognized the difference in taste and the difference in size right away as soon as it was served to me, being quite well acquainted with Shredded Wheat.

Mr. Small asked me to go to both these places, the grocery store and the restaurant. He asked me, also, to go to one other place, a restaurant. I do not know the name or address, because I went there, asked for Shredded Wheat, and received the National Shredded Wheat. So, out of two restaurants I went to, I received National Shredded Wheat in one and Kellogg Shredded Wheat in the other. In the other restaurant, the boy told me the package was Kellogg's Shredded Wheat.

When I bought the large package of Kellogg's Whole Wheat Biscuit in the grocery store, I did not think, when the man handed me the package, that it was National Shredded Wheat. I knew right away that it was a different package from that which I had been accustomed to. I pointed to the package and said, "Is this Shredded Wheat?" He looked at it and said, "This is shredded wheat," and reached out and touched it with his hand.

The man did not direct my attention to the statement on one end of the package: "Kellogg's Whole Wheat Biscuit are made of delicately flavored whole-wheat shreds. These shredded biscuits are a new convenient size. Two just fit the cereal bowl." My attention was not directed to it in the least. Now that my attention has been directed to it by Mr. Clarke, I have no doubt that the biscuit in there are shredded whole wheat biscuit. I believe they are. I did not take issue with the man when he said it was shredded wheat in the package. I did not try to tell him it was not. I had merely been asked to go and get a statement from him of the bare facts and bring out the information. That

was the only grocery store Mr. Small asked me to go to. He drove out there with me and left me a few blocks from the store. I had never dealt at either of these places before. My usual way of buying shredded wheat is to pick it out in self-service stores. In doing that, I have noticed Kellogg's Whole Wheat Biscuit on display in these self-service stores. It is always arranged in the cereal division of the store. In the store where I happen to purchase our provisions, it is located on one shelf a little bit to the side of the Shredded Wheat, and a shelf or so between with other cereals, Wheatena or Grape-Nuts, or something like that.

When Mr. Small dropped me two or three blocks from the grocery store, he stayed there and waited for me to return. That was the only grocery store he asked me to go to. When I was at the Plaza downtown, they served me in the bowl and threw the box away. I understood the box would be necessary as evidence, so I ate the first helping and had the box of the second placed before me, so I could eat it if I desired to.

I noticed a difference in the taste of the Kellogg biscuit, as compared with the National biscuit. My impression at that time was that the Kellogg biscuit did not seem to be quite as crisp as Shredded Wheat. Whether I had eaten some that was old or had been opened, I do not know; but that was the impression I obtained. I did not notice any difference in color. I noticed a difference in size. I have not eaten it since. It did not appeal to me quite as much as the National Shredded Wheat.

I would not go so far as to say that the difference in taste was sufficiently noticeable that, if I were blindfolded, I could tell whether it was National Biscuit I was eating or the Kellogg biscuit. I do not know. I might be able. On the other hand, I might not, depending upon how much milk and sugar and what-not I had on it, whether it was mixed with fruit or what-not. I

would not go so far as to say that I could tell the difference that way, except that, if I were eating it constantly and then changed to the other, I probably would notice it. I would not know whether it was due to a difference in the food or what. In that sense, I was conscious that there was a difference.

Since this experience, I have not noticed any advertising of either the National shredded wheat or Kellogg's. When I was a buyer for this fraternity house, we ordered through what was known as the Students' Cooperative Purchasing Association, and they sent us as many as we ordered, two dozen, or half a dozen, or a dozen. They were merely stacked on the shelves out in the kitchen. I was always in a position to see what came and what did not. During that time I always received the National Shredded Wheat Biscuit.

It is fair to say that, at least since these experiences of my purchasing in the grocery and the restaurants for Mr. Small, I realize that there are two different biscuits manufactured by two different people. I know that.

RE-DIRECT EXAMINATION.

THE WITNESS: When we had these packages of Shredded Wheat on the shelf in the fraternity house, you served yourself there. It was only eaten for breakfast, and the boys served themselves out in the kitchen. They would go out and take as much as they wanted and break it up or not break it up, and put it in the cereal bowl. They helped themselves from the package.

The Kellogg's Whole Wheat Biscuit I ate in the restaurant did not have any different effect on me from anything else, aside from the fact that I had eaten lunch a while before, and I ate too much of that stuff during the afternoon. The other place I went to I had to eat Shredded Wheat. I was not very hungry.

In the self-service store from which I now purchase, Shredded Wheat is now ten cents. Whole Wheat Biscuit happens to be the same, ten cents. I asked the manager how it was that there was a difference of one cent or two cents, because, in the majority of places I have seen, Kellogg's or the Shredded Wheat made by the National Biscuit Company sells for either eleven or twelve. He said they were both the same price at his store. In other places where I have observed these two packages, they are offered for different prices. Kellogg's is offered for ten cents, every place I have seen it offered. I observed the difference at Canfield's Market, where we do our shopping, known as the Home Food Store. Then, the price I paid over at Stout's Grocery, when I called there, and at the Gem Market, which is cater-cornered across the street from where we do our shopping. I have been in there. Naturally, after doing that for three or four months, you get so you know the prices of about everything you look at in there and where they are located. I have noticed that Kellogg's Whole Wheat Biscuit was always ten cents. Shredded Wheat was the same price in the store where we shop. Other places, there was a cent or two difference.

When the grocer handed me Kellogg's Whole Wheat Biscuit in the package I have identified here and told me it was Shredded Wheat, I did not believe he was telling me the truth.

RE-CROSS-EXAMINATION.

THE WITNESS: I did not believe, I mean, that he was handing me Shredded Wheat made by the National Biscuit Company. I could read on the box that it was Kellogg's Whole Wheat Biscuit. I could see the name, and I was satisfied he was handing me not Shredded Wheat as made by the National Biscuit Company, but

either the same thing made by another company or a suitable substitute for that. That is, in my own mind, I knew that must be the case.

I never tried to get the individual cartons for this fraternity house. I had been individual cartons in restaurants previous to that time, and I had eaten them previously to that time. The practice in the fraternity house was to open up the large package of the National Shredded Wheat and leave that in the kitchen. The boys just went out and picked the biscuit out themselves. Offhand, I could not say how long it took to consume a box. There were a number of cereals on the shelf, different kinds, and the boys would vary. One day it would be one; another day, it might be another kind. We always had hot cereal of one or two kinds. It would be hard to say. I think we consumed an average of about half a dozen packages a week, pretty close to that, nearly a package a day.

The afternoon I went to the two restaurants I ate some of Kellogg's biscuit at one restaurant and some of the National Biscuit at the other. I did not notice any distress from mixing those two biscuits, except, as I said before, that I had eaten too much of everything.

MRS. DOROTHY McFARLAND.

Deposition taken at Los Angeles, California, February 11, 1933.

Direct Examination.

The Witness: I am a housewife and keep house with my husband. I am not connected with the National Biscuit Company in any way. I know someone connected with the company, the agent at Long Beach, Mr. B. N. Aspergren, who is a personal friend of mine. I am acquainted with a product known as Shredded Wheat.

I recognize Plaintiff's Exhibit 1. I have been familiar with it for ten years, perhaps more, as a purchaser of it. I still purchase it. I usually just buy it in the neighborhood stores; perhaps, at just a little store; sometimes at a self-service store; any of them in the neighborhood. I never have occasion, to my knowledge, to order it by telephone. When I buy it at a service store, I ask for Shredded Wheat, and I expect to get the National Biscuit Company's Shredded Wheat.

In my experience, the expression Shredded Wheat has, I think, denoted to me another product than that in Plaintiff's Exhibit 1. If I understand the question correctly, there are several products similar to Shredded Wheat in the cereal line. They are sometimes called Shredded Wheat.

One experience is the instance at the time I bought this shredded wheat. On November the twenty-first, I bought shredded wheat at Walter's Market, 1050 East Anaheim, Long Beach. I asked for Shredded Wheat, and I got Kellogg's Wheat Biscuit. Plaintiff's Exhibit 174 is the package I got at that time.

I asked the grocer for Shredded Wheat, and he gave me that package. I did not think that was the kind I wanted. It was not the kind I had been buying. I asked him if it was Shredded Wheat; and he insisted it was; that it was the original Shredded Wheat; that the Kelloggs were the first people that made the Shredded Wheat and they made the Shredded Wheat, and that was what it was. So I bought it. The grocer told me that Kellogg's were the first people that made Shredded Wheat, that they made the original Shredded Wheat.

That was about the first time I had paid very much attention to the Kellogg's Whole Wheat package. I would not say that I had not seen it before.

I keep Shredded Wheat in the house. When I serve it to my husband, I usually just toast it and serve it with cream. I do not put the package on the table. I usually toast the biscuit in the oven or warm it up. I take the biscuit out of the package and toast it and serve it on the table in a dish.

CROSS-EXAMINATION.

THE WITNESS: I toast the biscuit because I prefer almost any cereal heated a little bit. I just kind of like it that way. I do not think I knew that the Kellogg's biscuit was double toasted, top and bottom. In the self-service stores, I could not say that I have paid very much attention to Kellogg's Whole Wheat Biscuit on the shelves. It was a Kellogg's package. I thought you meant if I took any particular interest in it. I took enough notice to know that it was there on the shelves.

I believe I have noticed packages having cellophane or transparent windows in them. That was a Kellogg's package, I think. Mr. Aspergren asked me to go to this store at which this purchase was made of the Kellogg biscuit. I had bought things there several times. He asked me to go and buy a package of Shredded Wheat.

When the grocer told me that the Kellogg Company were the makers of the original Shredded Wheat, I told him I did not think that was the kind of Shredded Wheat I had been buying. He insisted that they were the makers of it, that that was the original Shredded Wheat. I was looking for the box with the Niagara Falls on it, which was what I expected to get, Plaintiff's Exhibit 1.

I have always or most of the time associated Niagara Falls with the Shredded Wheat I have been used to buying. I told the grocer that I was looking for the other kind, and he said that was the original

Shredded Wheat. So I said, "All right, I will take it and try it." He said that was the original Shredded Wheat. He did not mention the other kind of Shredded Wheat; but I mentioned it to him. I think this was the only kind he had in the store. I did not see any more on the shelves. I had never bought cereal or anything there before. Mr. Aspergren asked me to go to just this one store only. He did not go with me. I took the package to him afterward. He was out at the Biscuit Company when I took it to him. This is the only experience I have ever had of asking for Shredded Wheat and getting the Kellogg product. I have, however, been buying Shredded Wheat right along for some years. I ate some of the Kellogg's Shredded Wheat. It did not taste like the Niagara Falls Shredded Wheat that I have been used to having. I cannot say that I think it is exactly the same. It is not exactly the same size as the other. The National is the larger biscuit. I think I noticed a difference in taste between them. I have not eaten any of the Kellogg biscuit since that time.

I usually buy at self-service stores. It is either the New Way Market or Ralph's Market, or something like that. I just go in in the usual procedure and get my groceries at the different counters. I usually buy a number of groceries. I just go to the different counters and select them, pick the goods off the shelves into a basket and take it up and have it checked. After the man has checked it, I pay for the contents of the basket. I really serve myself. No clerk waits on me.

I do not know of other kinds of Shredded Wheat besides National and Kellogg's. I did not mean, when I mentioned several different kinds, to refer to Shredded Wheat. I meant different kinds of breakfast food that were rather along that line. I guess I did not make myself very clear. I know only the two kinds of Shredded Wheat, Kellogg's and the National.

MISS ADELE MacDUFFIE.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I have no particular occupation. I am a mother's helper in a home. I live with Mrs. Arthur Lalond, who is not my mother. I help her take care of her family. She has children. I have been with her since March seventeenth, last year. I am not connected in any way with the National Biscuit Company. Mrs. Lalond's brother-in-law, Mr. Malkus, is connected with the National Biscuit Company, I think as a salesman. I would not be sure, because I do not know him personally.

I recognize the package, Plaintiff's Exhibit 1. I have seen those packages before. I have been familiar with that picture about sixteen years. I know what the package contains. I call it Shredded Wheat. I have been familiar with Shredded Wheat for sixteen years or about that time, as a user. I have used it very extensively. I have not had much occasion to buy Shredded Wheat. I come in contact with it at my home and at the residence where I stay. It is served at breakfast. When it is served at home or where I now live, the package is not brought on the table. The biscuit are served by me in dishes. I take it from the package in the pantry and serve it to members of the family, including the children and their parents.

Mr. Malkus asked me to go to some stores and make purchases of Shredded Wheat. I do not remember the exact dates. It was sometime before last Christmas. It is so long ago that I do not recollect if it was in November or not. I went to the Cohen store on San Pedro Street in Los Angeles. I did not know the store. He just drove me there, and I went in.

I said I would like to purchase a package of Shredded Wheat. They brought me Kellogg's. I said, "This is not Shredded Wheat." She said, "Oh, yes, it is." I said, "Is there any difference?" She said, "None, except in price. One is ten and one is twelve. National Biscuit is twelve."

I asked her what the difference in price could be, and she said that they were a large company and they did more advertising and took advantage of the public. I purchased the package. I did not keep it. They took it up to the National Biscuit, and they did not do it the right way. They just took the lids. They had me go back to the store again on a later date, which I do not remember either.

I went back and I went in and asked for Shredded Wheat. She brought Kellogg's. I said, "This is not Shredded Wheat." She said, "Oh, yes, it is." I said, "What is the difference?" She said, "One is ten and one is twelve." She would not say any more. I purchased the package and left the store. I kept that package and put my name and address on it. Plaintiff's Exhibit 175 is the package.

I went to several other stores during my tour of the stores, where I received the National Biscuit Shredded Wheat. I went to the I. M. Silver Store, on San Pedro, also. I went in and asked for a package of Shredded Wheat, and they brought me Kellogg's. I said, "This is not Shredded Wheat." They said, "Yes, it is; see?" He showed me the shredded wheat in the little cellophane window, and he showed me the name on the package, and he said, "One is ten and one is twelve." I purchased the package and left the store. Plaintiff's Exhibit 176 is the package I bought there.

In each instance, I paid ten cents for the package. The dealer told me that Shredded Wheat was twelve cents. These were not my first experiences. I had seen Kellogg's Whole Wheat Biscuits previously. We

had some of it in our house. We had purchased it. We had used both shredded wheat biscuit, made by the National Biscuit Company, and Kellogg's Whole Wheat Biscuit. We are familiar with all Kellogg's products, Corn Flakes and all those other products. We carry them in our house, a mixture of products. We have carried and used Kellogg's products almost as much as we have those of the National Biscuit Company.

CROSS-EXAMINATION.

THE WITNESS: I like the Kellogg products. I like the Kellogg Corn Flakes very much. When I first saw the Kellogg biscuit, I noticed, I think, that the Kellogg biscuit is a little smaller, quite a bit smaller than the National. I noticed that right away. When I saw the Kellogg Whole Wheat package, I saw that it was a different package from that of the National Biscuit Company. I liked the Kellogg biscuit, but I preferred the National, as I have used them much longer than I have Kellogg's, because that new package has just come out recently. I have used this other for so long.

When I first tried Kellogg Whole Wheat Biscuit, I did not think it was Corn Flakes or Wheat Flakes, or anything of that sort. I knew it was shredded wheat, all right. When the grocer in the Silver Store said that one of these shredded wheats was ten cents and one was twelve cents, I understood he was referring to the Kellogg Biscuit and the National Biscuit, because he had the Kellogg one on the counter and the other one was up on the shelf. He pointed to it. He said, "This is ten and the other one is twelve." I knew by that that he was referring to shredded wheat made by two different concerns, the Kellogg's and the National Biscuit. I have bought goods from self-service stores, but not in Los Angeles. I do not believe I have bothered with self-service stores in Los

Angeles. I could not say that, either, as to whether there are many of them here. I do not do any shopping, at all.

At the other stores where the grocer referred to the big concern, I understood he was talking about the National Biscuit Company. It was Mrs. Lalond's brother-in-law, Mr. Malkus, who asked me to go to these two stores and make the purchases. He took me in his automobile to several stores down where he sells his products. I think he is a salesman, because he talks about going to those stores. He took me there, and I purchased the package. He took me to several stores, but they handled the National biscuit, and that is what they gave me. He spoke of being acquainted with a few of these grocers, as a salesman. I believe he took me to about five or six stores. I got the Kellogg product at two stores, and the National biscuit at the rest of the stores. I did not know these stores before Mr. Malkus drove me to them. I had never purchased anything at either one of the stores before.

As soon as the clerks at these stores brought out the Kellogg packages, I knew right away it was not the National Biscuit package; and I said right away, "This is not Shredded Wheat." By that I meant that it was not the National Biscuit Company's Shredded Wheat. I did recognize it, however, as Kellogg's Shredded Wheat.

I have never purchased any packages that had the cellophane window in them. We had one package at home that had a cellophane window in it. She went to the grocery store and got the shredded wheat. When we got home, we noticed the cellophane window. She did not want that. I do not recall, but I believe it was Ralph's Grocery Store she went to. We spoke about the cellophane window. I do not remember exactly, but the little boy wanted the window out of it. That is all I remember. He argued about the package.

He wanted the package with the cellophane window in it.

RE-DIRECT EXAMINATION.

THE WITNESS: Mr. Malkus is not related to me in any way. Mrs. Lalond's sister is his wife. I only work for her. That is the way I happen to know Mr. Malkus. He is not related to me in any way.

When I referred to the package with the window as not being what Mrs. Lalond wanted, I meant she had never had it before. When she got it home, she noticed it was not the whole wheat package without the window that she had expected to get. She had gotten a Kellogg package without the window, before that; and, when she noticed the window, she knew it was not what she had been used to having.

MRS. R. E. ANDERSON.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a housewife. I have three children, two, four, and six years of age. I am not related in any way to anyone connected with the National Biscuit Company. My husband is not employed by the National Biscuit Company. I know the matter we are engaged with here is litigation between the Kellogg Company and the National Biscuit Company. I have no bias or prejudice for or against either side of that litigation.

I recognize the package, Plaintiff's Exhibit 1. I call it Shredded Wheat. I am familiar with the contents of the package. I have known Shredded Wheat, as close as I can say, around twenty-five years; a long while. During that period, I would say that the prod-

uct contained in Plaintiff's Exhibit 1, which I have known as Shredded Wheat, has been just the same.

Shredded Wheat was served at home, I know, when we were children. We always liked to eat it, because it had the picture of Niagara Falls on it. We thought Niagara Falls was quite the proper place to go on honeymoons and such things. We always had it served in the home. I associated Niagara Falls with Shredded Wheat Biscuit. That has been true since I was a child. The expression Shredded Wheat had a definite meaning to me at that time. It meant the Shredded Wheat Biscuit. It did not mean any other product. Shredded Wheat was simply Shredded Wheat to me. We serve Shredded Wheat in our home at the present time. We purchase it at different stores, mostly the self-service stores. I do my own shopping, go in and help myself. I do not believe I ever have had occasion to order it by telephone.

When I serve it in the home, I do not bring the package on the table. I serve it in the dish. I warm it in the oven and bring it in in the dish. My husband uses it. I usually keep a supply of breakfast foods on hand. I usually try to buy two or three packages at a time, so we will have it on hand.

I have noticed the advertising done by the Shredded Wheat Company. I do not know exactly how long I have been familiar with that, but it has been a long while. I remember Shredded Wheat was advertised in the *Saturday Evening Post* for a long while. That is the only one I have time at present to read. I read practically all the *Saturday Evening Post*. That takes a great deal of time.

Looking at Plaintiff's Exhibit 10, I recognize one of the end panels on which is a picture of a dish with two biscuit in it. I have purchased Shredded Wheat in a carton like that from time to time. I would say I have been familiar with that dish with two biscuit

in it for practically the length of time we have been using it. That picture suggests to me Shredded Wheat and nothing else. If I were to see a package not otherwise identified, having on it a picture of a saucer with two biscuit in it similar to that, it would suggest to me Shredded Wheat.

I have never used Kellogg's Whole Wheat Biscuit. I obtained it in a store on November 14, 1932, at Edward's Grocery, on Glen Oaks Boulevard in Burbank. I went to the store, which is not a self-service store, although, perhaps, it could have been. I was the only one in the store. I went to the counter and asked the man for a loaf of bread, a can of milk, and a package of Shredded Wheat Biscuit. I walked around the store a few moments to see if there was anything else I needed. There was not, so I came back. When I returned to the counter, there was a package of Kellogg's Whole Wheat Biscuit on the counter. I said, "Oh, I want the Shredded Wheat Biscuit, the one that is made in Niagara Falls." He said, "That is just the same, and I am sure you will like it just as well." I said, "I think I prefer the other if you have it." He said, "No, we do not have it in stock." He said it was more profitable to handle, and that there were fifteen biscuits, I believe, in the package. It was just the same as Shredded Wheat. Then he said, "Having a cellophane window, you can see what you are getting."

I finally took the package. Plaintiff's Exhibit 177 is that package. I recognize it by my having put my name and address on it and "Edward's Grocery, Glen Oak Boulevard." The biscuit in the package were visible through the cellophane, and when I saw them through the cellophane window, they suggested to my mind Shredded Wheat. They looked like Shredded Wheat.

I did that at the request of Mr. Harper, one of the salesmen of the National Biscuit Company. He is

an acquaintance of mine. I think I paid fifteen cents for the package. The mark "fifteen cents," in a circle written in pencil near the window on the package was not on there when I got it. I believe Mr. Harper put it on.

I have been paying ten cents for Shredded Wheat. The grocer from whom I bought Plaintiff's Exhibit 177 said he did not have Shredded Wheat. I never paid attention to notice what the price asked at other stores for Kellogg's Whole Wheat Biscuit was. This was my first experience with Kellogg's Whole Wheat Biscuit. I use a lot of other Kellogg products: but this happened to be the first time I had ever purchased Whole Wheat Biscuit. I knew there was such a product. I had seen it on the shelf. I had never purchased it.

CROSS-EXAMINATION.

THE WITNESS: Mr. Harper did not ask me to go in any other stores besides this one store. If I had known the Kellogg shredded wheat was selling for less than fifteen cents at other stores, I would not have said anything to this grocer about his price being out of line. I do not usually do that. I usually pay the price they ask. At the time, I did not know whether fifteen cents was either the right price or out of line at all. I paid it without any question. That was the only store that Mr. Harper asked me to go to and make this purchase. He took me there and waited outside. At that time, there was no one else in the store except me. I could, I rather think, have waited on myself if I had wanted to. They had a counter as you enter. I suppose, if the man was not busy, he would have helped you. Otherwise, it could have been self-service. They were not behind counters. They were easily accessible.

I have known these other Kellogg products for some years, used them, and liked them. I think the company has a very good reputation. It is, also, a wide advertiser.

I gave this package with the cellophane window to Mr. Harper. My children had never seen any of the cellophane windows of the Kellogg's. They are not old enough to have any argument between themselves, as to who would get a package of that sort, if it came into the home. If, as Mr. Clarke says, some other lady testified that her child became much excited and demanded that he have the cellophane package when it was brought into the home, that would be a very good idea. I suppose my little girl might have done that, if she were a little bit older, for her doll house, or something. I did not get one of the Wheel-of-Knowledge Charts like Plaintiff's Exhibit 172, with the package. They did not give me that. I will go back and get it. I do not think my children are old enough to think about the geographical part of it. They would be more interested in just knowing that it goes around.

When I looked through the cellophane window in this package, I saw it was shredded wheat. In other words, I did not think for a minute that it was corn flakes or oatmeal or anything of that sort. I knew that it was the cereal I know as shredded wheat.

I knew before that time that the Kellogg Company was making shredded wheat, as well as the National Biscuit Company. I had known that fact from seeing the Kellogg Company packages on the shelves of self-service stores. When the grocer said to me he had no other shredded wheat in stock except Kellogg's, I understood he did not have any of the National Biscuit Company Shredded Wheat. I do not know of any other concerns making shredded wheat besides the National Biscuit Company and the Kellogg Company. I do, how-

ever, understand that those two concerns are both engaged in the manufacture of shredded wheat.

Looking again at Plaintiff's Exhibit 10, the package with the plate, showing the biscuit in the plate, as distinguished from the picture of Niagara Falls, this one, Plantiff's Exhibit 1, is uppermost in my mind, because I can remember that Niagara Falls and the picture of the factory. The one with the plate is used a great deal in the advertising. I remember seeing it, of course, on the carton, but this picture on the end of Plaintiff's Exhibit 1 stands out more in my mind than the other. I know they use the other with fruit over the Shredded Wheat Biscuit, in advertising.

I have met Mr. Rodda of the National Biscuit Company. I met him here in this office just recently, sometime in December, in connection with this National Biscuit or Kellogg purchase. I did not take the package out to the plant.

RE-DIRECT EXAMINATION.

RDQ. 109. Mrs. Anderson, I think you said, in responce to a question that Mr. Clarke asked you, that you knew that two companies were making shredded wheat. Let me ask you this: If you asked for a package of Shredded Wheat and you received one like the package that you did receive, would you regard that as having filled your order?

A. No; it would not be the Shredded Wheat that I had asked for; but it would be the shape of the Shredded Wheat that I had asked for. It would be the shape of the Shredded Wheat Biscuit, but not exactly like it.

RDQ. 110. When you ask for Shredded Wheat, do you have something definite in mind that you expect to get?

A. Yes.

RDQ. 111. Can you tell us why that is, Mrs. Anderson?

A. Why, Shredded Wheat seems to fill our wants as far as shredded wheat is concerned; and I have never thought of changing. The Kellogg biscuit has more of a toasted look and a coarser grain. The Shredded Wheat biscuit we have been using has a fine grain, and we have never had any complaint to find with it; so I never thought of changing that product.

RDQ. 112. Has there been any definite association in your mind, during the long period of time you tell us you have known of this product, between the name and the product itself?

A. I have never given it any consideration at all, but always have gotten Shredded Wheat and used it. I never thought of anything else, or purchased anything else along that line, except Shredded Wheat. I have always called it Shredded Wheat. That has been true for twenty-five years.

RE-CROSS-EXAMINATION:

THE WITNESS: When I buy Corn Flakes, the food is usually taken off shelves. I usually buy in self-service stores, so I do not have occasion to ask for things by name. In my household, I tend to experiment with new foods or new products or new makes of old products, when they come on the market, if I am not satisfied with what I have been using. If I am satisfied, I do not change, even if some new and different product is advertised. I do not try it. I am not very experimental, because I have the children. If I find anything they like, that agrees with them perfectly, I usually stick to the same product. The children like the National Shredded Wheat. I have only given it to the four- and six-year-old. I try to vary their diet. I usually give Shredded Wheat to them once or twice

a week. They take it and eat it all. I or they have never tried the Kellogg biscuit. I just bought it and gave it to Mr. Harper. No doubt I will try the Kellogg biscuit, after all this, to prove to myself the difference, if any.

Looking at a cellophane package of Kellogg's Whole Wheat Biscuit, the biscuit shown through there does look darker in color than the Shredded Wheat of the National Biscuit Company, also coarser grained than the National Shredded Wheat.

CLARENCE E. LIERLEY.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a window trimmer and card writer. I have no connection with the National Biscuit Company or with the Kellogg Company. I am forty years old.

I recognize Plaintiff's Exhibit 1. It is Shredded Wheat. I am familiar with the appearance of the biscuit in that package. I have been familiar with Shredded Wheat more than twenty-five years, principally as a consumer. I have been a user of Shredded Wheat in my home and elsewhere, during that period. I purchase it occasionally in stores. My wife does almost all the marketing. When I buy it, I ask for Shredded Wheat, and I have something definite in my mind that I expect to receive. I usually go by the carton that they hand me. I look at the carton. I expect to get Shredded Wheat. By that I mean that I expect to get the carton that I am familiar with. Then, if it is in a different carton and I take it home, I expect it to taste like it did before.

When Shredded Wheat is served to me in my home, it is served from a dish. The carton is not brought on the table. I have had occasion to purchase it in restaurants. When I buy it in restaurants, it is served in a dish. I have never had it served to me out of a small carton. I very seldom buy it in restaurants.

I have recently purchased it in a restaurant, when it was served to me out of the carton. That was November 21, 1932, at Byron's Coffee Shop, Long Beach, California. I asked for Shredded Wheat, and the waitress brought the serving in a dish. I noticed the difference in the shape of it. It was not as long as the regular Shredded Wheat. Then, it seemed rounder. I did not say anything about that until I started to eat. I noticed the difference in the taste of it. It did not taste the way I had been accustomed to notice. I asked the waitress: "Is this Shredded Wheat?" She said, "Yes. That was what you asked for, was it not?". I said, "Yes,"—but it did not taste like the Shredded Wheat I was accustomed to eating. Then I asked her if she would mind giving me the carton. So she went and got the carton. As she handed it to me, she said, "This is the Whole Wheat Biscuit." I told her I did not think it was Shredded Wheat. I then asked her if I might have the carton to take home with me. She said, "Sure," so she gave me the carton. Plaintiff's Exhibit 178 is the carton.

There was a menu at that restaurant, one large menu and several small detachable menus attached to the menu. On a menu about three by six inches they had the breakfast foods. It was all attached to this one large menu, and on the bottom, it said, "Shredded Wheat with cream, fifteen cents." It had other cereals listed.

Mr. Aspergren asked me to go to this restaurant. He is an agent of the National Biscuit Company. He went with me, and we had lunch there together. The

biscuit served to me in the dish, except that they were smaller, resembled Shredded Wheat. If I had not been a long-time user of Shredded Wheat, I would have accepted those biscuit as Shredded Wheat.

I have had occasion to notice advertising of the Shredded Wheat Company. I have not noticed any recently; but I remember they used to advertise a dish of Shredded Wheat with strawberries on top, and a picture of a carton with Niagara Falls was the principal thing that stuck out in my mind, that I have always looked for. Niagara Falls was connected with the advertising. I associate Niagara Falls with Shredded Wheat. Ever since I have known it, the Niagara Falls was the part that I remember. When I hear the expression shredded wheat, it has a definite association or meaning for me. It is my favorite breakfast food. It is not the only one I eat; but it is my favorite. The expression brings to my mind the picture of the advertising that I have seen, of the Niagara Falls, and of the Shredded Wheat itself. I recall seeing a picture of a saucer or dish or bowl with two Shredded Wheat Biscuit in it. I can remember seeing that in advertising several years.

If I were to see a picture on a package not otherwise identified, of a saucer containing two Shredded Wheat Biscuit or two biscuit of the type we have been talking about, that would suggest Shredded Wheat to me.

CROSS-EXAMINATION.

THE WITNESS: I would say that corn flakes, oatmeal, and shredded wheat are all different types or kinds of dry cereals. Oatmeal is somewhat of a moist cereal, but corn flakes, wheat flakes, and shredded wheat are different kinds or types of cereal foods. Shredded wheat means to me a certain kind of cereal food. I have not known for more than six months that

the Kellogg Company was making shredded wheat. In fact, I did not know that the National Biscuit Company had any connection with Shredded Wheat until recently. I supposed it was made in Niagara Falls because they had Niagara Falls on it. I do not know whether it is made somewhere else now. I was only interested in it so far as eating is concerned; not in the manufacture. I know now, however, that two different manufacturers are making the cereal which I all shredded wheat. I never had bought any of the Kellogg product before this time I received it. I knew right away that the Kellogg carton was a different carton from the old Shredded Wheat carton. Mr. Aspergren asked me to go to the store. He did not take me to any other store, We went to lunch together. It was not my customary place for lunch. I have eaten there before. Mr. Aspergren seemed acquainted with the place. I judged he had been there before. He did not speak to the waitress. I did not notice whether individual packages of the Kellogg product were in sight. We sat at a table. There was a counter in the restaurant. I did not notice what was on the counter. We did not watch the waitress take the biscuit out of the carton. We were talking and we were away from the counter. When I asked the waitress for the carton, she went right back, got it, and brought it to me. She said she would get it if they had not thrown it out.

I very seldom buy groceries in stores. I have noticed the different kinds of food products, their cartons, in a way. I familiarize myself with anything like that by either the name or something. I have seen many food containers with pictures of plates containing some of the product; plates of spinach, peas, or baked beans. That is a very common practice with food products, showing the product itself in a dish in a satisfying or edible form.

When I speak of recognizing shredded wheat in a plate, I mean that I recognize it is not corn flakes or oatmeal, but that it is the cereal, shredded wheat.

WILLIAM C. RUCH.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I have been a merchant all my life. I am now a salesman of Real Silk hosiery. I have been in the clothing business. I have never been connected with the grocery business. I am not connected with the National Biscuit Company in any way. I have owned my own store, at times, a haberdashery in Hollywood. I was eight years in Hollywood and sixteen years in Freeport, Illinois.

I recognize Plaintiff's Exhibit 1. I am familiar with the biscuit contained therein. I have known this item twenty to twenty-five years, as Shredded Wheat. I consume a great deal of Shredded Wheat and have it in my family all the time. I have three boys; five in the family. We almost brought the boys up on Shredded Wheat. All they have for breakfast is Shredded Wheat and eggs, or something like that. The oldest boy is thirty-two, so I practically raised him on it. It is safe to say that I have Shredded Wheat in the house and have had it continuously in my home about thirty years.

The expression Shredded Wheat in my family means a whole lot. During all the time I have been familiar with it, I have had occasion to notice the advertising of the company, and the pictures of the factory. I saw their big, double-page ad not long ago in the *Saturday Evening Post*. I always notice those things. I have noticed a considerable amount of adver-

tising throughout the years by the company. When I see the Shredded Wheat ad, I usually notice the factory, then the package, because that appeals to me. That is what we like. My wife would not buy anything but the large Shredded Wheat. She prefers that. She has tried the smaller one and did not like it. If I were to ask for a package of Shredded Wheat and were given some other package, not like Plaintiff's Exhibit 1, I would not consider I had gotten what I asked for. I would pass it up. I had an experience of that kind, with a fellow named Sam Tucker, in the grocery business.

I asked for a bottle of milk and a package of Shredded Wheat. He brought me the Kellogg package. "No," I told him. "That is not what I want." He put out the Kellogg package and said, "This is much better." I said, "That is not what I want." It was a package like Plaintiff's Exhibit 168, with a window in it. I could see the biscuit on the inside. He said, "This is much better." I took the package because he did not have anything else at the time, but I preferred the other. I took it home and used it.

I made that purchase at the request of Mr. Hornsby, of the National Biscuit Company, who happened to be with me. I gave it to him, and he gave me the shredded wheats, which I took home and used. Plaintiff's Exhibit 179 is the package. The piece of paper with pencil writing is the receipt for the cash paid, written by the groceryman, Sam Tucker. This happened November 22, 1932. I was there after that a couple of times. The second time I received the same. He said, "This is much better." I said, "I hope, the next time I come around, you will have what I want." I have not been there since. I went back the second time because I happened to be down that way. I thought I would pick up another package.

I remember cartons like Plaintiff's Exhibit 10, with a picture of a dish on the end of it very well, because that is the way you usually see them in the advertising in all the leading magazines. My wife prefers that Shredded Wheat, anyway. She will use the other, if she has nothing else; but that is what she prefers. Shredded Wheat means a lot to us.

I have seen Shredded Wheat with dishes in advertising in different magazines, recently. I have seen the dish occasionally on billboards and in the *Saturday Evening Post* and *Good Housekeeping*. I do not remember how long. For some time back. The last I really took particular notice of was a double-page ad. I happened to see that very recently. I would say I have seen the use of this dish with two biscuit in it in advertising in prior years, for a considerable time. That is what draws our attention.

CROSS-EXAMINATION.

THE WITNESS: I do not know any other Kellogg product we have used. My wife usually does the buying. All I remember is just the shredded wheat. She has had Kellogg's when they did not have anything else at the Safeway and other stores. She has bought it before the time I made the purchases for the Shredded Wheat Company. She tried it when it first came out, but she did not like it as well as the real Shredded Wheat. I have used it myself and fixed them with poached eggs. I usually fix my own breakfast, and I like the larger shredded wheat. As soon as I saw Kellogg's, I recognized right away that it was a different size shredded wheat and it was not what I wanted. I went into the kitchen and took the biscuit out of the carton in fixing my breakfast. It is safe to say that my wife always knows what brands of products are coming into the house. My wife would not try

to substitute any different brand without speaking to me. I could tell. Then, she would not buy it. She usually buys a good advertised line.

If my wife had bought the Kellogg's shredded wheat without telling me anything about it and had put some of them into a plate and served me in the dining room, I would have seen right away that I was getting a different shredded wheat than I had had. If I did not like it, I would notice it and speak to her. I do not think any substitution could be practiced on me by my wife with the small shredded wheat in our home. I noticed it was darker in color than the Shredded Wheat. It tasted just a little bit burned to me. It was toasted a little bit more; that is all.

My family is rather particular about Shredded Wheat. That is practically their complete cereal. They use poached eggs and Shredded Wheat. We use very little other cereal; once in a while, oatmeal or something like that. That is usually Quaker.

I have known, from the time it first came to my attention, that there was another concern besides the Niagara Falls concern making shredded wheat. When the grocer handed me the Kellogg package, I knew right away that that was not the Niagara Falls product. Mr. Tucker said it was much better. I told him I did not think so. I said, "Next time I call, I wish you would have what I want," meaning the Niagara Falls Shredded Wheat. He said, I believe, there were fifteen biscuit in the package, a couple more in the package, of Kellogg's. Our family does not, when new food comes on the market, go out and buy it. We will try it out. We are not as prejudiced as not to try it. We tried the Kellogg product, because that was all they had in the Safeway Store that happened to be near us at the time. If we had happened to like it better with the dark toasting, we would have stuck to it.

If a new product from a responsible concern was left at our house, we would try it. If the Kellogg Company left a sample at our house of a new product, we would try that. I believe I would, because we have lots of different things of Kellogg's. We have used other products of the Kellogg Company. I regard the Kellogg Company as a responsible concern with a good reputation, a long time in the food business. I have known the Kellogg Company just about the same length of time as I have known the National Biscuit Company. I know them as large advertisers of their food products. I have seen their advertisements.

SIDNEY W. RODDA.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am district sales manager of the National Biscuit Company in Southern California and Arizona, with headquarters in Los Angeles. I have jurisdiction over the branches in southern California and in Arizona; the Central Los Angeles agency, the Pacific Los Angeles agency, the Long Beach agency, the Riverside agency, the San Diego agency and the Phoenix, Arizona, agency. My duties are of a general supervisory nature over all those agencies. As district sales manager, my immediate superior is Mr. Warner, in San Francisco, who is the regional sales manager.

In connection with my duties, I have occasion to visit the trade very often. Usually, when I visit one of the branches, we clean up the few necessary details and immediately go out to call on the trade. I accompany the manager or special salesmen, usually. The agencies over which I have jurisdiction handle

Shredded Wheat along with other products manufactured by the National Biscuit Company.

We have had very close to a 100 per cent. distribution of Shredded Wheat in our territory. By that I mean that the product is found in all or nearly all the retail stores I visit in this territory. The sales of Shredded Wheat have diminished in this territory in the last three or four years. One good reason I assign for that is Kellogg's Whole Wheat Biscuit, which sells in competition with Shredded Wheat.

I have known Shredded Wheat for many years, particularly since 1922 or 1923. We had Shredded Wheat at that time in my home, before we had anything to do with Shredded Wheat, before the National Biscuit Company acquired it. Shredded Wheat is considered a household word. Shredded Wheat means the original Shredded Wheat Biscuit that is now made by the National Biscuit Company. The name Shredded Wheat means Shredded Wheat. It means the Shredded Wheat Biscuit that we have always known as Shredded Wheat Biscuit. It is known as such in the household and in the home. I have asked the questions of my wife. She says that it is known as the Shredded Wheat, that Shredded Wheat is a household name. She knows Shredded Wheat in the home as Shredded Wheat. When she thinks of Shredded Wheat, she thinks of the original Shredded Wheat. That is her statement to me in our discussions. I do not believe that is peculiar to her, because she is not particularly inclined to shop around. She usually shops at certain stores. She knows what she wants, and she buys what she wants.

As I have circulated among the trade, I have noticed the presence of the Kellogg Whole Wheat Biscuit in the stores, and I have had occasion to notice the prices of Kellogg's Whole Wheat Biscuit and

Shredded Wheat in the retail stores. To a considerable extent, there is a difference in the retail prices in the stores. Shredded Wheat is the higher. I have observed in many stores that there is a difference in price, in many instances, of one cent a package. In a good many instances I have observed, Kellogg's Whole Wheat Biscuit is ten cents and Shredded Wheat is eleven cents. In some instances, Whole Wheat Biscuit is ten and some Shredded Wheat twelve. My general impression is that the differential in price in the stores is the rule, not the exception.

In connection with my duties, I make it my business to know what the two products are sold for by jobbers to retailers. I have information as to the relative prices at which the retailer can obtain Shredded Wheat and Kellogg's Whole Wheat Biscuit. I know of one particular instance where I saw a cost book, which indicated that this dealer was buying Kellogg's Whole Wheat for $1.89 per case of twenty-four, which would be on a basis of $2.83½ for thirty-six, as compared with the price this man was paying for Shredded Wheat, $3.34 per case of thirty-six. That is what I have generally observed. There is a difference in the price from jobber to retailer.

We have also requested information as to the prices from manufacturer to jobber and find there is a differential there. In one instance, we found that Kellogg's Whole Wheat Biscuit was $1.80 for a case of twenty-four. We received that quotation from the jobber. That would be equivalent to a price of $2.70 per case of thirty-six. His net price on National Biscuit Company Shredded Wheat is $3.30 for a case of thirty-six. I would say that this differential has a great effect on the distribution of Shredded Wheat.

In the self-service stores, Shredded Wheat is stacked on what they call island displays in the center of the store, and Kellogg's Whole Wheat Biscuit

nearby, with the prices on the stacks, indicating to the consumer what the retail price is. In others, Shredded Wheat is on the shelves and Kellogg's Whole Wheat Biscuit is on shelves, with their prices.

From the standpoint of profit and from evidence we have heard, the retailer pushes one in preference to the other. The fact is that the dealer does make more profit on the Kellogg package, in those cases I have investigated.

CROSS-EXAMINATION.

THE WITNESS: The National Biscuit Company has not put on special sales to the trade recently, on Shredded Wheat, not since last May. As far as I know, the National Biscuit Company has permanently abandoned the policy of giving special sales and special prices to the trade. There is no indication that it is going to happen. We have a regular list price, and then we have a scale of discounts, which extends from ten per cent. direct to an individual, all the way up to seventeen and a half per cent., which is the maximum discount to a retailer, based on quantity.

The National Biscuit Company never makes any allowance from those prices for advertising done by the retailer on Shredded Wheat. We never give the retailers any special prices to cover advertising done by the retailer, never give them checks, or never make them any allowances, directly or indirectly. My duties as district sales manager give me access to the cost sheets of my branches, which are consolidated here. We know exactly what is issued, so far as this group is concerned.

The dealers do advertise National Shredded Wheat. Very often, they do it themselves, without any solicitation. Very often we suggest that they advertise Shredded Wheat as a leader. They do it simply

on our suggestion. There is no other inducement. There is no other service we give them in connection with their advertising sales, unless we have a salesman go in on a Saturday for a sales promotion and conduct a sales promotion. In that event, all he does is sample to the consumer. I do not know of any instance where Shredded Wheat was sampled. It is just crackers I am speaking of. Insofar as their advertising is concerned, all we do to induce the retail grocers to advertise our National Shredded Wheat is just to suggest they put on a sale. Many times, however, our salesman will be present in the store on a Saturday and sell Shredded Wheat, together with other products. I do not regard this as an inducement to the grocer to advertise for us. I would regard it as co-operation on developing sales on our line; because there is more involved than Shredded Wheat right there. That costs us something, but we usually make money on it, because we make greater sales. We absolutely do not give a better discount when those sales are on than we do ordinarily. The only advantage to the retailer when we put the salesmen into the store is that he gets the volume discount in the larger range. They usually earn the discount in the respective classes of discount In most cases where our salesmen go, they go where there is volume. Usually they earn the discount, anyway. All our discounts are based on quantity purchases, on volume.

The presence of our salesman in the store helps the retailer increase volume so that he gets into a larger discount range; but, in the situation that exists today in this field, most of the stores in which we demonstrate are the stores where there is the larger volume. Usually they earn the discount, whether the salesman is in there or not. In other words, the presence of the salesman does not help the grocer from one class of discount into another class of discount, to my knowledge,

because, in most instances where the salesmen go in, the salesman is interested in increasing sales. He is interested in that, because it increases his commissions. So he will naturally pick out the volume store in order to hold a sale. He increases the volume of that store over what it was if he did not go in there. In most instances, that does not make any difference in the discount to those particular stores. He cannot earn any commissions without also increasing the profits of the retailer correspondingly. I do not say that none of that is sufficient to put the retailer from one range of discounts into a higher range. In most instances, however, our salesmen select the volume stores, which usually earn the maximum discount without that help.

We give no inducement to the retailer, whatever, to do any advertising at the dealer's expense. Wholly aside from whether that is true from Mr. Clarke's view or from the standpoint of bookkeeping or figures, my opinion, as I read the figures, is that the National Biscuit Company does not give and does not intend to give any inducement, whatever, to carry an advertisement of Shredded Wheat at the retailer's expense. Usually a reduced retail price at a sale is not suggested by us. We more often suggest that they advertise certain varieties. We do not say particularly Shredded Wheat. In most instances the advertising on the part of Shredded Wheat has been done voluntarily.

When we suggest that he advertise, that means usually that he advertises at a lower price. No one puts an advertisement in the paper to say that he is selling Shredded Wheat the regular price, usually. That suggested advertising price is not made by us. It usually depends upon the competitive condition that exists in that territory. Usually, there is a price on the merchandise that is advertised, just like everything else. They do not usually advertise the merchandise at the high price. Although I have known of par-

ticular instances where they have advertised Shredded Wheat at the regular retail sale price that it was selling in their store. They did that to increase their volume. This particular sale price I have reference to was advertising Shredded Wheat at ten cents a package. The net to that particular dealer is $3.30 a case of thirty-six. It is an unusual case; but he has done that before. His competitors in that neighborhood have advertised that they sold the regular National Shredded Wheat for less than ten cents; yet, he has maintained that price. I do not recall that those advertisements appeared at the same time.

I do not think he would be apt to do it if he knew it. Usually, they do not know what the other fellow is going to advertise, and we do not make it a practice to go from one to the other, indicating what one dealer is going to advertise it for over the other. In other words, my point is that we do not make it a practice to go from one dealer to another and indicate what the resale price is going to be or just what an advertised price is going to be. There have been advertised sales where the price has been lower than ten cents. I mean to say that price competition exists and has affected our sales.

I have been with the National Biscuit Company twenty-four years. I would not say that the National Biscuit Company have been one of the leaders in having their goods advertised at special low prices. I would say that the retailers have advertised National Biscuit Company's products extensively, but there are other brands that they have advertised at lower prices. Retailers have done some cutting of National Biscuit Company brands as price leaders or bait lures, or whatever you want to call them, trying to get people into their stores to buy the National line; but, when they do that, we rather encourage them not to cut under cost. We have not, however, tried to dis-

courage them from using it as a leader. We encourage them to feature National Biscuit Company's crackers, but not at a loss, not as loss leaders; but as attractive price leaders. I do not know that that has been the general policy of the National Biscuit Company since I have been with it; but, as field men, we encourage the featuring of National Biscuit Company's brands at a fair price. We do not encourage going down to cost; we rather discourage that. That is the only point at which the discouragement of the National Biscuit Company is applied to price cutting on its products, so far as we are concerned here. The only discouragement that we put on price-cutting on Niagara Falls Shredded Wheat is that they do not sell at a loss. We encourage that they do not sell at a loss. By that I mean that they should not sell for less than they pay for the product. We still encourage them to sell at a little more than cost. I would not say definitely what that figure should be, because individual cases are different. I do not mean to say that they should not sell at a loss, so far as donating their services and time and money that may be invested in the product is concerned. In suggestions that are made by dealers to our salesmen, in discussing possible sales or prospective sales, I believe it does not get to the point of just saying "Do not sell for a loss," or anything like that. I mean that, in many instances, the dealer discusses with our salesman and asks him, "What will we advertise?" Usually there is a discussion and the profit is figured, insofar as their resale price is concerned, when compared to their cost price. If a retailer were to say, "Suppose I advertise Shredded Wheat for less than it cost me," I do not know what our man would say. I would say that our salesman would rather discourage that practice.

I was with the National Biscuit Company when the Shredded Wheat Company was taken over by them.

The sales of the National Shredded Wheat were not taken over by the sales force of the National Biscuit Company right away. As soon as it could be done; some time after the amalgamation, it was taken over by the regular sales force of the National Biscuit Company. Those were men who, before that time, had been engaged in the sale of National Biscuit Company products, principally the cracker line. With those men, they had this added product, the Shredded Wheat, as an addition to the cracker line, to be sold by them. We distributed Shredded Wheat on a similar basis to the Shredded Wheat Company, the first year. Then it was turned over to our salesmen. We began to distribute Shredded Wheat in the same way that we distributed the rest of the National Biscuit Company's cracker line, with our products. That involved our distributing it predominantly through our own force, direct to the retailer, rather than predominantly through wholesalers; but we maintained sales through wholesalers and do today. Wholesalers carry it today. When the Shredded Wheat Company was in charge of the business, however, the sales of Shredded Wheat were made through wholesalers practically exclusively.

Since the National Biscuit Company got its system into operation, orders are taken by our salesmen, and we deliver the merchandise to the retailer. The wholesalers naturally only get such orders for Shredded Wheat as are not supplied in the regular way direct by the National Biscuit Company. The volume of Shredded Wheat distributed through wholesalers has been diminished at least by the amount which is now distributed direct by the National Biscuit Company.

We do not expect the same sales co-operation from the salesmen of wholesale houses now, as the Shredded Wheat Company had when all its product was distributed through wholesalers; except that many of the wholesalers are so tied up right now with voluntary

chains that considerable of the merchandise is billed direct through those voluntary chains in this territory. That has had a big effect on the jobber. We call and give the direct service to the retailer and bill through organization headquarters. They do not need to move it. In those instances, I would say that it would not make any particular difference.

However, as to the wholesalers whose business is sharply cut down in National Shredded Wheat by the fact that the National Biscuit Company has taken over the distribution, I would not, it is true, expect the same sales efforts from those wholesalers that they used to give to Shredded Wheat through their salesmen when the exclusive distribution was through wholesalers; except that, in recent years, there has been quite a change in the distribution of food products in this territory, and practically all those old-line jobbers are now accepting a billing of the manufacturer through their headquarters, where the delivery and contact is direct with the retailer, who is a member of the organization that is sponsored by the jobber.

It is difficult to say how many individual products there are in the National Biscuit cracker line. We class them as sponge goods and sweet goods. There are many different items of sponge goods, of sweet goods, and of cracker goods.

We have a regular sales force solely for contacting retail trade. When the National Biscuit salesman calls on the retailer, he will go from store to store, where the buying is done by independents, and he will take orders in that store for everything we have in the National line, through sponge goods, sweet goods, cracker goods and the cereal.

Where a particular store carries the general line of National goods, including not only Shredded Wheat, but the crackers, sweet goods, sponge goods, and so forth, the salesman gets quite a substantial order. If

he went to a store across the street which handled only Shredded Wheat, I do not know whether he would simply get a Shredded Wheat order. We endeavor to sell them all. I was quite astonished to find one store that did not handle any National line except Shredded Wheat, here, yesterday. I do not mean to try to create the impression that they all carry the whole National line, but I was quite astonished. What I mean to say is that they did not have the National cracker line in what, apparently, was a representative store. In that store, our salesman, if he spent any time there, would not have an order for anything except, perhaps, National Shredded Wheat, unless he succeeded in selling them the rest of the line. That would be equally true of all stores which handle nothing of the National line except Shredded Wheat. Usually, when a new product is introduced, it is sold to the headquarters of the chain or the independent, and displays are usually arranged for; attractive displays are made. We, and I know practically all manufacturers would encourage the trade to feature an absolutely new variety, a new product. Kellogg's shredded wheat, to my knowledge, has been, I would say, featured and brought to the attention of the consuming public in the various ways mentioned. It has been advertised to the public by the dealers, also by the manufacturer; and the manufacturer has supplied selling helps to the trade, wherever they could get them to put in cards referring to whole wheat. In other words, I believe the Kellogg Company has used all the ordinary and best known, most effective methods of introducing a new product to the consuming public through the retail trade, referring to Kellogg's Whole Wheat Biscuit. There is no indication in the stores that the Kellogg Company was trying to conceal the fact that it was in the market with a whole wheat biscuit.

I would not say that the self-service type of store is on the decline; it is rather on the increase.

I am familiar with the Kellogg biscuit. It is a shredded biscuit, a shredded whole wheat biscuit. I would not attempt to say that it is just as much of a whole wheat biscuit as the product of the National Biscuit Company; but it is a shredded whole wheat biscuit, as far as I can see. It is so advertised and stated on the cartons. I have no idea whether our gross price to the Safeway headquarters is different from Kellogg's. I know our price to them is the same as to other large accounts. There is no special price. The net price to Safeway outlets, with all discounts off, on Shredded Wheat, is $3.30 net; which is $4.05, less seventeen and a half and one; seventeen and a half being trade discount and one being cash discount. That price is public and known to the trade and everybody, as far as I know.

Assuming that the sale of Wheaties in this market in 1932 was 150,000 cases, with the tremendous number of cereals in the stores, I do not know it would affect Shredded Wheat a great deal. I do recognize that other wheat cereals would come in competition with Shredded Wheat or Whole Wheat Biscuit; but, in my opinion, with the tremendous line of cereals in the grocery stores, the effect on any one particular variety would be small, compared to the total. All cereals are competitive.

I would not concede, however, that, if a wheat user who had formerly used Shredded Wheat were to find wheat in a more attractive form to him, he would stop using Shredded Wheat. I believe that all cereals are competitive to a certain extent; but I believe that Shredded Wheat would be a lesser competitive item than corn flakes or All-Bran, or something like that. I do not know about the Kellogg product, but I know there are many who have been users of ours for many

years. Undoubtedly people shift around some. There are several cereals on the shelf in our home; but we constantly have Shredded Wheat. I think that is true of every home that uses cereals. It is my opinion that that pretty much exists. I do not mean every home has Shredded Wheat; but I mean, from evidence I have heard and discussions I have had, it seems to me that anyone who used Shredded Wheat regularly would have it in the home all the time, even though other cereals came in. I took home some last night. I saw some cereals on display; and I was particularly interested in knowing what that cereal was, but that did not replace Shredded Wheat on our shelves.

In this territory, we have an excellent distribution of Shredded Wheat. I do not know anything about the territory back East. I do not know anything about Shredded Wheat outside of this terrritory, because I have been in this territory entirely since we have had Shredded Wheat. Our advertising, our sampling, and our demonstration certainly reached people who were not already customers of our company. We do not regard all the sales work as done merely to hold in line the army of National Shredded Wheat users we already have. We are constantly featuring Shredded Wheat, in order to increase our volume. When I say *distribution,* I mean distribution to the retail stores, not to the consumer. I do not think that our Shredded Wheat makes our customers immortal in any way. We lose some of our customers by death. As one user goes out, we do hope that more will come in.

My statement was with regard to the distribution to the retailer. There is a field, we believe, among the customers, for increasing sales, surely. We hope to increase the number of consumer customers faster than we lose them by death or by change of appetite or by their getting tired of Shredded Wheat. If we did not

hope, by all our new sales efforts, to always recruit more public customers than we are losing, I do not believe we would advance the sales efforts. Those sales efforts are obviously directed to the end of increasing consumption and getting new people.

If we did not expect to increase our sales, we certainly would not continue it, or to maintain our present volume. There is a constant effort on our part, right now, to maintain our present volume. That is out battle right now. I would not say that a consumer eats Shredded Wheat three hundred and sixty-five days in the year, if that is what you want me to say. We have found, however, consumers who have not only made the statement that they did that, but that they conveyed that to their family.

When the National Biscuit Company took over Shredded Wheat, I am not familiar with any guarantee against price decline or guarantee of sales. When we changed from distributing through the jobber to direct by us through our selling force, the list price, I believe, was set at a figure that was practically the same as the net price to the jobber before the National Biscuit Company started to distribute Shredded Wheat direct.

The procedure is a little hazy in my mind, as to whether jobbers were notified beforehand that the change was about to be made; but I believe we gave them sufficient time, to let them cut down on their orders of National Shredded Wheat, so they would not be loaded up with a lot of it when we took over the direct distribution. I believe that was done. I am a little hazy on that. I do not remember any difficulties in this territory with wholesalers about stocks. My territory includes southern California, but not San Francisco.

I have tasted Kellogg's shredded wheat. I notice a difference in taste; and I have noticed the difference

in size and in the packages. I have noticed some difference in the toasting. I do not know whether it is more toasted than Shredded Wheat, but I know it has a darker color. I could not say whether there is any difference in the shreds. There is a difference in the size of the biscuit.

RE-DIRECT EXAMINATION.

THE WITNESS: Without giving figures, just estimating, my impression is that about 45 per cent. of the jobbers in my territory are affiliated, in one way or another, with retail outlets, such as voluntary chains. Practically all the large jobbers in this territory are either sponsoring voluntary chains or are sponsoring some sort of organization whereby they accept drop shipments of our line through the retailers. That is generally true in southern California. In other words, although the method of distribution of Shredded Wheat has changed from the jobber directly to the retailer, the jobber is still participating in that business, as a sort of purchasing agent for those voluntary chains. He gets some part of the purchase price. He figures on retaining a profit.

I noticed, in some newspaper advertising that has the co-operation of the newspaper with the manufacturer, they were advertising Kellogg's as the new shredded biscuit. It looked like Kellogg-sponsored advertising in the papers. I would not say that I recall having seen a display of Kellogg's Whole Wheat Biscuit marked Shredded Wheat, on cards, or anything of that sort.

I know that this Shredded Wheat Biscuit that is now put out by our company, from my own observation, when it was introduced was a new form of food product, away back in the beginning. My opinion is that, when it was started, it was something entirely

new to the public. I do not remember that, because it was quite some time back; but I do know that the Shredded Wheat Company, throughout a long period of years, use a great many methods to introduction, to teach the public to use this cereal. That has gone on to such an extent that Shredded Wheat has become a household word.

RDQ. 269. Let me ask you this: Do you think that it is as difficult a problem for the Kellogg Company to introduced their Whole Wheat Biscuit as a new product, as it would be if the Shredded Wheat Company had not done all this prior work?

A. Why, there is no question in my mind but what they are cashing in on that prior work done by the National Biscuit Company or by the Shredded Wheat Company.

THE WITNESS: By that I mean that, a Shredded Wheat Biscuit being a well-known product, it is less difficult to introduce something that is like it.

Shredded Wheat is not used generally as a loss leader, by retailers. We do not encourage that.

RE-CROSS-EXAMINATION.

THE WITNESS: I could not determine what volume of grocery business the voluntary chains do in my district. I can only estimate from my own knowledge of the cracker business. I would have no way of determining the total volume of grocery business. I believe I said that was from around 30 to 40 per cent. That is an estimate, without referring to my records or figures.

I have no idea what per cent. of the business the super-markets do, but a lot of them buy through voluntary chains. Therefore in my estimate, the voluntary chain figures would include those super-markets that are billed through voluntary chains.

HENRY BEEMAN RICKARD.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer. I own the real estate and operate the grocery department of the La Manda Park Public Market, at 2526 East Colorado Street, Pasadena. I also lease concessions for the other branches of the market to others. I have been connected with the grocery business close to twenty years, working at it for five and in business for myself fifteen years, always in southern California.

I am familiar with Plaintiff's Exhibit 1. I call it Shredded Wheat Biscuit. I am familiar with the product itself, as found in that package. I have been familiar with Shredded Wheat ever since I have been connected with the grocery business. I have always carried it in stock. During my familiarity with it, the biscuit has always been of the same general shape and appearance. I do not believe there has been any change in it, that I know of.

I know what Shredded Wheat is. I have tried it, but I do not eat it. I do not care for it. Our store is a self-service store and we deliver orders, also. We receive orders over the telephone. We carry Shredded Wheat in the store now and find that it sells readily. It is a good seller, one of the best sellers, I believe, of the breakfast foods.

I have noticed, in my experience that the Shredded Wheat Company has extensively advertised its products. I have noticed their advertisements quite a bit. When our customers ask for Shredded Wheat, we always give them the Shredded Wheat Biscuit, that package, Plaintiff's Exhibit 1.

I think the expression Shredded Wheat has a definite meaning to the general buying public. It has been

on the market so long that it should have. I know it has to me, and I judge that the average person has the same mind. When a person thinks or speaks of Shredded Wheat, to his mind is meant, naturally, the Shredded Wheat that has been on the market all these years.

We receive occasional telephone orders for Shredded Wheat, and we supply Shredded Wheat. I know the Kellogg's Whole Wheat Biscuit. We carry that. When a customer asks for Shredded Wheat Biscuit, I have never supplied the Kellogg's biscuit, unless they specially ask for Kellogg's. We always send them Shredded Wheat.

Q. 33. Have you ever observed customers in your store pick up either Kellogg's or the Shredded Wheat?

A. We have, more lately since the Kellogg puts a window in there. We have had them ask, "Well, are the Shredded Wheat people putting out a new biscuit?" And we told them, "No; that is put out by Kellogg's; they are putting out one that is similar."

Q. 34. Do you mean that they ask that question with reference to the Kellogg package?

A. Yes.

THE WITNESS: I have reference to Plaintiff's Exhibit 168. We have had them for the past two months with the window in. We have not always had them so. I would say that the presence of the window shows that it is a shredded wheat biscuit. It is very similar to the other. I think Kellogg's Whole Wheat Biscuit could be sold as Shredded Wheat biscuit. I have noticed our customers pick up the Kellogg package and then "I do not believe this is what I want," and they will go back and change it, or vice-versa.

I have had some experience in observing the introduction of new products, by advertising and by sampling. The way they introduced Kellogg's Whole

Wheat Biscuit to us was by price. If I remember right, the reason we put it in there was on a price concession. I think it was a little cheaper than Shredded Wheat; and we put it in for that reason, because everything Kellogg has is a good seller, and we naturally figured the whole wheat biscuit would sell along with the others. I think the Kellogg's Whole Wheat biscuit would be introduced more easily because it is like a well-known product. It is shredded wheat. In other words, it could be sold, because it is a form of shredded wheat.

Our retail price on both Shredded Wheat and Kellogg's Whole Wheat Biscuit is ten cents. We get the Kellogg's biscuit a little bit cheaper than the Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: I appeared here today to testify at the invitation of the National Biscuit Company. They said they would look after my expenses and time for me. My store is one of the regular self-service stores in which the customer waits on himself. Our store is arranged that way inside. We have our delivery and telephone service in the back; but our store proper is where people wait on themselves. In the store I think we give better display to the National Shredded Wheat than to the Kellogg Whole Wheat Biscuit; but we give a good display to the Kellogg shredded wheat, because we have quite a sale for all the line, and we give it a good display. I recognize that both those products are shredded whole wheat biscuit. You would call the Kellogg's that, because it is similar to the other; and, to me, it would be a whole wheat biscuit, looking at it, yes. If they advertise it as a whole wheat biscuit, I think it would have to be whole wheat. It is just as much of a shredded biscuit as the National Biscuit product is. It has been three or four years since we

have stocked Kellogg's; but I believe it was out sometime before we stocked it. I do not know.

I should think it should be pretty common and general knowledge in the trade by now that the Kellogg Company has put out a shredded whole wheat biscuit, because they are very active about introducing all their lines. Their shredded whole wheat biscuit has been introduced in the regular ways a new product is introduced, by sampling it, inducing some of the dealers to advertise; and they have had displays in the stores.

I do not believe the Kellogg biscuit is the same size as the National biscuit. I believe it is a smaller biscuit, as you can see it there in the cellophane window in the Kellogg package. I do not know whether it is as long a biscuit. I do not use it. I have not opened up the packages. I have seen it opened, but I do not know.

Putting one of the Kellogg packages end-ways on top of the National package, I should judge from that that the Shredded Wheat was a substantially longer biscuit than the Kellogg's. Corn flakes, oatmeal, and shredded wheat, I would say, are three different kinds of cereals.

XQ. 69. By the name Shredded Whole Wheat Biscuit, do you mean a dry cereal, made of shredded wheat?

A. It would naturally, to my mind, be the old Shredded Wheat; but I realize that the other is a shredded wheat, too; but it would naturally bring to my mind the old Shredded Wheat. For instance, if a lady came in and asked for a package of Shredded Wheat, I should hand her the package of old Shredded Wheat.

THE WITNESS: If the lady asked for Kellogg's Shredded Wheat, I would give her Kellogg's; and, in that case, I would regard her as getting shredded wheat made by the Kellogg Company. If she asked for

Shredded Wheat and I gave her the Kellogg product, she would be getting shredded wheat made by the Kellogg Company.

I would say that the Kellogg's Whole Wheat package was a familiar Kellogg package, as to the color and the color of the lettering. I would recognize that as one of the family of packages of the Kellogg Company, their familiar red, green, and white color scheme.

As I said, since the cellophane window packages came in, a lady had said the Shredded Wheat people were putting up a better, a different shredded wheat, a smaller shredded wheat. I said, "Well, that is put out by Kellogg's." One lady said that to me.

Until the cellophane window was put in the Kellogg package, the grocer would have no doubt as to just what was meant by a whole wheat biscuit, because it had been shown to him. I suppose you could have seven or eight or ten kinds of whole wheat biscuit. If this window were not put in there, anybody who had not already seen one of the packages would not know just what was in Kellogg's Whole Wheat, if they just called it Whole Wheat Biscuit. The grocer would know, naturally. After the cellophane window was put in, the people would see what kind of whole wheat biscuit it was that the Kellogg people were marketing. I would not say that this looks like a much darker biscuit than the National product. It looks to me just like it, very similar. Not having seen either one of them opened in recent years, I would not say without seeing them together. I would not express an opinion.

If I were told that Mr. Rodda, the representative of the National Biscuit Company, stated that, to him, these biscuit looked darker than the National biscuit, that would not surprise me, because he probably knows a lot more about it than I do. To me, that would look just like a Shredded Wheat Biscuit, figuring that the other shredded wheat could be browner than theirs.

I do not know that they always get them just the same bake. From my observation as a grocer, I would say that the Kellogg Company is trying all the well-known ways of introducing its shredded wheat biscuit to the attention of the public. They are advertising it and merchandising it, and such as that. Those methods Mr. Clarke mentioned: manufacturer's advertising, dealer advertising, sampling, demonstrating, store displays, are the generally practiced and best-known methods of introducing a new product to the attention of the consumer. The cellophane window would also tend to attract attention to the Kellogg package. It is rather a novel form of cereal display, not adopted by very many of them. I have never seen a window like that in any of the National Biscuit Shredded Wheat packages. It is possible that it would also appeal to children, that they would like to get hold of empty packages with the window, for playhouses and things of that sort. In my store, premiums like the Wheel of Knowledge have been distributed with the Kellogg's product. The distribution of a novelty of that sort would tend to attract attention to that package, naturally.

Our store is self-service. They are right there on the shelves. The consumers or customers go to the shelves and get what they want.

RE-DIRECT EXAMINATION.

THE WITNESS: While it is sometimes done, I would not say that one of the well-known ways of introducing a product is to make it look like a product already on the market. The Kellogg's Whole Wheat Biscuit does look like a Shredded Wheat Biscuit. In fact, I would call it one, just after looking at the two, simply because I have known the Shredded Wheat for so long.

Before the window was introduced, they used a package like Plaintiff's Exhibit 155, on which I see a

picture of a dish with two biscuit in it. Seeing that, without noticing any of the other printed matter on the package, I would think it was Shredded Wheat. So it is not quite correct to say, as Mr. Clarke induced me to say, that, without the window in the back, I could not tell what was in it, if they had that picture. They did have that picture on before they used the window, and they have the picture of it on with the window.

I have seen advertising of the Shredded Wheat Company that featured a dish with two biscuit in it; and I also believe it has been advertised in connection with fruits or berries. I have seen it both ways.

RE-CROSS-EXAMINATION.

THE WITNESS: I have seen Jersey Corn Flakes, but I have not handled it. That is a corn flake. Generally speaking, I imagine it looks like the toasted corn flakes that the Kellogg people put out. I have never seen the Jersey Corn Flakes opened. I have seen Post Toasties opened. Generally speaking that is a toasted corn flake. It is very similar to the toasted corn flakes put out by the Kellogg Company. There are more than one concern putting out Oatmeal in the grocery trade; a number of them. The oatmeal put out by one concern looks generally like the oatmeal of another concern, unless there is some difference; as, I believe, the H. O. is possibly different from the others. Some of them may be specially processed; but mostly the oatmeal of one manufacturer looks like the oatmeal of another. Heinz tomato catsup looks like any other general brand of catsup. There might be some slight difference in color; but they are all tomato catsup. There are many brands of catsup on the market.

On some of the products in my store, you could find packages with pictures of a dish with some of the product in it. I know you could with beans or such as that.

RE-DIRECT EXAMINATION.

THE WITNESS: I do not regard Shredded Wheat in the same class as catsup or beans. Shredded Wheat comes under the head of cereal or breakfast food. The original Shredded Wheat was the first thing of its kind. It was a new food product.

I know that a Kodak is something they take pictures with, a camera. Eastman is the best-known maker of it. I do not recall having seen any Kodak made by anybody else. I understood Kodak was a copyrighted word. It has become very common usage to refer to almost any small camera as a kodak, although, as a matter of fact, it is a trade name that belongs to the Eastman Company.

From my experience of more than twenty years, I should imagine that the old Shredded Wheat, the original Shredded Wheat is what the average customer would want. In fact, that is all a lot of them know, just the original Shredded Wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: They would ask for it as Shredded Wheat, not for the original. They would just say, "A package of Shredded Wheat." If they wanted Kellogg's, they would say, "Kellogg's shredded wheat."

If people began buying Wheat Flakes in large quantities in my store, I do not believe it would cut down on the sales of Shredded Wheat, which is different. It would probably cut down on a similar line, similar products to the wheat flake; but I do not believe it would on a cereal as different as Shredded Wheat.

I do not find that there has been any material falling off in the sale of National Shredded Wheat in our store. That is because we pushed the National Shredded Wheat. We give it every advantage that we can. I do not know why; it is just a kind of feeling I have. It was first on the market, and it should have that preference.

I have a friendly feeling toward both concerns, because we think Kellogg's is a wonderful line. We have a big turnover on all their merchandise; but there is just the same kind of feeling about the old Shredded Wheat. Wherever I could give any advantage in display or anything of that sort to the National Shredded Wheat over the Kellogg's, I would do that. I would give the original Shredded Wheat the advantage. That is a sort of individual feeling in my own store. That is just my own personal feeling. The National Biscuit people deliver us our supplies of National Shredded Wheat. We get our supplies of Kellogg's Whole Wheat Biscuit through the jobbers.

We have, pretty generally a complete National Biscuit line. When a National Biscuit Company salesman calls on me, he takes orders for the whole line, including Shredded Wheat and the cracker line. Similarly, when a Kellogg salesman calls on me, he takes orders for the whole Kellogg line, including the Whole Wheat Biscuit. The Kellogg orders are supplied through the jobber; but, of course, we do not always wait for the Kellogg salesman, because I can always order anything they have through the jobber. If we are out of any item of Kellogg's, we call on the jobber and order it, because they all have it.

RE-DIRECT EXAMINATION.

RDQ. 158. Tell me why you feel that way about Shredded Wheat?

A. Oh, I do not know, unless it has just been so long on the market that we just figure that it is the real Shredded Wheat, is all.

RE-CROSS-EXAMINATION.

THE WITNESS: I would say that it is conceivable that other grocers would have that same feeling about the Kellogg Company as I have about the National and would prefer to push the Kellogg line.

P. F. McCARTHY.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am in the public market business, embracing meats, groceries, fruits, and vegetables. Our partnership is McCarthy & Meyer, called the M. & M. Public Market, located at 1351 West Seventh Street, corner of Valencia. It is just a medium-sized business, not a super-market. It is about forty feet front. I have had it about twelve years. I have been connected with the grocery business all my life; over forty years, nearly half a century, all that time associated with the grocery business in some form. During that time, I have been, of course, familiar with cereals.

Our present store is rather a semi-service. We wait on trade, and they have the privilege of helping themselves, also. We deliver some goods, but very little. We have delivered heretofore, but very little during the last two years. We sometimes receive telephone orders and deliver.

I recognize the package, Plaintiff's Exhibit 1. I call it Shredded Wheat Biscuit. I am also familiar with the contents. I have known Shredded Wheat during the entire period of its existence on the market as a cereal. That is thirty-five or thirty-eight years. I cannot tell accurately the date. I remember when it first came on the market. It was a good seller. It has always been a very acceptable cereal. The Shredded Wheat Company or the proprietor of that Shredded Wheat Biscuit advertised it when it was introduced. The advertising of Shredded Wheat has continued throughout my recollection. I think I remember the shape and appearance of the biscuit when it first came out. I do not know that I could state that accurately.

It seems about the same. I do not think it has changed any. I think it is the same today as it was then.

I would say that the general purchasing public has always been familiar with that shape and form of biscuit. The public have asked for that biscuit as Shredded Wheat Biscuit, of course. That was the name it was known by; and it had no competitive article for a period of a quarter of a century. They did not have to distinguish it by any other name, and it was always asked for by that name. When a customer asked for Shredded Wheat, I knew what they wanted.

I remember a carton like Plaintiff's Exhibit 10, with the picture of a dish on the end of it. I would say it was used for quite a period of time by the Shredded Wheat Company. I have seen that dish and the biscuit in it used in other forms of advertising by the company.

I know the Kellogg Whole Wheat Biscuit as an advertised product. I have known of it from four to six years. It has only been on the market a brief period of years. I have carried that out at the Hollywood, and the other stores have also carried it. I do not carry it now.

Q. 36. What can you say about the Kellogg Whole Wheat Biscuit? Why is it you do not carry it?

A. I cannot say anything against the quality of it; but it has offered some demand resistance by putting it out for Shredded Wheat Biscuit; because the other product is what they expect to get.

Q. 37. In other words, have you ever had any customers——

A. Yes, sir.

Q. 38. —that showed some confusion about this biscuit?

A. Yes, sir; they bought the other in preference to it.

THE WITNESS: I think the Kellogg biscuit was sold to the grocer a trifle cheaper than the Shredded Wheat

Biscuit. I could not say that as a positive fact; but that is my impression.

I think I have seen a Kellogg package like Plaintiff's Exhibit 168, with a window in it. I have not had them in my store. Just looking at this package, supposing I could not see the name of it, of course, I would naturally presume it was Shredded Wheat Biscuits in there, by looking at it at a distance here. The similarity between that and the Shredded Wheat Biscuit that preceded it on the market is very noticeable. These are a little smaller biscuits. It is a different-sized package. The customers readily perceive the difference. They see there is a difference in the package, and they realize that it is not the package that they have been accustomed to receive for so many years. Looking in the window, I see the ends of the biscuits. I think there is some confusion of the public by the appearance of that package with the window in it, showing the biscuit. They are both sold as a similar product, of course; and one is sold as a Whole Wheat Biscuit. I believe it was sold as Shredded Wheat Biscuit at one time. Of course, merchants, during these days of small profits, are influenced to put out the merchandise that produces the best revenue. I presume that article was frequently put out where Shredded Wheat Biscuit was called for, without any additional qualifications to the package.

I think it would be easier for the Kellogg Company to introduce a product like that, now, under present circumstances, than if it were a brand new article; because a cereal of similar character preceded it on the market so much longer. It has already been well known to the public.

CROSS-EXAMINATION.

THE WITNESS: I remember Kellogg's Pep and Rice Krispies. Those products of Kellogg have really gone on the market a lot easier than Kellogg's shredded wheat. They have got a very good sale. They were

new products. They were not products that were like some other product that was on the market; yet they were introduced more quickly and easily than Kellogg's Whole Wheat Biscuit. Those goods sell very readily. Kellogg's Rice Krispies and all of Kellogg's products are very good products. I think I remember when the Toasted Corn Flakes first came on the market, generally, around the beginning of the turn of the century. I think I remember that the Kellogg corn product was first known just as Toasted Corn Flakes. There were a number of other corn flakes that came on the market under the name *Toasted Corn Flakes*. Then I remember that the Kellogg people applied the name of *Kellogg's* to their products.

Now that there are two shredded wheat biscuits on the market, I do not know whether there would be confusion between the two names Niagara Shredded Wheat and Kellogg's Shredded Wheat. I do not know that that would eliminate confusion. Of course, they could distinguish one from the other. That would, to some extent, do that. There is no doubt about it. I have not seen any effort on the part of the National Biscuit Company to avoid any confusion by calling their product anything else except just Shredded Wheat.

If I want to describe the product itself, it is Shredded Wheat. Shredded Whole Wheat Biscuit is the only name that would describe it, I think. I presume it is correct to say that Whole Wheat Biscuit is not as descriptive a name as Shredded Whole Wheat Biscuit. Whole Wheat Biscuit does not say that it is not shredded. There might be ten or fifteen kinds of biscuit that would be all whole wheat biscuits. The other is shredded. I do not know whether that term could be ambiguous or not. I suppose it is all correct.

Looking at these products of Kellogg and the National, they are both advertised as whole wheat; they are both shredded; they are both biscuits.

One of the National Biscuit men asked me to come down here today. They said they would look after my time and expense. I said I lived close by and it would not entail any expense. Of course, that is all right. I did not anticipate consuming very much time.

If I begin to have consumer call for Kellogg's Whole Wheat Biscuit, I will put it back into stock. I have no hostility at all toward any of Kellogg's products. I have regard for them, rather. I presume the Kellogg product has a very general distribution among the grocery stores in this market. I could not say as to that. I am just giving you my personal observations and experience. I found that it did not sell in competition with Shredded Wheat that had so long preceded it on the market. It was a very slow-moving item with me, so slow that I discontinued it. If it begins to move faster later on, I will put it back in the store. You have to equip your stock with merchandise that the public demands, if you want to live in business.

I advertise to the public. I put out a circular every week. I did some newspaper advertising, but not lately. It would not do me very much good. I am not a supermarket. If I were out where I could associate my business with the automobile traffic, I would advertise in newspapers. I would say that, where a market advertises Kellogg's Whole Wheat Biscuit in their newspaper advertisements, and so forth, it would help to create consumer demand in their stores for that product. So, if I did run newspaper advertisements and mention Kellogg's Whole Wheat Biscuit in those advertisements, I would have a consumer response, no doubt, to that.

The price differential between the Kellogg's Whole Wheat Biscuit and the National Whole Wheat Biscuit was just a slight one, but the motive for discontinuing the Kellogg product was simply lack of demand. I was selling the other whole wheat biscuits. As I said a

while ago, there was a little confusion. The amount of Kellogg's Whole Wheat Biscuit I sold was inconsequential, so I discontinued it. We are stocking all the Kellogg line except that.

When I speak of confusion, I have had several instances where they stated "I want the whole wheat biscuit." It was not a great deal of confusion; but, during this age of rapid transit, you do not want to have any confusion in serving the trade. You want an age of non-substitution and give them direct service, while putting out the goods called for. I do not think you could build up any real business for the Kellogg product by offering to substitute it for the National Biscuit Shredded Wheat. I think substitution is bad business. I do not think you are doing that. Substitution is not in conformity with good modern business today. Up-to-date business goes to the man who has got the supply that the trade requires. It is policy for him to put out and give them what they call for. I do not know about all instances, but I think substitution is a sort of dying institution in the trade. It would be, in our business. Those who are running a large business, such as supermarkets, can probably carry non-advertised lines and put out goods as substitutes for more specific goods; but they would be similar in quality and afford the dealer a bigger profit. I do not know whether they would meet the same trade resistance that I spoke of or not. I am just giving my own experience. I could not appropriate the experience of others and deliver it to you as facts. What I referred to as confusion in my store was that some customers said "We want the other Shredded Wheat." In that case, I gave them the other shredded wheat. That was not the reason I discontinued handling the Kellogg product. It was simply lack of demand in my store, in which I did not push or advertise it in any way. There was a lack of demand.

If the consumer asked for Kellogg's shredded wheat and I were carrying the whole wheat biscuit, I would certainly give him the Kellogg biscuit. If they said they wanted a package of Shredded Wheat, I would give them Shredded Wheat. If they said they wanted Niagara Shredded Wheat, I would give them the National Biscuit Company's product, because the National Biscuit Company product was the direct follower of the firm that preceded them, and they would enjoy the same confidence with the consuming public that they did; and I would put out the same product. I never heard anybody ask for Niagara Shredded Wheat. They just ask for Shredded Wheat.

I have never heard of Niagara Falls being associated with the National Biscuit product. The public calls for Shredded Wheat. I do not think of Niagara Falls in any way, in connection with the National Biscuit Company's product. I do not know whether where it is made enters into it or not. They call for Shredded Wheat. They never ask for Niagara Falls or anything. I have never noticed Niagara Falls in connection with the National biscuit, at all; never had any association with the demand, anyway. If anybody said they wanted the Niagara Shredded Wheat, however, I would know, certainly right away what they wanted, from the fact that the National are controlling Shredded Wheat.

I have the National Biscuit line. We have some other lines in there, too. We carry the Pasadena line; but our business is principally National products, in the cracker line. We never carry any of the National products as price leaders. We hardly ever cut on them or violate the regular price. There is quite a stability of uniformity in the prices of National products. They sell for about the same price. Even the super-markets do not cut on them very much. I do not conduct much of a cut-price store. I run some loss-leaders. I have to

do it. But I do not have any of the National products as loss-leaders, or hardly ever. We sell Kellogg's Corn Flakes at seven cents, sometimes, which would be a loss-leader, as far as adding the cost of doing business to the price we pay for it is concerned. We pay about that price for it, or a little less than that price. As far as the cost of doing business is concerned, that is a straight loss on Kellogg's at seven cents. On all those loss-leaders we are losing the cost of doing business, because they are selling at cost or some below. Competition sometimes drives them below. That is the popular method of doing business now. If you want to bring business, feature loss-leaders.

Our National line is purchased direct from the National Biscuit Company. From time to time, their salesmen call on me and take orders for the whole line, where we have business for the whole line. Included in that, they take orders for Shredded Wheat. Those orders are sold direct by the National Biscuit Company. Kellogg is selling through the jobbers, and the National deliver direct. Kellogg salesmen call on me occasionally. I have jobber salesmen call on me, also, and they would take orders for the Kellogg line, if I were out of any of it. That is the only way I can buy the Kellogg line, through the jobbers. Kellogg does not deliver direct. Under the plan adopted by the National Biscuit Company, I believe they deliver all that way. We get all our goods direct.

SIDNEY A. NELSON.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, located at 4368 Lime Street, Riverside. I have had that stand nine years.

I recognize Plaintiff's Exhibit 1. I call it Shredded Wheat, with which I have been familiar, I daresay, ever since I can remember; twenty-four years or so. During all that time I have been a consumer of it. We use Shredded Wheat all the time. We have it in our house all the time on the shelf. When Shredded Wheat is served in our home it is usually steamed; at times, with fruit of cream over it. It is not usually served in the package on the table. It is prepared in the kitchen and then served. It is brought in in dishes.

During the time I have known Shredded Wheat, both in my store and in my home, the biscuit, as I remember, has always been of the same shape and general texture.

My store is a combination of service and self-service. It is more or less a serve yourself. We accommodate the immediate neighborhood with service. We make some deliveries. We accept orders by telephone.

Our customers occasionally ask for Shredded Wheat, as in Plaintiff's Exhibit 1. That is the only way I have ever heard it asked for, Shredded Wheat. Whenever Shredded Wheat is asked for, they have always gotten what is exhibited as Plaintiff's Exhibit 1.

Shredded Wheat, in my mind, has been a recognized commodity, and such trade name given it that it is the product that, in my mind, should always be served to the public as Shredded Wheat Biscuit when it is asked for, just from, as I would say, a common law time of being on the market. I regard Shredded Wheat as a proprietary name.

I know Kellogg's Whole Wheat Biscuit. I do not carry it. I have handled the shredded wheat as put out by the Kellogg people, and I found a little confusion, at times, with the trade. Whenever they would ask for Shredded Wheat, I would give them Plaintiff's

Exhibit 1. If they saw the other package, they would ask what that was. If I would say shredded wheat, immediately it caused confusion, and they did not know, offhand, exactly what they had been accustomed to getting. They probably would ask me and depend upon my honesty to give them what they had been accustomed to getting. I would tell them that the shredded wheat in the package there was the one that had always been on the market and they had been accustomed to purchase. I carried the Kellogg product at the time when it was called Shredded Whole Wheat Biscuit. That is the time I referred to as to there being some confusion. I have carried it under the name Kellogg's Whole Wheat Biscuit. I did not notice any confusion at that time, because I never would hand it to them unless it was asked for by the proper name.

I had a conversation with the Kellogg salesman over the Kellogg biscuit. That is one reason and the main reason I discontinued the Kellogg biscuit, because of sales tactics that were not, in my mind, ethical or good business, asking not that we substitute but that we hand out Kellogg's biscuit for Shredded Wheat and that the customer would find it just as good and be satisfied. The Kellogg salesman suggested that practice to me. I do not remember his name. His face is familiar to me. He works the Riverside territory for the Kellogg people. I would know his face. I do not know that I ever heard his name. He was a man standing, probably, close to six feet, a slender face. Probably four or five years back, I think he handled your sampling crews out there, and later was promoted to sales work. His tactics in coming to the store and suggesting that manner of substituting Kellogg's biscuit for Shredded Wheat to help them get their biscuit on the market was one of my main reasons for dropping the Kellogg product.

I had my customers try the Kellogg biscuit. Such a small percentage favored it that popular demand did not warrant its staying on the shelf. The Kellogg biscuit looks like Shredded Wheat Biscuit. The tactics they are using now, that open-face package, is, in my mind, another scheme of encroaching upon the appearance of the National Biscuit Company's Shredded Wheat.

If there never had been a Shredded Wheat Biscuit and the Kellogg Company had come out with this Whole Wheat Biscuit, it would be a brand new product. It would take considerable effort to introduce it and make it popular, like any other new commodity. I am familiar with the fact that the Shredded Wheat Company has extensively advertised Shredded Wheat. I have seen its advertisements over a long period of years. The effect of those many years of effort on the part of the Shredded Wheat Company would be an advantage to the Kellogg Company in enabling it to market its biscuit. That is, they could gain by advertising that has been done by the Shredded Wheat Company in marketing their biscuit.

In my way of believing, I do not think their Whole Wheat Biscuit could be sold as a shredded wheat biscuit; but it is similar and answers a similar call.

CROSS-EXAMINATION.

THE WITNESS: The conversation with the Kellogg salesman occurred while I had Kellogg's Whole Wheat Biscuit in stock. When he told me to sell them, I believe he said to call the attention of the public to the fifteen biscuit in the cartons. I do not remember that he said anything about double toasting. He brought out the fifteen biscuit feature as one of his sales talks. He brought out that he wanted me to talk up the Kellogg biscuit, to tell people that I had a new shredded

wheat biscuit on the market; that the Kellogg Company was putting out a shredded wheat biscuit, along with this other statement.

I do not think that any business could be successfully built up in that Kellogg product by just bare substitution. I do not think there are enough merchants who would want to jeopardize their own business with methods of substitution. My opinion is that the grocer would immediately be in a quarrel with his customers. They would say that was not the biscuit they had been getting.

A customer would probably recognize the Kellogg's Whole Wheat Biscuit package as a different package than he had had before. I have used the Kellogg biscuit in my home. I recognized a difference in size. I do not know that I noticed that it was darker or more toasted than the other. I am familiar with the Kellogg Krispies and Pep. The Krispies product went into public demand very quickly. It was a follow-up of Heinz Rice-Crisps which were out first. It was a similar proposition to the Kellogg product. There is a Rice Crisp on the market, as well as Kellogg's Rice Krispies. I think it is a Heinz product, but I will not say for sure. I do not know what Heinz call theirs now. They have never sold well enough to continue to carry it in stock.

Kellogg's All-Bran was an easy product to introduce. It was a new product in the Kellogg line. Kellogg All-Bran was on the market when I started in the grocery business. The Campbell Soup line is a well established line. As to whether the existence of that line would help a competitor to get into business with a competing line of soups or retard the other man, I would say yes and no. It might temporarily. I recognize that, when a leader is properly entrenched in the business, it really does work against a new man getting into that line, rather than with him.

Kellogg's Whole Wheat Biscuit is a shredded whole wheat biscuit. I have no doubt that it is made out of whole wheat, as advertised. Assuming that the product is a shredded whole wheat biscuit, I would say that the Kellogg product was just as much a shredded whole wheat biscuit as the National product is.

I handled some of Kellogg's Whole Wheat Biscuit since the cellophane front was put in the carton. Since then I have discontinued the sale of it. When they first came out, they had one or two cartons that way packed in a case.

My store never advertises in the newspapers. I know that a number of stores do carry private store advertising. If those stores features Kellogg's Whole Wheat extensively in their newspaper advertising, that would tend to create consumer demand for that product in those stores. My store does not do any advertising of that kind.

After handling the Kellogg Whole Wheat Biscuit for a while, I discontinued it. If there were enough demand from my customers for Kellogg's shredded wheat, however, I would put the Kellogg biscuit back into stock. In that event, if customers asked for Kellogg's Whole Wheat Biscuit, I would give them Kellogg's Whole Wheat Biscuit. If they asked for Kellogg's shredded wheat, they would have to explain the difference before I would hand out a package. If a customer came into my store and said, "I want Kellogg's shredded wheat," I would tell them there was no Kellogg's shredded wheat. I would tell them there was a Kellogg's Whole Wheat Biscuit or the National Shredded Wheat Biscuit. I am quite serious in that testimony. There is a personal angle, too, underneath that; because there are customers who have traded with me such a long time that I am quite accustomed to what they want. They would say they want Shredded Wheat, if they wanted the National product.

After a customer had been saying "I want Shredded Wheat" to me for four or five years and suddenly came to me and said, "I want Kellogg's shredded wheat," I would immediately know he had misspoken or wanted a different product. I would ask him if it was this Kellogg's Whole Wheat Biscuit he wanted. I would tell them that there was no Kellogg's shredded wheat on the market.

Let me cite an instance. In the course of business, I have old customers come in for a brand you will probably recognize, Danish butter. They will come in constantly and ask me for Dane's butter. I say, "You mean Danish butter?" I know most of the customers well enough to talk pretty well with them. I would not criticize the customer for calling it Dane's butter if what she really wants is Danish butter. I would correct her in a smiling way.

If a customer came into my store and said she wanted Kellogg's shredded wheat, for some reason I do not know, it would not bring to my mind instantly that she wanted Kellogg's Whole Wheat Biscuit. I would explain to them that there are two products that are conflicting in their mind. There is a Shredded Wheat product and there is a Kellogg Whole Wheat product. They are different in size, and in the number in a package.

If they said they wanted Kellogg's shredded wheat, I would explain to them that there was the Shredded Wheat Biscuit by National and the Kellogg Whole Wheat Biscuit. Whichever one they specified, I would give them. I do not think I would finally get educated to the fact that, when they said Kellogg's shredded wheat, they wanted Kellogg's Whole Wheat Biscuit. If you had personal experience yourself in sales work in a grocery store, there is a way of getting around it. When you get a conflicting request like that, you are just as likely to take down the wrong package and

make a dissatisfied customer, as you are to get the right package.

If a customer called, and said he wanted shredded wheat, Shredded Wheat is what they would get. If a customer wanted Kellogg's Whole Wheat Biscuit and called for it as Kellogg's Shredded Wheat, and if I sent them the National Shredded Wheat and they called me and said, "You have made a mistake and given me the kind I do not want. When I called for shredded wheat, I want you to send me Kellogg's," I would explain that there were two different kinds.

I will cite you another instance. A customer keeps calling for table cream, and I keep sending it out. Suddenly she will ask for a bottle of cream. If I sent her another bottle of table cream, she would call me up and bawl me out, so to speak, for not sending her whipping cream. My customers and I seem to understand each other better than you and I understand each other.

If a well-known customer of mine would say to me, "I have tried Kellogg's shredded wheat, and I like Kellogg's shredded wheat, when I call up and say I want shredded wheat, I want you to send Kellogg's," I would say, "Yes, I can send you Kellogg's Whole Wheat Biscuit."

The next day, if that well-known customer called me and said she wanted shredded wheat, after that explanation, I would send her Kellogg's, and I would correct her again, too.

RE-DIRECT EXAMINATION.

THE WITNESS: The gist of all this examination is that I know one Shredded Wheat, one thing as Shredded Wheat. I do not recognize the right or power of the Kellogg Company to call their product shredded wheat.

It is a common thing, when a product has been for years on the market and obtained recognition through advertising and service to the public, for others to come in and attempt to sell a similar product. It is quite a common thing. The intent and effect of that proceeding is generally to bring out some ideas that are similar to the good points of the well-intrenched item.

Taking the resemblance between these two biscuits, surely, if I and most of my customers saw the two packages side by side, we would have no doubt that they are different products of different companies. It is very true that all customers are not as careful and designing as some. Frequently children are sent to the store to purchase articles. Also, a product like Shredded Wheat or Whole Wheat Biscuit frequently may be served in a dish on the table, as I have testified is the case in my home.

If two of Kellogg's Whole Wheat Biscuit were put in a plain dish and set on the table in front of the average householder or person who uses these cereals, they would know at once that they had gotten something different than Shredded Wheat. They would immediately notice it was a different product. I do not believe, however, that many would notice the difference if only one were put in a dish, because, like most people, they have certain dishes for serving certain commodities, and they would see immediately that there would be a different-sized biscuit. They would notice the different size of the biscuit. There would probably be questions the next time they came to the store, as to what it was all about.

RE-CROSS-EXAMINATION.

THE WITNESS: I came here by myself. The sales-manager for the National Biscuit Company in Riverside asked to to come down. His name is Mr. Nordlund. I drove down by myself. He said my time and my

expenses would be looked after by the National Biscuit Company. I know all the National Biscuit Company salesmen who call on me. The case was not discussed, as to trying to coach or instruct me in any way. After I was asked my opinion on it, before I knew what it was all about or that there was even a case being tried, we talked about the fairness and the viewpoints on the subject. I stated what my opinion was as to the fairness of the Kellogg Company using these cellophane windows in the package. My opinion was that the use of that cellophane window is not a fair thing on the part of the Kellogg Company. I think it is unfair on the part of the manufacturer, assuming that he has a right to make a product, to put a window in it and show what the product is; because they are encroaching by getting the appearance. The end appearance of the biscuit is similar in appearance to the Shredded Wheat.

If the Kellogg Company did not put out this shredded wheat, there would be only one concern, the National Biscuit Company, to my knowledge, making that type of shredded wheat. They would have a complete monopoly of that particular type of biscuit. There would be a complete monopoly in the National Biscuit Company of what I would call a shredded whole wheat biscuit.

My feeling toward the Kellogg people is that, if they had stayed with the original biscuit when it was a round biscuit, I think they would have done more toward getting on the market than they have by trying to mimic the National Biscuit Shredded Wheat. I believe that, if they had stayed with the round biscuit, assuming that they made a round biscuit they would have gotten along better than they have by putting this pillow-shaped biscuit out.

RXQ. 164. If we assume that, under the law—and that has to be determined by the Court—the Kellogg Company has a right to make this biscuit, would you

still think it was unfair for them to make it, to take advantage of their legal rights?

A. I think it would be encroaching deliberately upon the advertised pictures or the advertising that Shredded Wheat Biscuit has spent so much money on, in advertising their biscuit.

THE WITNESS: During all the time I have been in business, I knew that the Kellogg Company has had all kinds of competition with its corn flakes. In a straight quality corn flake, I do not know of any other than Kellogg's. I have known the Jersey Corn Flakes, Post Toasties call theirs a double-thick corn flake. It is corn flake just the same, a thicker corn flake.

The common things are all in a highly competitive market. I think it is unfair to have a little competition in the manufacture of shredded wheat biscuit, inasmuch as it has just newly started, and one detriment to business today is the fact that the merchant is being practically compelled to carry so many duplicate lines. I think that, from the standpoint of the merchant, it would be to his advantage if he could just have one kind of each product.

If he had one corn flake made by one manufacturer and one wheat flake, that would be convenient to the grocer, if it could be eliminated. Apparently, however, those companies seem to have gotten enough difference in their products so that they do not object to one another's coming on the market. The ideal grocery store would be one in which we did not have to carry any duplicates to most commodities, and in which we could have one well-established product in each line. I never expect to reach that ideal, but I think it would be a pleasant ideal.

When I say I think the Kellogg Company is unfair, I mean it is unfair where they come in and take a similar design. I think it would have been nice business if they had stayed with the round biscuit. In other

words, it is fair to say that the National Shredded Wheat Biscuit was the one line in my store where this ideal had been reached, where there was a complete monopoly and I only had to carry one Shredded Wheat Biscuit, and the Kellogg Company has now come in and even destroyed that little ideal and given me two lines to carry; and I think it is unfair.

RE-DIRECT EXAMINATION.

THE WITNESS: There is no confusion in the trade between Kellogg's Corn Flakes and Post Toasties, although they are both corn flakes. The point I am trying to make is that there is confusion between the two articles known as Shredded Wheat and Kellogg's Whole Wheat Biscuit, because they are alike and because there is no great differentiation in their appearance.

RE-CROSS-EXAMINATION.

THE WITNESS: If my customers begin to ask for Kellogg's Whole Wheat Biscuit, I do not believe I will put it back in stock. If a substantial number of our customers were to keep saying "I want the Kellogg's Whole Wheat Biscuit," it would take a long time before I would want to put it back in stock. If a third of my customers said "We do not want the National; we want Kellogg's shredded wheat," if I got that percentage, I would put it in. It is just a matter of percentage of demand.

R. L. WAUGH.

Deposition taken at Los Angeles, California, February 11, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer. My store is self-service and delivery. It is one of the large markets in Long Beach, part of the Orange and Wardlow Drive-

in Market. I have been in that market two years. I have been in Long Beach ten years. I have been in the grocery business thirty years. For the last two years, I have had self-service. Prior to that, my stores were service stores. Besides Long Beach, I have been in the grocery business in Winnipeg, Canada, Medicine Hat, Alberta, and then Long Beach. My present store is self-service with delivery. We take orders on the telephone and deliver. I would not call it a Class A store, but it is a fair-sized grocery store. We have a very nice class of trade, among middle-class people.

I recognize the box, Plaintiff's Exhibit 1. I call that Shredded Wheat. I have known it for thirty years, all the time I have been in business, but no longer than that. I am not a user of Shredded Wheat myself, lately. We have it in the household. We have four children, two of whom eat Shredded Wheat. The package is placed on the table and we mostly help ourselves out of the package and eat it with milk or cream over it in the morning. Personally, I eat Pep.

I move about two cases of Shredded Wheat a month through my store. It is a steady seller. On the telephone, my customers ask for it as Shredded Wheat. When they self-service, they pick it up themselves. They have always asked for Shredded Wheat. That is a regular term with them. Ever since I can remember, they always asked for Shredded Wheat. I have always supplied them with the regular package of Shredded Wheat, like Plaintiff's Exhibit 1.

I know the Kellogg Whole Wheat Biscuit. We carry it. It does not move so fast. We do not get telephone orders for it. I do not remember ever getting any telephone orders for Kellogg's Shredded Wheat. We have had orders for Shredded Wheat, and I have sent them Kellogg's, and I have had it returned.

Q. 42. Have you observed, in addition to what you just said, any confusion between the two products?

A. Yes, occasionally we have a party who will bring up a package of Shredded Wheat, and I have asked them if they thought that was the Shredded Wheat. They said, "Is that not Shredded Wheat," and I said, "That is Kellogg's Whole Wheat Biscuit." "Oh, I thought that was Shredded Wheat," and they would point to the window package and then walk back and get the other package, and they said, "This is what I want," meaning Plaintiff's Exhibit 1.

THE WITNESS: That has occurred several times, in connection with the package with the window in it, Plaintiff's Exhibit 168, the package of Kellogg Whole Wheat Biscuit that shows the biscuit through a cellophane window. The customers have picked that up in my store, under the impression that it was Shredded Wheat.

Q. 48. What have you to say about the expression Shredded Wheat? Has it acquired any definite meaning in the minds of the public, in your opinion?

A. Well, the word Shredded Wheat is a household word, and it really—referring, always, to the original Shredded Wheat.

Q. 49. When you call it a household word, do you mean by that that it has become attached to that particular product in the minds of the public?

A. Absolutely.

Q. 50. Do you believe that to be the case?

A. I do.

Q. 51. From your thirty years' experience?

A. Yes, sir.

THE WITNESS: I have seen a package like Plaintiff's Exhibit 167. I have noticed the language on each end of the package, "a shredded wheat product." I have had those in my store. I should say that, when the public see the words Shredded Wheat on there, they naturally think they are getting the original package of Shredded Wheat.

I do not think that is a usual and proper method of introducing a product on the market. I, personally, would not like to have anybody put up a package like that and call it Shredded Wheat. I would say it is an infringement on the original package of Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: The Kellogg product is actually shredded wheat. I would say I have no doubt, not merely that it looks like Shredded Wheat, but that it is actually shredded wheat. I am referring to the product in the Kellogg's Whole Wheat Biscuit carton with the cellophane front. Shredded wheat is a descriptive name for that product.

I know that many grocers who handle the Kellogg product have dealer advertisements in which they mention it by the name that is on the package, Kellogg's Whole Wheat Biscuit. I would think that name is unfair. I do not know what name the Kellogg Company could give that product which would be a fair name for them to use. That would be a hard one. I would have to think that over. If you would give me some time, I might be able to suggest a name for that; but I really could not do it on the spur of the moment, not offhand, as quick as that. It would take a lot of careful study. Kellogg's Wheat Flakes would not be a good name. It is not a flake. I think it is unfair for the Kellogg Company to show, by means of a cellophane window, what they are making. I would not go as far as to say that it is unfair for them to make the product at all; but I think that, by the window package, if you were a woman in a store, and you were picking up a package of this biscuit, you would naturally think you were getting Shredded Wheat. You are not getting identically the same article but a little smaller. It is made by a different company.

If the customer wants to get a shredded wheat biscuit made by the Kellogg Company, the company ought to show her that that is what she is going to get; but, if she thinks she is getting the original Shredded Wheat, she is not. My customers or one of them picked up Kellogg's Whole Wheat Biscuit off the shelf and came to my checker to pay for it. I do my own checking-out, mostly. I would say to the customer, "What do you think you have got in this package here?" She would say, "Is that not Shredded Wheat," and I would say, "No, that is not Shredded Wheat." She said, "What is this, then?" I said, "This is Kellogg's. That is the new product that is put out by Kellogg's." I may have told her it was Kellogg's shredded wheat, and she said, "Oh, well, that is not the package I wanted. I wanted this package here," when, probably, she thought that the Shredded Wheat Company had put in this window package. The package with the name *Kellogg's* was right there. I am continuing to do that. I did it this morning. I would not say that that was rather severe pushing or switching of those customers to the National Biscuit product. I would not regard that as pushing. I just did not want the party to get hold of the wrong package. That is the only impression I would do it for. Sometimes, they have said, "Yes; well, I will try this one." Sometimes I do not succeed in getting them to put the Kellogg package back. I have no objection. They can have whichever they like, as far as I am concerned. I do not want them to take that package home thinking they are taking the other package. When they bring me the package, it is not wrapped; it is in the basket.

I think they are more likely to find out when they get home that this package is not what they wanted, than they would in my store. When they take it off the shelf, they may think it is one thing. When they get

home and think about it, they finally realize that it is not what they intended taking. This process of realization by my customers is not a slow process. It is handled pretty quickly. Both products are on the same rack, not right alongside of each other. I think there is a little something between them. I do not think I keep Kellogg's right next to Shredded Wheat. I put the Pep or All-Bran in between, so that they will not get confused. After I have done all that, so they will not be confused, I still assume they are confused when they come to the checking counter and quite often straighten them out. This is the new product, and the other is the old product. Naturally, what they have in their minds is the old product. I have only handled the Kellogg product, I think, about two years. It would have to move a lot faster than it is doing before I would consider it "grown up." After five years, if the volume went out, I would say that it had attained a "majority" in my store. It is fair to say that I put a double check on confusion. In the first place, I separate Kellogg's Shredded Wheat from the National Shredded Wheat, by putting a lot of Kellogg's products in between. Then, I check her again at the door by saying, "Are you sure that this is the package you want?" Some of the customers say "I will try this this time." I think the cellophane front in there has a lot to do with increasing sales of the Kellogg package. I would say that the cellophane front has the effect of suggesting the other, the old Shredded Wheat package. In other words, in my mind, the old Shredded Wheat package looms up as though it had a cellophane front in it. That is the idea. I have never seen one of the National packages that had a cellophane front. I get that into my mind because lately they are using so much cellophane; and, naturally, the people might think that the Shredded Wheat Company are putting up this glass front.

I think it might occur to some of my customers that this was the Kellogg Company that was putting up the glass-front package, because their name is on the package; but, when the woman is buying groceries, she does not stop to consider all those things. She just simply picks up a package of Shredded Wheat. Almost all people buy today by the eyes. I do not think a person with good eyes could tell that that was Kellogg's Whole Wheat Biscuit, not the way they buy groceries. They buy them so quick. They just simply grab a package of Shredded Wheat and away they go with it.

I do not think that any of my customers really take Davis' Baking Powder when they really want Royal Baking Powder. They distinguish them because there are two features in the can entirely different: the name and the color of the label.

With the Kellogg package and the National Biscuit package, I do not think they stop to look at the name. They just simply see the Shredded Wheat through the package, and they grab it and go.

That being so, it would be fair to say that Plaintiff's Exhibit 1 has never registered itself on the memory of the general public in any way; but, as I told you, there are so many new cellophane packages coming out nowadays that the women today buy by eyesight more than anything else. They would take the cellophane package in preference.

Assuming that the public had had photographed on its mind and memory Plaintiff's Exhibit 1 as the package they had been buying for thirty years, I do not think that they would walk up to my shelves and pick up Plaintiff's Exhibit 155, the Kellogg Whole Wheat Biscuit carton without cellophane, and think they had gotten Shredded Wheat, as much. But, the minute Kellogg puts cellophane on the front, those customers think they are getting the old package they

have been buying for thirty years, with the cellophane front in it.

I find it necessary to correct the customers at the door, because I do not want them to get home and find that they have not got what they intended to buy. I think that realization will come to them at home rather than in my store, because, on the opening of the package, they will discover the biscuit is a little different. They will see there is a different kind of biscuit in there. What they started out to purchase was Shredded Wheat, and they will find out they have taken home a package of Kellogg's Whole Wheat Biscuit.

I have had an instance on the telephone, where I have had the lady order "Send me a package of Shredded Wheat," and I have sent the cellophane package of Kellogg's out and it has been returned. They called up and said it was not what they wanted.

I have had cases where customers have taken the cellophane-front package home and have come back to me the next day and said they did not get the product they wanted. The second time they came, they said, "That is the one I took last time. I want the original Shredded Wheat. I took that home last time. I just want the other one." I have had several cases of that sort.

I never had the experience of a customer who ordered shredded wheat and got the National Shredded Wheat calling me and telling me they really wanted the other kind with the cellophane front. It is not true that most of the customers who take the cellophane-front package keep on buying it.

There has not been very much consumer demand for the Kellogg's Whole Wheat Biscuit in my store. I should think I probably sell a case every two months. That demand is a constant slow demand for that much. I do not advertise Kellogg's Whole Wheat Biscuit in

newspapers; I have advertised it on handbills. If I advertise Kellogg's Shredded Wheat, I find it creates the wrong impression. I do not know for sure whether I called it Kellogg's shredded wheat or Kellogg's Whole Wheat Biscuit. I would have to look back on my record. I think I may have called it Kellogg's shredded wheat. It is not the regular Shredded Wheat. I will allow that it is Kellogg's Shredded Wheat.

We handle the National Biscuit line and the Sunshine. I do not like carrying two brands of the same product in the particular line of shredded wheat biscuit. It would save a lot of confusion if I could pinch out this little demand for one case in two months and just have one kind of shredded wheat in my store.

I am usually the one who asks the customer whether that is really what she wants. Then, nine times out of ten, she wants the other one. I do not want her to go away with the impression that she is getting one article, when she should be getting the other. So, in nine cases out of ten, when a customer picks up Kellogg's Whole Wheat Biscuit, if she leaves my store with it, she is only one out of ten that goes out with the Kellogg product. I do not know about the demand. We sell about a case of Kellogg's Whole Wheat Biscuit every two months. It is sold to us and we have got to get the stock turned over. I will not say that I stop a customer in every case, you know. I do not stop every one that comes out with Kellogg's, because I am anxious to get rid of my stock. I do not want it to get stale on my hands.

I have recently stopped customers coming up to me with the cellophane package and asked them if they are sure that it what they want. Not just since this case came up, or since I heard I was going to testify; but, since the party got the wrong package on the telephone. I then changed my plan.

I should say that, when a woman calls me on the telephone and says "I want Shredded Wheat," and I send her Kellogg's and she sends it back, that is the same kind of thing as a woman picking up Kellogg's Whole Wheat Biscuit off my shelves and seeing it there in her own hands. You must remember, when you are in a grocery store, we have other people who will come in. Just changing once is nothing. When a man will come in, he will simply pick it up: "No, I do not want that." "Haven't you got the other Shredded Wheat?" Then you begin to think they want the other shredded wheat. There is no use fooling them on it. The other shedded wheat is right there. I do not think I would stop all that confusion by putting the two products right alongside each other; because I will tell you, sometimes you can have a thing right in front of a customer's eyes, and she cannot see it. I do not know what you are going to do in that case. You know what it is in a grocery store. Sometimes you will be looking right at the object you want, and it is not there. That is true; you can send a woman down to look at the counter, and she cannot find it. They sometimes send children into a self-service store. I would say that nine out of ten that pick up this package would think they are getting the other package.

It is true that, out of every ten customers who come to my checking counter with one of these packages of Kellogg's Whole Wheat Biscuit in their hands, when I ask them if that is really what they want, I find that none of them do not want it, and that package goes back on the shelf and those nine people take the National Biscuit package. That will stand a check-up in my store. If an investigator is sent there to spend a week, that will stand up as true; if you will let me do the questioning as they are checking out. Nine out of ten will think they are getting the original package.

My testimony was that, in the past, out of every ten people I spoke to, nine of them said, "Oh, this is wrong. I did not want this," and went back and took the other.

I am not sure, but I think I sell about a case a month of National Biscuit Shredded Wheat, thirty-six packages to the case. I have to push this other one out and get rid of it. Roughly, I should say I sell a case of the Kellogg product every two months. I have testified that, out of every ten people who come to my checking counter with Kellogg's Whole Wheat Biscuit, I turn nine of them back to the other biscuit. There are twenty-four packages to a case of Kellogg's and thirty-six to a case of Shredded Wheat. There is a difference there. If I said on the National Shredded Wheat that I sell a case, thirty-six packages, a month, it may be more than that. Of course, I would have to look up my records. It may be more than that. It does not strike me that there is anything mathematically wrong about my testimony. I think it may be two cases a month of Shredded Wheat that we sell.

I told Mr. Clarke that I sell about twelve packages of Kellogg's a month. If the rest of my testimony is true and, out of ten customers who take the package off the shelf, I turn nine customers back, then, in a month's time, one hundred and twenty packages of the Kellogg product will have been taken off the shelves and only twelve get through. That would be about right, if you get down to final figures. Nine out of ten packages that the customers try to get out of my store every month and I succeed in preventing them from taking is right.

Mr. Aspergren of the National Biscuit Company asked me to come down here. He drove down with me. I have known him about two years. He is not a close friend, just a business acquaintance. We drove down in his car. He is not looking after my time and

expenses in the case. I do not expect any compensation for my time today. I do not expect to have a check handed to me when I walk out. I do not expect anything like that.

Most products like shredded wheat are bought by the housewife, sometimes by children. I do not believe that the practice of substitution is profitable. I do not like substitution. I would not care to be sending the Kellogg product to people who order and want the National and have them in most cases send it right back, causing friction and loss of customers all the time. I only do it occasionally, if I want to get rid of an extra package. If she is not a very particular customer, I do not think the customer will care which she gets, as long as it is shredded wheat. I would not try that as a general practice, to be followed year in and year out with all kinds of goods. I would not substitute, anyway, if I could get away from it. A grocer does not get very far by substituting.

I would say that, mostly, the housewife has control of the goods that come into the house and decided what package is going to be bought. Substitution or switching has been done by housewives. Sometimes, a housewife will buy a cheaper kind of coffee and try to put it over on her husband. Sometimes she gets away with it. As to size, a housewife could get away with substitution of Kellogg's biscuit for the National biscuit on the average child or father, all right. There is no doubt about that. I do feel, I should say, that the courts should be called on to intervene by injunction to prevent housewives substituting coffee. I agree with Mr. Clarke that the United States District Courts should be called on to enjoin the housewife from switching coffee on her husband. I will agree with Mr. Clarke, that, in the main, the housewife, as the purchasing agent for the family, tries to give the family what she

thinks is the best value and what she thinks the family wants. If the practice of substitution can be stopped, as between housewife and grocer, there will not be very much trouble about the substitution as between housewife and family, I would not think.

The self-service type of store is growing in popularity in my territory. There are more self-service stores going in today than ever. It seems to be the trend of the times to go into the self-service stores.

I used to eat Shredded Wheat in my early days. I use Pep now instead. So far as younger people are concerned, it is true that there is a great deal of shifting around from time to time in demand among the cereals, as far as particular customers are concerned. A person who eats shredded wheat once does not go on forty years eating it. They change around. They get tired of one thing and they go to another. Then they go back to the first one; or, if something new comes on the market, they try it. That is not true, however, of the older people. Where it becomes a health propoition, where somebody's health depends on a certain food, the younger ones will switch around.

HENRY L. DINGEE.

Deposition taken at Fort Worth, Texas, February 15, 1933.

Direct Examination.

The Witness: I am in the retail grocery business, operating just one service store. We are the oldest grocery store in Fort Worth, being in business since 1878. I have been connected with it since 1904 or 1905, continuously. I have not been in charge of the store all that time, but I have been a partner. My father was a partner and interested in the store before me. Since 1878, my father and I have conducted the store.

We still do a service business, with credit, telephone orders and so forth. We moved to our present location in 1924. Up to that time, we had been at 502 Houston Street.

I recognize Plaintiff's Exhibit 1 as shredded wheat, with which I have been familiar as long as I can remember, since I have been in the grocery business and before. I cannot tell exactly how long Shredded Wheat has been handled in our store, but I think I have heard father say we shipped the first Shredded Wheat into Fort Worth. No jobbers handled it at that time. It was shipped in by express a long time ago. My father died last February. Our store has carried Shredded Wheat continuously since that first shipment.

In my estimation, when the purchasing public ask for shredded wheat, that is what I think of. It is Shredded Wheat, made by the Niagara Falls Shredded Wheat Company and now by the National Biscuit Company. That has been true all the time I have handled it. It is asked for as Shredded Wheat. When they ask for that I give them this package, Plaintiff's Exhibit 1.

Q. 32. Can you tell me whether or not that name Shredded Wheat has a definite meaning in the mind of the public that purchases it?

A. In my opinion, there is only one Shredded Wheat. When a customer comes in and asks for Shredded Wheat, that is the first thing I think of, the only thing. To me, just Shredded Wheat is the name of a product, like saying the Cadillac made by General Motors. I think Shredded Wheat is made by this Uneeda Biscuit Company, or whatever you want to call it.

THE WITNESS: I regard it as a proprietary name, a trade name. I think Shredded Wheat is the name of the product.

I do not think I am familiar with Kellogg's Whole Wheat Biscuit. We did handle it, but, at present, we do not handle it, because there was not much demand for it. We put it in there, but we did not have much luck with it. I do not remember and I cannot recall handling it when it was called Kellogg's Shredded Whole Wheat Biscuit. Plaintiff's Exhibit 161, with the window in it, is the first package of that kind I recall seeing. When I see that product back of the window, it looks to me like a package of Shredded Wheat. The package looks to me like an imitation of Shredded Wheat. I believe that, with this package on the shelf, there might be confusion in the public mind.

I think the Kellogg package, like Plaintiff's Exhibit 161, might and would be sold as Shredded Wheat. Looking at the printing on one end, it says, "Shredded Wheat in its most delicious form," and, on the other end, "A shredded wheat product." It looks to me as if they are trying to sell it as Shredded Wheat. I think Kellogg's Whole Wheat Biscuit could be sold more readily as a shredded wheat biscuit than as a new product.

We use Shredded Wheat in our home. It is prepared in the kitchen and brought on the table in a bowl. We mash it up and put cream and sugar on it. There are five in the family. If, without my knowledge, a package of Kellogg's Whole Wheat Biscuit were opened in the kitchen and served on the table, I believe the members of my family would believe it was Shredded Wheat. I do not believe they could tell the difference in appearance.

CROSS-EXAMINATION.

THE WITNESS: I believe I could tell the difference. I do not know about the difference in taste. I recognize the difference in size. I believe I would recognize the difference in size of the Kellogg product.

If the Kellogg Company tell me on their package that it is Kellogg's Whole Wheat Biscuit shredded, I know it would be a whole wheat biscuit; but I do not believe it would be a shredded wheat biscuit. I believe I could tell the difference, in spite of the fact that it says on this side that it is shredded wheat biscuit. I do not believe the Kellogg Company is lying when it says it is shredded wheat biscuit. I did not mean to imply that. I said that I do not believe it is shredded wheat biscuit. I think the National Biscuit Company is the only one that makes Shredded Wheat, the trade name of Shredded Wheat. I do not think the Kellogg Company calls it shredded wheat. They do call it, on this package, very prominently, Kellogg's Whole Wheat Biscuit. That is the only name I have known it by. I believe that is the first time I have ever seen that package. Mr. Vilas asked me whether this did not look like Shredded Wheat, and I said it did. They are not shredded wheat. They are made out of wheat. They are shredded, all right. I do not think they are Shredded Whole Wheat Biscuit.

The Kellogg Company at Battle Creek, Michigan, could make shredded whole wheat biscuit, all right. If they made it, I suppose it would be a shredded whole wheat biscuit, physically speaking. I suppose they could make something similar to that, all right, and call it the same thing.

I do not remember eating or tasting some of Kellogg's biscuit. I do not believe I have. In fact, I hardly ever eat Shredded Wheat. I very seldom eat either product; just once in a while.

I handled the Kellogg product for a while but discontinued it, because I did not find there was any demand. We do run advertisements. I never advertised Kellogg's Whole Wheat Biscuit, to my certain knowledge. I do not recollect it. I have advertised

the National Shredded Wheat, Plaintiff's Exhibit 1, because we handle that and sell it. I surely think that my advertisement of it would tend to create a demand for it. I know that advertising tends to create a demand among consumers. I am sure that, if I advertised Kellogg's Whole Wheat Biscuit in the same way I have advertised the National Shredded Wheat Biscuit, it would create a demand for the Kellogg product. We did not drop the Kellogg product because we did not advertise it but because there was no demand for it.

Our store is located in Fort Worth, and there are quite a few self-service stores in that Fort Worth market, more than there are service stores, many more. I have never considered turning my store into a self-service store. It is such an old organization that we are going on from now on in the old way. There are no self-service features whatever to my store. Of course, there are some people who come back behind the counters, some old-time customers, who come behind the counter and help themselves, once in a while. The new-time customers, although used to waiting on themselves in other stores, do not do that. I think it is just the old-time customers. It seems to me that the table and counter in front of our shelves kind of bar them and they do not go behind them. Just the old-timers do. People who are used to the new self-service stores stay on the other side of the counter. They do not ask whether we have Kellogg's, or any other name that it could have been known by.

When we handled it, if a customer asked me for Kellogg's shredded wheat, I would give her that product, the Kellogg's Whole Wheat Biscuit. Plaintiff's Exhibit 161 is a very nice package. It looks more modern than Plaintiff's Exhibit 1, but this Niagara Falls package has been the same ever since I can remember. I do not know whether there has been any change in it.

I know what the National biscuit is. I have seen them made. If somebody asked me what it was, I would say it was an oblong, kind of pillow-shaped biscuit, made with long threads. We had a demonstration in our own store long years ago, and I saw it made.

XQ. 121. Oh, you call those shreds threads?

A. Threads.

XQ. 122. You would not call them shreds?

A. No, I would call them long threads the way, if I remember right, they came out.

XQ. 123. So that you would really call it threaded biscuit instead of shredded wheat?

A. Well, of course, I probably would not call it that; but that is what it looked like. In my mind, it was kind of cut up, like shredded cocoanut or shredded codfish, or something like that. I do not know whether I ever heard of shredded cabbage or not. I would expect shredded cabbage to be in long strings, as long as you could get it out, in cabbage. Shredded cocoanut is cut up in little bitty pieces, like that.

Noticing on the individual Shredded Wheat package, Defendant's Exhibit 1, a phrase in quotations on the side, "As made since 1893. It's all in the shreds," I understand the word shreds there to refer to those long threads of wheat. I have no doubt of that.

If I were asked by somebody, "Just what is shredded wheat?" and I said, "It is a biscuit made out of wheat that is shredded," that would, I think, describe it.

I know the Piggly Wiggly stores. They are self-service stores. I believe they started in Memphis and scattered pretty much among the southwest territory. I understand some of the self-service stores are coming into the east. I believe that type of store is on the increase, that that is the present trend, service stores being changed to self-service.

My father was very well acquainted with Mr. C. W. Post. Mr. Post, I believe, started his business in this section, at Fort Worth. Our store stocked Post Toasties, and I believe we were the only dealer in the United States buying them direct. We do not still buy them direct, but we were doing so at a time when others could not get them direct. I understand Post Toasties are toasted corn flakes. We also handle Kellogg's Corn Flakes. We handle Kellogg's Krumbles and a few other things. I do not know whether we handle the complete Kellogg line. Post Toasties outsell the Kellogg Corn Flakes in my store. We do not now push the Post product more than Kellogg's Corn Flakes. We used to. It was kind of a personal matter. There used to be a personal feeling there. My father and Mr. Post were great friends. We bought Post Toasties direct just through that friendship. We never had any hard feelings against the Kellogg's corn flakes. It was to our interest to push the Post product more. I have absolutely no feeling against the Kellogg Company now. We stocked the Kellogg's Whole Wheat Biscuit right away and continued to stock it until we found there was not sufficient demand for it. I do not recall advertising Kellogg's Whole Wheat Biscuit. My father may have done so. If there should be a demand in my store, customers coming in and asking for Kellogg's Whole Wheat Biscuit or for Kellogg's shredded wheat biscuit, I would stock it up again. I do not know, of my own knowledge, one way or the other, whether Kellogg's Whole Wheat Biscuit is pretty generally stocked by other stores.

I would say, however, that advertising of Kellogg's Whole Wheat Biscuit by other stores around me and the sampling of that product to the consumer naturally would tend, in the long run, to create a demand for Kellogg's Whole Wheat Biscuit. As soon

as they did create a demand for it, I would stock up with it again.

I do not believe I would say that it is generally and widely known in our market that there are now two concerns making this shredded wheat biscuit. I do not think the Kellogg product is well known as a whole wheat biscuit. I would be surprised if men who are in a position to know would tell me it has a distribution of as high as 75 or 80 per cent. in other stores. I am not really familiar with conditions in other stores. I have not gone through self-service stores. I do not know that practically all those stores carry the whole wheat biscuit. I could not say whether they did or not. So my opinion that the Kellogg product is not well known in this market is based just on my knowledge from the customers who come in. They will ask for a package of Shredded Wheat; they will not say Kellogg's. They want Shredded Wheat, and they seem to know what they want; so it must be pretty well known there is just one Shredded Wheat. That is the way it seems to me.

It is true that that statement is based just on conditions in my one store.

RE-DIRECT EXAMINATION.

THE WITNESS: I think the proper description of this product, Shredded Wheat, is threads of wheat, and the term shredded is more or less erroneously applied to it. So, by the application of this fanciful name to it, he has given a designation to his own product.

As far as I can remember, the package, Plaintiff's Exhibit 1, has had the same general appearance for a great many years. I do not know whether these letters used to be black or not; but it was in the same size package, I know.

Looking at Plaintiff's Exhibit 10, I recall that package with a picture of a dish on the end of it. I would say that package, with the dish on one end and Niagara Falls on the other, was used for a long time. I associate this picture of a dish with two biscuit in it with Shredded Wheat, and I think the purchasing public does, also.

I see a picture of a dish with two biscuit in it on the reverse of Plaintiff's Exhibit 161. If a person saw that picture on that package, the name being obscured for one reason or another, I think they would think that it was Shredded Wheat. I think that, aside from modernizing the package, as Mr. Clarke has suggested to me, there is value in the old, well-known package and that it has a distinct good-will value in the trade. It is that old established package, as I remember it; and, every time you have that up, you think of shredded wheat. It has been sold for a great many years, to my knowledge.

My father's friendship for Mr. Post is a thing of the past. I do not know whether Mr. Post is dead or not; but I believe he is. So far as that had any influence on our merchandising, that is all a thing of the past, absolutely. I have no prejudiced feeling against Kellogg or for the National Biscuit Company or against them in this matter. I really do not know what this case is all about.

RE-CROSS-EXAMINATION.

THE WITNESS: I recognize the Whole Wheat Biscuit package as one of the family line of Kellogg's packages. I recognize Kellogg's name on there. I believe that is on all their packages. I think the consumers would recognize the Kellogg name. Their name is on there just as prominently as it is on all their packages, Corn Flakes, and all. I do not mean to say that I would

confuse this package; but I believe I would this part of it with the dish. When I see it, I see the whole package. I do not mean to say that my attention is so clouded that I just see the plate and do not see anything else on there. If I look at the Kellogg package, I think of Shredded Wheat. I think the Kellogg product is threaded wheat; but I do not think it is the threaded wheat I have had in my mind. I think of just this one package there, Plaintiff's Exhibit 1.

The picture of the plate with the biscuit in it would make me think it would be a package of Shredded Wheat. I think that is shredded wheat, all right. If I arrived home with that package and found it was whole wheat in biscuit form, shredded, I would not bring it back to tell them I thought I was going to get shredded wheat and I had gotten oat flakes, or oatmeal, or something of that sort; but I would not think I had gotten what I called for. I would not think I had gotten shredded wheat biscuit. I would think I had gotten something else, like shredded wheat, probably made out of wheat. I would think it would be Kellogg's Whole Wheat Biscuit. It is on the package. That is what it would be.

Our store would like to get down, of course, to one brand of each article, if we could; but, you know, we cannot have that. I have no prejudice against duplicate brands, so far as there is a demand for both products. It is a fact that almost everything we have in the store has some companion brand. If we have one brand of ketchup, you will have another. We generally have Blue Label. It is true, however, that almost every brand of product has some companion product that is made by some competitive concern.

I would not say that the Kellogg product is a competitive product to the Shredded Wheat, I do not believe; because, in my mind, that is the only Shredded

Wheat. I do not like to say it, but I think the Kellogg biscuit is an imitation, but not a competitive imitation. By imitation, I mean it looks like Shredded Wheat and is called Shredded Wheat on the side; that it tastes like Shredded Wheat and I have no doubt it is made out of wheat shredded and put into the pillow-shaped biscuit form. It could be a real shredded wheat, but I mean I think it is copied after this other one. I do not mean anything in the nature of a fake; I mean just a product made like this one, probably the same thing.

RXQ. 226. Yes, probably the same thing. Is it not a sort of companionate or competitive product, just like the two brands of ketchup? They do not always just taste alike, do they?

A. Well, I kind of feel like if a concern would make a car, a Ford, and another concern would make a car and call it a Ford, it would not be a Ford. That is just the way I feel about it.

THE WITNESS: They have got Shredded Wheat on the end of the Kellogg package; but they call it Whole Wheat Biscuit on there. If the National Biscuit Company called their product in small type whole wheat biscuit, I do not think that would make it unfair competition with Whole Wheat Biscuit. It is shredded whole wheat biscuit. It is surely a whole wheat biscuit. It is whole wheat biscuit; but it is not prominently advertised on the package as whole wheat biscuit. The Kellogg product is so advertised. The main prominent features on the package are the words Kellogg's Whole Wheat Biscuit.

The machine demonstration in our store that I spoke of referred to small machines that actually made shredded wheat biscuit. They shredded out the wheat and formed the biscuit, too. I do not remember now whether they baked the biscuit or not, it has been so

long ago. I never heard anything about Mr. Perky, the inventor of the biscuit, originally intending to make little machines for making it in the homes. I never had any demonstration in my store on Kellogg's Whole Wheat Biscuit. I do not remember having put any sales effort behind Kellogg's biscuit. I never had my salesmen explain that there were more biscuit and smaller biscuit in the package, and that it was made by a new concern. I just put it on the shelf, without putting any advertising behind it. We advertised Kellogg's Corn Flakes, so you see we do not have anything against Kellogg's. We did not put any sales efforts behind Kellogg's Whole Wheat Biscuit to advertise it. If they call for Kellogg's Whole Wheat Biscuit in my store, I will stock it up again.

RE-DIRECT EXAMINATION.

THE WITNESS: The old Shredded Wheat Company put a lot of effort into pushing this product. It was a brand new departure in cereal products and required a great deal of educational propaganda to get people to use it. I know there must have been a great deal of money spent on this little machine, and so on, pushing it. As I remember, they put out all sorts of pamphlets and literature telling the public how to use it. I feel that all that sort of effort has had the result of making it a sort of household word. I feel that way about it. When I told Mr. Clarke I thought the Kellogg product was an imitation of shredded wheat, those were the considerations I had in mind. I did not mean any hard feelings or anything like that.

RE-CROSS-EXAMINATION.

THE WITNESS: It is generally like the biscuit, I am sure, made of whole wheat and shredded and put up into pillow-shaped form. There is no doubt about

that. It looks like Shredded Wheat and can be used as Shredded Wheat. This biscuit, I concede, is whole wheat, shredded and put up in pillow-shaped form.

RE-DIRECT EXAMINATION.

THE WITNESS: A man might make an automobile that looked exactly like Mr. Ford's product, but it would not be a Ford; and a man might make a Kodak, but, not being an Eastman, it would not be a Kodak. That is what I had in mind. It might be exactly the same product as the original, but I do not think it would be fair to call it that. That is the sum and substance of what we have been talking about. That is what I have been trying to tell you.

RE-CROSS-EXAMINATION.

THE WITNESS: I do not remember instances where a man like William H. Baker put out a Baker's Chocolate, in the shape and form of the original Baker's Chocolate, to be put off on people who would think they were getting the original Baker's Chocolate. I do not remember any of those fraudul nt imitations. They have not been as frequent in recent years, since the courts have been enjoining fraudulent imitations of that kind. I do not mean to say that consumers cannot tell the Kellogg package and the National package apart. The packages are similar.

RE-DIRECT EXAMINATION.

THE WITNESS: I can tell the packages apart when I see them. Some of my customers might be confused if they would see one package without the other.

RE-CROSS-EXAMINATION.

THE WITNESS: They might and they might not; that is true. There are people who might be confused about it. I will concede that this Kellogg Whole Wheat

package is just as distinctive as any other Kellogg package. Anyone who might take that as one of the Shredded Wheat packages might also pick up a package of Kellogg's Corn Flakes and think they were getting a package of Shredded Wheat, I think.

RE-DIRECT EXAMINATION.

THE WITNESS: I do not attempt to pass opinion upon the legal aspects of the case, as to whether fraud exists or does not exist.

RE-CROSS-EXAMINATION.

THE WITNESS: I have not heard of fraudulent imitations in recent years. I did not hear that there were imitations of Royal Baking Powder, Baker's Chocolate, or Rogers Silverware. I did not hear of a man named Frank Royal who put out Frank Royal's Baking Powder. In my experience as a grocer, I never heard of that kind of imitation. I do not remember any.

ALVIN J. LEE.

Deposition taken at Dallas, Texas, February 15, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer, with a service store, no self-service feature. I have been in the grocery business about twenty-five years, always in Forth Worth. I am the owner of the store. I have owned the store twenty-five to thirty years. I cannot remember that far back.

I recognize the package, Plaintiff's Exhibit 1. I call it Shredded Wheat. I am familiar with the biscuit inside it. I have known it since at least twenty-eight years ago. I have been married that long. I was then working for Pittman, and I used to buy it

by the dozen packages then. At that time, it was a well-known product. Then and since, I have carried it in my store at all times. I have never been without it. There is a demand in the trade for that product. My customers ask for it as Shredded Wheat. When a customer asks for Shredded Wheat, she gets Plaintiff's Exhibit 1.

The reputation of shredded wheat in the public mind is excellent. When my customers hear the expression shredded wheat it means to them that package, and quality. I never had a package returned yet, except that, once in a while, you get a buggy package in hot weather.

I know Kellogg's Whole Wheat Biscuit, and I carry that in my store. We have handled a few in about the last year or so.

I use Shredded Wheat some in my home. When it is served there, my wife does not bring the package on the table. It is usually served in a dish with cream.

When I see a package like Plaintiff's Exhibit 161, with a window in it and biscuit, seeing those articles through the window, it has the semblance to my mind of Shredded Wheat.

I know of Shredded Wheat in a package like Plaintiff's Exhibit 10, with a picture of a dish on the end of it. I would say I have been familiar with that package for a very considerable length of time.

Noticing the picture of a dish on Plaintiff's Exhibit 161, supposing I or one of my customers would see that package, with the name obscured, that would suggest Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: I still carry Kellogg's Whole Wheat Biscuit. That product is now known in my store as whole wheat biscuit. It is a little smaller biscuit than

the regular Shredded Wheat. I would not call it shredded wheat. It is a similar biscuit. If any of my customers asked for Kellogg's shredded wheat, I would give them Kellogg's Whole Wheat Biscuit. If they asked for Kellogg's shredded wheat, I would ask them if they wanted Kellogg's Whole Wheat Biscuit, and I would expect them to say yes. If they would come in and ask for Shredded Wheat, I would not give them Kellogg's. If that is substitution, I would not substitute.

I recognize the Kellogg Whole Wheat Biscuit package as one of the general family of Kellogg packages, by the red and green colors, and it says "Kellogg's." With the name on it, I would recognize it as one of the family of Kellogg packages. I do not remember seeing any of the whole wheat packages that did not have the Kellogg name on it in big red letters. I am rather inclined to think the Kellogg biscuit is smaller in size than the National Shredded Wheat. I do not know whether it has the same number of biscuit in the package.

It has been some time since I advertised Shredded Wheat like Plaintiff's Exhibit 1. My store does advertise certain products. We have advertised the Niagara Falls Shredded Wheat. We have never advertised Kellogg's Shredded Wheat. There is no particular reason why we have not, or why we did advertise Shredded Wheat.

I do not know whether we have had any demonstrators of Kellogg's shredded wheat in our store. There are so many of those things that I do not remember. I do not believe we have. I remember their having a demonstration of corn flakes, about 1920, before they came out with the whole wheat biscuit. We have advertised their Corn Flakes and other products but not Kellogg's Whole Wheat Biscuit. I do not know

any reason why I would not advertise Kellogg's Whole Wheat Biscuit, if I thought conditions were ripe for it.

Piggly Wiggly is a self-service type of store. If I remember correctly, there are about seven hundred and eighty-five food establishments in Fort Worth. Piggly Wiggly has about twenty. Help Yourself had seventeen, I believe, before they began to cut down. The A. & P. is about fifteen or twenty. There is one Safeway store there. That is the same as the Piggly Wiggly. I have made a study of the situation and I know that it is not a fact that the trend is more and more toward the self-service store. If other witnesses have testified that the trend was toward the self-service store, I would say they do not know what they are talking about. The statistics do not show it.

If I were told that the Handy Andy Stores management say they have changed over sixty-five per cent. of their stores and are changing others as rapidly as possible, I would say that they did not know what they were talking about, in Forth Worth. I do not know about the country outside Fort Worth. I would say service stores are doing sixty-five per cent. of the business in Fort Worth. It is easier for me to get a customer from a chain store now than it was before. The new stores going in have all been service type. Self-service stores are going out instead of in. They are closing up stores. Hardly a week goes by that A. & P. or Piggly Wiggly does not close a store. I think the pendulum is swinging back to the service store.

I do not know about conditions outside Fort Worth, except what I read. The new stores in Fort Worth are all self-service stores. I have seen the several new stores. My own store has no self-service features. We will permit them to pick out what they want but we prefer to wait on them. I can sell Mrs. Murphy twenty-five per cent. more than she will buy, if her credit is good. That is why I like the service feature.

I made no particular effort to sell them Kellogg's Whole Wheat Biscuit. I could sell them if I wanted to. My present store is twenty-five by eighty, but I need fifty by eighty.

I know the Wyatt store and I have been in it. It takes some time to sell customers twenty-five per cent. more than they want. Ninety per cent. of my business is over the telephone. I can increase the demand over the telephone, surely, by suggestion. If your wife called up and ordered Shredded Wheat, I would immediately ask her if she wanted cream. If she ordered lettuce, I would ask her if she needed mayonnaise. In that way I increase sales. I would call it salesmanship. In such a store as Wyatt's, a woman walks around and takes what she wants; but they follow them around and even carry baskets. You used to carry your own sack. Now, they even make deliveries, I suppose, here. In Fort Worth, practically all chain stores make deliveries. Managers even carry accounts. That is a result of depressed conditions. They are not so independent now and a little more anxious for business. The A. & P., Help Yourself, and Piggly Wiggly are in the same block with me. I do not know what business they do; but I have been in business a long time. I watch them and I believe I am doing as much business as all three of them.

If they have merit, I introduce new products into my line from time to time. My custom would be to tell customers I have a new product, the merits of it, and the price. I will cut the package. If she asks me how many pears are in a can and I do not know, I will dump a can and count them. I regard that as good business and a service to the customers, if it has merit. Those methods are a legitimate means of bringing a new product to the attention of customers. It is the only way you can do it.

Sometimes, a manufacturer samples a new product from house to house or advertises it, as well as having dealers advertise. Very few of them ever give a dealer anything for advertising. Most of them encourage the dealer to advertise for them. The manufacturer is always trying to get the retailer to build his business for him. When I advertise Shredded Wheat, that is at my own expense. The Shredded Wheat Company did not tell me to do that, that I know of. I believed we did football it, at one time. That does not do much good. It would not help it with me. When they begin to football it with me, I knock it out. I will not tell them it is no good; but I will try to sell them something else just as good. There is nothing illegitimate about that, if it is true. If a customer asks me for any specific item, I never try to change her. If she asks for Shredded Wheat, Beard's Bread, or Heinz's Pickles, I give her what she wants. If she insisted she wanted Heinz's pickles, I would not argue with her; but, if I could make more money on another brand, I would not keep quiet about it. I do not work for nothing; my health is pretty good. If I had the same margin of profit, I would see no advantage in changing them. If I had a bigger margin of profits on Campbell's Pickles, I would try to sell them. The profit is about the same on Shredded Wheat and Whole Wheat Biscuit.

The first time we had Kellogg's biscuit, Mr. Strong, a personal lifelong friend of mine, asked me to try to sell it. I ordered two or three cases of it. It sat on the shelf for quite a while, and I quit it. We just carried a few to accommodate those who demanded it. We have it in stock now, probably half a dozen on the shelf. We have no objection to profit competition between manufacturers. That is their fight. They all do it. The Kellogg Company, on Whole Wheat Biscuit never gave me anything.

Mr. Mays, manager of the National Biscuit Company, invited me here today. I have handled their entire line for several years. Before theirs, I handled Brown's cracker line, but I do not now. I have handled Morton's Salt ever since I have been in the grocery business. I never change. I can get other salt cheaper. I can get five per cent. on other lines, but it would cost me more to sell it. Sometimes there is an advantage in price, but I would not change. I have the same matches, snaps, macaroni, salt, and toilet paper I have handled ever since I have been in business. I might change or ease into another product, if there were every kind of advantage to it, if the sales resistance were not too strong, and I could put it over on the housewife. I have never been able to get anything from the National Biscuit Company except just the standard discount. They have made no special inducement to me to put in their line. Just the regular seventeen and a half per cent. discount. I would like to know if they have anything lower. I have never been offered better by anybody. I have tried to get a better discount but could not get it. I still think they give the chains more. I am satisfied but not contented with the situation.

RE-DIRECT EXAMINATION.

THE WITNESS: I get fifteen cents for Shredded Wheat. I do not remember what we get for Whole Wheat Biscuit. With about thirty-five thousand dollars tied up in the grocery business, I naturally study it and inform myself of conditions. What I have said about conditions in Fort Worth are correct. I get my statistics from jobbers. I make observations for myself and know about the volume of business. I think the self-service fad is running its course and is going back. There is still a fertile field for the service grocery.

I think the manufacturers, as well as jobbers, are beginning to realize they erred in making the chain-

store possible. Ninety per cent. of the jobbers are broke. They are quitting business. They made the chain stores, running after them and giving them everything they had to start with, getting down to where they could not pay their bills. Then the chain stores put in their own stores. I think the manufacturers have been giving them special discounts. They are getting sick of it. There is nowhere for them to go, except the service store. Service is really the backbone of the grocery business, I think. Ninety per cent. of the people would buy from a service store, if the price were equal. I have about four hundred people who buy from my service store and do pay the price.

My first impression of the Whole Wheat Biscuit was that, when Mr. Strong sold it, just by looking at it, I drew the conclusion that it was shredded wheat. Afterwards, I found out it was a whole wheat. I do not remember if he told me it was a shredded wheat biscuit. It is possible he did. I do not think he would intentionally, because he would know I would know better.

RE-CROSS-EXAMINATION.

THE WITNESS: Kellogg's biscuit looks as if it were shredded. Very few self-service stores in Fort Worth are independently owned. I would not call the Wyatt store in Dallas anything else but a chain store. He has been associated with chain stores ever since he has been in the business. I do not know of any other Wyatt stores. I would not call it a chain system if he had only one store. The self-service type of store, I am sure has passed its peak and is going the other way. There may be a few individually owned, but most of them are chain stores.

I think the big chains are on the decline. It is not my observation that the National Biscuit Company's products have been used notoriously as price leaders or loss leaders in recent years. I do not see Uneeda Crack-

ers or other National items advertised a great deal. I know the A. & P. sold them pretty scant. The best we can figure is they take their discount without the profit.

I would not be surprised if the National did not object to price cutting if it did not go below trade cost. They might not like it, but I do not believe they would say much about it. My experience with manufacturers is that distribution is about all they want.

I have not been giving stuff away in my own store. I am going to get a profit every time it goes out of there. You can gamble on that. I do not accommodate with anybody. That sort of price-cutting wipes out profit. Loss-leaders are a method of getting people into a store; but I do not cut anything below its cost. I always make some profit on it. If I make an attractive price it is not particularly to bring them but to keep those I have satisfied. If I have three or four specials advertised, it might not attract one more person to the store, but it leaves a better taste in the customer's mouth.

I think I am in a good competitive price range of the market. Just by advertising something, you will stimulate the sale of it. Advertising Morton's salt, one day, at regular price, we sold twenty-five times as much as we would ordinarily.

I do not know which is the most modern packages, Plaintiff's Exhibit 1 or Plaintiff's Exhibit 161. I do not think the cellophane-window feature is old-fashioned. They seem all to be going cellophane crazy. That is a modern, up-to-date package.

I have seen Plaintiff's Exhibit 1, ever since I have been in business. It has not been modernized in the sense of having glassine in it.

RE-DIRECT EXAMINATION.

THE WITNESS: The old package of Shredded Wheat seems to have some value. There is something that

makes it sell; I do not know what it is, whether it is the package or what is in the package. It just seems that it is instilled in the minds of the public. Shredded Wheat is what they know and what they ask for. We will sell a hundred times as much Shredded Wheat as we do the Whole Wheat Biscuit, in spite of the fact that the Kellogg package is a modern package and Shredded Wheat is an old package.

MRS. IMA BULLOCK.

Deposition taken at Dallas, Texas, February 15, 1933.

DIRECT EXAMINATION.

I am a housewife, living in Fort Worth. I am familiar with Shredded Wheat. I suppose I have been using it practically all my life. I have purchased it often. I patronize independent service groceries. I do not order by telephone. I ask for Shredded Wheat. I always picture a package like Plaintiff's Exhibit 1. I have seen that all my life, and I always think of Shredded Wheat in that form.

I have ordered Shredded Wheat and gotten something else, at Donnelly & Walker's, in Fort Worth. It is not a store I am used to going to. Mr. Gordon Pittman, a salesman of the National Biscuit Company, asked me to go there. I asked for a box of Shredded Wheat. He brought a package. I looked at it and said, "Is that the regular Shredded Wheat?" He said, "No, this is Kellogg's." Then I asked him if it was the same thing. He said, "Yes, the same thing"—only that there was more of it. I took the package, paying fifteen cents, the same as I usually pay for Shredded Wheat. Plaintiff's Exhibit 182 is the package I got there on February 1st. That is the only experience I have had with the Kellogg product.

CROSS-EXAMINATION.

THE WITNESS: That is the only store Mr. Pittman asked me to go to. I went there alone. I brought the package back and gave it to Mr. Pittman with the contents. I had the full package until just a little while ago. It was bothersome to carry, so I took out the biscuit. I gave them to the porter in the hotel. He took them.

I have never tasted the Kellogg Biscuit. That is the first time I heard of it. As soon as the Kellogg package was produced, I know it was not the package I had been getting for years. That is why I asked him. He did not say it was different, but I understood it was. He said it was made by the Kellogg Company. I had heard of Kellogg's before then. I use the bran and maybe other products, not corn flakes. I know the name of Kellogg. I met Mr. Savage, one of the attorneys for the National Biscuit Company, today for the first time. I talked with him about this case.

That is my only experience with Kellogg's Whole Wheat Biscuit. I have never tasted it. I cannot see anything in it.

I only deal with service stores, never with self-service. I have been in self-service stores, but I do not trade with them. My husband is in the bread business, Mrs. Beard's Bakery, in Fort Worth, and I believe in trading with home institutions, if I can, because he wants people to deal with the home bakeries. My store, across the street from my home, is a service store. He carries Shredded Wheat. He carries other Kellogg products but not the Whole Wheat Biscuit. The store Mr. Pittman sent me to does carry it. I do not know whether it carries Shredded Wheat. He did not offer it to me when I asked for it. When I asked for it, I thought that, if he had it, he would give it to me; but he did not.

HOWARD P. BURKE.

Deposition taken at Dallas, Texas, February 15, 1933.

Direct Examination.

The Witness: I am not connected with the National Biscuit Company in any way. I am familiar with the product known as Shredded Wheat. I have been a user of it. I could not say offhand how many years; but I can remember eating it as a child. I have known it as Shredded Wheat, which term has not meant anything else to me but this product.

I have purchased Shredded Wheat at restaurants sometimes. I ask for Shredded Wheat. In one instance, when I did that, the young lady brought me a box of Kellogg's Whole Wheat Biscuit. I had asked for Shredded Wheat, so I asked her, "Is that Shredded Wheat?" She said, "Yes, sir." I looked at the box. I said, "It says 'Kellogg's Whole Wheat Biscuit.'" She said, "It is the same thing." I said, "Is it?" She said, "Yes, sir," and I ate it. This occurred yesterday at the Texas Hotel Coffee Shop, Fort Worth. That is the only experience of that kind I have had, to my knowledge, when I was looking for that product. I was always under the impression I was getting Shredded Wheat when I bought it.

I remember Kellogg's Whole Wheat Biscuit having been served me for Shredded Wheat a number of times. I am often on the road, traveling. I know that the product has been known as and bought for Shredded Wheat for many years. I have with me and produce the particular package served me yesterday, which is Plaintiff's Exhibit 183. Someone connected with the National Biscuit Company asked me to get this. I would say that, although this may have happened to me before, this was the first time I realized I was not getting the Shredded Wheat I asked for. When I got

it, I recalled that I had previously had the biscuit served to me in the small package.

I was familiar with the large package of Shredded Wheat before. I had had occasion to purchase it in store. I have never seen an individual service package of Shredded Wheat, that I know of.

CROSS-EXAMINATION.

THE WITNESS: Yesterday was the first time I was ever conscious at the time of getting Kellogg's biscuit. After getting it yesterday, I knew that I had gotten the Kellogg biscuit a number of times before but had not realized it. I have always had it served in the same way, in the individual cartons. I have noticed it before, because I have had business to do with a firm connected with Kellogg's. I am in the garment business, and I have made uniforms for men who are distributing Kellogg's products. Naturally I remembered the name "Kellogg's." I asked for Shredded Wheat in restaurants, but, although I did not realize it at the time, I know now that, in those instances, they brought me Kellogg's carton. I only just had occasion to notice. I am pretty observant. I had never noticed Shredded Wheat in the small box before. I think that is one of the reasons I may have been conscious of the fact it was Kellogg's. From the time I have been served with the small carton, it has been a carton like the one shown me, the Kellogg carton, as far as I remember. I have never been served with any other kind of carton for Shredded Wheat except this red-and-green carton. I have had Kellogg's products, like Rice Krispies, but not Shredded Wheat. I could not say that I have ever had Shredded Wheat served to me in a carton like Defendant's Exhibit 60. I do not remember ever having any like that. I do remember having had other servings in the Kellogg carton, like Plaintiff's' Exhibit 183. I can remember Plaintiff's Exhibit 1 when I was a young-

ster, being served at home. The reason I remember Kellogg's is that it was prominent on that package. I did not pay any particular attention.

XQ. 46. This is your package of Kellogg's Whole Wheat Biscuit. That is the package that you remember being served to you; is that right?

A. No, sir; that is Shredded Wheat.

THE WITNESS: Each time Kellogg's Whole Wheat Biscuit has been served to me, I have eaten it. I ate it for shredded wheat. It looked like shredded wheat biscuit, and it tasted like it. I called for Shredded Wheat. That is what I thought I was getting, because I did not look at the package. I was buying Shredded Wheat. I bought it as Shredded Wheat. On this particular occasion yesterday, it was served to me as Shredded Wheat. I should imagine Shredded Wheat would be a product by itself. That is what I mean. I do not know. Shredded Wheat seems to me the picture on that package right there. Looking at Plaintiff's Exhibit 161, if I should see the biscuits down there that look like Shredded Wheat, I should imagine that would be Shredded Wheat. I see "Kellogg's" down there. If I did not, I would take it to be whole wheat biscuit, if I saw that picture. If you would put it on a plate, I do not think I could tell the difference between Whole Wheat Biscuit and Shredded Wheat.

I am familiar with the old biscuit, such as are contained in Plaintiff's Exhibit 1. There is a difference in the size of the Kellogg's biscuit, I imagine. I noticed the Kellogg biscuit is a smaller biscuit than the other.

I could not say whether it is physically impossible for anybody other than the National Biscuit Company to make or manufacture that product that is in Plaintiff's Exhibit 1. I think that anybody can duplicate anything anybody else does. If they did, it would be

the same thing, in the product itself. If they duplicated it and it were made of whole wheat, shredded, and put into biscuit form, I imagine you would call it shredded whole wheat biscuit. It says on the bottom, "Shredded Whole Wheat." I think that is a true statement.

I do not know any other way to describe the biscuit in that package except shredded whole wheat. To be frank with you, I never thought about its being a biscuit. I only thought of it as Shredded Wheat. In describing that biscuit, I would say it was an oblong shredded wheat. I would say the Kellogg's biscuit physically is an oblong shape. It could be termed that. I think it is that. I cannot give any better description than that. I think that description would suit all right.

The way I was served this biscuit in a restaurant, I would say is the customary way of serving a biscuit in a restaurant, in a little package, also of serving other cereals, such as corn flakes and bran. They just bring a carton and let me dump it out myself. They do not dump it out for me.

I came here at the invitation of Mr. D. A. Mays, of the National Biscuit Company, a personal friend of mine. I am not connected in any way with the business. I am in the garment business. I talked with Mr. Mays about the case. I did not talk with Mr. Savage about it. I was willing to sacrifice a few hours of my time through friendship.

RE-DIRECT EXAMINATION.

THE WITNESS: In my travels, I have had Shredded Wheat served to me outside the package, in a restaurant, without the production of the package. That has occurred several times. I could not say whether I was served Kellogg's Whole Wheat Biscuit on those occasions, because I am not well enough acquainted with the product, outside of what I called for. I was served with

a biscuit that seemed like Shredded Wheat, on those occasions, and I used it. It may have been Shredded Wheat or the other product.

Prior to yesterday, I ordered it and thought I was getting what I ordered, although I now know I did not, on every occasion, get Shredded Wheat. In my conversation with Mr. Clarke just now, I used the expression shredded wheat as a name for a product, which I have applied to that product for a long time. He was using it as a descriptive term. That is the reason for his questions and my answers.

MRS. W. A. MAHAFFEY.

Deposition taken at Dallas, Texas, February 15, 1933.

Direct Examination.

The Witness: I keep house for my husband and myself. I am familiar with Shredded Wheat and have been ever since I have been married, about thirty-five years. I have purchased it at stores at different places, and in Fort Worth. I have used it in my home all that time. I recognize Plaintiff's Exhibit 1, which is the package or one similar to the package with which I have been familiar. Shredded Wheat has always been put up in a package something like that.

When I go into a store, I usually ask the salesman for a package of Shredded Wheat Biscuit. Naturally, I have the National Biscuit Shredded Wheat in mind, because I have used that until just the last few years, when I have been given the other, several different times in stores where I trade. I have been accepting the Kellogg product under protest, because we have used and liked the National Shredded Wheat Biscuit, and we knew what it was. When you get used to a thing, you know that thing and like it. When I pro-

tested, the answers have been varied. Some had said it is just as good as the other brand. Some have said it is cheaper. I recently bought a package.

I went into a small store on Evans Avenue, in Fort Worth, and asked for Shredded Wheat Biscuit. He said, "Yes, we have it." He went over and handed me a package. I said, "No, I want the National." He said, "We do not have the National brand, but we carry this, which is just as good and is cheaper." He said, "It has a little cellophane front, so you can see it is exactly the same thing." I said, "I used the other, and I prefer the other," but I was in a hurry, accepted the package, and went along home with it. Plaintiff's Exhibit 184 is the package to which I refer. The box, as I got it, looked like Plaintiff's Exhibit 161. When I bought it, it was filled with biscuit and I could see the biscuit through the window. They looked just like this biscuit on Plaintiff's Exhibit 1. When I saw those biscuit through the window first, they looked similar to Shredded Wheat, of the National Biscuit Company.

It seems to, although I am not definite about it, that I was given Kellogg's biscuit maybe eight or ten years ago. I also had another one given me, but that was neither. It was wheat done in a round biscuit. I believe they call them Muffetts. That was offered to me as being as good as Shredded Wheat. I did not receive a package with a window in it as long as ten years ago. Prior to that time, however, the only package I had given to me as Shredded Wheat was the one with the Niagara Falls picture on it. When I say Shredded Wheat, that is the kind of package I mean. If the store has it, I get that in preference to any other biscuit.

CROSS-EXAMINATION.

THE WITNESS: I do not eat either kind very much, myself. My husband is the one who eats the cereals at

our home, mostly. I served him Kellogg's biscuit. He did not think he was getting the same biscuit. He wanted to know why I did not get the other kind of biscuit. He always does that when I get a different kind of biscuit than Shredded Wheat. He always sees the difference right away. He is quite fond of fruit and wheat cereal. He always wants fruits and cereals of some kind for his breakfast. I have, on occasion, served him Kellogg's from time to time. The first time Kellogg's biscuit was handed to me in the store, I recognized right away that it was not the National Biscuit package, because it is in a different box, and a different size.

The National Biscuit Company put out Shredded Wheat like Plaintiff's Exhibit 1, as far as I know. It has a picture of Niagara Falls on it. In other words, it is something we have been consuming and using for many years. I know it is good.

I have known for some years this National brand of Shredded Wheat. I have also known for some years back that there was this Kellogg brand of Shredded Wheat. I would not say that most of the stores with which I deal now carry the Kellogg shredded wheat. Most of them that I deal with do carry the National brand of Shredded Wheat. I do not believe they both carry the same brand at the same time. I was asked to make this purchase of the Kellogg product just the one time; but I have purchased the Kellogg brand before. I shop around at many different stores. I pay cash for my groceries, and I go wherever I want to buy them. I sometimes deal in stores where I help myself. I cannot tell you whether I have seen the Kellogg biscuit in those stores, because I look for the other. When I go into the stores, I have in mind what I want. So I list just what I want to buy. I know how to get around to where each article is kept. If I see it, it is just a matter of seeing it and passing it by. I deal at a few

service stores. I have asked for Shredded Wheat and received Kellogg's biscuit a number of times, at the independent stores. I would ask for National, and they would bring me Kellogg's or some other, did not have the National. I would buy it because I was in a hurry and did not want to go somewhere else to get it. I would use it as a substitute, for the time being; but I would go back and get my National Shredded Wheat when it was convenient to get it. Absolutely every time I got Kellogg's, it was because they did not have the other. When I got Muffetts, the grocer said they were just as good as Shredded Wheat. I think I bought them here in town, at Oak Cliff. I do not eat things like that myself, but my husband ate them. He does not care for anything else like the National Biscuit Shredded Wheat, because he just likes them. They are lighter. My husband has stated that he likes the National the better of the three. He prefers that I get it. I try to get what he wants. I have not very often tried to slip anything over on him by way of substitute. He catches me sometimes. I have never been able to substitute any shredded wheat on him. As a rule, when I get Kellogg's, the grocer tells me they have this brand, and that it is just as good as the other brand. I take it and go on, because I do not want to go somewhere else at that particular time. That is my only reason for taking any substitute.

If I did that often enough, I do not know whether my husband would get to like the Kellogg product. I just said he likes the other better.

PAUL W. SIEBERT.

Deposition taken at Dallas, Texas, February 15, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a retail grocer. I have been in the grocery line twenty-odd years, and about thirteen years of that for myself. I operate a service store, make deliveries, receive telephone orders, and carry credit accounts. About ninety per cent. of our business is done by telephone.

I recognize Plaintiff's Exhibit No. 1. It is Shredded Wheat. I am familiar with the biscuit in it. I have known about that for twenty-five years. My first experience was with the Reliable Grocery, and that has been at least twenty to twenty-two years ago. I have carried it in stock continuously in all that time. It has never been off the shelf. It is a commodity that sells regularly. There is a demand for it. Customers ask for Shredded Wheat. I presume they know what they want when they ask for Shredded Wheat. They never ask for anything else. I fill the orders with this particular package, Plaintiff's Exhibit 1.

The name shredded wheat has acquired a reputation among the purchasing public. I have hardly ever known anything but Shredded Wheat until some few other brands came out, imitations, you might say, or in competition with it; such as Triscuit and Muffetts, and Kellogg's put out one. They called them Whole Wheat Biscuit or something like that.

I recognize Plaintiff's Exhibit 161. I did carry that; but I discontinued it, because, first, we did not have any sale on it to amount to anything. They had extensive advertising which peeved us a little. It was not exactly in line with our method of selling goods; so we did not try to push it any more. A few customers—two in particular—told me they were selling

Shredded Wheat, and, when they bought two packages, they would give them one. I had to do what I could, taking the package off the shelf and showing the lady that it was not Shredded Wheat.

A lady came and said, "Will you sell me two packages of Shredded Wheat and give me one? They are selling them off the wagon that way." I said, "I am sure it is not Shredded Wheat." She said, "I am sure it is." So she went so far as to look on my shelf and go and look at her package and came back and apologized to me. She was getting Kellogg's and thought she was getting Shredded Wheat. She came to me and asked me to sell her Shredded Wheat at the same price. In fact, she did not buy it that day, because she said she did not know anything about it. She said the man told her that, if she had milk bottles, she would take the milk bottles. A few days later they had a piece in the paper about milk bottles being as good as currency anywhere. We had that feeling, and, of course, we did not then and do not now stock them much, because I do not think we have ever had more than two dozen packages on the shelf. When people ask for Shredded Wheat, there never was, in our mind, anything but the one Shredded Wheat. There was a Whole Wheat Biscuit.

Looking at Plaintiff's Exhibit 161, I now see something about Shredded Wheat on the end of it. I also see the words on the other end. I do not know that I ever took particular notice of that before. I do not think you could ever put out that package for Shredded Wheat. If a customer wanted Shredded Wheat, in my estimation she would want that one Shredded Wheat, because I never knew anything else but the one Shredded Wheat. If it was something else, it would have somebody else's name on, like Kellogg's Whole Wheat Biscuit. They have always had so many items that a customer would not know what they would want. They have caused our service men more trips, because a lady

might want Pep. If she wanted cooked bran, we might send her some other kind of bran. I do not know whether other grocery men are like that or not, but it has always confused us. We usually have one brand of one article. We have more than one kind of corn flakes. We sell very little Kellogg's. I like Post Toasties, myself, and have always pushed it, because they are, in my estimation, a better piece of goods. They do not mush up like other brands.

CROSS-EXAMINATION.

THE WITNESS: I think National Biscuit is the only concern in the country that knows how to make Shredded Wheat. If it would be something on the order of it, it would be somebody else's shredded wheat, or somebody else's Wheat Biscuit. I do not think they could put it out as Shredded Wheat. By Shredded Wheat is meant not only the item that is in it, but the brand of it. In my mind it is not just like oats, whole wheat or hominy. In hominy, you get Quaker Hominy or different kinds of brands of hominy. In grits, you get Quaker Grits, Aunt Jemima Grits, and various others.

If you asked me what Shredded Wheat was, as a physical product, as near as I can describe it, it is a rolled-up biscuit, because, in my early days, it was what it seemed to us, because it looked to me like little shreds coming out of the package, formed into biscuit, and baked. That would be my description of it. I do not think shredded wheat biscuit is a short name for what I have just said, when it comes to the brand or the package. I do not know that that would just exactly mean shredded wheat, shredding it.

If I were asked what a Shredded Whole Wheat Biscuit is, the only thing I would say is that shredded wheat was Shredded Wheat, this one. I have not had any experience with the other one. I do not know what

it would be. I have tasted the Kellogg product. I do not think I saw it when it was called Kellogg's Shredded Whole Wheat biscuit.

If I were told that was a package that had been on the market for some time before Kellogg called it Whole Wheat Biscuit, I would not think they were lying when they said the product in that package was called shredded whole wheat biscuit. I do not think that would be any misrepresentation, to say that that physical product was a shredded whole wheat biscuit. If the product in Plaintiff's Exhibit 161 is shredded, I do not know what shredded would mean. In my estimation, I have always considered it as much a brand as it would be a biscuit.

I think the word shreds has a meaning to a certain extent in the English language. I do not think it means threads or strings. I would have to go and see it scientifically made and see whether it is shredded or not.

Referring to Defendant's Exhibit 1, package of National Shredded Wheat Biscuit, I do not know that I am qualified to say what the word shreds refers to in the phrase: It's All In The Shreds. I do not know that it would have any relation to the biscuit inside. I do not know that we paid that much attention to the package. That phrase does not mean anything in particular to me. I presume there are shreds in this package of shredded wheat. The way it is laid out, for them to call them shreds, it would have to have a definition of what shreds means.

I have heard of shredded coconut. I do not know what it is. I have no idea that that is called shredded. I think they call it grated coconut. If they said grated coconut, I would not expect to find whole coconut instead. I think most of the packages say grated coconut. I would know what that meant. If it said shredded, I think I would classify them both the same. If I had a package of sauerkraut that was marked shredded, I

would expect to find the cabbage torn up into little pieces. I do not mean to imply that the word shredded is any misrepresentation on this package. It is more the brand. It is partly the package, as much as it is what is in it. That is my view of it.

If the wheat grains in Plaintiff's Exhibit 1 were whole wheat grains, and they put the word shredded on the outside, I would not know what they would mean by that. I know what shredded means, as applied to sauerkraut, coconut, and cabbage; but I do not think that applies to this. It really means wheat, shredded; but when a customer comes in and asks me for shredded wheat, that is and has been for years, the only meaning I have had in mind for shredded wheat. Shredded, I suppose, means the same as grated. This might be shredded wheat biscuit, but I do not think it is.

If the Kellogg Company puts on the side of the package this little phrase which I did not notice before, in which it is called a shredded wheat product, I think it is a lie, in this way, because it is not a shredded wheat product, in my opinion; because a shredded wheat product would mean a product from this particular company, in my estimation. Shredded Wheat means a biscuit made by the Shredded Wheat Company. I should think there could be a shredded wheat biscuit made by the Kellogg Company. It would be possible for them to make them. That is Shredded Wheat Company, unless they changed the name on it. That would be a Shredded Wheat product from the Shredded Wheat Company.

Looking at Defendant's Exhibit 5, I think that is a whole wheat biscuit. It comes nearer to this; but I would not consider it a shredded wheat product. I would call it a whole wheat biscuit or shredded whole wheat biscuit. I would have to answer Kellogg's, of course, because it is there, the same as I would say about somebody's grits; but to use the words shredded

whole wheat without Kellogg's would be, to my mind, a product which is neither.

If I had a package of Kellogg's Whole Wheat Biscuit with shredded wheat biscuit in it in my store and somebody asked me for Kellogg's Shredded Wheat, I would not tell them that this was not Shredded Wheat in this package, if they put it on the package that way. If they put it on the package that this is shredded whole wheat, that is true enough for me, as far as that is concerned; because we do not analyze what is in the package, any more than to try them once in a while. The names by which goods go are the large names on the front face of the package. The little stuff on the end is to misrepresent you. For instance, as you buy an automobile for $675, f. o. b., the $675 is big and the f. o. b. is small.

I do not know why the Kellogg Company put on the end of the package shredded wheat in its most delicious form. It may be dodging of a certain infringement or skipping over something. I do not know. That is the way I figure the f. o. b. part. The phrase might mean that the Kellogg people had shredded wheat in this package; but ninety-nine out of every hundred would never read that.

We advertise the products in our store very little. We have had circulars once in a while. We have not found them successful of late, so we discontinued them. I have owned the business thirteen or fourteen years. We did not carry Whole Wheat Biscuit until the sampling methods started. I do not believe we had it at that time, because they were selling the product all over town. They had the stuff on trucks. Nobody had consulted us about putting on these exhibits. We feel that, on deals like that, they should come to us. Lipton's Tea people, for instance, will sell them two pounds of coffee and give them one pound; and they will get that stock out of your store and show you a profit. In

the Kellogg instance, we were not consulted. We were peeved because we were getting knocked out of our sale. For that reason, we did not even stock it.

It is customary to buy it from the stock of the neighborhood grocer, so he can make a profit. At that particular time I was peeved, because they did not. We stocked it only twice before that, because the sale was never great enough. I do not turn down business. If they came to us and asked me, I would go out and get it, so the customer would be pleased. If the demand does not come, I will not stock Kellogg's or any other item. If I would get a demand for it, I would put it back in stock. I would just as soon sell one item as another, as long as we can make a profit on it.

As far as my store is concerned, I have never done anything by way of advertising the Kellogg product or explaining it to the customers as a new product. I have never done anything to create a demand for that product. We carry every other item of Kellogg's. This particular item we do not have.

I do recognize the various methods of promotion, telling customers I have a new product, and permitting demonstrators to show them, as legitimate ways of creating a demand for that product. A great many of them ask to put on demonstrations; but we do not encourage it, because we do not have a drop-in trade. Our business is ninety per cent. over the telephone, and there is no reason for demonstrations in our store. Demonstrations are usually held in big stores where there is a big drop-in trade to sample it. I would not have objected to the Kellogg method of sampling if they had bought it at my store. I would have welcomed that means of creating a demand. I would not object to stocking it right now, if there were a demand. I do not think we had a demand for it, even during that sampling. The theory on which others have bought

their samples from me is that it is my territory that is being sold and I ought to have a profit on it.

I handle most of the National line. We ordinarily buy Shredded Wheat through Western States or some other jobber, wherever we can get it cheaper. We also have Brown's cracker line, of which we probably sell more than we do the National, which may be due to prejudice in favor of the home article. We are trying to buy and sell Dallas products.

My orders sometimes go in for Shredded Wheat through the cracker salesman. In fact, they are sometimes somewhat insistent in selling Shredded Wheat with the crackers, to pad their orders. They do not necessarily want me to take Shredded Wheat to get the cracker line. If they give me a price, I would just as soon give it to them as to the other fellow.

Until the National Biscuit bought them up, Shredded Wheat, to me, has always been this Shredded Wheat Company. I was rather surprised to see that they were owned by the National. I was thinking they must have been taken over by the Shredded Wheat Company. But Shredded Wheat was just Shredded Wheat, just like a sack of flour, you know. The National Biscuit salesman is polite in asking for orders. They have a very nice man out there. He has been coming out there a long time. I know he went out of there many a time without my even getting any crackers. I think the records might show I bought Shredded Wheat when I did not buy crackers.

CLARA M. TUTT.

Deposition taken at Dallas, Texas, February 15, 1933.

DIRECT EXAMINATION.

THE WITNESS: I keep house, cooking for seven. I know Shredded Wheat. I recognize Plaintiff's Exhibit 1, which I have known all my life. We have eaten it as long as I can remember. My mother used it before me. I have always used it in our home.

When I go to a store, I ask for Shredded Wheat. That is all I know. Shredded Wheat, to me, means just a very healthful breakfast package. That is the way I have always considered it. We have always used it, are always partial to it. That is what we think is best for us. We serve it in our home every morning. Sometimes we poach an egg and put it on the biscuit; sometimes we have it with bananas and cream. I do not bring the package on the table. I warm it in the oven before I serve it in a dish on the table.

If I served something different from but similar to that, I am sure my family would know it. We purchase it in a cash service store right close to us. I go there and ask for Shredded Wheat.

Recently, I went into the store of Phipps, on the north side, a store at which I do not regularly trade, and asked for Shredded Wheat. They brought me this package. I was asked to do that by somebody connected with the National Biscuit Company. I said, "This is not the original Shredded Wheat." He said, "Oh, yes, it is." He called a manager and said, "Mr. Phipps, is that the original Shredded Wheat?" He said, "Yes." I said, "This is not what I have been buying." He said, "This is the original Shredded Wheat." I took it and paid for it. This happened yesterday. The box they gave me was Plaintiff's Exhibit 185. I did not even know there was a Kellogg's on the

market, until I saw this package. That is the first time I ever saw it. I never heard of it before. When I look through that little glassine window in the package, I admit it is a good imitation. It certainly looks like Shredded Wheat.

CROSS-EXAMINATION.

THE WITNESS: It is not as fine a product. I have never tasted it. I just said, "This does not look like the package I have been getting." They said, "No; it is the original Shredded Wheat." I did not believe them, of course, because I know well enough, after I have been using it so long, the Niagara Falls building there. Having seen that Niagara Falls building, you would not doubt in the least you were getting the wrong package. I did not argue with them or try to put them straight. They seemed to be very sincere. I do not know whether they were sincere that the Kellogg package was the original Shredded Wheat. They seemed to believe what they were saying. The man said he would call the boss. He said, "Is this not the original Shredded Wheat?" He said, "Yes."

Mr. Nipp asked me to go to that store. He did not go there with me. He told me just to go to that particular store and to bring him the package. I had never dealt in that store before and had never seen the Kellogg biscuit before. I have asked for Shredded Wheat in other stores. We get it all the time in the store we trade in. My experience with Shredded Wheat has practically been confined to the store where I deal. I do not know whether it carries Kellogg's biscuit. It is the Stop-Six Grocery, on the Dallas pike. I have never eaten Kellogg's biscuit and never had any experience with it until yesterday.

MAXINE REYNOLDS.

Deposition taken at Dallas, Texas, February 15, 1933.

Direct Examination.

The Witness: I am familiar with Plaintiff's Exhibit 1. I know it as Shredded Wheat, and have known it all my life. I use it frequently. I purchase it most of the time, when I go for things myself. I have bought it in restaurants on several occasions. When I ask for it, I ask for Shredded Wheat. I have in mind definitely that I expect to receive Shredded Wheat Biscuit, which is known as Shredded Wheat and is put out by the National Biscuit Company. I have never called it a National Biscuit product; but I have always taken for granted that it was their product, in asking for it. Shredded Wheat means that particular product to me.

On one occasion, February 1st, I went in the Blackstone Coffee Shop in Fort Worth and ordered Shredded Wheat. When the girl was ready to serve me, she brought out Whole Wheat Biscuit. I told her I had ordered Shredded Wheat. She said, "This is exactly the same thing." She brought the biscuit out in the package, which I saw. I have it. I took the package. That was all the conversation. When she told me that, I went ahead and took it. This is the carton, Plaintiff's Exhibit 186. Before that experience I had never seen or eaten Kellogg's biscuit before. That is the only experience of that kind I had had.

Cross-Examination.

The Witness: Mr. Mays, of the National Biscuit Company, asked me to go to this restaurant and order Shredded Wheat. They told me it was exactly the same thing. When I tasted it, I thought they had misinformed me. I knew it was not exactly the same thing. It is a coarser shred, has a tendency to be more doughy

after it is covered with cream. It has a tendency to be thicker and not quite as long as Shredded Wheat Biscuit. In the restaurant, I recognized right away that it was not the National Biscuit Company's product, but it was served to me for it. I did not think it was corn flakes or anything of that sort. I recognized that I was eating a shredded wheat, but a different kind from any I had ever known. That is the first time that happened to me. I have been using Shredded Wheat of the National Biscuit Company twice a week for as long as I can remember. I like it much better than the Kellogg brand. I never paid any attention to Kellogg's, because I always had ordered Shredded Wheat, and this was just recently they had ever given me anything except that, as a substitute.

I do not know anything about any of the other Kellogg products. I suppose I have eaten them, but not to pay any attention to them. I have heard of the Kellogg Company. I have a home. I have had a few food products sampled to my home. It is a relatively common form of merchandising to create an interest in new products.

MRS. R. K. STALCUP.

Deposition taken at Dallas, Texas, February 15, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a housekeeper and live in Dallas. I am familiar with the product known as Shredded Wheat and have known it practically all my life, it seems to me. At least eight years. I have never known it by any other name than Shredded Wheat. I purchase it from time to time. I ask for Shredded Wheat, and I expect to get Shredded Wheat.

I recognize Plaintiff's Exhibit 1, which is the package I associate with Shredded Wheat. I have recently,

at the request of a representative of the National Biscuit Company, asked for Shredded Wheat in a store, at the Franklin Grocery, in Fairview Street, Dallas. I went in the store and asked him if he had some Shredded Wheat. He said, "Yes, ma'am, I do have." We both glanced at the same time up to the shelf. He said, "I have the Kellogg's shredded wheat." I said, "Is this the original shredded wheat?" He said, "Yes, ma'am." I said, "I want to be sure. I am buying this for someone else." He said, "Yes, they will never know the difference. This is the original Shredded Wheat." I asked him if he would make me a bill for it. He said he would, and he made out a bill, this one. I paid him and took the package. There was no further conversation. The sales slip, Plaintiff's Exhibit 187, and the package, Plaintiff's Exhibit 188, are the slip and package I received. I think I usually pay nine cents for Shredded Wheat at the Tea Company.

CROSS-EXAMINATION.

THE WITNESS: Neither I nor anybody connected with me has had occasion to deal with the National Biscuit Company. I know Mr. Wilson of that company. He asked me to make this purchase and told me to go to this store, where I had never dealt before. He did not ask me to go to any other store. This man did not look as if he was expecting me when I came in; but he did say that Kellogg's was the original Shredded Wheat. Besides me and the clerk, there was another lady and another man in the store, whom I did not know. They did not hear the conversation I had with the clerk. I did not argue with him or try to put him straight. I just told him I wanted the original Shredded Wheat. It did not occur to me to ask him to put "Original Shredded Wheat" on the bill of sale. I just asked him for a bill of sale. I have heard of Kellogg's biscuit

before. They carry it in our grocery store, where I deal regularly. It has been there for the last few months. They have never offered me Kellogg's biscuit in my own store, A. & P. No. 30, but I have seen them in that store. I have seen the package with the cellophane window like Plaintiff's Exhibit 161. They were on display on the shelves of my A. & P. store. The National Shredded Wheat is on the same shelf, but it was down quite a ways. The package like Plaintiff's Exhibit 161 is very attractive; but I knew the other, and I have always bought the other. I knew what it was. It registered enough on my attention so I knew I had seen this Kellogg's Whole Wheat before the man gave me the package I brought here today. Mr. Wilson kept the package for me until today. He did not go to the store with me. I saw him later. I do not know how far away from my home the store is, but it is some distance. I drove over there in a car. I just went to that one store, following his directions. I have had samples of food products delivered at my door. I do not remember them selling two packages of cereal and giving one free. I have just had samples delivered. That is a method of bringing new food products to my attention as a housewife. I have had a service grocer tell me he had something new and ask me to try it. I have had demonstrations in stores, where the demonstrator tried to get me to try new food products. I do not take advantage of special sales of food products very much. I do not notice or hear that they have specials. I do not shop around. I stay with my own grocery store.

MARY HUNSAKER.

Deposition taken at Kansas City, Missouri, February 16, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am employed by the Kennedy Grocery Company, in St. Joseph, Missouri, at present. I am not right now connected in any way with the National Biscuit Company. I certainly am familiar with the product known as Shredded Wheat. I have eaten it all my life. I recognize Plaintiff's Exhibit 1. I have known it all my life, as a consumer. My mother has fed it to me. She made me eat it when I was young. Now I want to eat it and still eat it. I live at home with mother and daddy. I do all the buying in my house. I usually purchase Shredded Wheat at Kennedy's, where I work at the present time. I do all my buying at Kennedy's, or at the neighborhood grocery store. Some are service stores, where they wait on me. I always ask for a package or two of Shredded Wheat. Grocers usually know what I mean, and they give me Shredded Wheat, Plaintiff's Exhibit 1.

Shredded Wheat at my home is usually heated in the oven a little, then hot milk over it. Sometimes I just have it heated a little and eat it with butter. We do not bring the package on the table usually. We take the biscuit out of the package.

Prior to this year, I have eaten in restaurants a good deal. I have traveled. It is usually served to me in restaurants in the package, a small, individual package. I ask for Shredded Wheat. Several times I did not get Shredded Wheat, and I would fuss. Once, down at the Rogers store, 234 South Fourth Street, I walked into the store and around to my right. A boy who looked like a senior in high school asked what I wanted. I told him I wanted a package of Shredded Wheat. He walked over to the shelf and took down this package.

I said "I want Shredded Wheat." He said, "This is shredded wheat." I asked him again, "Are you sure this is Shredded Wheat?" He said, "Yes, ma'am, it is." I said, "Will you write it down"—on a piece of paper what I had asked for, because I was getting it for someone else. He said yes, and he wrote on this little piece of paper, "One Shredded Wheat"; and then a very elderly man—his father, I presume—came from behind the living room of the store and asked if I had received what I wanted. The young man said, "Yes, she wanted Shredded Wheat and she has it." I then paid for it and walked out. That was the G. M. Rogers store, 234 South Fourth Street, some time in December. I was asked to make the purchase by someone connected with the National Biscuit Company. The date was the 13th of December. Plaintiff's Exhibit 190 is the box that was given me at that time; and Plaintiff's Exhibit 189 is the slip the young man wrote out for me.

CROSS-EXAMINATION.

THE WITNESS: I made a written statement of the occurrence at the request of someone connected with the National Biscuit Company, which Mr. Clarke may have. I was formerly employed to make several demonstrations for the National Biscuit Company's Wheatsworth, in St. Joseph; but that was all. I have an arrangement where I go to retail stores. I usually have a grill and serve a couple of pancakes to people and sell them Wheatsworth flour, already mixed. I make pancakes out of the flour and try to get them to taste it. They usually do and buy it, and it is wonderful. There was nothing especially unique in that, that I can think of, as compared with the demonstrations usually practiced by other ordinary food demonstrators. Any food that is demonstrated in stores is demonstrated along those broad lines. Demonstrators try to get people to taste it and use it, the purpose being

to introduce the product to new customers or consumers. I find, with Wheatsworth, that there are an astonishing number of people who have never tasted it before. I think housewives are usually very practical and sensible. When you can reach her and get her to taste the product, if she likes it and uses that sort of thing, nine times in ten she will buy it. My experience has almost invariably been that people have, apparently, never tasted it. The Wheatsworth demonstrations have been the most wonderful I have had. We have been doing nothing but demonstrating for four or six months. I have had demonstrations for several other companies.

I am sorry to say I have never demonstrated Shredded Wheat. I never worked for the Kellogg Company at any time. I have been employed during the last three weeks at the Kennedy Grocery Company, St. Joseph. I have two demonstrations a week there. On other days, I just see that everything is running smoothly on the floor. When the young man told his father, "Yes, she wanted Shredded Wheat, and she has got it," I did not say anything, and I did not contradict him. There was no need to argue with him. I wanted them to know I wanted Shredded Wheat; but I did not think it was worth while to argue about it. I took the Shredded Wheat as it was. The elderly man came out and asked whether I had gotten what I wanted, and I said "Yes."

Out on the road I have asked for Shredded Wheat and gotten Kellogg's, several times. I had not known of Kellogg's Whole Wheat Biscuit so very long. I have not the least idea even how long you have had this on the market as a product. I cannot mention the places on the road where I have gotten Kellogg's, because I think I have been in five hundred different places. I could not possibly remember. Of those five hundred, I have asked for Shredded Wheat in a good many. I eat

it once a week or twice a week, for breakfast. I would not just remember. I do not remember the proportion of times I got Shredded Wheat, as compared with the times I got Kellogg's. It did not happen a great many times that I got Kellogg's. I cannot recall the first time. The first time, I knew right away that the Kellogg's Whole Wheat Biscuit was not the Niagara Falls biscuit; because I had been getting it in the little box, and the girl did not bring it that way. She brought it in a plate, and I asked her what it was. She told me it was Kellogg's. I guess I asked her because I am always suspicious of restaurants. I had eaten it for so long, and I was so mad that they did not bring it to me in this little box and that everything was so unsanitary, so unclean. I always hated having it served to me outside the little box, when it could be in it. If the manufacturer is going to the trouble to put that up into a sanitary box or container, the very least the restaurant could do would be to bring it to me in that box, let me pick up the box and turn the biscuit out myself. Previous to that, I had been living on the road for a year; and I was just perfectly sick of the filthy restaurants.

The way they usually do with all dry breakfast foods, such as Grape Nuts, is to bring the box to me and I turn it out myself. The first time Kellogg's biscuit was served to me outside the carton, I asked right away what it was, and the waitress said it was Kellogg's Shredded Wheat. That is the only way I could know it, because I had not started to eat it yet.

Each time I ordered Shredded Wheat and the waitress brought me Kellogg's, I knew that, in the physical sense, I was getting shredded wheat, or thought so; but I wondered why she did not bring it the other way. Physically speaking, it was just as much shredded wheat, being made of wheat and drawn out into shreds.

I have never measured the National and the Kellogg's biscuit, but, according to my eyes, I think they are smaller. I do not know whether it was a difference in their color or size that made me ask about the difference. I was furious. I became a very cross girl on the road, because I was furious about things of that sort. I had not done any demonstrating then. I have never demonstrated until within the last few months. It was not a customer reaction, either; it was just a very critical woman. I was cross about being out on the road. If, after living at home, you go on the road for five years, after being home where everything was the way I wanted it, and then having to go out and live in small and large towns, almost any girl would become very critical. Every time the National Shredded Wheat has been served to me, I am pretty sure it was served in an individual carton containing two biscuit. I may have seen National Shredded Wheat about the size of or a little smaller than Kellogg's Whole Wheat Biscuit, if that was the sample they gave out at the pure food shows. I am of the opinion that there are two sizes of Shredded Wheat Biscuit; one large or regular, and one a little smaller. They would give samples at the pure food shows. I have always gone to the shows, here at St. Joseph. I cannot remember whether I got any or not. Shredded Wheat is Shredded Wheat.

Except for the one time or two when I received Kellogg's product, I have had no discussion with them when they served me Kellogg's. I do not think it was more than two or three times I was troubled that way. In small towns, they have foods around on shelves. If I did not see what I wanted, I got so that I would not ask for it, because I got so cross about it when I did not get it. Since I have been home I have been able to get what I wanted.

I never eat corn flakes, although I know people who do. I never eat any kind of flaked food. I eat Grape Nuts and Shredded Wheat; that is all. I used to eat cooked cereals, but no more.

I do not deal at Rogers Grocery all the time. Mr. Clarence Carolus asked me to go there. He asked me to go, also, to other stores, which I did. Several of them were completely out. I asked them to describe what sort of box they were going to sell me for Shredded Wheat, and they described Kellogg's. Of the others, about eight or ten had Shredded Wheat. I just simply stated I was doing survey work for the National Biscuit. I went to ten stores, I should think. Of those, I actually got the Kellogg product in one store. Three, at least, had the Kellogg product in stock. I asked them if it had a picture of Shredded Wheat and the plant, and they told me no. I said, "Oh, do you mean Kellogg's Whole Wheat Biscuit"; and he said, "No, Kellogg's shredded wheat." That happened in a store on Gavell Boulevard, I believe, and another away down in the Ohio valley, near St. Joseph.

I presume that, out of these ten stores, about five handled Kellogg's and the other five handled National Shredded Wheat. That was a fair survey, as far as I know, of the territory that I operated in at Mr. Carolus' request. That was just practically all. I then became employed and I was eating uptown. I did ask in several places where I ate. Two places were out. Another had been serving Whole Wheat Biscuit, because one of my girl friends had gotten it there. Most of those places served it in a carton, the way I like it, and I did not say any more about it. The only time I eat out now is at noon. I do not eat that sort of food then. I had not eaten Shredded Wheat for two weeks, but tomorrow I am starting in again. I do

love Shredded Wheat; there are so many ways of serving it, with fruit, and so on.

I can only think of three restaurants in St. Joseph and I did not get Kellogg's biscuit in any. It happened, I would say, at least two or three times when I was on the road. I have asked for Shredded Wheat and gotten National Shredded Wheat hundreds of times. I do not remember where I got the Kellogg Biscuit. That is my impression, that that is all. I was on the road five years and ate breakfast every morning. On the road I eat breakfast food more often than at home, because on the road I cannot have the things I want. I was on the road from 1917 until a few months ago. I was in hotel coffee shops, small-town restaurants, very exclusive little places and sometimes just little dumps, from Chicago to Canada and from the coast to Memphis. I have been to every small town in Idaho, Utah, Colorado, Nebraska, Kansas, Missouri, and most of them in Illinois and Indiana. For me to go back and say that, at a certain time and on a certain date, I ate so and so, is impossible. I am testifying from my impression. If it were shown to me by testimony of actual Kellogg men who service the restaurant trade that the Kellogg product has as high as 70 to 80 per cent. distribution in the territories I was in, I would believe it, certainly. I have no fuss with Kellogg's, only I am very mad at them right now, the way they do in St. Joseph. When a customer comes in and asks for Shredded Wheat, and they have not got it but have the Whole Wheat Biscuit, what makes me more angry than anything else is when they say, "You will surely like it. You will not know the difference." That is not what they say. They sell you Whole Wheat and you think you are getting Shredded Wheat. The product made by the National Biscuit Company is Shredded Wheat. I do not mean to say that the Kellogg Company does not

know how to make shredded wheat. I do not mean to say that the National is the only one that can make shredded wheat; it is just like my baking a cake. I mean Shredded Wheat made by the National Biscuit Company. The Kellogg product is not Shredded Wheat; it is Whole Wheat. It is not Shredded Wheat to anyone. I do not assume the grocers were liars when they said it was shredded wheat. They just have a wrong assumption.

If I went in a store and they tried to hand me Grape Nuts or corn flakes, I would say right away, "You are crazy. That is not Shredded Wheat." I wanted to say that when they gave me Kellogg's Shredded Wheat.

XQ. 153. I suppose that all the National Biscuit organization wants to tell everybody that the shredded wheat of the Kellogg Company is not shredded wheat at all.

A. Well, it really is not.

XQ. 154. It is not shredded wheat made by the National Biscuit Company. Is that not what you mean?

A. Yes, on account of the name being patented, and so forth.

MR. VILAS: You are trying to tell Mr. Clarke, are you not, that Shredded Wheat is a trade name?

THE WITNESS: Why, indeed, it is.

MR. VILAS: That is what it means to you, is it?

THE WITNESS: Why it does. It is, is it not?

XQ. 155. In that case, it is marked right here on this package, "Trade-mark Registered U. S. Patent Office, Shredded Wheat." Is that not what you understand it to mean?

A. Yes.

XQ. 156. And that is an absolutely definite statement to you that that is a trade-mark and it is registered in the patent office, is it not?

A. And there should not be any other Shredded Wheat.

THE WITNESS: There should not have been any other shredded wheat, to my mind. This is what Rogers Store should have said to me: "Madam, we do not have Shredded Wheat. You are asking for Shredded Wheat, but we have not got it. We have something, however, which is just as good: Kellogg's Whole Wheat Biscuit. You can use it in place of Shredded Wheat." But he handed it to me and I said, "Is this Shredded Wheat?" and he said "Yes, it is Shredded Wheat." I say it is not Shredded Wheat. All my life I have gone to the store and bought Shredded Wheat. When I was a little girl and could just say Shredded Wheat, my mother would send me to the store to get it. I went in the store and said I wanted Shredded Wheat. Everybody else wants that, I think, if they have any convictions at all. I am not employed by the National Biscuit Company. I was, just for demonstrations. I had probably three or four demonstrations for Mr. Carolus, one for Mr. Turner, who has the Y Park District, one at the store of Turner and Snow, for Mr. Gibbons, wheatsworth pancake flour, and one out at Jackson Street for Mr. Turner, wheatsworth. I had one at Packer's Market, before it burned, for fig bars. I had one at the Kennedy grocery for fig bars. It seems to me I had one in there for cookies, at some place. Those were all the National demonstrations I had, but not for the National Biscuit Company. I am no employee of that company. I was employed just for the demonstrations, the same as I have been employed by lots of other companies. The National Biscuit Company has not paid me five cents.

The salesmen, instead of putting on those demonstrations themselves, paid me out of their own pockets to put them on. Those were National Biscuit salesmen, but the National Biscuit Company has not paid me five cents. I do not know whether they were paid. I suppose the company paid them their salary. I had nothing to do with that. It has nothing to do with this case. It is a lot of work for a man to fry a lot of pancakes for a hundred or more people and to serve them. These boys hired me just to do that. I just helped them out so they could go on and see their customers and have their regular Saturdays out. I do not know whether the money they paid me was reimbursed to them. I never asked them. Except for these demonstrations, I have never been in the employ of the National Biscuit Company. I have never been in the office, and I do not even know who is in the office, or anything. I have never been to their building. When the grocers told me the Kellogg product was shredded wheat, I would not say they were all wrong. There was never any chance for an argument. I would say the Kellogg product is not, physically speaking, shredded wheat. Shredded Wheat does not mean Kellogg's. It means Shredded Wheat. It is a biscuit, and it is a nice little something. There are not two shredded wheats. That is Kellogg's Whole Wheat Biscuit. It says so right on the box. I can conceive that, when a grocer says there are now two concerns making this little biscuit in pillow-shaped form, it is true; because your wife may make a cake, and so can I; but my cake might be different than hers. I can understand that, when the grocer says "This is shredded wheat," he is talking about the product itself, the little pillow-shaped biscuit. Nevertheless, I think I am right when I say there is only one Shredded Wheat, and that the grocers are indeed wrong when they say there are two kinds. I could not admit the

possibility of my being wrong and their being right about Shredded Wheat. There is only one brand of shredded wheat on the market. Kellogg's biscuit is Whole Wheat Biscuit. If I were asked to tell what whole wheat biscuit was, I would not know.

I would describe the product I see through the cellophane window in that package as a biscuit. It looks very much like shredded wheat biscuit. Why does it not say it is? I have no doubt it is a shredded wheat biscuit. "Whole Wheat Biscuit" would not give me any idea what it was; but, if you said it was shredded whole wheat biscuit, I would immediately think it was shredded wheat, as in Plaintiff's Exhibit 1. Then I would find that, instead of its being Plaintiff's Exhibit 1, it was a Kellogg package.

RE-DIRECT EXAMINATION.

THE WITNESS: The gist of my debate with Mr. Clarke is that I believe that Shredded Wheat is a product name, the name of a product, peculiar to the product I have known so long; and that no one else should call their product by that name. That is only honest and right. The people with whom I associate, when they ask for Shredded Wheat, want Shredded Wheat. If they want Kellogg's, they ask for it.

RE-CROSS-EXAMINATION.

THE WITNESS: I tried to tell you in the beginning that your salesmen should explain the fact that the process is shredded wheat, but that it cannot and should not be called Shredded Wheat. When people ask for Shredded Wheat, you should tell them you do not have the original Shredded Wheat but that this is similar. For instance, if I would go downtown and ask for a dress and find, when I got home, I had a pair of pajamas, it would be the same idea, to me, or if I asked for

Shredded Wheat and found I had gotten some corn flakes. I would be furious. If I asked for Shredded Wheat, meaning one shredded wheat, and a grocer handed me another shredded wheat, I would have the obligation to tell him, "I want the other kind," because that is all I want. I would say, "I want Shredded Wheat." He should then, in my opinion, say: "This is not Shredded Wheat, but it is very similar to Shredded Wheat." If he does not give me oatmeal or corn flakes when I ask for Shredded Wheat, I can conceive the idea that he thinks he is giving me shredded wheat. If I would say, "I do not want that shredded wheat; I want the other kind," there would still be confusion. I have been in Kennedy's store the past few weeks. If a woman came in and asked me for Baker's Cocoa, and I would slip it in a sack and hand it to her; and, after she got home, she found it was Baker's Cocoa when she wanted Hershey's Chocolate, she will not like it. They will come back the next day.

To me, it is the same when I ask for Shredded Wheat. When I go home, I want Shredded Wheat for breakfast. I do not like it if I am going to have Kellogg's. If I said, "I want a package of cocoa," and found, when I got home, that it was chocolate, I could not complain. There is a difference between cocoa and chocolate. There is also a difference between Kellogg's product and the National Shredded Wheat. I think there is as much difference as between cocoa and chocolate.

Some of the Kellogg salesmen do the same thing here in town they do home. They go around on house-to-house canvass, selling a package of Kellogg's and giving a package free. They do not even come to Kennedy's store. If I were Mr. Kennedy, I would throw Kellogg's products out the door.

When I went home one day, mother said, "I wish you would call Mr. Carolus and tell him what happened.

A young man came to the door and wanted me to take a package of something of Kellogg's. He said he would give me a package if I bought one." My mother is certainly very truthful. She said she thought that was terrible, that it spoiled the groceries' trade. My mother did not take the free sample. Her feeling and mine was that it is unfair for the Kellogg Company to be selling stuff from door to door, taking customers away to that extent from the grocers, and trying to get you to buy one package and giving one free. We disapproved of that.

I mean I disapproved of it as a demonstrator or as somebody who is interested in the sale of products. As an ordinary consumer, however, I would be afraid of it, if somebody came to my door with dresses and offered one free if I would buy one. I would be afraid they were shopworn.

It was not my mother's feeling that they were not full-value packages. I did not think it had any bugs in it or anything of that sort. I did not think the Kellogg Company would demonstrate moth-eaten goods to their new customers. My mother thinks it is very unfair to the store. She does not have any professional feeling just because I am temporarily at Kennedy's. My profession is teaching. I just happen to be in this position this year. She is only interested in Kennedy's store because we do a great part of our buying there and we have known them for years and years. So far as worrying about whether Mr. Kennedy will make money or not is concerned, that is not in her mind. In talking to at least six people about the same thing, in St. Joseph, they said it was terrible. If all the packages sold and given away were bought at the stores, out of their regular retail stocks, of the grocers in that neighborhood, I do not know whether that would be unfair to the grocers. They were not advised about it in advance.

Mr. Kennedy did not know anything about it. He said, "What are they doing a thing like that for?"

Mr. Kennedy carries Kellogg's. He has a lighted Kellogg display sign in his window. Ever since I was a little girl, I can remember eating Shredded Wheat. That has all been outraged by the Kellogg Company putting out this Whole Wheat Biscuit. My feeling about Shredded Wheat is certainly outraged by the fact that the Kellogg Company also made a product of shredded wheat. I believe in honest competition.

HENRY F. STEEN.

Deposition taken at Kansas City, Missouri, February 16, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am vice-president of the United States Air-Ways, carrying mail, express, and passengers by air between Kansas City and Denver. I have occupied that position a little more than two years.

Ever since I left school, I had experience in the food business. When I left school, I went with the National Biscuit Company in Chicago and went to California, then back to Kansas City. In 1926, I think, I left the company and bought an interest in the Piggly-Wiggly Stores here with a man by the name of Byrd. I had been at least twenty-five years with the National Biscuit Company. I left them permanently in 1926, and I have not been associated with them since. This is the first time I have been in here since I left the company. I then bought an interest in the Piggly-Wiggly Stores in Kansas City and became vice-president of that concern. When I went in, we had fifty-six stores; when we sold out to Safeway a few years later, we had two hundred and thirty-one. I had other business connection before I became connected with my present concern.

I recognize Plaintiff's Exhibit 1. I have been familiar with the product known as Shredded Wheat about as long as I can remember. We used Shredded Wheat in our home. Later, we bought a good deal of it and sold a great deal of it, long before it was taken over by the National Biscuit Company, in the Piggly-Wiggly Stores. If the National Biscuit Company took it over in 1929, I had three years' experience buying it, prior to 1929, from the original Shredded Wheat Company at Niagara Falls. Prior to being in the grocery business, I used to use Shredded Wheat, about as long as I can remember. I remember the form of the biscuit during all that time. I cannot remember any difference in it. It seems to me the biscuit has been the same since the first time I saw it. One indelible fact standing out in my mind that I recall is that, when I was a very young boy, I saw them make it in the World's Fair in Chicago. No, I believe they had a plant in the San Francisco Fair in 1914. I guess it was not Chicago. I have a faint recollection of it; but whether it was San Francisco or not I do not know. That was the first time I saw them make it, in a small plant they had set up at the World's Fair at San Francisco. That is the first time I saw it manufactured. Shredded Wheat is the only name I ever knew for it.

I think I know what the general reputation of Shredded Wheat is with the public, from my own experience of it. A few years ago, when I was in the grocery business, there was a little difficulty in getting Shredded Wheat at a certain time. Whether it was lack of production or what, I do not know. This was prior to the National Biscuit Company taking it over. They used to carry a stock in one of the warehouses here. If a car did not get in, there would sometimes be a little lack of delivery.

At one time, we bought some of the Kellogg biscuit and tried to sell it to the customers for Shredded

Wheat, to the consuming public, with no success whatever. They absolutely criticised us for staying with the substitute. We discontinued it, due to the complaints from the consuming public. The public said it wanted the original Shredded Wheat, not something that we wanted to sell them in place of it. They meant they wanted the Shredded Wheat, Niagara Falls Shredded Wheat, the original package that has been on the market as long as they could remember. I would say that it is fair to say, in my opinion, at least, that the term shredded wheat is entirely connected with the Niagara Falls product. I would regard it as a trade name and as the descriptive name of the original Shredded Wheat Biscuit.

I am familiar with Plaintiff's Exhibit 161, the window package. I have seen them. Looking through the window at the contents of the package, I would say it was an imitation of the original Shredded Wheat Biscuit. In my opinion, it is possible for the grocery trade to use that as a substitute for Shredded Wheat, certainly, if you can get away with it.

CROSS-EXAMINATION.

THE WITNESS: Mr. Clarke is a better judge of whether they could get away with it in their sales than I am. The building up of a sound, solid, lasting business on substitution has been done. I do not say it has in Shredded Wheat Biscuit; but there have been other items on the market imitated. We did not have that success. Our own experience was that it could not be done successfully and have satisfied customers. If customers want one particular brand, they might take the other. Such things have been done; but, as my experience has shown, it is not a satisfying package, which might have been due to the fact that Kellogg is substituting it for the old original Shredded Wheat Biscuit.

When we carried Kellogg's shredded wheat, I cannot recall whether I advertised it; but we did in the stores. We operated self-service stores. When you are in the grocery business, you want to sell all the merchandise you possibly can. Usually, with a new product, we would put it on the checking counter where customers check out. A customer would come there, and the clerk would attempt to sell her Kellogg's biscuit. In fact, while we have told them not to substitute, I understand the clerk, when they brought Plaintiff's Exhibit 1 out, would try to take out the package the customer had in the package and substitute Kellogg's package for it. There was a business reason for that. We had a temporary better profit on it. There was a deal on it. Our store managers work on a salary, a thirty per cent. cut in the profits. We got seventy and they got thirty of their own store. We furnished every week a list of long-profit items to the store managers. Naturally, they would go after the items that would give them the greatest profit. I was the first one to buy Kellogg's biscuit over there. The company was a little bit opposed to it; but there was a reason at that time for putting it in. Another chain store in town cut all the profit out of the Niagara Falls package of Shredded Wheat, Plaintiff's Exhibit 1, which at that time was not owned by the National Biscuit Company. We could not make a penny out of it. We used to get twelve cents at that time. I think we paid eleven. They cut it to ten cents a package. We attempted to push the Kellogg product; but we did not continue to do so when we found there was objection to it. So we cut ourselves down to ten cents. We made about eight per cent. on it. It cost eighteen per cent. to run the store. We lost something on it. You are not losing on the actual transaction; but, when you count your overhead, you are losing money. When you are in the grocery business, you are trying to find some way of competing. We attempted

to do it with Kellogg's biscuit. When I say there was a deal on, I mean the manufacturers gave us a special price for a temporary period of time, to introduce it. We never got any deals on Shredded Wheat. I cannot remember any at that time. It was not necessary.

We did, from the National Biscuit Company, go on to other products, any new item. That was customary at that time with any manufacturer. The method was not unique with the Kellogg Company.

When a customer would come to the checking counter with Niagara Falls Shredded Wheat, the clerk would try to exchange the package for Kellogg's package. He would just say, "Here is a package I would like to have you try." I do not remember what else he said. He attempted to substitute Kellogg's package for Plaintiff's Exhibit 1, and he found it was not good business. I had always built up our business on high-quality merchandise without any substitution whatever. We had a splendid reputation here for integrity in a business way, and we did not want any substitution. We were trying to substitute something that was a substitute for the original, and we were afraid there would be a reaction. We thought it was not good merchandising, but it was not unethical, because that is done every day in the grocery business.

Another firm here, Quaker Oats, I believe, had a similar biscuit they called Muffetts. I believe, if Kellogg had used another name than whole wheat, the men could have sold it more conscientiously. If they could have said that here is something known as Muffetts, or something else, not using the term shredded wheat. I believe their success would have been greater, because there are scores of items on the market today which are similar, but which are sold, under different names. Both companies are enjoying a good business. It is not considered an imitation. Muffetts was shredded. They were round, I think. I

would not say that it would be unethical for a clerk to explain what Muffetts were by saying it was a whole wheat, shredded, if that was the fact. It is his business to explain.

It is true that the Kellogg Company has and did have at that time a predominant position in the market on the sale of corn flakes. It is customary to ask what brand you want. If a customer asks for corn flakes, if a clerk is waiting on the trade, he asks, "Which one do you want?" We operated a self-service store. They did not ask for anything.

If a customer came into a service grocery and asked for a package of toasted corn flakes, there being more than one brand handled, if the grocer took his favorite brand and handed it to the customer and the customer took it and walked out, I would not assume she was satisfied until she got home and found out whether it was the kind she was using and whether the quality was satisfactory. If she then kept it and used it, and came back and got more, he could believe she was satisfied, if she did not complain.

Piggly-Wiggly sold the rights to use the name in various parts of the country. You could buy the rights for a state, and all those stores would be considered Piggly-Wiggly Stores. They were all over the United States, but not very much in the east. I believe they predominated the country from Ohio on west. They never invaded the eastern market. They are now opening Piggly-Wiggly stores in Philadelphia, I believe, and in Pittsburgh and other places. I have not been back there recently.

It is true that self-service stores are coming into existence more than the old style of service store and that some service stores are being converted into self-service stores. There are a great many stores going into self-service. It is a growing type of store around the country.

Any new manufacturer of even an old product has a certain amount of resistance to encounter in the demand on any new item, if it is a similar item to what you are already selling and the other item has given perfect satisfaction. There is naturally more sales resistance.

It is true that I would not expect a product like toasted corn flakes to be very long on the market as primary brand, the Kellogg brand, before there would be a secondary brand of corn flakes to compete with it, like Jersey. For instance, for Heinz Ketchup, we would find another competing ketchup on the market made by different manufacturers, and that some grocers would carry the first brand and some would handle the second.

As to Worcestershire sauce, most of those except Lee & Perrin's are sold under different names. It is not the original Lee & Perrin's sauce. I guess practically every brand, generally speaking, has a competitor. It is true that Shredded Wheat was practically a unique article and did not have any competing brands for many years, until the Ross Biscuit came in. Then, later on, came the Kellogg biscuit.

I would not expect the Kellogg Company to meet a great deal of resistance in the trade on the new product. I want to qualify my statement in this way. I did not say anything against the quality of Kellogg's biscuit; but the fact that you were substituting it for a biscuit that has been known for generations as Shredded Wheat Biscuit is where the trade resistance came up. If Kellogg's had used another name--Whole Wheat Biscuit may be the name we have there now; but not at the time I am talking about, when they were selling it as Shredded Wheat. I do not think the name Whole Wheat is the same as Shredded Wheat. What I want to convey to you is the fact that we were substituting biscuit back at that time, which you called

Shredded Wheat Biscuit, for the original Shredded Wheat Biscuit. That is where the objection came from, even from some of our clerks, in addition to the public. In fact, the sales resistance was such that we discontinued it entirely in our stores.

I have too much experience in selling merchandise to say that one cannot create a demand for anything, even though it is an imitation of something else. What I am testifying is that the demand did not exist when I was back in the business, two years before. It has only been two years since I was in the grocery business. In those stores, at that time, there was no large consumer demand for the Kellogg product. We carried it for a while and then discontinued it. We bulletined the Kellogg biscuit to the store manager and gave him his profit on it and tried to sell it. We then decided it was bad business to let him bring it to the attention of the consumer as a whole wheat biscuit, as a substitute for the other.

Physically speaking, I have no doubt the Kellogg Company is able to make a biscuit like the National product. I would not say I think it is any trade secret to manufacture Shredded Wheat.

XQ. 127. My question is this: Suppose that somebody heard that Kellogg was putting out a whole wheat biscuit and never had seen one of them and you had, and this person said, "What kind of biscuit is whole wheat biscuit?" how would you describe it to them? What would you say? Would you simply say that whole wheat biscuit is a whole wheat biscuit?

A. If I were in the grocery business I would say it is an imitation of Shredded Wheat.

THE WITNESS: Just as a man, not a grocer, I would say it was an imitation of Shredded Wheat Biscuit, made at Niagara Falls by the National Biscuit Company. If Kellogg said it is whole wheat biscuit, made out of shreds of whole wheat, just as much

whole wheat shredded as the Niagara Falls product, I would still say it was an imitation. I call the same thing an imitation. I do not use the word imitation as meaning a fake copy of something else. I mean it is an imitation of the original Shredded Wheat Biscuit. That is what I will say; that is what it is. It is nothing else but that.

If I were asked whether Kellogg was manufacturing a shredded whole wheat biscuit, I believe I would say no, that they are just manufacturing an imitation of it. It is nothing else but an imitation of the original Shredded Wheat Biscuit.

The Post Company do not call their Post Toasties corn flakes. They call them Post Toasties. If they have the words corn flakes on their package, I suppose they get away with it. You could probably say they were making toasted corn flakes under another name. The Kellogg Company is not making its shredded wheat biscuit under another name.

It is physically possible for the Kellogg Company to make a biscuit like the one made at Niagara Falls, of different products, anyway. Assuming it is made exactly the same as the other, out of shredded wheat, and the same way, except as to size and color, in the same shape, I believe I would say it was an imitation biscuit. When I say imitation, I mean I think two things can be identical and yet one of them would be an imitation of the other. What I am trying to convey to you is that any item put on the market to be substituted and to use the original name for the package is not fair to the consuming public or to the grocer who is expected to sell it. That is my opinion. It was customary for us to hold meetings once a week, so we could get the reaction of the managers as to what the public thought. When the Kellogg biscuit was put out, we would get complaints from those men. We would ask the question again next week. After a

while, we began to think there was a certain objection to it, and we discontinued the biscuit entirely, went back to Shredded Wheat on an 8 per cent. profit. The matter finally adjusted itself.

After we discontinued the Kellogg biscuit, our competitor raised his price. We discontinued the other biscuit before the competitor changed his price. We just went on, buying them when we saw that they were selling them at ten cents, and we saw they got seven. We attempted to handle this Kellogg product as a competitive product long before the price was put on, not as against the customer but for his preservation. We wanted to make a little profit on our sales, which we were not doing at the time the National Biscuit Company took it over. When the Shredded Wheat Company were advertising the shredded wheat as a loss leader, we were advertising Kellogg against it. That was one reason. There was another. We were handling the Kellogg products. If a man is a good salesman, he will come around and attempt to sell you something, whether you can dispose of it or not. If you were selling the National Biscuit Company products here today and somebody else wanted to get out a new biscuit that might be similar in some respects, although an entirely different name, you naturally would add another item. That is customary in all stores. Any grocer will do that.

If a manufacturer established the name toasted corn flakes, so when people asked for them they meant his product, and other manufacturers then made them and called them toasted corn flakes, I would say they capitalized on the original product. I cannot say that it was an imitation corn flake. I say that they capitalized on another man's product. They would be, maybe, making toasted corn flakes. There are various kinds of products. The first man making corn flakes is the one who sells it originally. If someone else comes

along and uses that name, he is capitalizing on the other man's past efforts. I would have to see the product to know whether he was making genuine toasted corn flakes. They might possibly be identical in manufacture. That is an imitation of the original. In reality it is true that the Kellogg Company is making an imitation of the original shredded wheat. It is about the same product. It is an imitation, even though it is the same thing, and capitalizing on the other man's name. The first man who put out corn flakes might use a name. If another man came in and used the name, he is capitalizing on the other man's past efforts in building up that business, and he got away with it. I suppose nobody ever interfered with him.

If somebody asked me to describe the National Biscuit Company Shredded Wheat, I would state that it was a biscuit that was made of shredded wheat, properly manufactured, through toasting or baking, or whatever their process is, put into the form of a biscuit, and sold. In my definition, I have said it was made of wheat shredded, which is shredded wheat, that it is made out of whole wheat, and it is made into a pillow-shaped biscuit. If you say, boiling down my description, that it is a shredded whole wheat biscuit, I would say that that is an exact description of this National Biscuit Shredded Wheat.

RE-DIRECT EXAMINATION.

THE WITNESS: The gist of the discussion is that I have known the original Shredded Wheat, the old name, as Shredded Wheat, for many, many years; that it has acquired a reputation with the public, and that the expression Shredded Wheat is attached to the National product in the minds of the public. That is why I say that the Kellogg product is an imitation of it.

Examining Plaintiff's Exhibit 161, I see the cellophane window in front, showing the biscuit. Those biscuit look like Shredded Wheat Biscuit. On the reverse side, I see the picture of two biscuit in a dish. I have seen, quite a little time back, advertising of a carton of the Shredded Wheat Company, which had two biscuit in a dish. Sometimes they also showed strawberries in the dish, like Defendant's Exhibit 6. That was used for many years.

I saw the ends of the Kellogg biscuit carton a little while ago, which says shredded wheat in one way or another, on both ends. Checking all those features of the package to which you have directed my attention, I think that package is designed and can be sold as imitation shredded wheat.

RE-CROSS-EXAMINATION.

THE WITNESS: I do not think it could be sold as genuine shredded wheat, because it is not genuine shredded wheat biscuit. I do not think it could be sold as shredded wheat made out of wood or paper or anything of that sort.

RE-DIRECT EXAMINATION.

THE WITNESS: When Mr. Clarke asks me if it is not genuine shredded wheat, he is using shredded wheat as a common noun. When I use the term shredded wheat, I use it as a trade name. That is the difference between me and Mr. Clarke in the debate we just had. So it is not like two kinds of beans or tomato catsup.

FRED A. TYLER.

Deposition taken at Kansas City, Missouri, February 16, 1933.

Direct Examination.

The Witness: I am a retail grocer, operating my own store in Kansas City. I have been in the grocery business twelve years the first day of this coming April. That is my entire experience with the grocery business. This is a service store. I receive orders on the telephone, which is 75 per cent. of our business.

I recognize the package, Plaintiff's Exhibit 1, as Shredded Wheat. I have been familiar with it since I have been in business and as a consumer before that. We have used it in the home and carry it in our store. Our customers ask for Shredded Wheat when they want that product, and we supply them Shredded Wheat, meaning the product in Plaintiff's Exhibit 1.

The expression shredded wheat has a definite meaning in the minds of my customers. They ask for Shredded Wheat. What I mean by that is that we used to carry Kellogg's Whole Wheat Biscuit. We do not carry it any more, because, when we were out of Shredded Wheat Biscuit, we would substitute it, and we have had some returns of Kellogg's shredded wheat biscuits. When I sent Kellogg's biscuit in answer to a call for Shredded Wheat, it was not always accepted, but it was sometimes and no complaints made about it. I did find it possible to send the Kellogg product, sometimes, in answer to a call for Shredded Wheat.

Cross-Examination.

The Witness: I found that substitution would not work in all cases. When a customer asked for Shredded Wheat, I could not tell from the tone of her voice whether she was using the words with capital

letters or small. If she asked for shredded wheat in a note, spelled with small letters, we have been told to send National Shredded Wheat and not Kellogg's shredded wheat. I do not mean to say at all that I am satisfied that nobody in the United States really wants the Kellogg kind of shredded wheat. I do not know whether they do or not.

It would be impossible for me to say what percentage of customers who asked for shredded wheat and received the Kellogg product returned it to us. I recall an incident where we did have to pick up Kellogg's and send the original Shredded Wheat. There have been some. I do not remember how many. I suppose, if people order Shredded Wheat, that is what they want. When I sent Kellogg's product to those ordering Shredded Wheat, some have sent it back and others have kept it. I do not have any Kellogg's shredded wheat biscuit in stock now. I leave the question of stocking products up to my son, principally. I am outside most of the time and he is inside. I instruct him what to do, of course. We do not intend to carry any line of merchandise that does not move. If I find any non-movers in the store, I put a sale on them, put them down, and sell them regardless. I do not stock Kellogg's biscuit any more. I know we have not had it in the store.

I am president of the Retail Merchants' Association of the State of Missouri and the Retail Grocers' Association of Kansas City, Missouri. I go out and organize associations over the country in different towns. It keeps me pretty busy. All those associations are of large store owners of independently owned stores, opposed to the chain type of doing business; or not opposed. We just want them to be taxed along with us. That is what we are trying to do, to put taxes on the chain organizations. I have just one service store I own, and my son operates it. It re-

ceives a good many telephone orders. We do not exactly have self-service features. We do have displays where the customers can pick for themselves. We have merchandise there, and they come in and pick it up if they want to. We do not have the type of counters they used to have.

I do not recall whether or not we ever tried to create any demand for the Kellogg biscuit by demonstrating, advertising or sampling. It has been some time since we put in Kellogg's. I do not recall just what method we did use. I have not worked in the store very much lately; but every Saturday I was there, and we did a big telephone message business. I got a return myself. That is why I said we had some kick backs on Kellogg's Whole Wheat Biscuit, where they wanted Shredded Wheat. I still take some of those telephone calls, but not so much.

If, every time shredded wheat was ordered, I sent out National Shredded Wheat and about half the customers sent it back and asked for Kellogg's, I guess it would educate me to ask which one they wanted, when they asked for Shredded Wheat; but we have never gone into that. The customers have not gone into it so thoroughly, except on certain occasions. If you were my customer and told me once you did not want Kellogg's but wanted Shredded Wheat, I would recall that incident and would not send Kellogg's to you. Vice versa, I would understand what you meant and would send you Kellogg's even if you said shredded wheat, if that was what you wanted. If you wanted Kellogg's and I had it, I would send it. You would get Shredded Wheat Biscuits if you wanted them and I had them. People get acquainted with an article like Kellogg's or Shredded Wheat after it is on the market a short time, and they tell you what they want. They say "Send me a package of Shredded Wheat." After you have had it in your store, you

know better than to send something else. You would know it would be a mistake. If somebody after that, in ordering the Kellogg product said, "I want shredded wheat," I would know they meant the Kellogg product and I would send it to them. Judging by my experience with substitution, it is not a very successful practice. It is a good way to get myself into arguments and quarrels with my customers if I do not give them what they want. In my own case, I found it was not good practice to use with my customers.

RE-DIRECT EXAMINATION.

THE WITNESS: The condition assumed by Mr. Clarke has never arisen in my store. My customers have not divided themselves, with some of them wanting Shredded Wheat and some of them wanting Kellogg's Whole Wheat Biscuit. Shredded Wheat is the order, from the way I get it. My customers know and ask for Shredded Wheat. When they ask for it, I know what they mean.

RE-CROSS-EXAMINATION.

THE WITNESS: I belong to the Associated Grocers, and they do their own advertising. I do not recall whether they ever advertised Kellogg's Whole Wheat Biscuit or not. It has been a long while since we stopped Kellogg's. I do not recall ever having seen any dealer's advertisement of Kellogg's Whole Wheat Biscuit. If some dealers did advertise it to their trade, that would be, of course, one way of creating demand for that product. Sampling from house to house is a way to create a demand for a product.

If the Kellogg Company advertises to consumers that they have Whole Wheat Biscuit on the market and think it is better than the other biscuit, that would help create demand, advertising by manufacturers,

and by dealers, and sampling from house to house and store demonstrations. That is the way they usually try to create a demand. I never approved of them. I suppose they are legitimate; but I never approved of house-to-house canvassing. I did not think there was anything unlawful about it, but, as a grocer, I would rather not have it done. It takes away the profit you are entitled to. If you take a package of biscuits or any other product to the housewife and give it to her, it takes the profit the merchants are entitled to on that article.

I have had manufacturers buy the sample packages they gave away from me at the regular price. I had them make those propositions; but I always got hooked every time I did it. If both the sold package and the free package were bought from me at the regular retail price, I guess I would feel a little differently about it; but I do not believe in giving free goods to a customer. I fight it all the time. I fight premiums and everything of that kind. I do not believe in that method of merchandising. We have to create a demand in some other way, I believe, than by going out and giving them to the consumer. I do not fight the advertising of that, just the sampling.

I appeared here today to testify at the suggestion of Mr. Neighbor, the sales agent here. He did not ask whether I was handling Kellogg's Biscuit. He was in my store, and he just asked me if I would come down and testify. I do not think he knew I had discontinued handling Kellogg's biscuit. He could see whether I had it on my shelf, I guess. I do not handle the entire National Biscuit cracker line, only a very small proportion, because the A. G. organization advertises mostly Loose Wiles. I am mostly a Loose Wiles dealer.

LESTER S. GUTHRIE.

Deposition taken at Kansas City, Missouri, February 16, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am in the farm machinery business at Wichita, Kansas. I am not connected with the National Biscuit Company. I am familiar with the product known as Shredded Wheat and have known it about twenty-five years. I recognize the package, Plaintiff's Exhibit 1, as Shredded Wheat. It is a cereal that my mother always had for me. I never did like bran, and she always gave me that with cream and sugar. I liked it better than I did bran or oatmeal. I have eaten it at home a great many times. Mother usually brought it on the table in the box, opened the box, and take it out. Then she puts it back in the bread box.

I have had occasion to purchase Shredded Wheat. I ask for Shredded Wheat, and I have in mind that I would like to get the Niagara Falls brand of Shredded Wheat; but I often get the Kellogg brand of Whole Wheat, lately.

I remember especially September 7th, in Wichita, at P. O. Weltner's, 3060 East Douglas Street, a grocery store. I bought some other groceries and asked for some Shredded Wheat Biscuit. He gave me a box of Kellogg's Whole Wheat Biscuit. I told him it was not what I wanted. He said, "That is just the same thing. One time they come marked one way, and one time they come marked another." He said it was all one and the same. I told him I did not think they were; but I would take a box home and try them, which I did. Plaintiff's Exhibit 191 is that package. I ate the biscuit. It did not seem to me that it was as firm as Shredded Wheat. It was more porous and open and smaller biscuit.

This first purchase was not made at the request of anybody. Afterwards, I found out, through a friend of mine who is manager of the National Biscuit there. I kidded him why he did not go out and sell old man Weltner some Shredded Wheat, so he would not be fooling the public. I just mentioned this fact to him: that I thought they were selling somebody else's product under the National trade name, and I thought they ought to get down there. They were selling something under the name Shredded Wheat that was not Shredded Wheat. I regard the name Shredded Wheat as a trade name, of course.

I went down there again last night, February fifteenth. I bought a ten-pound sack of sugar, and I told him I wanted a box of Shredded Wheat. He handed me a box of Kellogg's. I called his attention to it. He said, "I have the Niagara brand over here, if you would rather have it, but it costs a cent more a package. It has fewer biscuits in the package. It is all the same thing." I took a box of Shredded Wheat last night; but he offered me the Whole Wheat Biscuits with the conversation I have just related.

I sometimes eat Shredded Wheat in restaurants. I did last night, afterwards. I went down to the Alice Hotel, the Pup Lunch, which is a cafe at the leading hotel there; and I looked down the menu for Shredded Wheat. It was on there. I ordered Shredded Wheat, and they handed me Whole Wheat Biscuits, the Kellogg product in the box right there. So I told the girl to give me another one. She started to tear one of them open, and I told her to give me another one and not to open it. I did not eat either one. I just told her to put them in a sack, that I would take them home with me. She said that is all they had ever sold for Shredded Wheat. I took the menu from that restaurant, and that had Shredded Wheat listed on it. It was there last night. Plaintiff's Exhibit 193 is the menu. I did not eat

Shredded Wheat there. I had already eaten, so I just took doughnuts and coffee. My wife took a regular supper. Plaintiff's Exhibit 192 is the carton the girl did not start to cut open. That was the only time I had that experience in a restaurant. I do not eat in a restaurant very often.

The newspaper I have produced, called the *Wichita Independent,* is delivered to our front porch every week. It is a regular weekly paper, regularly printed in Wichita and distributed to subscribers.

MR. VILAS: I offer particularly the eighth page, carrying the advertisement of T. A. H. Grocers, with particular attention to the advertisement of Shredded Wheat, Kellogg's, twelve biscuit in each package, nine cents.

(The page of the *Wichita Independent* referred to was received in evidence and was marked "Plaintiff's Exhibit 194.")

CROSS-EXAMINATION.

THE WITNESS: I noticed the ad in the *Wichita Independent* after I had bought the package of Kellogg's. I bought it on December 7th the first time. The paper came out after that. My attention as a consumer was attracted to the ad. I noticed it, because I had had that set-to with Mr. Weltner. I felt that he was trying to put something over on me, trying to tell me it was all the same, and I did not think it was. What riled me was that he was trying to give me something else under somebody else's trade name. He did not tell me he was trying to gyp me; but, generally, it was the same thing. He did not use very good judgment, for a business man, because he got kind of hot about it. I did not think that was right, because I tried to convince him he was lying to me. He did not like me to imply he was lying. I do not know what shredded wheat is made of. It

might be made out of glue; but I know I like it. I do not like your Kellogg's Whole Wheat Biscuit as well as I do the other. The Kellogg Company says on there that is made of Whole Wheat Biscuit. He turned it over on the end and showed me where it said "a shredded wheat product." Shredded Wheat is Shredded Wheat. It does not make any difference what it says on the box. When he said it was shredded wheat, I do not think he was sincere in that statement. I said, "Do you know what wheat would look like when it was run through a shredder?" And he did not even know what a shredder was. I do. I sell shredders. I sell farm machinery, to shred wheat, corn, and everything else, as far as that is concerned. He did not know what he was talking about. He said, "I do not even know whether there is any wheat in them or not." He said, "They might not have any wheat in them."

He was trying to sell me something I did not want, because I ordered one thing and he was trying to give me something else. It is not possible that he said shredded wheat in one sense and I meant shredded wheat in another sense. He did not have what I wanted in his store. I wanted Shredded Wheat as in Plaintiff's Exhibit 1. I did not say that to him. I told him I wanted a package of Shredded Wheat. I wanted it that it said Shredded Wheat on the side of the box. He got around to the end of it to try to show me that it did.

I did not understand that he was trying to say it was the same kind of breakfast food as Shredded Wheat Biscuit. He was trying to sell me something I did not want. That was all that conversation. He tried to sell me shredded wheat, but under another name; and I took the strange stuff back with me and said that, if I liked it, I would buy it. I fed it to my dogs. I think it was good for them. I tried some of it myself. I did not, for a fact, like it as much as Shredded Wheat. I have eaten Shredded Wheat practically all my life,

always the Niagara Falls brand. I recognized there was a difference in size between that and the Niagara Falls biscuit. I noticed there was a difference in the looks of it. After I tried it, the dogs were standing there begging, and I said "Come on" and gave it to them. My dogs have begged for National shredded wheat. They beg for everything. There was nothing unique about their conduct. I have some nice dogs.

It is fair to say that, when I asked for shredded wheat, if this man had tried to hand me some toasted corn flakes or oatmeal, I would have said he was crazy, which was the same thing I told him when he handed me this whole wheat biscuit. I told him I wanted Shredded Wheat Biscuit and he was not going to put off some Kellogg's Whole Wheat Biscuit on me. He began to heat up, and he got sort of hostile. I told him I would take them home and try them. I traded there at that store right along. I am not still trading there. I had no break in my friendship with the man over the Kellogg product. Last night, he had some Shredded Wheat and he tried to put off Kellogg's Whole Wheat Biscuit on me under the Shredded Wheat trade name. That is where they are doing wrong. Why do they not advertise Whole Wheat Biscuit and get a name for themselves?

Mr. Ash Paine is the name of my friend in the Shredded Wheat Biscuit Company organization. I went to him and spoke to him about it. I suppose he had called on them before. They worked the town pretty hard. My wife had ordered some from that store before that, and we had bought some Shredded Wheat from Ratcliffe's Grocery. We got some Shredded Wheat last night. His wife tried to sell me Kellogg's. She told me it was the same number of biscuit in the box and it was all the same thing. I took a box of Shredded Wheat and a ten-pound sack of sugar and went home.

RE-DIRECT EXAMINATION.

THE WITNESS: A corn shredder tears corn up and separates the kernels from the cobs, and most generally will blow it off into a loft or a pile. It tears it apart. That is what I understand by shredding. That is what a corn shredder does to corn. I imagine a wheat shredder or oat shredder would do that same thing to wheat or oats.

RE-CROSS-EXAMINATION.

THE WITNESS: If it did not, I would not think it was a shredder. I have not been to Niagara Falls. If I went there and saw the machines that make Shredded Wheat and they were referred to as wheat-shredding machines, I would not think they were shredding machines if they would not shred. They would not be shredding at all. They would be shredding a kernel after it has been—I understand what you mean: something that tears it up as a shredder and cuts it into shreds. By shreds, I assume is meant strings. When you run corn through a shredder, the fodder comes out shredded, and the corn comes out shelled. Speaking of shredded wheat, I think the shredding has reference to shreds. It is all in strings or shreds, as mentioned on Plaintiff's Exhibit 10, "It's All In The Shreds." In my estimation it looks as if they ought to be called strings instead of shreds. It looks like it, if they are going to mix it up with farm machinery. Shredded fodder is where they got the idea. Evidently, the first they made must have run out in a place, and it came out in shreds. The bottom of my pants legs is going to be shredded pretty soon, if things do not change.

My friend Paine was playing bridge at my house. When I spoke to him, he said, "I will have to see about that." That was the comment he made when I razzed him about it. I have known him all my life, practically.

He talks machinery business over with me, and I talk biscuit business over with him.

I left Wichita last night and got here this morning on the sleeper. I think they pull out about one o'clock. I came over here to see Mr. Chadwick of the J. I. Case Machine Company. The National Biscuit Company have not said anything about paying my expenses over here. I imagine they will, though. I would not refuse it if they offered it.

JES C. BRANSON.

Deposition taken at Kansas City, Missouri, February 16, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am a salesman in the advertising line, for no one at the present time. I am not a National Biscuit Company man or connected with them. I have a friend with them. I am familiar with a product known as Shredded Wheat and have been for several years. I have known Mr. Watrous, a Shredded Wheat representative, for about ten years. We lived across the street from each other. He is now cereal representative of the National Biscuit Company.

I have been using Shredded Wheat all that time. We used it in my home years before we knew Mr. Watrous. I knew it by the name of Shredded Wheat. We always bought it as Shredded Wheat. The advertising of Shredded Wheat caused us to use it. I think the first I ever used Shredded Wheat was when I was in the grocery business for a number of years in Iowa. I think the first Shredded Wheat I ever used was off my own shelves. I carried it in the store there, and I used it for years, above every other cereal except oats. I had customers come in my store and ask for it. They called it Shredded Wheat. That is the only name I ever knew it by. I never knew anything else by that name.

At the request of Mr. Watrous, some time this month, I went into a store on Troost Avenue, in the Troost Arms Building, a hotel building, in Kansas City, alone. I purchased several articles. I told him I wanted some eggs, Shredded Wheat, and some oranges. He was waiting on three boys. I waited until he had finished with them. I went over and got six oranges and put them on the counter. He asked me what else I wanted. I told him I wanted a package of Shredded Wheat and a half-dozen eggs. He reached over and got the eggs and put them in a bag. He then walked over and brought me a package of Kellogg's and set it down. I told him I wanted a ticket for those articles. As he was going to make out one, I said, "That is not Shredded Wheat." He said, "That is shredded wheat; it is five cents cheaper." I said, "I never saw Shredded Wheat under Kellogg's name." He repeated the statement and said, "Yes, that is shredded wheat, and it costs you five cents less." I picked up the ticket and package and walked out. I identify Plaintiff's Exhibit 195 as the package I bought. Plaintiff's Exhibit 196 is the cash slip on which I paid the bill. He charged me ten cents for the Shredded Wheat. I told him I was getting it for another party and to make me out a ticket. I do not know what I have been paying for Shredded Wheat. My wife does all the purchasing. She usually has Shredded Wheat at home all the time. We occasionally have Triscuit. I do not even know what she pays for oatmeal any more.

My wife serves Shredded Wheat with cream, sometimes with bananas or sliced oranges. She does not bring it to us. The package is always up in the cupboard. If we do not have oatmeal and want Shredded Wheat, we go and get it. I help myself. I always have the habit of serving Shredded Wheat. I just take it and roll it up, and sometimes we heat it. My daughter will eat it if we heat it.

CROSS-EXAMINATION.

THE WITNESS: Mr. Watrous asked me to go to the Troost store. He did not ask me to go to any other. I knew right away when it was put down in front of me, it was not the Niagara Falls Shredded Wheat. I understood the grocer to mean that it cost five cents less than the regular Shredded Wheat Biscuit. I never had anything happen to me anywhere else like this. Mr. Watrous did not tell me to go to any other store but just there and make the purchase.

JAMES F. BELL.

Deposition taken at New York, N. Y., March 24, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am president of General Mills, Inc., milling. I have been in that business about thirty years. General Mills manufacture a general line of cereal products. In the course of my business experience I have had occasion to be connected with the production and sale of cereal products, included among which are some sold under trade name, such as Wheaties, Bisquick, and Gold Medal Flour. Bisquick is one of the proprietary items of General Mills. Gold Medal Flour is a well-known name of one of the products of my company.

I recognize Plaintiff's Exhibit 1 as a product of the National Biscuit Company. I know it by the trade name of Shredded Wheat. I recognize the biscuit taken from the box. My earliest recollection of that biscuit, that I can fix, is 1897. I happened to be in Lawrenceville at school at that time, and it was one of the products served to us for breakfast. It was at that time of the same general appearance it is now.

It was then called by the trade name Shredded Wheat. I have been familiar with that article ever since that time. It has been known by the name of Shredded Wheat. I am not much of a breakfast eater now; but it is used extensively in my home, today, and always has been.

From my experience with the cereal business and my knowledge of the history of this product, I regard the expression Shredded Wheat as a trade-name. It was introduced under the name of Shredded Wheat, and it became known in the minds of the public as a specific product of a specific company. In my opinion, this name is known generally very well to the public as the name of a particular product.

I think the form and appearance of the product, which I have stated remained the same to my knowledge since 1897, have decidedly something to do with the association in the public mind of the name and the product.

I saw the product known as Kellogg's Whole Wheat Biscuit a few weeks ago for the first time. I saw it in a package something like Plaintiff's Exhibit 161. My recollection is not definite as to whether it had a window in it. Looking at the reverse side of the exhibit, that is more like what I saw.

I have seen Shredded Wheat sold in a package like Plaintiff's Exhibit 10, with the picture of a dish on the end of it. I recall that dish. I could not say how long I remember the use of that dish by the Shredded Wheat Company. It was for a considerable period of time, some years.

If I were to see a package like Plaintiff's Exhibit 147, with nothing visible on it except the dish, assuming the product name was covered up, that would suggest to me the Shredded Wheat of the National Biscuit Company or its predecessor company. If I were to

see it with the window package, the window displaying the goods inside, I would make the same answer.

It is the practice among manufacturers of cereals to employ trade names for their products. In my opinion, from my knowledge of the cereal business, I would say that this expression Shredded Wheat is a true trade name. (Question and answer were objected to as incompetent. To be continued against all similar questions.)

Assuming I had knowledge that it was a wheat product, if a Shredded Wheat Biscuit were put under my eyes, without any knowledge beforehand, I would say it was a drawn product of wheat, or a vermicelli-formed product of wheat; and that, as a descriptive name, Shredded Wheat was a poor choice, I would say. If the original people wanted to use the words Shredded Wheat as a descriptive term, I think they picked a poor descriptive term. I would never describe it in that way. If it were put in front of me without my previous knowledge of it, I would never say it was a shredded product.

Referring again to Plaintiff's Exhibit 147, examining the front end of the package and seeing the words A shredded wheat product, I would make the same comment I made before: that I would say that Shredded Wheat meant a product of the National Biscuit Company or its predecessor company. I would not call it descriptive, any more than I would in the sense that I would not describe the product as a Shredded Wheat product. I have never seen this product in any other form than this pillow-shaped biscuit.

It has been suggested to me to make it in another form. I was approached, some years ago, to engage in a wheat product of this character; but the form in which it was shown was round. It was a man from Chicago. His name might have been Williams. He

came to us some years ago and endeavored to interest us in the manufacture of the product. He showed us this globular or semi-globular formed biscuit.

I know no other biscuit made of similar materials on the market today. Triscuit, as I recall it, is a flat, cracker-like product. It is made, however, by the National Biscuit Company, of the same material of which Shredded Wheat is made. Triscuit is a trade name and a fanciful name.

CROSS-EXAMINATION.

THE WITNESS: I do not think corn flakes has been held to be a trade name. Corn flakes or wheat flakes or anything of that sort is the result of a flaking process. As far as I know, it can only be made in that way, in that form, mechanically. For that reason, I would not call corn flakes a trade name, in the sense in which I have called shredded wheat a trade name.

If these machines were known as shredding machines, that would make no difference to me. My idea of a shredding machine is one that tears things up, rips them to pieces. My idea of a shred physically is small fragments of original material torn apart.

Noting the phrase on the bottom of Defendant's Exhibit 81, "It's All In The Shreds," that would not mean anything to me personally. It would not mean anything on that box. What is in the shreds? As you show it to me, that phrase conveys nothing to me. The words Shredded Wheat on that package identify it as the proprietary product. I take the word shredded to mean things torn into fine pieces. As a noun, the word shred would mean one of the particles that resulted from shredding. It would not be a flake. It is the form into which a thing is ripped into shreds.

I have heard of shredded codfish. The word shredded there means a thing torn to pieces. I would

think it was codfish torn into shreds. I cannot imagine wheat in shreds. You would take the wheat and put it through a machine with a lot of knives that tear and rip it, and the wheat would be shredded, yes. I think, if the term Shredded Wheat was meant to describe the product of wheat, it was but a very poor choice. If it was put out as a trade name and the public accepted it as such, it being a wheat product, what difference would the form particularly make? I have a good deal of respect for the opinions of courts.

If I were told the Shredded Wheat Company tried to register this product as Shredded Wheat under a trade-mark, under the Act of 1905, which is the act under which a fanciful or non-descriptive trade-mark is registered; that the Patent Department refused to so register it; and that they went all the way to the Court of Appeals of the District of Columbia and failed to secure such registration, that would not affect my opinion. I would not want to answer a question like that unless I had read all that testimony; but I do not think it would be persuasive. I would not call vermicelli or macaroni or spaghetti shreds. I never heard of shredded cabbage. I would not call sauerkraut in shredded form a shredded product; I would call it sliced. Seeing a piece of cabbage, not knowing whether it had been sliced or squeezed through a hole, the word shredded might not be wildly mis-descriptive of that product; but I would say it was a sliver of lettuce or slice of lettuce or slice of cabbage. You see, I am familiar with the making of sauerkraut.

I am not connected with any other organization besides General Mills. That is a substantial business. I have no connection with the Red Owl organization at all. I am a stockholder in the Red Owl, but I have no connection with it. I am neither an officer nor a director nor anything else. I am a stockholder in it. It is a chain organization. I am a stockholder in

quite a number of chain organizations. I own quite a number of shares in the Red Owl. I think maybe you are getting me mixed with my son, who bears the same name. I believe he is secretary and treasurer of the Red Owl. I think he is. I know he was an officer. Whether he has been changed into some other position or what the exact situation is, I do not know. He very seldom discusses that subject with me.

The Red Owl chain stores are in the middle northwest section of the country. I do not know that they are quite good customers of the Kellogg Company. I do not know anything about their policies.

I would not know whether they stock a product before there is a demand for it. I suppose their object is to perform services to their customers and give them what they call for. That is what we all have to do. I did not know that that chain are very large users of Kellogg's Whole Wheat Biscuit. I would not have the slightest feeling in the matter if you tell it to me. I have no objection if any of your dividends come in part from earnings on Kellogg's Whole Wheat Biscuit. It is not for me to question that. That is their business, not mine.

Noting again the name Whole Wheat Biscuit, as it is placed on Kellogg's package, since you say it is made out of whole wheat, I would not say that that was a trade name. I have seen the Kellogg biscuit. I would say it was an imitation of Shredded Wheat. Since my testimony stated that I thought Shredded Wheat was a product of the National Biscuit Company or its predecessor company, I could not, unless you told me who made the product, say it was not an imitation. My definition of shredded wheat is a biscuit of that kind made by the National Biscuit Company or the old company. I have already testified what I consider in respect to shredded wheat. I would say shredded wheat is a pillow-shaped vermicelli-

formed wheat product. I would not say it was a shredded whole wheat biscuit. I would say that, if it was a shredded wheat biscuit, it would either be made by the National Biscuit Company or its predecessor company, or it would be an imitation. If it were genuine whole wheat biscuit put through a shredding machine, I would not say it was a shredded wheat biscuit. Shredded wheat, as I have already testified, is a product of the National Biscuit Company or its predecessors. I identified that in three ways: as a name, a product, and a shape. Apparently, they have erected in the minds of the public this product in the most desirable ways of coverage that I can conceive of, being in the cereal business; because they have a three-way coverage, as far as the public mind is concerned: name, product and form. No one else has any right, in my opinion, to use either the name or the shape. I think those rights would be exclusive. They have promoted all those three phases over a long period of time; and they have so identified them in the public mind that I think it would not be fair if they did not have proper protection in all three of them. By that I mean the complete exclusion of anyone else, in the name, shape, or form of the biscuit. That would not be a complete monopoly, in my opinion. As long as the patents have run out, if you made other products of wheat, assuming the right existed in the expiration of the patents to use this vermicelli form of product, it could be put into other shapes.

I did not know the shape itself was the subject of a design patent. I am not familiar with the patents on it at all. I am really just basing my testimony on my opinions at the present time. I do not know anything about the history of the business. Of course, I am basing my testimony as well on my experience in the business.

I do not know that the Shredded Wheat product was the subject of litigation with the Ross Biscuit Company, and that the courts held the Ross Company had the right to make the identical biscuit in that identical form. I did not know that the courts had ruled on the trade name Shredded Wheat. I only know it from the trade standpoint. The trade know that shaped biscuit.

If no one else used the words Whole Wheat or Whole Wheat Biscuit for such a period of years that a customer saying, "I want Whole Wheat Biscuit," would immediately mean Kellogg's Whole Wheat Biscuit to the public mind, I would call that the trade name of it if they had come out and firmly fixed it into the minds of a public over a period of time. In that event, one would think they were entitled to it. Our experience has been, however, that they will not, because it is Whole Wheat, and, therefore, thoroughly descriptive. Our own experiences have been, as you might say, along another line. We thought we had certain things covered and they were not covered. Here is a product of which all three features have been covered from a very good standpoint, as far as the trade is concerned. My mind is definitely fixed that the National Biscuit Company would have the exclusive right to the name and the form of its biscuit. So far as making Whole Wheat Biscuits is concerned, of course they would not have it or Whole Wheat products covered. That product, however, I know as Shredded Wheat Biscuit, I assume no one has any right to make except the National Biscuit Company.

As I said before, the flake is the natural result of a flaking process; but I do not think that Shredded Wheat, in the form of the National Biscuit Company product, would be the natural result of a shredding process. I think you could use shredding machines, and, whatever those machines produced, you would

call them vermicelli or tubular, or string-like, spun or drawn results. It is rather a drawn or spun product. I might call them filaments, but I would not call them shreds. I would be very much surprised if, through all the early patents on those products, they were called filaments or shreds. If, in some of the patents and trade-marks, the product of those machines was referred to as shredded wheat, I would be surprised that they called it a shred. I would not call it a shred. It would not mean that to me.

Shreds, as described there, would not represent such a product as the National Biscuit Company product. I would call the Kellogg product an imitation of Shredded Wheat. I would not say that, in the generic sense, it was shredded. When I say imitation, I mean something that looks like something else, but is not really the same thing. I think it is physically an impossibility for the Kellogg Company to reproduce the thing that the National Biscuit Company are making, leaving legal and trade-mark considerations out of the question. As a physical fact, they have made it, and it is an imitation of the original product. This Kellogg product, as it stands, is an imitation of Shredded Wheat. It looks exactly the same as the National Biscuit product. You tell me it is made from wheat, and I assume all the wheat is in it. It is a vermicelli-formed product. I would describe the other product as a vermicelli-formed product. I will assume that Kellogg can turn out a product that looks exactly like the product turned out by the National Biscuit Company. Unless you put them in front of me, alongside each other, I could not tell which was the real one and which the imitation. Unless you told me both were made by the National Biscuit Company, I could not tell you which was Shredded Wheat and which was the imitation.

If you made up a papier-mache car that looked like a Cadillac, I would not call it an imitation Cadillac. If

it was a copy, I would say it was a papier-mache replica of an automobile. It is not an automobile. It does not operate. I think you would have to use the word imitation in a wholly different sense here. I might say that you could make an automobile which looked like a Cadillac and was made to deceive the eye of the observer into thinking it actually was a Cadillac. If you made a papier-mache replica of a Cadillac, he would not say it was an automobile.

I would say that the Kellogg Company is a thoroughly responsible concern. I never examined into its affairs; but I think we can accept it, in the general sense, as a large and responsible company. Referring to Kellogg's Shredded Whole Wheat Biscuit, Plaintiff's Exhibit 165, if Kellogg put a product on the market represented in that way, the matter of whether it was misrepresenting that product, physically, would be for the courts to decide; but, if they put out a shredded whole wheat, even though they made it to resemble shredded biscuit, I would say it was another product. I would say that this term, Shredded Whole Wheat is, in my opinion, deceptive. It would be deceptive; and they would be practicing a deception on the public by telling them they were giving them Shredded Wheat Biscuit when they were not. It is quite a matter for them if they want to make it read Kellogg's vermicelli whole wheat. It is a drawn product or spun product of wheat. They could call it anything they wanted to except shredded. I would think that shredded, originally, had the sense of something being torn, rather than squeezed into a strip. Even if the trade and the public by universal usage had decided it was shredded, what they do decide would not change the psychology of the people or the acceptance of the public with respect to it.

I have not seen Rippled Wheat. That is a new one. Looking at Defendant's Exhibit 88, that is quite differ-

ent. It has not as much vermicelli form to it as the other. It looks more like Muffetts, a product made in a ribbon and wound around. They tried to sell that to us. The fine spaghetti of the market known as vermicelli is a very fine, thread-like thing that you can spin, undoubtedly. It is just like a string or thread. It is done with wheat. Vermicelli is formed from wheat. I have not heard the term vermicelli-form used in connection with wheat processes. I have only used it in my mind for some decriptive term. Let us say a wire or a thread. A thread we conceive of as being actually spun and a wire is drawn.

If it is a fact that, all through the patents for making Shredded Wheat Biscuit, those machines are known as shredding machines, that would not have any meaning to me. It would not affect the term. I regard that seriously as a misconception of those machines. What does a jig mean in machinery? It has now a very definite meaning to me; but, if I were without any knowledge of it and it were put before me, I would not call it a jig; I would say it was a guide. Shredding machines, as I have seen shredding machines, have been a series of knives that tore the product up. I have never seen Shredded Wheat made; but shredding machines would be machines with knives that ripped and tore. Rippled Wheat cannot be made the same as Shredded Wheat. It does not look drawn, if you would take it as you would draw a wire out.

I was down here at this time on the Farm Board Bill and happened to be in the city. The National Biscuit Company interviewed me in Minneapolis at my home. They had arranged to take my testimony there. I happened to call them up when I was East and said I was here in the city, if they wanted to examine me. I was East on account of the Agricultural Bill.

I would not attempt to read the minds of these people; and I would not attempt to say what my own

mind would be if I were faced with that same situation. I do not know how to answer that. I think Shredded Wheat was a very poor choice, if they wanted to use a descriptive name. The originators of this may have thought it was a descriptive name, although it does not seem descriptive to me. At any rate, they had it in the minds of the people, the name, the product, and the form. To my mind, they had an ideal situation, which any cereal manufacturer would like to aspire to when he puts out a product. I think decidedly that they could have gotten a much better term to describe their product. If they wanted a descriptive name, it was a poor choice. I will not go so far as to say the words shredded wheat are actually misdescriptive or deceptive; but I think they have gotten an acceptance of it into the public mind in connection with that product in that form.

RE-DIRECT EXAMINATION.

THE WITNESS: If the originator of this product had wanted to pick out a fancy name for it, I would not criticize his choice in the slightest. If he liked Shredded Wheat, or Rippled Wheat, or Spun Wheat, or anything else like that and wanted to use it, it was up to him. He could have called it anything he liked in a fanciful way, a bird's nest, or anything.

Having had my attention directed to the description of the product by the originator of it, in his Letters Patent 548086, October 15, 1895: "A food or bread, composed of superposed or massed layers or deposits of dry, externally rough, porous, sinuous threads or filaments of cooked whole wheat," I would say that was a description of this product, shredded whole wheat—threads, or filaments, or wire; anything except shreds. It would not mean shreds to me. I cannot tell what was behind the interpretation of the phrase, "It's all In the Shreds."

My trip East was in connection with the Farm Board Emergency Bill, so called. I did not come here at the request of the Biscuit Company to testify here in New York. It happened to suit my convenience and yours. I am cooling my heels around here, waiting for this Congress to take action. I am awaiting action that is to take place today.

Vermicelli is a wheat product, made of hard Durum Wheat, and from other hard wheats.

The Shredded Wheat Company has extensively advertised its product under this name and shape. In view of my knowledge of the extensive advertising of the Shredded Wheat Company, I would say that, in my opinion, Kellogg's Whole Wheat Biscuit, such as I have before me, could be introduced to the public more readily by reason of that. I would say the Kellogg Company was getting out the same kind of product the National Biscuit Company are: that is to say, an imitation of it.

I would not think it was strange if I were told that a witness testified that, in talking to a dealer, he was told he was under the impression the Kellogg Company owned the Shredded Wheat Company. That might easily be possible. There might be a hundred other interpretations.

RE-CROSS-EXAMINATION.

THE WITNESS: As to whether the Kellogg Company has done anything wilfully to create that impression, there is the product itself. It speaks for itself. I do not think the Kellogg Company would have put out a product of this kind or would have had it suggested to them, had the other product not been on the market. As to whether the packages could be taken one for the other, I do not know how well people look at it. They have been familiar with the product and have known it for a long time.

If I went into a store and asked for a package of shredded wheat, I would expect to get the National Biscuit Company's product. If they sent me something else, then I would have said there was an opportunity to substitute for what I had desired. If I looked at the bottom of the Kellogg package carelessly, I could readily be deceived into thinking it was a Shredded Wheat package. If I examined it and saw Kellogg's on it, I would say Kellogg was making an imitation of Shredded Wheat. Am I going to get the same thing or not? I do not know, except by trial. It looks the same.

I would not say that the man who designed the Kellogg package was trying to imitate the other. I have seen the Kellogg biscuit. I was shown one outside the carton. I can see from the depth of the cartons that there is quite a difference in the length of the biscuit, if you see it this way. As they set on the shelves, you would not see that. If you went in the store and saw them as they are set on the shelves, you would not know how deep it was. I would very quickly, however, find that out when I took them out of the package and put them in the plate. If I went in the store and asked for Kellogg's Whole Wheat Biscuit or for Whole Wheat Biscuit, I do not know which product I would expect to get. I do not know about trade conditions. I do not know how far you have gone in your advertising of Whole Wheat Biscuit in this form. If I went in and asked for Whole Wheat Biscuit and did not specify some particular one, I might get Triscuit. I might get any one in the category of whole wheat biscuit, because there are biscuits and biscuits, as we know; and any biscuit that was made of whole wheat would answer the order.

I hope my son is not an unfair merchandiser. I am not familiar with that organization's affairs. I do not know what kind of reputation they have among manufacturers. I hope it is a good one. I preach the

general principles of being fair to all; but how far it sinks into the youthful mind and how hard-boiled they are, I could not tell you. I think General Mills is a direct competitor of the Kellogg Company. I think we were in the wheat flake line before you were. In that sense, we are. Otherwise, I have no particular feeling, one way or the other. I have no personal friends in the National Biscuit Company. I have known some people a long time, as I know other people in the trade.

RICHARD H. MALONE.

Deposition taken at Denver, Colorado, April 21, 1933.

DIRECT EXAMINATION.

THE WITNESS: I have been in Denver since sixty years ago the first day of last February, at two-thirty in the morning. I will be seventy-six on the twenty-third day of March. I am a realtor. I am taking care of the hotel and some other property I have.

During the 1890's, I was a partner of F. W. Crocker, at the cracker factory, on Nineteenth and Blake, which is still in existence. We sold it out in May, 1890, to the American Biscuit Manufacturing Company, and then they afterwards consolidated. So the factory to which I refer is still in existence as one of the National Biscuit Company's factories.

At that time, the factory was equipped with the usual cracker-baking machinery. I came here in 1876, and it was equipped then. It had three Reel Ovens.

I recognize the document shown me, Plaintiff's Exhibit 234 for identification, in which we agreed to consolidate with the biscuit folks on the Missouri River and out this way. That is Mr. Crocker's signature, my signature, and my typewriting. It is dated May 19, 1890, and has reference to the selling out, to which I referred in my testimony.

The F. W. Crocker named therein was my brother-in-law, and at that time my partner. I met a man named Henry D. Perky. I have seen him a good many times. It was between 1888 and 1892 or 1893, I think. I met him many times. He was interested in the Circle Railroad here, which the Santa Fe afterwards had. My brother was interesting in trying to promote it. My recollection is that it came along in 1888 or 1889, when I first met him. He was interested in the railroad I speak of during those years. I met him in connection, also, with the manufacture of shredded wheat. I have been thinking about it, and I would say it was 1889, but it might not have been until after 1890. I will tell you why I remember it. My partner, Mr. Crocker, went to Europe. I had a stenographer, because I did not know how to spell to write him, so she was there along in those years. I did not have much to do with Perky. Harry James was interested with him and Milo Smith, a man who had an addition out here, and they came in and asked me about backing them. They said Perky had only baked them in the kitchen stove, by hand. He asked me if I would take them over and bake them in the plant. They were then located in what was then called Market Street, the third store from Eighteenth, going toward Nineteenth. That is when I first had anything to do with this shredded biscuit. They did not have much of any plant. They did not have much money. Harry James, whom we all loved, was financing it. He called me over and showed it to me. It was a machine run by hand, as I remember. It ran in rows, with a little space between each one. I said I would cook it for him. We talked it over, and they went to my factory to see what we could do. We had high racks that we put pans in between. I told them we could fix it over here or they could bring it over and we would cook it for them. We sent the racks over to them. The foreman and I built a fire and heated the oven. We

asked them what heat they wanted. They did not know anything. We tried out one or two of them. Then, we ran about four of those racks full. They baked them and took them off.

I said, "What are you going to do with them?" Perky said, "I am going to sell them." I said, "Harry James, don't I ever get one for cooking them?" So they gave me a little pop box full and I took it up to the house to see if my folks wanted to eat it.

What makes me remember those things is that Crocker was in Europe then, also the fact that we sold out to the National Biscuit Company in 1890, Mr. Crocker and I. After we sold out, the question came up whether I had a right to bake. I did not give a darn if I did not. I baked it for nothing, because I did not care. So it must have been about that time; because I would probably have disobeyed the order, if some friend has asked me to bake some for him. I figured it was in those days. I do not remember my partner being there at the time; but I do remember seeing the biscuit there in the row, after being sort of spread out. They were cut off, just about the same length that you are running them.

I recognize a biscuit out of Plaintiff's Exhibit 1. I think the biscuit at that time were perfect in that way. I do not think it has ever been changed. Perky called them shredded wheat biscuit, and I asked him what he was going to do with the ones I baked for him. He said he was going to sell them. I baked them on two occasions.

My stenographer at that time was Mrs. A. M. Nickerson. She is living here in town now, working at the State Capitol. She was with me nine years. Harry James and Milo Smith were interested. Harry said, "Dick, do you want to go in with it? Do you think it is a profitable thing?" I said, "I will put in some money with you"; but I did not. I never saw Perky after

that. The last time I cooked it was the last time I saw him. He never came near enough to give me an opportunity. I do not remember anything about where they baked them after that. He may have come down once or twice. I do not remember. They told me they had been baking them in their kitchen stove.

Another means I have of fixing the time is that my son was born in 1887. He was very sick for three or four years and I had my teamster's wife go over to the house to take care of him and my wife. The name of the teamster who was working for me at that time was Washington Sturns.

CROSS-EXAMINATION.

THE WITNESS: I stayed with the factory after it was sold to the American Biscuit Manufacturing Company, until they went in with the National Biscuit Company, eight years. I was manager. It would have been physically possible for me to have baked this biscuit just as well after the sale as before. The ovens were all there. I am quite certain this biscuit was baked after Mr. James became interested; because I would not have done it for anybody but James.

I know Mr. Harry Lindsley, after he got into politics. I do not know that Mr. Lindsley was solicited to become interested, and refused but got his partner, James, to go into it. I never heard him mentioned in my life on that subject. If he stated that, after he turned it down, about 1893, Mr. James took an interest in it, I doubt him. I do not think his statement is correct. I do not know anything about it. I never knew before this week that Lindsley had anything to do with it. I would doubt the statement because I have known him in politics for years. I have fought with him and worked with him. You can draw your own conclusions. I would not believe all of it. I will tell Harry that this afternoon when I see him. There is no question that

James did take an interest in it, because James asked me to cook it for him. James died a year or two ago. There is no question that whatever I did was after James was interested, because he came over and told me about it. They had kind of a little hand machine that you might call a sort of coffee grinder, if you wanted to. My recollection is that it had a handle. It was on a small table of some kind. I recall how the wheat came out of that machine. It started up here. They put the wet wheat in the hopper. I think they said they had steamed it. At any rate, I ate some of it. It ran out in a row, something like that, and then there was, as I remember it, a little space between them so they would not touch each other. I do not mean each string or shred was separate. Each one of those shreds was strung out. They were all so close together that they made a unit something like that biscuit Mr. Vilas has.

Those I cooked were not piled up on top of each other. They ran like across, right across there, we will say, and then put on to my iron pans, about two and a half feet wide. I have forgotten just what length those iron pans were that we had. At any rate, those threads in there were about two and a half feet in length as they were baked in the pans. If that iron pan is not that wide, you know, it would not be. The shreds were as long as the pan. I think the pans were approximately two and a half feet long. That is the way they were cooked. My recollection is that there were three or four of those long shreds, run close together. Then here would be another and here another. Then they would run those out and cut them off and then run some more. There would always be a little crease between those layers of wheat, showing there was a division on the machine. I have drawn on this piece of paper four long shreds. There would not be four more shreds come on top of them, that I know of, so as to leave

spaces between them. I never saw them on top of each other. I should say they were about half an inch thick, each of the threads that went out, about half an inch thick. That is a continuous thread, and those ran big enough so that they ran together. When one would come out, it would be right close to the next one, and so on, right all the way through. They came out the whole three or four threads at one time. They were noticeably apart from each other. I described each one as about half an inch in thickness. I cannot be sure about that. As far as I can remember, they were about like that one there when they came out of the machine. When the wet wheat was in here, it was not more than half an inch square. When you cooked them, they swelled up. Each one of these threads in here was half an inch thick, about. There were four of them right close together. When we cooked them, they were together just like Plaintiff's Exhibit 1, ribbon-shaped threads, right close to each other, right next to each other. I never cut any or saw any cut in cross-section. There were three or four of them as we have drawn it here, as I remember. None of them were lying on top of each other. They ran together before we even touched them. When they came out, the wet ones would be so close together that they would stick together.

(Mr. Clarke's sketch was marked "Defendant's Exhibit 106.")

Making my own drawing, now, this is the way they were when they came out on the pan, on Defendant's Exhibit 107, but there was a decrease, an impression between each of those. It was not a space. They were already closed when they ran out. But it was a depression. They would run in this way, and then those would all come through with a depression in there like that. They were stuck together and you could pull them apart on those lines. I do not remember about that slight

depression, only as it was out in a row. By the time we got them over from their place, which was about a block and a half from where they made them to where we baked them, they were all one. They went into a solid mass or sheet, with no layers on layers, whatsoever.

It was not like is shown in perspective on the sketch you now show me, because the ridges between them showed on top. They called this product Shredded Whole Wheat Biscuit at that time. I did not pay much attention to the machine. It was the finished product I was interested in. I did not know Mr. Perky very well at that time. I do not know anything about his work in Denver in connection with the Circle Railway, any more than if he went away and never came back. I did not say Lindsley was a liar. I doubt some statements of almost every politician. I see no reason why Perky should not go away from here after the Circle Railway time and go down to Texas. I will not make any expression of opinion, one way or the other. It is a matter of indifference to me, what he is and what he does. We are good friends yet. We have been working in politics lately. We were both in politics lately. I do not believe he would say as much about me as I have about him. I do not think he would have any right to, and I would call him a liar if he did. I will fight with him if he wants it. He has no cause of complaint of me.

I think I saw the little machines work, but I do not remember much about that. I was only on the baking part. I am sure I saw a little machine; but I knew nothing about it or about any of the machines that made them. My impression was that it was a little hand machine, operated by a crank. My recollection is that the only bakings I did were the two I have described. Those pans were about that long, and there would be about twenty-eight or twenty-four of those wide, as I remember. I have not been there for twenty-one years. Those were put on a shelf in a row,

like that. That was a ten-shelf oven. I am guessing, but I think there were about eight of those pans on the shelf, and I cooked two ovens full. That would make a complete baking of, I should say, about a hundred and fifty pans. Only a few days elapsed between those two bakings. I cannot remember anything that went on before or after that. They did not want my money. I told them I would go in with them. They did not come back to get my money. I would like to have done it. It is my understanding that James went in with Perky. I never heard of any litigation afterward occurring between Perky and James.

I kept some of the biscuit. I ate them and my babies ate them. We liked them. We kept those we did not eat around for a month or so in a paper box. It might have been longer. At any rate, I had a box full of them. I ate some of them. I would not eat them all. I still quite often eat Shredded Wheat of the National Biscuit Company. I never have eaten any of Kellogg's shredded wheat, and I am not going to, because they had no business to bring it on. I like their corn flakes. I will not eat any of their shredded wheat if I can get the National Shredded Wheat. I do not remember eating the Kellogg biscuit. You give us too little for our money, on the size of them. I noticed the difference in the size right away. I thought we had been skinned on the same thing for the same amount of money, so I did not buy it. I have seen the Kellogg biscuit packages in the stores, I think on the shelves, and I have seen them in the windows. I thought they were so much less than I had been getting. I do not remember having tasted them. I do not give a darn whether I taste them. I can get more for my money on the National Shredded Wheat, so I am not going to work for either one of you. I am going to work for Dick Malone. I do not

want the Kellogg product if it is soggy and heavy. I do not know whether it is. I have not eaten any of it. When I saw it, I had no difficulty in knowing it was Kellogg's. I knew it was cut off. There is a little of it, sure, but darned little of it.

I never met Doctor John Harvey Kellogg at that time. I do not remember whether the corn flakes came out before or after the shredded wheat. I use corn flakes. I like them, and I always insist on Kellogg's. I would not be prepared to dispute a man like James, if he were alive. If Harry James said that Perky only came back about 1893 or 1894 from Texas, I would believe him anywhere. Perky I do not know anything about. That is a matter of indifference to me. I was right there in this cracker bakery from 1876 to 1898. I would place the time of the baking this way: that we sold out to the American Biscuit Company in May, 1890; and it was before that time. Even if other men told me they had records to show Perky got back from Texas in 1893 or 1894, I would not take back what I said. I would stand hitched. I would testify just the same that Perky was not in Texas at that time. I would doubt him if he said that Perky had been down in Texas for several years and only came back in 1893, because I would stand hitched on what I said. Perky used to have opinions about having railroads and other things, and real estate, varied, some opinions between him and other folks, and maybe between me and other folks. I could not get him to the point where he would change. I would not attempt it. I absolutely baked these two bakings for Mr. James. My sole ground for placing this before 1890 is this sale that took place to the American Biscuit Manufacturing Company. My duties as manager continued on just the same after that sale as before. Mr. Crocker was manager for the American Biscuit Company from 1890 until he went to manage a biscuit factory in New

York. I was assistant, and then from that up. I was in the plant all the time from 1876 to 1898. This physically could have taken place, as far as I was concerned, at a later date. I was there and the plant was there. If Harry James had asked me to, I think I would have baked them up to the last day I was there, in 1898. Whether the National Biscuit Company liked it or not, I would have done it. I do not remember whether Milo Smith was there with James; but he talked to me about the proposition. I think that either he got James in it or James got him in it. They were friends. We were all three nice friends. I do not know that Smith was interested in any shredded wheat company at Colorado Springs. He was a real estate man out at Montclair, put on an addition out there. Mrs. Nickerson, my secretary, knew about this baking. She was with me from I think 1885 up to 1902. I called her up on the telephone this morning and asked her if she was dead or alive; I had not seen her for so long. If these men wanted her down here, I asked her if she would come, and she said yes. I got her the job she has, under a darned old Republican. I am a Democrat.

I know nothing about Perky whatever. They always told me they steamed the wheat.

RE-DIRECT EXAMINATION.

THE WITNESS: As I told you, the biscuit I baked for Perky or James looked like the biscuit Mr. Vilas has in his hand. I notice the rather small thread-like pieces of wheat. I do not remember the details, but they were that size and baked up that way. In my drawing, I made this along that way, simply meaning it this way; but then, when the heat got on them, they all ran along in one solid bunch. Perky attempted to get up a biscuit of the size I see here now, before

baking. So, when we got through, we had a biscuit like this one. You realize that is the fact, but that is a darned long time. He was not making another product at that time. He was making this same biscuit.

My recollection is that we took what we call a half-sized cracker box, about six or eight inches high and packed them in, loose. I told Harry that, if he wanted to take them, he could take them. I did not want to run the trays back over yonder, because it jolted them too much to run them back and forth too much, so I gave him the boxes.

RE-CROSS-EXAMINATION.

THE WITNESS: I do not mean to change my sketch, Defendant's Exhibit 107, in any way, as covering my recollection of how the threads looked. They looked as though they were longer. They came out longer threads. That is the way I remember it.

WASHINGTON STURNS.

Deposition taken in Denver, Colorado, April 21, 1933.

DIRECT EXAMINATION.

THE WITNESS: I am not at present employed. I am a pensioned employee of the National Biscuit Company. I first went to work in the biscuit business in 1887, for Mr. Crocker and Mr. Malone, in the bakery down here on Blake Street, the same place it is now, but a different building. I drove the delivery wagon. I always did for the whole company. I never did anything else. I worked for them all, including the National Biscuit Company, thirty-two years, exactly. Then I was pensioned. I have been living home here in Denver since that time.

I did not really have anything to do with the baking of some shredded wheat that was baked in the bakery, but I saw what they did, a part of it. I saw them fetching it over to the National Biscuit Company—whether it was National Biscuit Company then or not I do not know; but it might have been the American. I remember the Crocker Company sold out to the American at some time. I saw them taking the biscuit over there to bake them. I cannot remember exactly just when it was. I did not pay very much attention to it, but I saw them bringing them over, and I saw them there. I saw them wheel it home, after it was cooked. I saw the biscuit.

I have been familiar with shredded wheat biscuit since that time and used it. I use it now. That biscuit was not very different from the shredded wheat biscuit I use now. It was about the same, I think.

It was my wife who went over to take care of Mr. Malone's son. I remember that circumstance. I spoke to my wife last night, but she does not know the time. It strikes me it was somewhere along in 1891. I do not know, though; I could not tell. It has been so long ago, and I did not pay much attention to it. That is the best I can do about fixing the time, somewheres along about then.

CROSS-EXAMINATION.

THE WITNESS: I did not hear anything about shredded cereal coffee. I do not recall eating any of this biscuit that was baked at that time. I do not believe I did. I kind of did not like the looks of it; and I did not pay much attention to it then, although I saw them coming with it. I talked with my wife last night and she could not help me fix any date. I could not fix it myself.

WILLIAM S. HURD.

Deposition taken at Denver, Colorado, April 21, 1933.

Direct Examination.

The Witness: I was a merchandise broker. I have not been in any business for the past three years. I have lived in Denver sixty years, next September. I came here in 1873.

I have heard about Shredded Wheat. When is something I cannot tell you exactly. Mr. Harry James married a niece of mine. He was a young man just out of school, and his father was one of the big stockholders in the Denver Gas Company. He worked for them but in the office there. He came down to me one day and wanted me to come up and see a machine. The party wanted to buy a gas engine and operate it. He said, "It is in your line. It is cereal. I want you to see it." I said all right, and we went up. I do not want to be too positive on the location, but I think it was Seventeenth and Glenarm. Things have changed a little up there. It was not Arapahoe Street. It was in the basement. I saw a couple of cylinders, with the help around it. They put in some wheat, and it turned out this cereal, a long shred. It took me right way, kind of, the novelty of it. He came down afterwards. He said, "You have a chance to get in on that. This fellow is hard up. Do you want any of it?" I said, "Yes, Harry, I would like some of it." He said, "How much do you want?" I said, "I will take what you do not want." He said, "I just wanted to let you in." I said, "Just forget it, then, because I have my business to attend to. Things have got to be developed." He said, "I am going to declare you in." To what extent I was in I do not remember. I do not think I ever put up any money, but I think he did put

in five thousand dollars for a quarter interest. That is my recollection. That was Mr. James.

The time of this transaction was sometime in the summer of 1893. I fix that date by the time of the World's Columbian Exposition, which was scheduled for 1892, but they did not get the buildings done, and they postponed it a year. They had gotten this Shredded Wheat up so that they made some biscuit like that, but we we could not do anything with it. We could not get Perky to do anything. It was just a hopeless case. I told Harry, "If we could get Perky to promise to turn them over to Douglass & Stewart" who were manufacturers of oatmeal and rolled oats in Cedar Rapids, I would go to Chicago and meet Mr. Mower and get an engagement to meet him there. He got Perky to do that. He said, if they would take half of it, he would turn it over to them. I went to meet Mr. Mower very much elated. I was used to meeting him. He came out very often. I got him up to my room at the Palmer House in Chicago, and I showed him the article, along in 1893, in the summer sometime. What queered the deal was that the wheat was roasted by somebody here, I do not know who. When he opened it up, it was green with mold inside. He said, "There you are; you can never make a commercial article out of it." I could not talk him out of it. The wheat part had not been evaporated properly, and it was roasted too quickly. That was it. He said, "No, you could not put that on." That was the way they turned down the biggest thing they had ever had a chance to get.

The biscuit I had at that time in Chicago had a very close resemblance to the biscuit lying on the table here, except that that might be a little smaller. I do not remember just about that; but it was supposed to be one portion. I would say this was smaller than the Chicago one. They are of the same shape. Perky

called it Shredded Wheat. The name of the company was, I think, the Cereal Machine Company. When they reincorporated it and changed it to Shredded Wheat Company, I do not know. I had no further connection with Perky and his company, only in the way of advertising the thing. Mr. James was a rollicking kind of fellow. He used to get up parties to go and hear Perky lecture on Shredded Wheat. It was quite a joke when we were around with his friends in the evening. They would joke him about Shredded Wheat. One of Perky's favorite statements was that it was the whole wheat berry, denuded of its silicious—meaning glassy—tar coating. They would say, "Is that denuded of its *salacious* tar coating? Do not touch it."

I did not go into Shredded Wheat as an investment. I had it just as a flyer; that is all. We got out, after we sold an interest to somebody in Long Island, I believe, some clique there. They had a big factory there, and Harry made me come down with him and attend a stockholders' meeting. We had to wait for people around there, nearby, who had not yet gotten in. I have forgotten the man's name. He was the bookkeeper who used to be out here with him. He was engaged in balancing the books, and I offered to help him. I said, "I will go crazy in this little town, if I do not get something to do." That was Worcester, Massachusetts. I offered, and I went over the books with him. Of course, that has nothing to do with it. I found enough about it in the books, though, to convince me we did not want to spend much time or money on it. It was just the way he went after Perky. He did not say that if people would eat Shredded Wheat, it would make musicians out of them. I did not know Mr. Perky before that, at all. I did not know him in connection with the Denver Circle Railroad. I do not know how long before I saw him he had been making this Shredded Wheat. It must have been a few months be-

fore. Anyhow, that is my recollection, because, as I say, we were jollying Harry about it all that time. It was quite a joke, until they got in shape so we thought we might get somebody to manage it.

CROSS-EXAMINATION.

THE WITNESS: When I say Harry, I mean Harry James. At the time he took me to see the machine, he went over to look at it in the Gas Company's place. He had not yet put anything in it, I think. It was after 1892 or just about that time that James put his money in and declared me in, also. I could not say if some of James' money went into Perk's restaurant. It seems to me I have some recollection of his starting a restaurant. I was never in it, and I do not know. I do not know anything about Perky getting any money in regard to Shredded Wheat from anybody except James, at that time. He never got me to put any money in. I never heard of litigation between James and Perky, a few years after that, in which James got it. James did not buy Perky out. He sold the interest, as I understand it, to some people in New England. Then that money he gave bought his interest to get his money back. How much it was, I do not know. He knew Mr. Lindsley, the lawyer here. I never heard of a Western Union telegram in the way of a bill of complaint Perky wanted him to file against James. About that time, however, James sold out his interest to Perky or someone. It was after we came back from Worcester; but I do not know what year that was. I think, if there had been any lawsuit about it, we would have heard about it.

XQ. 42. I show you this photostat of an advertisement which appeared in the *Denver Republican,* Sunday morning, March 11, 1894, containing at the left-hand side, running the whole length, a picture of this Goddess Ceres, with the prominent words *trade-mark*

at the base, where she is standing on the world. (Reading.) Have you ever heard of any advertisement of that sort?

A. If I had, I had forgotten it.

XQ. 43. That sounds a good deal like Perky, does it not?

A. Very much, except that he has not got in there his ability to develop the brain and to develop any natural talents you have got and bring them out.

(A photostatic copy of the ad referred to was received in evidence and was marked "Defendant's Exhibit 108.")

THE WITNESS: He did not say it would make a musician of you there, but it would. He says "The reconstruction of your physical form." That is fine. Maybe that is what is the matter with me. I have eaten it all the time. I have just commenced to gain flesh today, after about twenty-five years.

The rather broad statement that "Absolutely pure food is manufactured only by the Cereal Food Company, 1632 Arapahoe Street" sounds very much like Perky. That is a sample of the lectures we used to listen to. Every once in a while, Harry would get up a group, among his friends, to go to a lecture. I never went to them. Mr. Perky was a very peculiar man, very headstrong. His own brother could not get along with him. He was very domineering. His brother told Mr. James, I understand, that there was no use trying to get along with him. He would not give up an inch; and it was a very discouraging thing to have a minor interest in. I never heard anything about this Shredded Cereal Coffee, referred to in the advertisement. No doubt that is correct, because it would make ice cream. You could put it in ice cream. They probably took shredded wheat and made some sort of decoction out of it, being a cereal coffee. There was hardly anything

it would not do, and he believed it, I think; because I think the fellow was not all there.

I do not remember going to the Arapahoe Restaurant. I do not think I ever did go in it. I have heard folks talk about it; but I never went in it. Perky was a lawyer. He claimed to have been the inventor, at that time, of this whole wheat product; and he told me how he invented it. He had the flu, and it left him in a condition where he could not keep anything on his stomach. He went into a sanitarium and he could only eat whole wheat. It was all he had to live on. The way he discovered this was by experimenting with the different forms he could put the wheat berry in so as to make it palatable. That is how he discovered this. I do not know about his being away in Texas. He was promoter of the Circle Railroad and the extension they built here. I did not know him then. I understood he was in this district. He built the railroad away back of Cherry Creek, back to where Montgomery-Ward is now, called the Circle Railroad. If he had any money in it, he lost it. Everybody else did. He was not looking for money from James when I met him. James was simply a young fellow the Gas Company sent over. He did not know him. I understood that five thousand dollars of James' money went into it. Mr. James was also connected with the Denver National Bank. His father was one of the promoters of that. When he came over to get that gas thing, Mr. James was quite elated and came down for me. If he had known it before that, he would have come back and said something. Mr. Perky was considered a very peculiar man. We took this bookkeeper of his, whose name I do not remember, down to Worcester. He knew Perky's eccentricities and shortcomings, and knew all about him. Perky managed the Shredded Wheat Company at Worcester. I do not know what sanitarium Mr. Perky was in when he was experimenting with the shredded wheat or making

wheat into different shapes. They called his trouble the flue, now; but we called it grippe then. I could not tell you if he was in a sanitarium in Texas.

I understood the shredded wheat biscuit I had down in Chicago in 1893 to show Mr. Mower were just gotten up for a sample. I do not think those were baked at the American Biscuit plant; because I do not think they would have monkeyed with it. I do not think they would have gone to the trouble of making them for him. It must have been some little bake-shop. I do not know whether Mr. Malone put them through the ovens or not. It was the first item I had ever seen in that shape. I am quite certain that, if Mr. James was connected with it and asked him to bake them for him, he would do it; but James did not have anything to do with the matter until around 1893.

The biscuit broken open at Chicago were found to be moldy inside, which spoiled any deal with Mower. They had not been properly baked, and it was hot weather. I had them in my grip; it was very hot; and they were moldy. As to the deal conducted by correspondence with Mr. Mower up to then, the idea was to get the Douglas & Stewart people to take the patent over and run the business. They were cereal manufacturers at Cedar Rapids. I do not think they were given to me as good representative samples of the biscuit. They were just gotten up as a sample of what they were making then. I had them in my grip probably forty-eight hours. I do not know if Mr. Mower is still alive. My impression is that he passed away a good number of years ago. I was not personally acquainted with Milo Smith. I knew of him. I do not think, when James was in there, they tried to make any deal with Milo Smith. He was, of course, with Milo Smith's son, Mr. Salisbury Smith.

I knew Ben Brewer by sight. I had no personal acquaintance with him. I do not recall H. C. Davis. I

would not know anything about the certificate of incorporation of the Colorado Shredded Wheat Company, Defendant's Exhibit 109.

I think Harry James and E. Salisbury Smith were schoolmates together. They were boys together. I guess they went together to the public schools here. I do not know whether they went to the same college or not. They would be in the same classes. I have no recollection of the incorporation of any company. I had no stock in any of it. I never had any stock issued to me. Mr. James had, and he was holding it for me.

I never met John Harvey Kellogg, of Battle Creek, Michigan. I do not know of any other activities of James in a business way, in connection with Shredded Wheat. I really do not know much about his activities prior to the time he took hold of it, until he went out. My understanding was that he went out after we were at Worcester and found things in such bad shape that I advised him not to continue. He wanted him to go down to the Genesee Valley and buy wheat. I said, "Harry, I have been over these books, and the thing is hopelessly insolvent. You do not want to go down there and contract for white wheat for a fellow who has no money to pay the freight on it. Do not even think about it. If there is a grain broker in Worcester, he can get all the white wheat he wants, and you do not have to go down there." Harry suggested that to Perky, and that was all right. He could get it through the broker, so we came home. As far as I know, that was the last time Harry had anything to do with it, except they got others to go to Niagara Falls probably and make a deal with Harry. They took over the Shredded Wheat. I do not think he got very much out of it. I cannot fix the approximate date when I was in Worcester with James. It was quite a while after this day in 1893 I spoke about. Perky wanted James to buy white wheat in the Genesee Valley for him, and my

judgment was they were hopelessly insolvent then. The bookkeeper told me the machine he had in there cost thirty thousand dollars. It was a long roll with six parts. I said, "My God, how is he going to pay for it?" He said, "I do not know, but he has two more on contract." He said he was in comm rcial production at that time; but, in going over the books, I found a number of firms who were very good, just like a bank, who never left a minute go by without paying a bill. They would always get one and two per cent. discount. They had bills against Frank Sprague and Warner. My recollection is they were so far overdue that, regardless of Perky's statement, they were not sales. They could not have been. They must have been on consignment; otherwise, they would have been paid for long ago. They were regularly in business, had a place of business, a factory, a bookkeeper, and were doing business. They were preparing for a much larger business; but I could not see how they were going to run it through.

They wanted James to go from farm to farm through the Genesee Valley and buy up white wheat. It never was necessary to do that. The broker in Worcester could do it. He would smother him with white wheat, if he gave him an order.

(A duly certified photostat copy of the certificate of incorporation of the Cereal Machine Company, with three certificates of amendment, was received in evidence and was marked "Plaintiff's Exhibit 235.")

MR. VILAS: Mr. Clarke, I have in my hand and have already shown you a letter from the division passenger agent of the Atchison, Topeka & Santa Fe Railway Company, dated April 13, 1933, addressed to Mr. Brace, our manager, with reference to the connection of Mr. H. D. Perky with the Denver Circle Railroad. Owing to the difficulty

and expense of making legal proof of the facts stated therein, I am going to ask you to permit the letter to be copied on the record, with the stipulation that the witness, if called, would testify to the facts set forth in the letter.

MR. CLARKE: Yes, that is perfectly agreeable to me. It is so stipulated that, if called as a witness, he would testify to the facts stated in this letter, and I will ask the reporter to copy that at length into the record.

MR. VILAS: It should be marked as an exhibit and copied at length into the record.

MR. CLARKE: Yes.

(The letter referred to was received in evidence and was marked "Plaintiff's Exhibit No. 236.") (Reading.)

LEWIS H. BRAKEL.

Deposition taken at Denver, Colorado, April 21, 1933.

DIRECT EXAMINATION.

THE WITNESS: I have lived in Denver fifty years, this fall. I am a machinist, with The Denver Machine Shop. I was employed by several companies in the early nineties. I have been a free lance, never married a job in my life, have changed quite often.

I have seen shredded wheat. I recognize the biscuit on the table as some of it. I guess I have been familiar with that forty or forty-one years. I was running a shop of my own. At that time, I was a blacksmith. Since, I have switched my trade, and I have run a shop facing Fifteenth Street, George Leyner. The two come close together at the row. I did work in that

shop on machines for Leyner to make those biscuits. To the best of my recollection, that was about 1892. I did work on part of the machine. I hardened the rolls, some of the rolls. I also remember making an arm attached to the machine, to slide these tables back and forth over a cam; but it was not a success. The function of the table was to build up that biscuit. It was underneath the rolls and was to catch the shreds that came through the rolls, just like my finger would come through rolls, and they would fall like this on this table, but this table would move back and forth, and it would build them up, not zig-zag, but straight in a line, one on top of another. It was sent back and forth in a plane, this way, under the rolls, and piled them up. This lever did not work. Later on, we designed something that did work. We later had a rack and pinion, and that worked fine. I did that work for Leyner. Later I hardened some of the rolls. I can give you an exact drawing of the rolls, in lead pencil. The rolls on the upper machine were this way. I would say this was seven inches in diameter, as near as I can remember. The collar on here is just simply to keep the oil on this bearing from getting on this roll and staining the product. A shaft went right through here. One roll was plain, ground smooth; the other roll was grooved, twenty grooves to the inch, straight grooves around, not like a thread to convey, but straight curved around, twenty to the inch. I remember that distinctly. Those rolls were close together. I expect, under extreme pressure, they would be in contact. That I am not in a position to state. Those rolls crushed the wheat. I saw lots of biscuit made in those machines. They looked like the biscuit that is lying on the table here, after they were baked. Before they were baked is the only way I liked it. The wheat, I understood was cooked in a boiler before it went through the rolls. I believe the time was fifty-five minutes, as I remember

on that. They were very fussy about that time. It had to be a certain length of time to get the wheat at a certain texture before they could dare to put it in, before it would go through the rolls; and then it was put through the rolls and cut and baked. This was at Arapahoe Street, between Sixteenth and Seventeenth, the first I really remember seeing the machines working. They had a restaurant there, and the machines were in the basement. They were selling their shredded wheat in the restaurant. They called it at that time shredded whole wheat.

CROSS-EXAMINATION.

THE WITNESS: When I saw the machines, I do not know whether it was shortly after they were completed. Mr. Berky was his name, if I remember right, though some pronounced it Perky. He was a promoter, and he took a whole bunch of us up there to dinner one day, in the restaurant at Arapahoe Street. I had been in there, possibly two or three times. The machine in the basement had this reciprocating table for piling the biscuit up.

FURTHER DIRECT EXAMINATION.

THE WITNESS: I do not remember delivering the machine to the place of Mr. Perky. I remember installing some machines over here on Seventeenth Street. To the best of my recollection, that was after the restaurant, although I have been informed it was before. We installed the machines. We did not deliver them. They were the power machines for making that biscuit. They had to have the reciprocating table to make the biscuit. I installed those machines for Leyner. That was in 1893.

FURTHER CROSS-EXAMINATION.

THE WITNESS: I had an occurrence at that time that kind of made it a little more prominent, so it would be fixed in my own mind. 1893 was the year of the panic. Two Denver banks, I believe, proved

stable. The rest of them, quite a few, went broke. I had some money in the City National Bank, then at Sixteenth and Larimer Streets, now the Nassau Building. I got scared of this money and took it out. My wife would not keep it in the house, and I said I would carry it. The night we installed this shafting and these machines on Seventeenth Street, we finished about two or three o'clock in the morning. There were no street cars in those days. The horse cars quit at eleven or twelve o'clock. I lived all the way up at Thirty-third Street. I hunted me up a clean piece of pipe, and I got my things ready, and Clarence said, "What are you getting that for?" I said, "Well, Clarence, I have a thousand dollars in my clothes, and, if anybody gets it, they are going to get it the way I got it." I trusted him. I knew him. That panic did not last nearly as long as this one did. We had a Republican in office. It made a Democrat out of me. They had to put Roosevelt in to stop this one.

I would certainly be surprised to find that the machine I am talking about was made after the first of the year 1894. We could not install them unless they were built. I could not have put them in before they were made. If the first little machine was started after 1894, of course, I could not have put them in two years before that.

Seeing the first advertisement of Arapahoe Restaurant on March 11, 1894, I still would be convinced that I put in those machines even two years before they started to be made. Some of the others tell me this was previous to the restaurant. My recollection is that this was after the restaurant.

My recollection is quite clear and it is my belief that it was a machine made by Leyner. I could not swear to it, because, previous to the time Leyner built these machines, I knew nothing about them at all. All I know is that, sometime during that panic that ran

from 1893 for some years, I carried a pipe and a thousand dollars in my pocket. That was when I came home from putting the Leyner machine in. It was set up for more than one machine. They had a lot of trouble with the rolls of the Leyner machines. They would become elliptic. They would bend over or bust or crack, and everything else. We even sent them to Browne & Sharpe, in Providence, Rhode Island, and asked them to make four or six, and they could not make them, although they are considered the best in that line in the United States. We got the steel from their place. Leyner had some little hand machines. I would not want to say they did not have any hand machines in the restaurant, but they had power machines there. This was sometime after the power machines were constructed and completed. The trouble with the Leyner machines and the rolls took two or three years after they started making these machines, before they got the difficulty with the rolls ironed out. In those days they did not have the carburizing furnace. There was no carburizing furnace in the City of Denver. In fact, it was not known. We tried to make them out of cast iron and out of mild steel and cast iron. It was not satisfactory. After that, we tried tool steel. Every once in a while you strike a little pebble in the wheat, which is generally flint. Unless your roll is glass-hard, it punches a hole right into it. It may ruin the roll; otherwise you will ruin your stomach. It will do it, anyway. I would not eat the stuff. Nowadays, they call it roughage. It is fine for cows and sheep and hogs; but that stuff is no good for humans. Some of the rolls would break and some would go elliptical. We got some steel from Brown & Sharpe. Then, we got some from a company in Pittsburgh. We got it from a Moore Company. You might get some data there. We took it over to show them how it busted in the hardening, just a piece, and the next day the piece let go and

busted, just lying on the desk. It was the strain on the metal, and it finally let go, just let go, the next day, lying right on top of the desk. You fellows laugh at that, but I am telling you what happened.

That was a problem. Even when we moved to the other building, we tried to harden it. At that, we had as good success as Brown & Sharpe had. I do not think I was interested in this roller business after they moved to Worcester, Massachusetts. I do not remember about that. The trouble with the rolls ran over several years from the time Leyner first started to make the first machine. Later on, another plant took it on. They thought they were equipped to harden the rolls. Nobody had any success with it. It was too hard to obtain the steel they hardened, without pestering them. Sometimes they would go elliptical. Nowadays, with the carburizing process, they would be a snap. They had grooves, twenty to the inch, half round and half grooved. They were sixty degrees, as I remember and V-shaped in cross-section. They were a little deeper than they were wide, just like a thread would be, exactly, only it was not a thread. It was straight around the roll. By thread, there, I mean a screw-thread, a spiral. They were like that thread, only not spiral. They went straight around. I was working with them off and on, during the whole time they were having trouble with the rolls. I never married a job in my life. I never had one place for a very long period. Since I am older, I have cut that out.

I can go further than that ad, referring to shredded whole wheat bread and shredded cereal coffee. My recollection is that everything they had was shredded: turkey, lobsters, oysters, anything that you ordered was shredded. Everything went through these machines. Of course, I do not know about that. I do not know what they did. I do not know whether they ever saw the machine or not, but everything was

shredded. It was a shredded restaurant. It seems, by that ad, they even shredded their coffee; but I would not swear to that. I remember eating up there and having everything I ate shredded.

When they mention Shredded Whole Wheat Bread in the advertisement, that is what they called the biscuit. I do not know what the Shredded Cereal Coffee was. I knew Mr. Perky then. That was all. I do not know whether he was the inventor of this. He was the promoter. I do not know whether Perky was a machinist or not. I just knew him as a promoter.

CLAYTON K. BRACE.

Deposition taken at Denver, Colorado, April 21, 1923.

DIRECT EXAMINATION.

THE WITNESS: I am manager in the Denver sales department of the National Biscuit Company and have been with the company twenty-six years. I have been in Denver nine years. My territory covers the Black Hills of South Dakota, Wyoming, Colorado, and New Mexico. I personally cover all that territory from time to time. I carry shredded wheat among the products I sell.

We have practically a 100 per cent. distribution of shredded wheat in my territory. Possibly, around 95 to 98 per cent., including retail stores, chain stores, and restaurants and hotels. Taking restaurants and hotels as a class, we do not have the distribution there that we do in the general retail stores.

We encounter competition from Kellogg's Whole Wheat Biscuit. We find more competition among the restaurants and hotels, in proportion, than we do from the retail trade. For one thing, there is the price [illegible]

nation. Generally, once or twice a year, there is a lower price, including, perhaps, free goods. My experience has been that the product does not repeat in stores in this territory. The dealers will put the merchandise in and many of them will discontinue it after their initial deal of merchandise is disposed of. Theirs is a trifle cheaper than ours.

The institutional, government, and State business in this territory is generally handled by bids; but a quantity of that business is done through the jobber. We are given bids, and we bid on the items. Most generally, the bids are awarded to jobbers, and we find we do not get even half the bids on institutional business. I have yet to recall one bid from institutions designating anything but shredded wheat.

I have eaten Shredded Wheat for probably fifteen years. When I travel, I eat it in restaurants. Generally, Shredded Wheat is not served in a package in restaurants, but in a bowl. I was in Albuquerque last fall, and again in February. The first case, I was served the Kellogg product. I asked for Shredded Wheat. It was served in a bowl.

I spoke to the lady who served it and told her I would like to have what I asked for, Shredded Wheat. She informed me they did not have Shredded Wheat. Later in the day, the salesman I was accompanying succeeded in selling this place, the Franciscan Hotel, two cases of our individual-size package. The following morning I again asked for Shredded Wheat and was again served with the other product. It was served in the package by another waitress. I finally succeeded in getting Shredded Wheat. I told the lady we had delivered a package to them some hours before, and, if she would search in the wareroom, she would find it. She finally came back with Shredded Wheat.

When I went down in February, the same process was repeated. If I would take the time to recall, I am sure I would recall many cases where the other product has been served. I can recall one specific instance in Omaha, sometime last summer, when we had a district meeting there. I remember particularly Mr. Thoms having breakfast with me and three or four other men. In that case, I particularly asked the girl if she had Shredded Wheat, the original Shredded Wheat, and she said she had. I told her I would take it. When she delivered it to me in the bowl, not in the package, it was the Kellogg product. I recall that instance, because Mr. Thoms became quite excited and called over the manager of the restaurant. He merely stated to the manager in my hearing that I had asked and designated the kind of breakfast I wanted and had specified that I wanted the National Biscuit Company's Shredded Wheat, and the girl had brought the other product, and he thought that was unfair. The manager gave him an order for Shredded Wheat, that came out that afternoon.

CROSS-EXAMINATION.

THE WITNESS: I do not recall any instances in which I had told waitresses that the Kellogg product is not shredded wheat, or in which my men have tried to tell them so. I do not recollect that that argument ever came up at all. My men do not, to my knowledge, hold to that in my district. What Mr. Thoms said was that I had ordered National Shredded Wheat and they gave me the Kellogg product and we did not think that was fair. Then, they got an order for National Biscuit Shredded Wheat, from this Omaha hotel.

In regard to the Kellogg Company pushing its product, generally; once or twice a year, there is a campaign on, and, I think, such things as giving away

premiums. In those drives, there is considerable of the Kellogg products placed on the market. I do not remember their using coupons redeemable in free packages. I remember something about dishes.

Right here in Denver, has been quite a strong National Shredded Wheat center, extremely so. I do not mean to say that the Kellogg product has no distribution in this territory, or in this district. I was asked if there was general distribution. I answered that, in this district, there were drives put on once or twice a year, and, about that time, considerable quantities of their products were put on the market.

A year ago, last May, the National Biscuit Company had a drive, at which time they offered the value of one case with twelve. That is all I recall in the way of any special sales effort behind the National Shredded Wheat. The Kellogg Company has put a sales effort and push behind its product and in the restaurant trade right along. They have had campaigns and we have campaigns. I was merely bringing out the point that there is greater distribution when they have put on their campaigns, and the distribution dies out immediately thereafter. It does not repeat to the consumers, not in this territory.

I cannot give you the name of any grocery which carried the Kellogg product and discontinued it, offhand, but I know it is a fact. I cannot recall the names of any stores. If I were told that Mr. Clarke went into a Skaggs Store and found National shredded wheat selling at ten cents and Kellogg's Whole Wheat Biscuit at twelve cents, and the manager stated he sold almost as many of the Kellogg at twelve as of the National at ten, if they were both equally displayed, I would be surprised to know it. I would be inclined to think the grocer would have to give some personal effort with it. It is a self-service store; but, if you stayed around in some of them, you would find there

is considerable service goes on. I have been with the National Biscuit Company since the shredded wheat business was taken over. They did sampling, which we have continued to do, house-to-house, but we do not do that with wagons. We have crews hired to go out and distribute samples. That has been continued on the same scale as the Shredded Wheat Company did, and we had a very complete sampling in this entire territory last summer. We did not have any the year before that. We came into direct sales of shredded wheat, I believe, two years ago last January. The only free sampling since then was this last summer. It is not true that substantially all shredded wheat salesmen and specialty men were dropped when the National Biscuit Company took them over, that is, in this territory. We operated with a force, maybe not the same men. We have a cereal man here now who operates with the same function the former manager here did. We have had that man since about last June. I only know about my territory. The man in charge was dropped, but another man was put on last June.

We dropped the jobber for a while, and we are still selling direct. We had no particular difficulty with the jobbers in this territory, because of the sale of the product and the demand for it. We found very fine co-operation from the jobbers. We have that co-operation now. I did not say we had no complaints from jobbers. I said we enjoyed a very fine co-operation from the jobbers; but we did have complaints.

I could not say whether the jobbers are pushing our product as hard as any other in that line. I will state one case I recall about a year ago or a year and a half ago. I called on one jobber, the Morey Mercantile Company. I was asked to come to their office. They showed me an order from their cereal branch for

ten cases Kellogg's shredded wheat. The buyer said to me, "We are not handling the Kellogg product. We do not want to handle it. Have your man see our man in Sterling and get him straightened out." That jobber did not handle our cracker line; yet, he specifically stated he did not handle the Kellogg product and he did not want to fill an order for it, because, in his opinion, there was no demand for it. He had an order from the Sterling manager to this buyer to get for him ten cases of Kellogg's. He did not fill it; he gave me the order. He asked me to have our salesmen see the manager in Sterling, and sell him Shredded Wheat, which I wrote him to do and he succeeded in doing. He sold him twenty-five cases of Shredded Wheat. That business was switched to the National Biscuit Company. I have not had that sort of thing happen in other instances. You mentioned the fact we were not getting co-operation, I cited that instance to indicate that was co-operation, which I believe it was. You can draw your own conclusions.

We have used the small individuals in the restaurant and hotel trade. The sale has practically dropped in volume. We put on a drive about a year ago with the smaller package you are referring to, but we have almost eliminated it. The sales dropped off.

The only instance of either shredded wheat product being furnished to me in a restaurant outside the package are those down in Albuquerque. I am sure that was not our own small-sized biscuit, because the waitress came back and told me. In Omaha, I asked for the empty package and she brought it to me. I knew it was not the original Shredded Wheat, because I can tell from the appearance and color of the cakes. These were a little browner. I asked for the National package and I got the Kellogg package. If they were served me outside the cartons, I believe I could tell

which was which. I do not believe an ordinary customer could.

In New Mexico, I sold them two cases of individuals. I do not recall particularly why I did not sell them the big cartons, only that they handled them in that manner, in the individuals, but they took them out of the individuals in the kitchen, to me. I could not answer whether they did that for any improper purpose. It did not strike me as curious that they were taking the individuals instead of the larger packages, if they were serving them outside the package; because, in a carton, there are twelve biscuit which have to be served when the big package is opened. When they are kept in the package, there is a certain degree of protection to the biscuit in the little individual packages, even though not served on the table. It is a cleaner way to handle it. We do not encourage them in any way to serve our biscuit outside the individual cartons. We have never used any serious program in the way of getting the restaurants to open the individual cartons in the kitchen. We just sell the individuals to them and let them do as they please. As a company policy we have never tried to encourage them to use the individual carton by bringing that right out on the table and letting the customer dump his own biscuit out. They have never been told to by our company.

We have had institutional business, army camps, hospitals, and so forth, in the shredded wheat during the time we have been selling it. I have already testified I do not recall a case where they have designated the Whole Wheat Biscuit. I do not recall any case where shredded wheat, twelve and a half ounces to the package, was referred to. If we got a bid calling for a product other than ours, we would contact the institution that sent out the bid, and ask them if shredded wheat, twelve ounces to the package, would be satis-

factory. Then we would submit a bid twelve ounces to the package, thirty-six packages to the case, provided they said it would be satisfactory.

I might say our cereal man mentioned one case here by the City General Hospital, where the buyer had the Kellogg product. When he asked him why, he said he did not know why, but that is what he got. I recall that incident; but I do not recall any case similar to that, of my own personal experience.

If I got a request for a bid that specified, by the number of ounces per package and number of packages per case, the Kellogg product the person had in mind before making up those specifications, I would request permission to bid on my own product. If they gave me permission, I would put in a bid for shredded wheat, twelve ounces to the package and thirty-six packages to the case. I would not automatically change the bid.

We have seventeen salesmen in the territory. The bulk of their profit is on the cracker and cookie business. Our discount system is on an entirely quantity basis. Shredded wheat is just one of several hundred items.

A grocer who buys only shredded wheat and would not buy enough in a month to make more than a relatively small discount, would get a smaller discount than if he bought shredded wheat and the cracker line, if he was an independent dealer. He would have to buy a great deal shredded wheat, one hundred dollars' worth to get 15 per cent. discount. He does get into a better discount differential if he carries the whole National line rather than shredded wheat alone.

We have not had a falling off in recent years in our shredded wheat business, since the depression started. I would say possibly eight or ten per cent; but our shredded wheat volume has held up in better proportion than our cracker volume. The cause of

that is each man's personal opinion. It is hard to tell what would cause it. My own opinion would be that, in the sale of cookies, there are more farmers. They can manufacture and cook their own cookies, rather than buy them. I think that is making the difference. That would be, I would say, a depression condition. The small National shredded wheat, in the individual cartons, has almost gone off the market in my district, because there is no demand for them. I have never had any cases in which I handled the small National biscuit in any other way than in individuals. That has never been, to my knowledge, put into the large cartons. In all the time I have been with the company, that is the only change in size that has ever taken place with the National shredded wheat, as far as I know, just in the little individual package.

RE-DIRECT EXAMINATION.

THE WITNESS: I made it clear to Mr. Clarke that I was merely reciting the instance of jobber co-operation to show that we did get it, in answer to his question.

The situation mentioned by Mr. Clarke, supposing an institution specification for twelve and a half ounces to the package is purely hypothetical, as far as I am concerned. I have never had such a case. The only reason I mentioned that is that, in bids, we have received for our cracker products, it is not uncommon to designate the wrong weight of biscuit. For instance, they will say a five-ounce package of Uneeda Biscuit. It weighs four and a quarter. When they specify shredded wheat, they call for shredded wheat.

(End of plaintiff's depositions.)

DEFENDANT'S WITNESSES.

CLARENCE L. JORDAN.

DIRECT EXAMINATION.

I am advertising vice-president and director of N. W. Ayer & Sons. We handle the newspaper, magazine, billboard and radio advertising of the Kellogg Company. I handle the personal contact between our business and the Kellogg Company.

N. W. Ayer & Sons is the oldest and one of the largest advertising agencies in the world.

Some of the accounts we handle are the American Telephone & Telegraph Company, Ford Motor Company, Kellogg Company, Canada Dry Ginger Ale, National Carbon, Union Carbide & Carbon, Armour & Company.

We have handled the advertising of the Kellogg Company since about 1921, and during that time we have advertised all of the Kellogg products—corn flakes, All Bran, Whole Wheat Biscuit, Pep, Kaffee Hag. We have handled the advertising of the Kellogg Company in relation to Kellogg's Whole Wheat Biscuit from the beginning, as far as 1927 and 1928 is concerned.

In this advertising we follow the same general procedure that we follow on every product. Our first duty is to become thoroughly acquainted with the work. We send our writers in the first instance out to Battle Creek. They go to the factory just the same as one of the men working on the line. They talk to the people; they see the product being made, follow it through in every step and get thoroughly familiar with it.

We also send our men out in the field. We maintain a large corps of men. We extend their time in

the trade to get the general reactions of the public toward different types of product that we must know in order to prepare our advertising. Of course, in that instance those people went out specifically to find out about this particular food product. After they came back, we got their records and put them down. In addition to that, we employed the Medical Arts Laboratory in Philadelphia—that is a separate scientific organization—to make an independent study of Kellogg's Whole Wheat Biscuit, and to tell us at the end of their analyses the truth of the claims and the statements we might make regarding the food value of that product.

We had actual knowledge of the conditions in the trade in relation to the Whole Wheat Biscuit. We have men who do nothing in the world but contact with the trade on the Kellogg Company and its problems.

Our Research Department is concerned primarily with the reactions of consumers towards different types of products and with the reactions of the trade. We try to forecast the type of things that a consumer will want to buy, so that we can meet that desire in the advertisement.

We are concerned with everything that has to do with advertising; we write the advertising, draw the pictures, do all of the work.

The headquarters of N. W. Ayer & Sons are located in Philadelphia. We have at the present time something between 700 and 800 men and women. We have offices in New York, Boston, Philadelphia, of course, Chicago, Detroit, San Francisco. We have two offices in South America and one in London.

The full functions of N. W. Ayer & Sons, if we are retained to help promote the sales of a new product—well, I should say we have two definite functions. The first one and the function that is most vital is the writing of the copy and the making of the pictures

and putting it on paper, the advertisement, but in order to be able to do that successfully, we must know what we are doing, so that research work goes on, doing all of that work—I can perhaps illustrate it best by saying that we have customers, for example we handle Marshall Field in Chicago, the wholesale end of their business. Marshall Field has many people to whom they are putting out style articles. They get to work in the fall, for example, on what the woman is going to wear in the spring. Without a good deal of research you cannot tell what the woman is going to wear in the spring, and we try to do the same type of work.

In dealing with food products we do house to house canvassing. We are just completing one. I had the privilege of taking to Battle Creek about ten days ago a study made of the feeling of personal interviews in six thousand kitchens. We call it six thousand kitchens, because our investigators are required not just to go to the door and have a woman come and ask the question, but in talking about food products they are required to go into the kitchen, and actually see the work, and actually talk with them in the kitchen when her mind is on the subject.

We rather pride ourselves that when we do an advertising campaign for a customer, we start right at the ground floor and follow it all the way through, get in as closely as we can to every move that is made, because a lot of the things that are done, even some of the machinery in the factory becomes at times a basis for an advertising campaign. We made a check-up at the factory and also checked up on the consumers. As a result of that investigation, we started to get together in our mind the classification of this work—that is, what we would have to do, and as we see it, there are only two types of products fundamentally that can be disposed of successfully. Any

product to make a success of advertisingly has got to be something entirely new, something that fills a long-felt want or opens up a new avenue of business, or has got to represent certain improvements of salable differences as compared with anything else of its type on the market. The initial result of our investigation was to classify Kellogg's Whole Wheat Biscuit—Kellogg's Shredded Wheat Biscuit.

As a result of the investigation we classified the Kellogg's product as one which had certain improvements of salable differences as compared with anything of a similar type on the market. Those differences, as we found them in our discussions, were first of all that we had a similar biscuit which, because of its more convenient size, made an appeal to a certain number of women. It was a smaller size. We thought the smaller size was a salable difference, because when he told us that a number of women said that the smaller-sized biscuit was just about the right size for a child and two of them were the size for an adult. Another point of difference, it seems a salable point of difference, was the toasting on both top and bottom, which gave a brown, crisp appearance to the biscuit. Another salable point of difference was the 15 biscuits to a package, and particularly during the last two or three years, the economy appeal as exemplified by 15 servings, if you want to look at it that way, was a salable point of difference, and, of course, the fourth salable point of difference, which was developed later as a result of the Medical Art Laboratory, was the fact that we certified the food value on each of these biscuits, and that every claim was certified by that laboratory.

Well, when we had decided that it was advertisable, we, of course, were ready then to begin making our recommendations. Our recommendations were largely based on the fact that since we had a product

which had salable points of difference, but was not an entirely new product, that we should go into what we call a competitive or comparative advertising campaign. That means that the basic policy for that advertising campaign for this biscuit was to establish the difference between it and any other biscuit, or any other similar product, as quickly as we possibly could; this as opposed to an educational type, which we would have done if there had been no competition on the market.

Ready-to-eat cereals are one of the most competitive articles that any one can advertise, not only because of the large numbers that are on the market, but because most of them are highly specialized, and if a person eats one brand, if he eats corn flakes, he will not eat bran flakes. We also consider that we are in competition in so far as ham and eggs—everything that is eaten for breakfast, almost every cereal is highly competitive. Competitive advertising, probably a better word or as good a word, is also comparative. You compare your product in the advertising in a perfectly thorough manner with what you consider part of your competition. You have got to compare it with other cereals, and in this instance we recognized that we had to do some comparisons with the Niagara product. The basic policy was to tell the difference between our biscuit and the Niagara biscuit, which we call competitive. If you like, I can illustrate that better by just showing some of the advertising than I could by talking.

I go back to the beginning of an advertising campaign. The agency side, as we look at it, includes everything that has to do with the marketing of the product. We make our recommendations on the packages; for example, we make our recommendations with all of the advertising that goes to match the package. We make our sales recommendations also, then we go

and get back of that and do our advertising for publication, so I will tell you just how, once we had arrived at the fact that we wanted a comparative policy, we went through with it. We recommend designing. We drew original designs for their consideration. We made up a number of designs. The final design is the working out of several years' packages, so that is not one of our original designs, but we contributed to the step that came up to this.

That is the Kellogg Whole Wheat Biscuit carton with cellophane front. As I say, this has been added to since we started by so many people, that it does not go back to the original design. That has been a step by step process, but we have assisted in every one of the steps.

First of all we have in the Kellogg family covers, red and green, one of the most distinctive package lines in the grocery store. It has been on the market for years, so it is known as the Kellogg family. The Kellogg family products all are products, with the exception of bran flakes, as in this red and green package, so as you go into the grocery store you get this whole picture of the red and green Kellogg packages, as they are the largest manufacturers of bread wheat cereals in the world, so it is probably the best known package. So we felt that was nothing more than that red and green package and the Kellogg name, we had a distinctive package, but it was our desire to go further than that. The first thing, the real reason for this bowl with the two biscuits being on the front of the package, was to illustrate the point which we make in all of our copy, and that is that we have a size package biscuit where two of them exactly fit the cereal bowl.

That was entirely competitive. If you have a picture of two biscuits in the bowl, you can see how different it is from others, and our reason for putting

it on there was to illustrate that point. It is brought out in our advertising copy also. You will notice that this bowl is drawn with a perspective—looking down on it like that (indicating). That is one of the most difficult jobs that we have. We had to make the drawing over at least half a dozen times, because if you put a bowl of cereal down and look at it at an eye level, as you would ordinarily draw it, you do not get the end of the biscuit—any biscuit, regardless of its length. They all look about the same. We were so anxious to illustrate the difference in length between our biscuit and competitive biscuit, and we finally arved at making this drawing, and it illustrates the point we wanted to bring out. In addition to that, of course, there are salable points of difference as connected with this product.

As to the cellophane, I would like to mention the real reason for the cellophane window, first of all seeing food products through cellophane has become a very big sales point the last few years, and every manufacturer would like to have it if he could. We have tried it on corn flakes and other packages, but while it was suggested that we might have put the cellophane on the side, actually these products are not displayed with the side pointing towards the customer. They are displayed in that (indicating) direction, and the cellophane on the side would not have done it much good, so it had to go where it would do us some good.

In reference to our experience in making these investigations of consumer's condition and state of mind, I can give you an opinion of what we have done, and probably in several thousand stores in the last two years, and that is that in our opinion most women, when they buy them, see the name on the package and they buy carefully. I have never met very many women who have bought without looking. My opinion is certainly that the average woman is a careful buyer.

THE COURT: Are you seeking relief?

MR. CLARKE: None in this case.

WITNESS: I was talking about the points of difference that we had incorporated into this carton, to stress the individuality of our product. I had mentioned the ones on the outside of the carton. We went further than that. We did something that has never been done in the making of cartons for cereal products, so far as we know, and that is a different color of lining to the package, so that after a woman had opened the package and looked inside, seeing this green color in here, she would get something that would strike her as being different from anything she had ever seen.

We went still further than that, and developed a different type of separator for packing the biscuit. Perhaps that is best explained by this exhibit over here.

Separators, as they have been used before, had largely been instruments for carrying an advertising message printed on cardboard, and in this particular instance of ours we developed this new type of separator, which would be entirely different.

Now, coming back just to that point again that I made earlier, in pointing out the difference in this drawing—over here are two biscuits in the bowl. We consider that a perfectly legitimate selling drawing, because you can see how we stressed in that bowl the small size and darker color of our biscuit as compared with the larger size, lighter color of the biscuit on competitive sizes. You can also see the point that I have made, had we drawn our bowl as we did in trying to arrive at the correct way. In that perspective as is shown there, we could not have shown the shreddings of our biscuits as well as drawing in this fashion.

It is common practice to use dishes containing a portion of the contents of the food cereal package. I

have here a number of labels where that is done, on a great many products on the market, which speak for themselves. All food products.

(Received in evidence and marked "Defendant's Exhibit No. 128.")

I have known this type of advertising device that uses a dish with a portion of the contents of the food package ever since I have been in the advertising business, it seems, but I cannot give you a definite date, but I have always thought it was used. I cannot give you the number of years I have definite knowledge that it has been used. I am under the impression it has been used ever since I have seen it. I have knowledge that food products have been illustrated on the label for the last ten years, I can say definitely.

I have completed the comparative analysis of the two cartons as to the difference of matters emphasized in the plaintiff's carton and in the defendant's carton. I am going on from there to carry this policy right straight on through, and show how the same thing was done in the advertising that appears in newspapers. For example, I will not take up the time to read all of this exhibit, just to give you the facts. In this advertising we used them for headlines. This is the first advertising—newspaper advertising that ran in 1927, by the Kellogg Company of Kellogg Shredded Whole Wheat Biscuit, in these headlines. We used the words "Kellogg Shredded Whole Wheat Biscuit." We used those words. We used Kellogg's Shredded Whole Wheat Biscuit in a headline, simply to inform the public immediately that Kellogg's had a Whole Wheat Biscuit on the market.

The first paragraph of the copy in most instances read something like this:

"The very newest flavor treated by the famous Kellogg kitchen, a brand new Kellogg flavor surprise. You will be delighted with this newest Kellogg cereal."

In all instances, beginning right at the first of the advertisement, our first step was to identify our product as the newest product of this type on the market. That same policy carried right on through all of the advertising, down through 1932, all of it is in these exhibits, you can see. In 1928, where we were illustrating our points of difference, 15 biscuits in a package.

This is all newspaper advertising. We did nothing else except radio and booklets, of course. I just want to show one other example here.

MR. CLARKE: I offer these for identification.

(The same were marked for identification as follows: 1927—"Defendant's Exhibit 129 for Identification," 1928—"Defendant's Exhibit 129A for Identification," 1929—"Defendant's Exhibit 129B for Identification," 1930—"Defendant's Exhibit 129C for Identification," 1931—"Defendant's Exhibit 129D for Identification," 1932—"Defendant's Exhibit 129E for Identification.")

WITNESS: Exhibit 129, that is the advertising for Kellogg's Shredded Wheat Biscuit for the year 1927.

(Received in evidence and marked "Defendant's Exhibit 129.")

WITNESS: 129A is the advertising of Kellogg's Shredded Whole Wheat Biscuit in the year 1928, the newspaper advertising.

(Received in evidence and marked "Defendant's Exhibit No. 129A.")

WITNESS: 129B, this is the advertising of Kellogg's Shredded Whole Wheat Biscuit in the newspapers in the year 1929.

(Received in evidence and marked "Defendant's Exhibit No. 129B.")

WITNESS: 129C is the newspaper advertising of Kellogg's Whole Wheat Biscuit in the year 1930.

(Received in evidence and marked "Defendant's Exhibit No. 129C.")

WITNESS: 129D is the newspaper advertising of Kellogg's Whole Wheat Biscuit in the year 1931.

(Received in evidence and marked "Defendant's Exhibit No. 129D.")

WITNESS: 129E is the newspaper advertising of Kellogg's Whole Wheat Biscuit in the year 1932.

(Received in evidence and marked "Defendant's Exhibit No. 129E.")

WITNESS: These represent advertisements run in the newspapers in those years.

(Adjournment taken at this point.)

(Witness excused until later.)

FOURTH DAY.

May 25, 1933.

MR. COOPER: I will first offer in evidence the certificate of incorporation of the Natural Food Company, being a certified copy thereof, certified under the seal of the Secretary of State of New York.

(Received in evidence and marked "Plaintiff's Exhibit No. 254.")

MR. COOPER: Next I will offer a certified copy of the order of the Supreme Court of the State of New York of Niagara County, authorizing the change of name of that corporation from Natural Food Company to the Shredded Wheat Company.

(Received in evidence and marked "Plaintiff's Exhibit No. 255.")

MR. COOPER: I will next offer in evidence a certified copy of the certificate of organization of the National Biscuit Company in the State of New Jersey.

(Received in evidence and marked "Plaintiff's Exhibit No. 256.")

MR. COOPER: I will next offer a certified copy of the certificate of amendment of the charter of the plaintiff, that amendment being as of the seventeenth day of October, 1902.

(Received in evidence and marked "Plaintiff's Exhibit No. 257.")

MR. COOPER: Next a certified copy, also from the Department of State of the State of New Jersey, of the second amendment of the charter of the National Biscuit Company, the plaintiff, this second amendment being as of the twenty-fourth day of November, 1922.

(Received in evidence and marked "Plaintiff's Exhibit No. 258.")

MR. COOPER: I next offer in evidence the next certificate of amendment of the certificate of incorporation of the plaintiff, being the one as of the 12th of March, 1930.

(Received in evidence and marked "Plaintiff's Exhibit No. 259.")

MR. COOPER: I next offer in evidence a bill of sale, dated the 30th of April, 1930, from the Shredded Wheat Company to the National Biscuit Company.

(Received in evidence and marked "Plaintiff's Exhibit No. 260.")

MR. COOPER: Do you admit that the defendant is a corporation?

MR. CLARKE: Yes.

MR. COOPER: As alleged in the complaint?

MR. CLARKE: Yes, I formally admit that. If your Honor please, with my friend's permission——

THE COURT: You are not raising any issue as to the formal jurisdictional averments in the bill?

MR. CLARKE: No.

THE COURT: And are they all admitted?

MR. CLARKE: As to the corporate capacity of the defendant we raise no question. As to the corporate capacity of the plaintiff, we want to take an inspection of those documents.

CLARENCE L. JORDAN.

DIRECT EXAMINATION (Continued)

The cartons which you have marked on the board are the Quaker packages of our different series. They represent all of the products of the Kellogg Company except one, and that one is Kellogg Bran Flakes. These packages are regularly on the market.

MR. CLARKE: I offer those cartons in evidence as one exhibit, marked from A to R, and if there is no objection by my friends, I will have them in as one exhibit on this plaque.

(Received in evidence and marked "Defendant's Exhibit No. 130.")

WITNESS: Yesterday I was just beginning to show the advertising, by years, for the Kellogg Shredded Biscuit, and later Kellogg's Whole Wheat Biscuit.

The first folder illustrates the advertising in 1927, which was the first advertising that we did for this product. That is Exhibit No. 129. As I explained yesterday, the major feature of this advertising was the identification in the headlines with the fact that Kellogg was making a Shredded Whole Wheat Biscuit. We put that as the major feature on each one of these headings. It did not carry down into all of the small advertisements, but it did carry in all of the larger ones and in many of the small ones. At that time our biscuit had 12 biscuits to the package. We had been justified from the fact that Kellogg made this Shredded Whole Wheat Biscuit, and that it was a smaller size. Those two pages were the first two biscuit pages we advertised.

There are two pages in here. I can read the headings of all of them if you want me to. Well, the headlines are: "Extra crisp Kellogg's Shredded Whole Wheat Biscuit." "New Kellogg's Shredded Whole Wheat Biscuit." Here "Kellogg's Shredded Whole Wheat Biscuit." "Try Them." "Kellogg's Shredded Whole Wheat Biscuit." Then on the smaller advertisement "Delicious," and on this one "Try Kellogg's." On this page of the larger advertisement on the right is: "Order today Kellogg's Shredded Whole Wheat Biscuit, the new way, crisp." The next larger advertisement, "Try Kellogg's Shredded Whole Wheat Biscuit." "Three features you will like, tasty, fits the bowl, just right."

The next exhibit is No. 129-A. That is the advertising that appeared in newspapers in the year 1928. In that year we had 15 biscuits to the package, so we immediately put in as one of our major copy features the 15 biscuits story.

One interest in this campaign is that it shows the development, step by step, of the different features that came in. The headline on here is "Kellogg's Shredded

Whole Wheat Biscuit, browned on both sides." The headline on this one "Here is why they are so popular." In the round circle above that "15 biscuits in each package." That is in every case. "You get so much when you buy Kellogg's." "15 in each package." "It certainly pays to buy Kellogg's Shredded Whole Wheat Biscuit." "Taste them, they are delicious." "A wonderful cereal of a remarkable value." "Each crisp biscuit is toasted top and bottom, and you get 15 in a package."

In these little small advertisements we applied the same ideas as well as we could. "15 in one." "Three features you will like." "15 biscuits." "It is in the toasting both top and bottom, toasted twice." "15 in one, toasted twice." "So crisp." "You get 15." "Just the right size." "Just the right size." "Toasted all over, toasted all over." "And it is new."

Now that completes the advertising for the year 1928. I would like to say this, however, the way this campaign was progressing, we simply got distribution in one market, and then we would break the advertising and move on to another market with the same advertising when the other market was broken. That means, some of the advertising prepared in 1927 and 1928 might have been used in opening new markets in 1929 and 1930, so that while this is the advertising actually prepared during those years, it may have been at different times.

An advertising campaign of this kind covers a series of years. I was just illustrating how we got new points of difference for our biscuit as it progressed.

In regard to the number of years a campaign of this kind would take normally to develop would depend on the success of your work. It might take a good many years, and it may be done quickly. It just depends on how fast the consuming public takes it in volume.

There is a relation between the type of advertising used and in the progress and the distribution of the product that is being advertised. We do not advertise in the market until after the sales force has secured distribution.

This is the advertising for 1929 in newspapers. There were only two proofs prepared new in 1929. As I have just explained, we were using the others for opening markets from year to year. The headlines on these two are: "Served as a toast and a new toast idea." That was some special copy. The first sentence following that is "A new and delicious toast idea, Kellogg's Shredded Whole Wheat Biscuit, heated and buttered." "Many people are eating Kellogg's Shredded Whole Wheat Biscuit in place of toast, as well as a cereal with milk or cream."

The next exhibit is No. 129-A. This is the advertising which appeared—which was prepared in the year 1930. By that time we had received the final analysis from the Medical Arts Laboratory on their independent study of Kellogg's biscuits.

We have dealt with other business than Kellogg. I cannot give a definite answer on it being a recognized institution of standing in that line. We have dealt with them a number of times, but I cannot testify to their size.

We used the analysis of the report from the Medical Arts Laboratory—the food analysis that they made of Kellogg's Whole Wheat Biscuit as the basis for our copy policy in 1930. We also placed on the carton "Certified for Food Value by the Medical Arts Laboratory in Philadelphia." That was another individual point that we brought out in connection with this biscuit, something that had not been done in cereals before.

The headlines in this case, "Modern Wives Realize the Importance of Breakfast."

In order to save time and not read the copy, I will explain that this type of headline was leading into the fact that every mother or every woman should serve a healthful food for breakfast, and the analysis by the Medical Arts Laboratory gave us the facts to tell about what this biscuit contained. It should be a part of the breakfast. We use it for breakfast, and maybe I am wrong.

Each of these advertisements has an illustration at the head of them—each advertisement carries this little seal, "Certified for Food Value." "May be this is why you are tired. Plenty to eat yet. Lucky children whose mothers realize at last. A certified cereal. To a tired business man." And each of these advertisements contains an illustration of the defendant's package of the Whole Wheat Biscuit. "Certified for Food Value. Never before have mothers known a cereal like this. Is breakfast a danger meal in your house? It is not how much, but what you eat, that counts. Now a delicious new food makes breakfast safe. Read how this new cereal helps children make better grades. Your family may have plenty to eat at breakfast and yet be starved. A new contribution to the American table. Delicious cereal biscuits that supply ten important mineral salts."

All the advertisements that I have referred to contained the illustration of the package Kellogg's Whole Wheat Biscuit. The slogan "Kellogg's Whole Wheat Biscuit" is used in the copy. The next exhibit is 129-D. This exhibit shows the advertising that was prepared in 1931 for newspapers, and also illustrates the extent to which the campaign was spreading, showing the different points where the advertising appears.

In this case our advertising appeal was comparative, plus the certified food value. By this time, we had gotten all of our four distinctive points together and

were working them all into advertising, or as many as we could.

The headlines read "Deliciously improved by Kellogg. Try this." Under that is an illustration of the small biscuit with the caption "Deliciously improved by Kellogg." "Try this new Whole Wheat Biscuit, Shredded," and a picture of the biscuit. "Just compare these new biscuits, shredded. To a tired business man. May be this is why you are tired. Lucky children whose mothers realize," and these advertisements down here, "These are the biscuits you want. What an improvement. Here is a new treat. A new taste thrill. Just try this new Whole Wheat Biscuit shredded. Just notice how these Whole Wheat Biscuits are improved."

In all of this series, we are using both pictures and words to explain our points. Here is the certified food value, and here is the toasted top and bottom.

"New cereal helps school grades. Plenty to eat yet. Modern housewives realize importance of breakfasts. At last a certified cereal. Just look at the difference. Just look at this new and different Whole Wheat Biscuit. Try these improved biscuit. Kellogg's Whole Wheat Biscuit are new and different. Kellogg's Whole Wheat Biscuit are new and different. Kellogg's Whole Wheat Biscuit are new and different."

Three ads with those headings. "A new Whole Wheat Biscuit shredded. Deliciously improved. A new Whole Wheat Biscuit shredded. Different in size. Different in crispness. Different in flavor. Seeing is believing. Look at this new and improved Whole Wheat Biscuit."

That completes the advertising prepared for 1931.

Exhibit 129-E, this is the newspaper advertising prepared for 1932, together with the parts where the advertising appeared marked on the map. As the

back to the early days, toasted corn flakes was a descriptive name, and we found it was necessary to put the word Kellogg on the package. We thought it would be a good idea if later on we could develop products that would not have a descriptive name, so that there would be no chance of difficulty, so we brought out a product called Kellogg's Pep. There were no descriptive words on the package at all, just Kellogg's Pep, and then the necessary label designation in small type, required by the Government. That product did not go. It did not sell in large volume. We are studying to try to find out, and we finally came to the conclusion that it was necessary to put descriptive words on the package.

We then went to work and called it Kellogg's Pep Bran Flakes, which was descriptive of the product. As soon as we put the bran flakes on the advertising the sales immediately began to shoot ahead. We had the same experience with Crumbles, where we added the word "Wheat" to Kellogg's Crumbles. That practice has been proved out in those cases. It has been followed by other manufacturers—Post Toasties, for example, added the words "Corn Flakes" to their package, so that when we started to advertise this biscuit, we naturally wanted to do it descriptively.

I know that all of the big sellers on the cereal market are either bran flakes or corn flakes or shredded wheat, something of that nature.

We have a designating name which describes the product and I have knowledge of the methods used by the sales force of the defendant company in the promotion of Kellogg's Whole Wheat Biscuit because I worked with them out on the field.

I am constantly in contact with the Kellogg Company. I sit with them on their merchandising committee meetings, as well as their advertising commit-

tee meetings. We discuss and help to lay out all of the sales and advertising plans.

I receive and read all of the reports from the Kellogg district managers and have to do with advertising and merchandising for the Kellogg cereals.

The sales force consists of district managers and salesmen who call on the jobbers, chains and retailers, and men who also go out and manage the sampling crews, put out advertising in the window, go from house to house on special sales.

From time to time I have been out with them on every one of those jobs. I go out and go with them in their calls, so that as representing my firm, we will be familiar with the work that they do in the field. We require that familiarity in order to prepare good advertising. It is purely a simple research and information that we go out for. I can tell you of one of these journeys that I took in Texas, where the district manager and I got in an automobile in Dalias. We drove across the State in Texas, from Dallas to Laredo on the border. On the way down we met Kellogg salesmen in every point where there was a salesman at the time. We covered his route with him at that time, saw the retailers that he ordinarily covers, not all of them—as many as we could in the day we were with that salesman. I contacted with about seven salesmen in that trip across Texas. These men were salesmen of the Kellogg Company, doing nothing else except selling. We called on the jobbers on the way down. We called on the chain store on the way down. We called on a number of retailers on the way down and of course saw the salesmen.

This past spring I was in the South for three weeks, working with the district manager part of the time in the City of Atlanta, and riding some of our men down there through the different parts of that territory for the Kellogg Company, and getting in-

formation on a new product that had been introduced in the South, where we wanted to get a consumer reaction. By our men--I mean N. W. Ayer & Sons' men. We keep those men, associates of mine—at least one of them—in the field all the time. I am only there part of the time.

I went to California and stopped to see all of the district managers on the way across the country, going out the northern route and coming back the southern route. That was two years ago. I am quite frequently in contact with the district managers in New York and Philadelphia, the two largest districts. I always meet with all of the district managers at the sales conventions. I have called on the Chicago office and work with them; on the St. Louis office and worked with them; the Oklahoma City office; Atlanta, Boston, Denver—almost all of them, in fact.

In my contact with the sales force of the Kellogg Company I observed both the district managers and the salesmen talking to retail and wholesale fields regarding Kellogg's Whole Wheat Biscuit. That is as far as I personally observed. When I was with the salesmen in the grocery stores they were looking for orders. They were selling biscuits, making a general good will of the call and selling biscuits.

We plan the merchandising sales and the Saturday morning sales conducted by the representatives of the Kellogg Company. I have not seen any of these sales on Whole Wheat Biscuit—not personally.

The Kellogg Company spends a larger amount per case for advertising on whole wheat biscuit than on other Kellogg products of a similar kind. That was done on the recommendation of the N. W. Ayer Company and approved by the Kellogg Company. We recommended this to the Kellogg Company because of the highly competitive work that would have to be done, as I explained, not only in the entire cereal field,

but also because of direct competition, that we would need a larger appropriation per case in order to promote this product successfully than we did on other products that did not have quite so much competition.

This advertising campaign on Kellogg's Whole Wheat Biscuit is developing from market to market as the sales force gets an adequate distribution in the market. They advise the Kellogg Company, who advise us, to release the advertising in that market, and that progresses right along across the country.

The percentage of distribution that Kellogg Company have secured on this Whole Wheat Biscuit, nationally speaking, is 40 per cent. It is not a uniform distribution throughout the nation. We have very little distribution, almost none in some markets, and we have close to a hundred per cent. in others. It is very spotty. The average goes down to 40 per cent., but there is no uniform distribution at all. As to more advertising support in those markets where the distribution runs high—the distribution has to get up around—it has to be above 50 per cent. before we would consider advertising, and usually up around 70 per cent. before we advertise at all.

The advertising has to follow the distribution for the simple reason that when you put an advertisement in the newspaper, it goes into practically every home in the town. Well, now, unless we have a product conveniently located for the consumer to buy, and she reads about it in the newspaper and goes down to the store, and that product is in there, she will not get it, she will get somebody else's, because she will not chase all over town hunting for the store where our biscuit is distributed. For that reason, in order to enable the advertising to work 100 per cent., you must have 100 per cent. distribution. Of course, you cannot always get that, but the nearer it is to 100 per cent. dis-

tribution that you get, the nearer to 100 per cent. value you get out of your advertising.

The Kellogg Company absolutely stands behind the sale of any product that it stocks the grocer trade with. We pick off the grocers' shelves any product that is not passed fast enough to stand in good condition. I always see—I mean the Kellogg Company, we always work together that way—if we find any Corn Flakes or Shredded Wheat on grocers' shelves that are out of condition, we pick it up and give full value on that.

They know, to answer your Honor's question, when we come to them and offer them a product, that they can take that product just the same as they can take an absolute gold bond, because they can not lose on it. We take it up if it went bad or did not sell.

The methods of securing distribution on the Kellogg Whole Wheat Biscuit depends entirely on the market. In some places where we are closing in on a market, say we have distribution, and went in there and got it simply on the strength of the Kellogg's sales force, selling the majority of the dealers which they can do, and we had finally opened that town, and suppose the merchandising committee had decided to close in around that town, all points, then they would instruct the sales force to go out and tell the dealers in neighboring towns to put it in and it would be backed by advertising, in that case we would plan the advertising at the same time we planned the distribution, otherwise it follows the distribution.

In order to create a demand for the Kellogg products first of all the salesmen of the Kellogg Company get good display in the store, that is the primary job. It attracts the eye of the consumer. This shelf-display or ledge display of all the Kellogg products, is one of the most prominent things in the grocery store, and we try to have that right at the front of the

store, so that the first thing that the consumer sees when she comes in, is the ledge display of the Kellogg product.

That display has quite an effect on advertising. It impresses the customer with the green and red family of products.

As to whether it is a more or less effective method of advertising than the newspaper advertising, the best way to answer that is simply to say that that a chain is not stronger than its weakest link. If you are going to do a hundred per cent. merchandising job, you have to have all the things that go into it. Simple display by itself would not be a way of promoting a product for a period of time, neither would newspapers without display. You have to have them together to do a good job.

In the grocery trade advertising by direct display of the product in the store is a very effective means of bringing it to the attention of the consumers.

There have been window displays of the Kellogg Whole Wheat Biscuit. To give you an adequate picture of the extent of the Kellogg advertising, it is necessary to bring in all of our national work as well as the local newspaper work because on much of our national work Whole Wheat Biscuit is included, as are all members of the Kellogg family.

To state it briefly, Kellogg is the largest advertiser in the cereal field, one of the largest advertisers in the world. We use for general subjects, that is, all of the members of the Kellogg family, the booklets I have just given you, going out over our National Radio programs and National magazine programs. Back of that are the individual campaigns in the newspapers of individual products.

Last year, there were 1,300,000,000 Kellogg advertisements published in newspapers alone. All told, there were nearly two billion, including the magazine

insertions and radio announcements. Of course, that is all we placed for the Kellogg Company. I am speaking of the United States. The figures are affected by the circulation of a newspaper. A newspaper with a circulation of 500,000 means 500,000 ads.

I think I have already answered what effect Kellogg advertising would have on the promotion sales of the Whole Wheat Biscuit, as one of the members of the Kellogg family. I said that the Kellogg's Whole Wheat Biscuit was a part of much of that national effort, and that we included it in the advertising we sent out as responsive to the radio requests and as responsive to the magazine requests. It is a part of it.

As to a consumer demand for Kellogg Whole Wheat Biscuit being created by these various advertising and sales promotional methods, publicity kills the possibility of substitution, and in order to fully explain how I can qualify to make that statement, without going very much into our history, we have been in business about sixty years. We have probably been connected with as many commercial successes as any other institution in the world. Our job is advertising and publicity. We know from that experience that when you put advertising back of a product, and throw it out into publicity, if that product is not worthy to stand on its own feet, it will kill it. It will kill it just the same as a man may do things in private life that are not very nice, and nobody knows much about it, but let him go into the public and get the searchlight on him and it will kill him. Advertising does just exactly the same thing to commercial business that publicity does to a man.

As to whether this Kellogg Whole Wheat Biscuit could be promoted in the trade as a substitute or deceptive substitute for any other product, I can answer that in several ways. The first one is we would not be advertising it if it were; we would not handle it on that basis and the Kellogg Company would not handle it on

that basis. No, I do not see how it could. I think the package is distinctive. It has a name on it. It looks like a different product. I do not see how there could be any.

The tear sheets that you have appeared in newspapers and magazines.

(Received in evidence and marked "Defendant's Exhibit No. 138.")

MR. COOPER: Counsel will concede that all of these issued after the defendant's advertisements, to which the witness has referred, were commenced, and practically all of them, since the beginning of 1931, is that right?

MR. CLARKE: I concede that all of these that have the phrase "When you see Niagara Falls on the package, you know you have Shredded Wheat," were issued by the plaintiff company at some time after the defendant company entered the field as a competitor.

WITNESS: They are photostatic copies of the advertising of Shredded Wheat and Krispies taken from all the issues of magazines by our Research Division. These photostats were made from the *Woman's Home Companion,* March, 1903, to and including the year 1916.

CROSS-EXAMINATION.

WITNESS: I have been with the N. W. Ayer Company since 1915, except for the two years I was in the Army. I have been vice-president since about 1929, I do not remember the exact date, and a director since 1930 or 1931. I made part of the investigation which was made before the advertising of the Shredded Wheat product of Kellogg began.

XQ. 188. And when did you begin to make part of it?

A. In 1927.

basic policy of this campaign, we used the news readers' style of advertising, where the advertising is written and panelled after the same manner as a news story. It is a well-known form of advertising that is used quite frequently to give the story, particularly if you have something new to talk about, and that is why we call it the news reader type. If you have news, this is the form of advertising you can frequently take. In this series we use as a lead-in heading, the major item of news, and we identify it in the sub-heading. That is quite generally the policy followed in every case. It is an old editorial practice, and where you tell what happens in the lead-in headline, and identify it in the sub-heading, thus, "New Shredded Biscuit contain iron and vitamin B. Kellogg's Whole Wheat Biscuit certified for Food Value by Philadelphia laboratory." "New Shredded Biscuit making big hit. Grocers say housewives welcome many improvements in Kellogg's Whole Wheat Biscuit." "Many new features for new Shredded Biscuit. Kellogg's Whole Wheat Biscuit set new standard for this type of cereal." "New Shredded Biscuit. Extra good with hot milk, Kellogg's Whole Wheat Biscuit offer many improvements." "Philadelphia laboratory certifies new Shredded Biscuit. Kellogg's Whole Wheat Biscuit pronounced very rich in food value."

These are typical of all the ads. Here is the reading matter of one particular ad: "One of the first things to be noticed about the new improved Kellogg's Whole Wheat Biscuit is the unusually delightful flavor and crispness. The Kellogg Company uses a special process of pressure cooking. This takes in the original flavor. Every shred is thoroughly cooked and therefore easier to digest. The biscuit are then toasted a light golden brown on both top and bottom. This makes them much crisper and crunchier. Economy has

not been overlooked either. Instead of the usual dozen, you get fifteen biscuit to the package. Incidentally, the biscuit are new, convenient size, two just fit the cereal bowl. There is also news in the fact that the Kellogg biscuit is so rich in food value that the Medical Arts Laboratory of Philadelphia, certifies every package. Mothers are welcoming this improved and healthful cereal. They find it equally delightful for breakfast, lunch or children's suppers, serving it with milk or cream, and sometimes adding fruits or honey. Local grocers have this new shredded biscuit. It may be identified by the familiar red and green package. Made by Kellogg in Battle Creek."

Incidentally I might say that that closing paragraph identified by the red and green package and made by Kellogg in Battle Creek, has been a feature of practically all of this copy.

That concludes the newspaper advertising that we prepared for Kellogg's biscuit.

No, I did not receive any instructions from the defendant in any way altering its freedom in the matter of designing advertising. I did not even know that there was anything pending. I thought that with the dismissal of the other suit, it was entirely over.

This is a window display piece. Are these marked with exhibit numbers or are they all one exhibit?

(Same was thereupon received and marked for identification "Defendant's Exhibit No. 131 for Identification.")

The poster exhibits consisting of a number of pieces are marked A, B, C and D, etc. The first one is marked 1930-A, and that is a typical sampling circular. It is the circular that we gave away as we distributed the small samples and the large samples of this product from door to door. This was the advertising announcing the first certified series.

Exhibits marked E, C—if agreeable, your Honor, I will simply mention the broad general classification covered by this material, and not take it up piecemeal. In this material are contained the store cards, posters for windows on grocery stores. I am talking about the card classification, not the individual features, the circulars that go out inside of the cases with messages to grocers. The booklets that we send out in response to requests; on our radio programs, The Singing Lady and Buck Rogers. I simply will say in that connection that on The Singing Lady there have been in excess of a million requests on that program and we are running up around 400,000 of Buck Rogers.

The Singing Lady is broadcast over the Blue Network of the National Broadcast Company, and Buck Rogers has broadcast over the Columbia network. We also include the booklets that are sent out on the Slumber Music, which was also broadcast over the Blue network of the National Broadcasting Company. Also a booklet that we send out in response to inquiries received from our magazine advertising. There have been upwards of 150,000 of those, and the other sampling circulars, I explained them first, and the others are here. Those are the broad classifications covered by all of this material.

That material identifies the Kellogg's Whole Wheat Biscuit—it has the name and most of it has the package illustrated in it. All of it relates to Kellogg's Whole Wheat Biscuit.

The large cartons of Kellogg's Shredded Whole Wheat Biscuit—that is a window—what we call a jumbo carton, used in a window as a display. I just classified that under the window and store decorations.

There has been no difference in the general character of the advertising that has been put out since this suit was instituted, about May or June of last year.

The suit was brought on June 11, 1932. Well, on all of the newspaper advertising which I read—that is all except some of the 1932 books, prepared prior to that time, so that is cleared up all right, because it is so marked in the folder.

As to the poster advertising, I can tell you all of that is definitely prior to this. I would have to guess at the amount in the early part of 1932.

This sampling circular announces the first certified cereal. It is marked 1930-A. These pieces I know were.

They have no mark on them, but they are identified by the Kellogg Shredded Whole Wheat Biscuit package, and I know that was prior—prior to 1932-X.

We have never had any instructions as to the litigation, one way or the other. No instruction to shape the advertising in view of any litigation.

As to 32-B, I cannot say definitely whether that was prepared before or after the litigation. 1930-E was prepared before; 1933-C was prepared afterwards; 1932-I, that was prepared before.

1931-N was prepared before; 1931-K was prepared before; 1930-F was prepared before; 1930-G was prepared before; 1932-H and J, I cannot say definitely; 1931-L was prepared before; 1931-O was prepared before; 1930-P was prepared before; 1930-Q was prepared before; 1930-R was prepared before; 1928-X was prepared before. Now, all of these exhibits are marked with double letters. They have no year mark on them, but they were all prepared before, because they are——

Identified for record they are AA, BB, CC, DD, EE, FF, GG, HH, II and JJ were all prepared before.

There are two that I know definitely were prepared afterwards—these two. 1933-B was definitely prepared afterwards and 1933-C was definitely pre-

pared afterwards. After June of last year. 1932-B, I do not know, and 1932-H and J I do not know.

MR. CLARKE: If the Court please, I will offer as Exhibit 131, all the pieces which have been identified by the witness as having been issued before the present litigation was instituted.

(Received in evidence and marked "Defendant's Exhibit No. 131.")

(Received in evidence and marked "Defendant's Exhibit No. 132.")

WITNESS: Other type of advertising has been the advertising of retail grocers. I will tell you our part in it. Every time we sent out a newspaper campaign, we wrote a letter to the newspapers, and I have a copy of that letter in my pocket, asking them to assist us in getting advertising from the retail grocer.

(Received in evidence and marked "Defendant's Exhibit No. 133.")

WITNESS: Retail grocers advertised the Kellogg's Whole Wheat Biscuit. This is a bundle of retail grocery advertising for Kellogg's Whole Wheat Biscuit. I cannot tell how many tear sheets or ads there are in the bundle, but in all of the bundles together there are approximately two thousand advertisements by retail grocers on the Kellogg Whole Wheat Biscuit and between three and four hundred advertisements by retail grocers on Kellogg's Shredded Wheat. That is including all of the bundles. I do not know how much there is in each bundle.

(The same, consisting of five bundles, was thereupon received in evidence and marked "Defendant's Exhibit No. 134.")

(One bundle of retailer advertising Kellogg's Shredded Wheat received in evidence and marked "Defendant's Exhibit No. 135.")

WITNESS: So far as I know neither Kellogg Company nor N. W. Ayer have anything to do with the preparation of the so-called dealer advertising of Kellogg Whole Wheat. Our part is limited to the letter we wrote to newspapers. We had no further contact with the retailers at all. We do not phrase their advertisements. We collected the newspaper tear sheets—cut them out of the newspapers and put them in our files.

This newspaper tear sheets is the separate package that includes those advertisements which advertised Kellogg's Shredded Wheat instead of Kellogg's Whole Wheat Biscuit. This top advertisement contains reference to Shredded Wheat and Kellogg's Shredded Wheat, both under breakfast foods, but that is not true of all of these advertisements. This is the Kellogg Shredded Wheat advertisements. There are two bundles of that.

(Received in evidence and marked "Defendant's Exhibit No. 136.")

(Bundle of tear sheets offered in evidence and marked "Defendant's Exhibit No. 137.")

WITNESS: Some of these advertisements used the terms Whole Wheat Biscuit and Shredded. In the first place, we wanted to describe the product. We had found in the experience that we had had in advertising cereals that there has been no cereal developed into great volume on the American market, no ready-to-eat cereal, unless the name of that cereal was descriptive, or the descriptive words used on the label and in the advertising. Naturally with that experience back of us, we wanted to describe the Kellogg Biscuit as completely as we could. We used the words Shredded and Biscuit and Wheat in order to describe the biscuit.

Yes, I can mention one or two products which were advertised at first under special names. Going

I could not tell you the output. I would not like to guess. One or more packages with the cellophane window in them are put in each case of goods sent out. There are some stores that will not and some get all cellophane windows. I heard a district manager say that he was not ordering anything in his territory except cellophane windows.

Plaintiff's Exhibit 4 is one of the type of cartons which has a light green color applied to the pasteboard inside of the carton.

The carton that we started to put out last September is the one like you hold in your hand.

(Same marked "Plaintiff's Exhibit F for Identification.")

That is the one that had the corrugated liners as distinguished from plain slips of paper. The green lining or green tinting on the inside is practically invisible through the window to your eye. All that one can see there is the oval ends of one row of biscuit and the tops and bottoms of the adjacent rows below and above and the separator.

The clipping from the *Bangor Daily News*, April 11, 1931, is an advertisement of Kellogg's Whole Wheat Biscuit; I am sure that it is in the bundle of advertisements which I have produced. I would have to look up the record to be absolutely certain. I assume it is one directly from Kellogg Company through our company. It looks familiar to me. The cuts that appear in the advertisements of *Marion Star*, Marion, Ohio, April 3, 1931; *St. Paul Dispatch*, St. Paul, Minn., April 9, 1931, were furnished by N. W. Ayer & Company. We drew the cuts of the biscuit. No, I do not think that is a cut that more closely resembles Shredded Wheat Company's product than it does the Kellogg Company's product. I am sure that the artist who made the drawing had a biscuit of Kellogg's

to draw from. Our company furnished the cut of the saucer with the two biscuit in it for the advertisement in the Lancaster, Ohio, *Daily Gazette*, April 3, 1931, but we did not place the advertisement of the *Home Dairy*, Lancaster, Ohio, who are not customers of ours. I assume that cut was furnished to them by the Kellogg Company from our cuts. The drawings of the cuts are not made by our agency artist—we buy our art work on the outside, but they were bought by us and made under our supervision.

The drawings represent Kellogg biscuit as distinguished from the Shredded Wheat Company's biscuit, but not as well as we finally made it after some more trials.

We had some difficulty in the perspective in making pictures that distinguished Kellogg Company's biscuit from Shredded Wheat biscuit—when you look down along the flat. You do not show length as well when you use a perspective. It was easy in this kind of drawing. I mean the type of drawing in the *Jamesville Daily Gazette* of May 19, 1931.

In Exhibit 129-D—advertising of 1931—there is a sheet headed 1ABM 1931, and beneath the picture of a wheat biscuit in the reading matter in the lower quarter of the sheet are the words "Wonderful new flavor"—that was the flavor in the Kellogg Biscuit—the flavor in the Kellogg Biscuit as it had been since 1927. The way you cook it gives it a flavor. The product has a flavor. There is a difference between the flavor of the Kellogg biscuit and the flavor of something else—the something else is any other type of Shredded Biscuit. I am familiar with the Shredded Wheat Company's biscuit since right after the war. It would be very difficult to put into words the "Wonderful new flavor" of Kellogg's. If I knew how to describe it, I would put it in the copy.

I do not know that I have ever tasted the biscuit described by Dr. Oakes as having been made on what he called the automatic machine where there was toasting on both sides.

Our company did not make the drawing with the two biscuit in it. I cannot give you the date on those cartons. I do not remember that. We get into the making of the carton and carton design—we make our suggestions sometimes six months, sometimes a year before they actually come out in the production of the factory. You will have to ask one of the factory men about cartons, because I do not know.

The difference between the picture of the dish with the two biscuit on Plaintiff's Exhibit 1 and the dish with the two biscuits on Plaintiff's Exhibit 5, was we got a darker biscuit and a deeper perspective in the Exhibit 5—Plaintiff's Exhibit 5—as compared with Plaintiff's Exhibit 1.

The drawing that I was referring to (cut of Plaintiff's Exhibit 5) and the drawing that we used in our advertising, is similar to the drawing that is used on other packages. We make the original drawings that are used in the advertising. They frequently place them with the artists who make the packages. What I was really referring to was the number of times we made those drawings for the advertising placed on the package. Our company did not make this drawing that appears on this carton—no, we did not. We made the original that was used in advertising matter of which Kellogg made the drawings that go on the package. We never made a finished drawing that went in any of these packages. A word to explain it is in the nature of the rough suggestion to the Kellogg Company, where we would make these in pencil or in color on tissue paper and give to their advertising department.

Our company made the cuts contained in the large mass of advertising introduced here in the direct examination. We made the cuts and the advertisements. We did not approve the cartons. That is a matter that is done by Kellogg. We talk it over with them and give suggestions, but the approval of the carton is their responsibility, and not ours. We design the advertising ourselves and they approved it. We did not design the carton, Plaintiff's Exhibit 5.

I have never seen the answers to the interrogatories in this case.

MR. COOPER: Counsel has tendered to me recently during the trial a large number of photostats of purported advertisements of the Natural Food Company in its original name, and the Shredded Wheat Company I suppose in succession, which counsel said in general ran from 1903 to 1916. I raised no questions that those were authentic advertisements issued by that company under its several names at about the time the periodicals purport to bear date.

MR. CLARKE: I offer those in evidence as one exhibit.

THE COURT: No objection?

MR. COOPER: None.

(Received in evidence and marked "Defendant's Exhibit No. 139.")

MR. CLARKE: I also offer this pamphlet entitled "Uneeda" which is conceded to be an advertisement of the plaintiff, dated December, 1932, and January, 1933.

THE COURT: No objection?

MR. COOPER: I have no objection.

(Received in evidence and marked "Defendant's Exhibit No. 140.")

MRS. GRACE BURNS.

DIRECT EXAMINATION.

My husband's name is Lester and I have on daughter, sixteen years old. I am a housewife and a a user and consumer of the product known as Kellogg' Whole Wheat Biscuit. I do not remember how long have used that product, but it is several years, prol abl three years or something like that.

I have known it as Kellogg's Whole Wheat Bi cuit. I happened to see the package in the store an as I always used Kellogg's products, other product and I liked the size of the biscuit and I tried it.

My first package I purchased in a service grocer store. I just asked for a box of Kellogg's Shredde Wheat, as soon as I had seen it on the shelf, becaus I had used their Corn Flakes and I saw the small bi cuit which was a better advantage for me to use, and just tried it and we have used it ever since.

Previously to knowing Kellogg's Biscuit I ha known the other biscuit, the Niagara Biscuit, and use it. After making a comparison between the two bi suits I continued to use the Kellogg Biscuit. On reason for preferring the Kellogg Biscuit was the siz It just seemed the right size, and another reason wa that it was brown, it was much browner than the othe biscuit and every one seemed to like them better—th preference seemed to be a general preference. Th main thing was the size because the other biscuits wer so large and there was always just a little more tha they wanted with the breakfast, and that was really th main reason that I continued using this biscuit.

I recommended Kellogg's Biscuit too there beside members of my family, because I liked it so well my self, I will say that truthfully.

I came here today to testify because an agent wa sent from the grocery store to me. A man came an

asked whether I used Kellogg's Biscuit. I had never seen the man before, and I do not know any one connected with National Biscuit Company or the Kellogg Company.

In ordering the biscuit I ask for Kellogg's Whole Wheat.

CROSS-EXAMINATION.

I live at 1125 West Street, Wilmington.

How I came to buy my first package of Kellogg's Whole Wheat Biscuit was because I saw the small size of the biscuit on the package—that was really the first thing I noticed. I saw the sign of the biscuit on the package on the shelf, and that is one reason, and then it was narrower. I do not know whether that picture was always there, but I know it was a different shaped package from the Shredded Wheat. I do not remember whether the package I first saw had a cellophane window in it or whether two biscuits were there at that time or not. It was like that package—pointing to Plaintiff's Exhibit 2.

(Same was thereupon received and marked "Plaintiff's Exhibit E for Identification.")

I was able to tell from the package that Kellogg's Biscuit was shorter than Shredded Wheat Biscuit by the side there. Is not this biscuit packed in the same way as this one? I have forgotten because it is quite a while. The package might have been exhibited either end to me or face to me and in either event since it was this package I observed that it was Shredded Whole Wheat Biscuit and asked for it for that reason.

I knew the product that I had used prior to that time as Shredded Wheat.

As to the package that I saw I do not remember whether the face of the package was exposed, or whether it was the end of the package.

RE-DIRECT EXAMINATION.

RDQ. 56. What kind of biscuit is this Kellogg Biscuit?

A. What kind? I do not know, it is very good, th is all I can say.

RDQ. 57. It is a wheat biscuit?

A. It is a wheat biscuit.

MR. CLARKE: That is all.

MR. MORRIS: That is all.

By MR. CLARKE:

RDQ. 58. What kind of biscuit was this biscuit y used before you used the Kellogg biscuit?

A. It was a wheat biscuit.

MR. MORRIS: Will you mark that E for identi cation, and then we will find out what the exhi number exactly like that is, and then stipulate th that is Plaintiff's Exhibit for identification.

(The same was marked "Plaintiff's Exhibit for identification.")

THE COURT: I would like to ask whether not the state of the record is satisfactory in rega to the tender of that pleading, in evidence.

THE COURT: The tender is withdrawn.

MR. MORRIS: I thought since I have miss something in the beginning of all this trouble, thought I had better take the blame for it.

THE COURT: Thank you very much.

MR. CLARKE: I suppose the record then is co plete, without any motion to strike.

THE COURT: The record is complete. You a standing on proofs.

MR. MORRIS: We are standing on admissio

THE COURT: Admissions in pleadings, ce tainly.

HAROLD F. MUNTZ.

DIRECT EXAMINATION.

I specialize in institution and restaurant sales for the Kellogg Company. I have been employed by the Kellogg Company slightly over six years. I am twenty-eight years old.

The nature of my duties with the Kellogg Company is to work with the district sales managers and Kellogg salesmen in the development of institution and restaurant sales of Kellogg's Whole Wheat Biscuit.

I work with the Kellogg salesmen calling on institutions in an effort to encourage institutions to use the various Kellogg products, including the Kellogg's Whole Wheat Biscuits.

We always interview first the buyer and the dietitians in an effort to have them fully acquainted with the entire Kellogg line. We talk to the buyers about the convenient sizes of the Kellogg biscuits, about the number of biscuits packed in a package, and about the price of the various Kellogg products.

We talk to the dietitians about serving the Kellogg products to the inmates in an institution, and of the food value of the Kellogg's Whole Wheat Biscuits.

In the course of developing institution business we call on all types of institutions, including private institutions, State institutions and Government institutions.

By this I mean we endeavor to call on every place where there are more than twenty-five people eating in the same dining room; that is, we feel that it is worth our while to call to see the buyers and dietitians of institutional outlets where more than twenty-five people are served.

That takes in three very distinct classes; the private institutions which are the city hospitals and orphanages and sanitariums that are in no way connected

WITNESS: I cannot give you the date definitely. I do not remember.

I was one of the men who were sent to the factory in that early investigation. We just went to the factory at Battle Creek—the Kellogg factory in Battle Creek.

No, I did not send men at that time or subsequently to the factory of the Shredded Wheat Company at Niagara Falls. So far as I know none of our people have ever been in there.

When I talked about the kitchen count, I was referring to the work that we do, and I said that we had just completed a 6900 kitchen count.

In the early days of the preparation to take over the advertising of Shredded Wheat product of Kellogg, we investigated to see what the demand was or would be for that product—that investigation included both calls on the retail trade and calls on women to determine their preference for that type of product. These investigations were made primarily in our branch offices in Philadelphia, New York, Boston, Chicago, San Francisco. Those offices took charge of some sort of a canvass of homes to ascertain largely the demand for wheat cereals. We were interested in the entire field of wheat cereals. The investigation started around 1927 and is still continuing. The investigation did not include an examination into the demand for the Shredded Wheat. The reports when they came in included Shredded Wheat. There are several hundred. The reports could be produced for inspection if they are still on file. I doubt very much whether they are.

I was informed of the result of these investigations, and whatever information came in those reports with reference to Shredded Wheat we ascertained the fact stated in the reports at about the time they were delivered to our company.

We did not get a clear idea as to the existence on the market over such part or parts of the country as the investigation covered of Shredded Wheat. We were not really asking for that type of information.

From the investigation we did learn something about the product Shredded Wheat. Before the investigation was put on I personally knew about that product, both by name and by the pillow-shaped biscuit.

At the time of the investigation—what we were trying to do at that time, and what we were doing at that time, was asking what people thought of a biscuit of our size. We were not asking about the demand for a product. We were asking about what they thought of a biscuit of that size and general shape, and so on. It was not a demand investigation at all.

I do not know how many of the several hundred reports made mention of Shredded Wheat, such as Exhibit 1.

I should say that I have known personally of Shredded Wheat, such as exemplified by this Exhibit 1, since after the War, around 1919, or somewhere around there. Other members of the organization of N. W. Ayer & Company also knew the product like Exhibit 1.

As I stated previously there has been no big market made for a food product unless the name was descriptive of the product—that is based upon all the experience of our company, not only in advertising itself, but in noticing advertisements of others who did not retain us as their agents.

Yes, I know a cereal called "Force" which name is not descriptive of the product. It has been a failure ever since I heard of it. It has been off the market in this country. Yes, I have seen advertisements of it recently. They are coming back, but they certainly have not started to sell.

I have heard of cereal called "Grape Nuts." That name is not descriptive of the cereal. "Grape Nuts"

is in wide distribution throughout the United States, but it is not a leading seller. I mean a product that sells up into volume, such as we consider a leader, in big volume. I would estimate that there are not being sold annually in this country fifteen million packages of "Grape Nuts." I agree that then the name is not descriptive.

In connection with our investigation, preparatory to advertising Kellogg Shredded Wheat, we did not make any computation or get any figure to show the output of the Shredded Wheat Company.

We did not design the first carton put out in 1927 of the Kellogg Shredded Wheat. We suggested a number of designs for their carton, but the final work-out was done through the addition of a lot of things and a lot of advice.

I am familiar with Plaintiff's Exhibit No. 2. As far as I know that was the first put out in 1927 by Kellogg for shredded biscuit. I cannot tell exactly, but so far as I know it is. I do not think, in fact I am sure none of our suggestions went into the design of Plaintiff's Exhibit No. 2. Our suggestions were very largely taken on the others.

Plaintiff's Exhibit E is the one which was made from our company's design. They worked that out in spots. That was used pretty generally. That is the course of standard. You recognize that—meaning the colored name; that is all standard and does not require redesigning. The carton like Exhibit E came out some time in 1928.

I recognize features on Plaintiff's Exhibit 1 that we discussed and asked them to work out. We discussed the representation of a dish with two biscuit in it, but we did not make that drawing. We suggested this panel on the side and we worked with them on these suggestions. They were not original with us.

No, the two biscuit in a dish do not fairly represent Shredded Wheat Company biscuits. They represent Kellogg's biscuit fairly accurately.

Plaintiff's Exhibit 1 was designed and put on the market about 1930. I do not remember the exact dates of those cartons.

I cannot tell if Plaintiff's Exhibit 4 represents the carton after the one last inquired about. I recognize it as one that our company at some time helped to develop and recommend. So far as I know it is the first one with the window in one broad size. The date I cannot give.

I examined a large part of the mass of newspaper advertising, not all of it. I do not recall having seen a copy of a part of the *Tampa Daily Times* for Friday, July 8, 1932, containing an advertisement under the heading of Piggly-Wiggly Store, Kellogg's Shredded Wheat, Pkg 9¢. That advertisement was not included in the large bundle of newspaper advertising which was introduced on direct examination. It was not withdrawn from those before production here. Those advertisements that were produced are not complete copies of every grocer's ad.

I observe that Piggly-Wiggly in the advertisement in question uses the word "Kellogg" in the smallest lettering of the advertisement proper and the words "Shredded Wheat" in much larger lettering. I also observe that Piggly-Wiggly puts a representation of the Shredded Wheat Company's package in its advertising.

The Kellogg Company furnishes cuts, as they are called, to the grocers for their advertising.

I have been told that the Kellogg Company worked on the pillow-shaped biscuit before we took over their advertising, but they were not making them at the time I first visited them. I did see the biscuits in the factory before the advertising began, and they ex-

plained to me the advantages that they had in their size biscuit.

From the time we first began to contact with the Kellogg Company, it has been a subject of conversation between the Kellogg Company's representatives and representatives of N. W. Ayer & Company as to the resemblances and points of difference between the two biscuits.

I should say that we did form an opinion from the investigation that was made as to the consumer demand that had been created by advertising for the Shredded Wheat Company's Shredded Wheat.

I did say that the company—N. W. Ayer & Company—has been in business sixty years and that when you put advertising behind an imitation, it will kill it.

I have no case in mind of any of N. W. Ayer's customers being held to infringe other's trade-mark rights.

I can recall conversations and reading about instances in which things which have been extensively advertised have been held to infringe somebody's trade-mark rights. I have no personal knowledge of them, but I imagine it is true.

Mr. Cooper, the question was substituting and not infringement. The statement that I made was with regard to the practice of substituting. Perhaps we look at the definition differently, but an infringement would not come within that statement of mine.

There are about 300,000 retail grocery stores in the United States. In about 120,000 of those there is Kellogg's Shredded Wheat for sale—about 40 per cent. distribution. Actual information about the number of retail stores in which there is on sale today Kellogg's Wheat Biscuit or Whole Wheat Biscuit product, can, I think, be received from the record of the Sales Department at Battle Creek. I based the 40 per cent. distribution on information from our sales depart-

ment. What I gave this morning was on information and not on my knowledge. For information regarding distribution you would have to go to the Kellogg Company.

As to the amount of money the Kellogg Company has spent in advertising the packages which have the words "Shredded Biscuit" substantially as prominent as on these Exhibits E for identification and 2, as distinguished from those like Plaintiff's Exhibit 1 and Plaintiff's Exhibit 4, that give the prominence to Whole Wheat, we have the actual figures here; of course, I can figure out from them right away the proportion.

We do not keep the figures for the advertising that they pay in Battle Creek—that is the store material and that nature. We spend about ten times as much money on the Whole Wheat Biscuit as on the Shredded Wheat Biscuit. That includes all of the different varieties of package in the one group, which has Shredded Wheat Biscuit in prominent letters, and in the other all of the carton that has the Whole Wheat in prominent letters. We have put about ten times as much advertising expense into the cartons which have Whole Wheat in prominent letters, as we put into the cartons that have Shredded Biscuit in prominent letters. It was two and one-half years before they began to put any out with the Whole Wheat in prominent letters, that would make it 1929. Either the end of 1929 or the first of 1930, according as the date goes forward or back.

Cartons put out by Kellogg like Plaintiff's Exhibits 1 and 4 have been displaced. There is a new carton. We have not featured the cellophane window in advertising at all. I could not give you their manufacturing output. That is usually discussed as an advertising package of which there will be a certain percentage to a case. Some stores get more than others.

WILL K. KELLOGG.

Direct Examination.

I am a food manufacturer, president of the Kellogg Company. I have been in the food business upwards of forty years. The Kellogg Company was organized in 1905. It was the Battle Creek Toasted Corn Flake Company at first, and afterwards it was changed to the Kellogg Company. Then that was succeeded about 1922 by the present company, The Kellogg Company. I have been president of these companies throughout the period from 1905 down to the present time with the exception of two years when I was chairman of the board.

The product that the company manufactured in 1905 or 1906 was Toasted Corn Flakes.

I am unable to give the exact date when the company began to manufacture any other products besides Toasted Corn Flakes, but within five or six years after our organization we began to add foods, different foods.

I think it was around 1910 when the company began to experiment with any wheat biscuit in shredded form, and the product was put on the market about that time under the name of Whole Wheat Biscuit, Shredded Wheat Biscuit. The correct name was Kellogg's Toasted Wheat Biscuit. This product was on the market for about six years until war time—was on from 1910 until war time.

This product was a biscuit made from a dough which had been partially cooked and that was shredded, made in the form of biscuits placed on pans, a cover pan was placed over the biscuits and it was then baked in an oven and that constituted the biscuit.

At first this product was composed wholly of whole wheat, but later it was not. At first it did contain sugar and salt flavor and some malt flavor, but

later, during the war period, it contained other grains besides wheat. We were restricted by the authorities at Washington from using so much wheat. We used corn and rye. That particular biscuit was a very edible product, but we found that it was impossible to control the weights. The weights were over, overweight. The package first, I think, contained about ten biscuits and afterwards twelve, and would weigh from —well, it varied from 14 to 16 ounces and sometimes a little more. It proved to be rather unprofitable due to the fact that it was overweight. The admixture of other grains ruined the palatability of the biscuit. It was not as palatable as it was when composed entirely of wheat.

The advertisement you show me is an early advertisement taken from *Munsey's Magazine,* in colors, of Kellogg's Toasted Wheat Biscuit, published about 1913.

The one marked A on the second page is a leaflet of advertising Kellogg's biscuit by different names, indicating the date when it was published or used. That was about the same time as the advertisement, I think.

B is a six-page leaflet, advertising Kellogg's Toasted Wheat Biscuit, published about the same time, or used about the same time. C is about the same type. There is a picture of the factory and the original factory where the food business was started in Battle Creek. D is the advertisement from *Home Life* of Kellogg's Toasted Wheat Biscuit, which appeared in *Home Life* about March of that year.

E is a cut-out of a counter display sign, advertising Kellogg's Toasted Wheat Biscuit, on a plate—a saucer. Two of the biscuits being illustrated in the saucer.

(Received in evidence and marked "Defendant's Exhibit No. 145.")

WITNESS: That biscuit went off the market during the war time and that identical biscuit was never manufactured after that period. We continued the experiments in our laboratory in the factory for some time, and we brought out another biscuit about 1922—another Shredded Wheat biscuit. I think it was called Shredded Wheat Biscuit. Yes, the name Kellogg appeared on that—"Kellogg's Toasted Wheat Biscuit." That was a carton like Kellogg's Shredded Whole Wheat biscuit carton which you have here, with the exception that the name at the bottom was "Kellogg's Toasted Corn Flake Company instead of Kellogg Company. There were some pictured in colors, a green and a red.

The carton you show me is one of the cartons put on the market by the Kellogg Toasted Corn Flake Company in 1922. It has some of the old biscuit in it, which are small in size and well toasted.

(Received in evidence and marked "Defendant's Exhibit No. 146.")

WITNESS: The advertisement marked G is from some local magazine, full page; H is an illustration of a girl with a package of Kellogg's Toasted Biscuit and I is an advertising page in colors taken from the *Field and Stream* magazine, August 20th, but I do not see the year, and Kellogg's Shredded Whole Wheat Biscuit.

Kellogg's Shredded Whole Wheat Biscuit of 1927 was manufactured for five or six years and how long it remained on the market after that period I cannot say. The one of 1922—I suppose you refer to the one I have been testifying about—that was on only a short time. That is Exhibit 146—my recollection is that it was on for less than a year, or about a year or less. As to the carton, I believe it was the same carton.

About 1926 or 1927 the company put Kellogg's Shredded Whole Wheat Biscuit back on the market with another biscuit and it continued on the market with an increasing trade. The name was changed. I think it was put on first as Shredded Wheat Biscuit, Kellogg's Shredded Wheat Biscuit. Afterwards it was changed to Whole Wheat Biscuit, Kellogg's Whole Wheat Biscuit.

The carton, Plaintiff's Exhibit 2, is Kellogg's Shredded Whole Wheat Biscuit manufactured by the Kellogg Company. The net weight is nine ounces, the package states. Plaintiff's Exhibit 3 followed Exhibit 2. It is Kellogg's Shredded Whole Wheat Biscuit. 15 biscuits.

I do not think the size of the biscuit has changed between 1922 and 1927 and the present time.

The biscuit taken from Exhibit 146 is the same size that we continued to use after changing from the larger size. The larger size was discontinued in war time.

The original name—Sanitas—of the corn flake product under which it was advertised was placed at the top of the package in small letters. It was only used for a short time, and then it was sold as Kellogg's Toasted Corn Flakes, but I think at the time the Sanitas was on the heading of the carton, that W. K. Kellogg or Will Kellogg was on the end of the package "Non-genuine without this signature."

The corn flake business was purchased from the Sanitas Nut Food Company. The Sanitas Nut Food Company was Dr. J. H. Kellogg of the Battle Creek Sanitarium. He owned it.

The Sanitas nut foods were foods packed in cartons. I think there was something like a hundred of them. I cannot describe them all. Some of them were made from nuts, cereals, different preparations, quite a large variety.

The carton that you show me is one of the original cartons which was used at the time the business was taken over by the Battle Creek Toasted Corn Flakes Company from the Sanitas Nut Food Company.

(Received in evidence and marked "Defendant's Exhibit No. 147.")

WITNESS: The product was sold as Toasted Corn Flakes. We endeavored to control the market by having the only toasted corn flakes.

After removing the name "Sanitas" from the package, we used the name "Kellogg" and continued to do so to the present time.

Dr. Kellogg was my brother. At the time the name Kellogg's was put on that package I am not positive that we were the only concern manufacturing Toasted Corn Flakes, but I am not sure.

We encountered competition—severe competition within the first year.

The name has been added to each new product as brought out, and includes the bran, All-bran, Bran Flakes, Kellogg's Krumbles, Kellogg's Wheat Krispies, Kellogg's Rice Krispies and Pep. The name Kellogg appears from six to nine times on every package.

There is a very great value to the name Kellogg due to the fact that it has been advertised so many millions or billions of times.

It is a very easy matter to introduce a new product to the grocery trade just on the name. The grocers are aware of the fact that we stand back of the name, that if any product which we put out is not satisfactory in every way, it is taken back and the money refunded. It is of inestimable value in putting out new products.

In an average year the name Kellogg appears on packages, I think, in excess of one billion and a half; on the cartons only.

In advertising products under the name Kellogg the company has expended since it began advertising in 1905, in excess of fifty million dollars; the name Kellogg has appeared in every advertisement.

As to whether the Kellogg name under these circumstances has value as a sales element—it has very great value. Unless the consumer created a demand for the product through the advertising, the retail grocer would not be interested in stocking the goods.

The units of sale you ask about—the products are all sold in packages or cartons, as indicated by this exhibit. Some are individuals and some are family size.

To mark these cereal products, the Kellogg Shredded Wheat Biscuit, the Whole Wheat Biscuit, we introduced some years ago a glacine front, a cellophane front, which showed the biscuit very plainly, so that the consumers may know what they are buying. It is impossible to mark flakes.

None of the cereal products of the Kellogg Company, other than the whole wheat biscuit, are individually marked as to the product itself, when it is outside of the carton.

Kellogg's Whole Wheat Biscuit is a product made from the entire wheat. It is shredded and the shreds are very fine shreds. It is well baked and toasted, dark on top and bottom, and it is a small biscuit. That is the size (indicating) as compared to the other biscuit.

Nothing is added to its flavor, but the process produces a special flavor. This is done by dextrinizing more thoroughly the starch of the wheat.

As to whether the small dark biscuit of the defendant could be palmed off as the large biscuit of the plaintiff—in my opinion, one would be able to tell one biscuit from the other, when it is white on the bottom, slightly toasted on the top. The smaller biscuit is well toasted

on top and bottom, and the flavor, when eaten, is different.

(Offered in evidence and marked "Defendant's Exhibit No. 148-A to 148-H for Identification.")

The exhibit you show me marked Defendant's Exhibit No. 148-A to H, is the tear sheet from a magazine, *Literary Digest,* of Kellogg's Shredded Krumbles.

B is an advertisement of Kellogg's Shredded Krumbles, an advertisement from a magazine or newspaper, I am not sure which.

C is an individual carton of Kellogg's Shredded Krumbles. It is marked "Free Sample."

D is an advertisement of Kellogg's Shredded Krumbles taken from some magazine and I am unable to state which one.

E is proof sheet of a carton of Kellogg's Shredded Krumbles.

F is a magazine tear sheet in colors, advertising Kellogg's Shredded Krumbles showing a facsimile of a carton and a girl in colors.

G is the same thing as the preceding one, an advertisement of the Kellogg Shredded Krumbles.

H is an advertisement of Shredded Krumbles showing a boy and a facsimile carton.

I am unable to state the month these advertisements were run, but the copyright would indicate that they were not run before that date—1920.

They were run as advertisements of the defendant company.

(Received in evidence and marked "Defendant's Exhibit No. 148.")

The copyright date of 1920 and the package illustrated contains the words "Kellogg's Toasted Corn Flakes," which would fix the date between 1920 and 1922.

The carton marked for identification 149 is a carton of Kellogg's Krumbles, Shredded Whole Wheat, put out by the Kellogg Company.

THE COURT: Have crumbs and Krumbles anything to do with each other?

MR. CLARKE: I do not know. Mr. Kellogg might answer that question.

WITNESS: It is a shredded product.

MR. CLARKE:

Q. 106. It is in cracker or in biscuit form?

A. It is just in shreds.

THE COURT: A crumb would suggest Krumbles?

WITNESS: According to the name, it did. It is small Krumbles or shreds.

(Received in evidence and marked "Defendant's Exhibit No. 149.")

WITNESS: Package marked for identification as Defendant's Exhibit 150 is a package of Kellogg's Wheat Krumbles printed in the Kellogg colors, and it is whole wheat, shredded and toasted, and it is shown to be served in a dish, or the product is in a dish on the package on both sides.

A very large demand has been created by advertising for the products known as Kellogg's Whole Wheat Biscuit and Kellogg's Shredded Whole Wheat Biscuit.

(Package offered in evidence and marked "Defendant's Exhibit No. 150.")

CROSS-EXAMINATION.

WITNESS: I have been forty years directly and indirectly in the prepared food business. I was associated with Dr. J. H. Kellogg at Battle Creek, Mich.

with the State or Government. The fraternities and sororities, colleges and universities, are under the first classification.

The second classification, the State institutions, that is, institutions that are owned and controlled by the various States in the United States, including prisons, hospitals, State hospitals for the insane, sanitariums, homes for the aged, which are all controlled by the various States.

And the Government institutions which include the Department of the Interior, the Veterans' Administration, the United States Army, the Navy, and the Marine Corps, and all Government institutional outlets.

The Department of the Interior has Indian hospitals and schools, of which there are about seventy-two throughout the entire United States.

This institutional work as I have outlined it has a fairly large market for the Kellogg biscuit. It is a very special market and it is a market that we have tried to develop in a special way, because as a general rule it does not resell the Kellogg products.

I have been working at Battle Creek about five years, and I have been spending the majority of my time since I have been with Kellogg Company in the development of that particular type of business. I travel all over the United States in the development of the institutional restaurant.

The Kellogg Company, to my knowledge, is the only cereal company at the time I started in the development of institution sales that specialized in selling institutions.

For example, the Department of the Interior, up until three years ago, did not use any Kellogg's Whole Wheat Biscuits, or a wheat biscuit of any type.

Up until the time the Kellogg Company started such specialized work, for example, the Navy Department, in the latter part of 1928, made it possible for the

navy to use—ready-to-eat cereals, including a wheat cereal, such as Kellogg's Whole Wheat Biscuit.

Up to that time the navy has never approved the use of any ready-to-eat cereals for the use of the general service.

The Department of the Interior stated that if we could create a demand for such a product, that they would include it in their catalogue, include both Kellogg's Whole Wheat Biscuit and Kellogg's All Bran in their catalogue, which made it possible for the institutions to obtain those products in serving cereals to their inmates in the institutions. He gave his consent to our going ahead and supplying samples of our products to the various institutions, and told us if the institutions requisitioned the cereals, they would be placed on the catalogues and put out for competitive bidding, and at that time he asked me if there were any other competitive products on the market for both of the two items that we were interested in.

That was the Whole Wheat Biscuit and Kellogg's All Bran, and I, of course, told him there was a competitive product for both of them; the National Biscuit Company's Shredded Wheat and Posts Whole Bran. When I speak of him I mean the purchasing agent, W. B. Fry.

The way the business was handled within the Department of the Interior is that requisitions go into the purchasing department annually, and if they call for any such particular items, they are purchased on competitive bidding. Now, the institutions requisition the Kellogg products, and at that time Mr. Fry asked us regarding the way he should call for such products, so that it would be open to competitive bidding, and at that particular time we, of course, were anxious to get him to call for Kellogg's Whole Wheat. He says, "You will have to appreciate the fact that the Government

always wants competitive bidding on anything that they buy, and asked us to look over a particular clause that he had used in calling for this particular item."

I have here a copy of the bid which they just recently issued, showing the way they called for this particular product, in the very first year that they issued proposals, calling for bids for a wheat biscuit. This bid was opened on May 18th and is an annual bid. The document is our extra copy of request for a bid. It is the statement on Government form of bid marked groceries, samples not desired, directed to the purchasing officer, Room 144, Department of the Interior, Eighteenth and E Streets, Washington, D. C., and attached to it is a schedule, one of the paragraphs of which reads:

> "56-G-590-1072. Case of biscuits, Whole Wheat, Shredded, to meet Federal Specification No. NC-191, as described, E-2H thereof. 24 12½ oz. packages and 36 12 oz. packages to type 1 or 2 carton; samples not desired. State price per pound."

Q. 30. Do I understand that that specification of what was desired to receive bids on, was prepared in any way in collaboration with you?

A. No, sir, he prepared it and asked us if our product would meet that specification.

WITNESS: Our product meets specification 24 12½ ounce packages. The product manufactured by National Biscuit Company meets the specifications of 36 12-ounce packages. I could not state definitely, but I rather imagine the product known as the Rippled Wheat would meet the specification, although that would be a matter of analysis. When it comes right down to it, the Rippled Wheat really would not meet that specification, I do not believe.

I know of only those two that would meet the specifications—plaintiff's product and Kellogg's product.

Yes, the Government mails this form to the Kellogg Company. To my knowledge they are mailed by the Government to cereal manufacturers at large.

When the bids are received by the Kellogg Company they are filled out just above the word "Biscuit, Whole Wheat, Shredded" on page 18—would fill in the name "Kellogg's Whole Wheat Biscuits, packed 24 12½-ounce packages to the case." I attended to this bid opening.

Q. 46. You filled in the price at which it was bought?

A. Yes.

WITNESS: That is a copy of our bid. It is a request for bids from the Department of the Interior. The bid went in as a duplicate of this, with the price added. I attended the bid opening. I heard all of the prices that were bid. The National Biscuit Company bid on that.

Q. 52. How was the product identified on plaintiff's bid?

A. It was identified as "Original" Shredded Wheat, using the word "Original."

(Received in evidence and marked "Defendant's Exhibit No. 141.")

WITNESS: I have several other samples of various types of bids. The Navy Department calls for cereals. These bids are the standard Government specification known as M-C-191, dated July 21, 1931. There is a specific specification for Shredded Wheat on the third page, paragraph E-2-H.

(Received in evidence and marked "Defendant's Exhibit No. 142.")

WITNESS: I have here a proposal calling for food requirements for the Naval Supply Depot at Norfolk, Va., for their commissary store. This is for resale in the commissary store, and calls for one item, No. 315, which item reads—"Item No. 315, 2400 packages wheat, shredded, Kellogg's, 12½ ounce packages, and Item No. 316, 400 packages wheat, shredded, N. B. C. 12 ounce packages."

Item No. 315 refers to Kellogg's because the printed name Kellogg's is referred to, for one thing, and the 12½-ounce size is the Kellogg's package, the weight of a Kellogg package.

Item 316, reading 400 Whole Wheat, Shredded, N. B. C., refers to National Biscuit Company's Shredded Wheat.

The procedure of the Kellogg Company was to fill in the standard form, No. 31, the first sheet indicating the name of the Kellogg Sales Company and address, and we have indicated under item No. 315 the name "Whole Wheat Biscuit." We typed that in. The printed name, Kellogg's, is, of course, in there, and I might add that in this particular instance they accepted the lowest bid on Kellogg's for item No. 315, and the lowest bid on National Biscuit Company's product for item No. 316. We did not bid on item No. 316, which is specified as the National Biscuit Company's product. Both those articles were ordered for resale in commissary stores. The bid as returned has certain prices marked opposite the item "Whole Wheat, Shredded, Kellogg's 12½ ounce." You simply filled in price for that one article. Opposite "Whole Wheat, Shredded, N. B. C." the price columns are blank.

(Offered in evidence and marked "Defendant's Exhibit No. 143.")

WITNESS: I have several others similar. Here is one from the Naval Supply Depot, calling for delivery to the Naval Hospital. The Naval Hospital has also specified a distinct brand name, and this calls for delivery both to the General Hospital and for the general service. The general service, of course, does not specify brand name, but for the hospital delivery, they call for "Wheat, Cereal, Kellogg's Whole Wheat Biscuit, one ounce packages." I might add here that the National Biscuit Company placed a bid on this particular item, which was specified "Kellogg's."

The Kellogg bid, "Wheat Cereal, Kellogg's Whole Wheat Biscuit, one ounce packages," was filled in and returned to the Naval Supply Department.

(Offered in evidence and marked "Defendant's Exhibit No. 144.")

FIFTH DAY.

May 26, 1933.

MR. COOPER: The next point is about the Plaintiff's Exhibits 254 to 260 inclusive, those being the certificates of incorporation of the Natural Food Company and the amendment of its charter, and so on, down through the title papers which I offered yesterday and the ruling of which was suspended pending an examination and consideration by the defendant's attorney. I understand that they have no objection.

MR. CLARKE: No objection.

THE COURT: Admitted.

(Received in evidence and marked respectively "Plaintiff's Exhibits Nos. 254 to 260.")

MR. COOPER: We would like the privilege of withdrawing these and substituting photostatic or other copy.

from the Navy purchasing officer at New York City on April 8th. The bid was opened April 18th. This proposal calls for cereals, ready to eat, to meet specification No. NC-191; calls for wheat, shredded, equal to paragraph E-2-H, Specification 191, in Bulk. That is in large size packages, and also wheat, shredded, equal to the Specification NC-191, paragraph E-2-H, in individual packages.

That specification referred to is the Government Federal Specification. We have placed our bid on Kellogg's as is indicated on this copy.

The word "Kellogg" in different type was not in the bid when it was received by me. I typed in after "Wheat, shredded—E-2-H" the word "Kellogg's". I then typed in the figures, giving the price at which we were bidding.

(Received in evidence and marked "Defendant's Exhibit No. 153.")

WITNESS: The proposal which has just been offered in evidence, called for food requirements to supply the Navy during the month of May, 1933, and I have here a price bulletin of provision contracts, issued from the Navy Purchasing Office at New York City, which is sent to all naval supply stations supplied out of the New York Purchasing Office. This shows the name of the contractor, the contractors' address and telephone number, so that the purchasing officer may place his orders against the contract which is entered into on the part of the contractor with the U. S. Navy. This particular price bulletin shows the Kellogg's Sales Company as having been the successful contractor for certain items, and it shows the National Biscuit Company as also having been a successful contractor for certain items.

Both of these items include either Whole Wheat Biscuits or National Shredded Wheat. The items

which are called for in large packages, or in bulk, are considered—or are given to the Kellogg Company, as indicated by the number which is assigned to the Kellogg Company—the number is 45,172. This represents the number by which the contractor is designated. On the first page it shows No. 45,172, as being the Kellogg Sales Company of New York City; 41,186 is the number for the National Biscuit Company. The National Biscuit Company was awarded the item of individual packages for wheat cereal, shredded, as indicated here as original; .1448 indicates the net price per pound. Number 41,186 is the number of National Biscuit Company. There are no other references regarding cereals.

(Received in evidence and marked "Defendant's Exhibit No. 154.")

WITNESS: This is really an accompanying letter from the Navy Purchasing Office, stating that the award for that particular item was made to the National Biscuit Company. The original memorandum received by Kellogg Sales Company follows notification number to the National Biscuit Company.

I have here a copy of a standard Government form of bid. It is a request for a bid, a copy of a request for a bid received from the Navy Purchasing Office at New York, calling for a delivery to their commissary store, such items being resold as resale items in the store.

Under Item No. 725 it calls for Wheat, Shredded, Kellogg's in 12½ ounce packages.

We have shown on the copy of our bid that we are bidding on Kellogg's Whole Wheat Biscuits, 12 ounce packages, 24 to the case, and the price.

The document as I received it described No. 725 Wheat, Shredded, Kellogg's 12½ ounce packages. It could not refer to any other product on the market. I might add in this particular instance, as is the case

with any commodities purchased by the Government for resale in the commissary stores, that when a brand name such as "Kellogg's" or "National" or "Niagara" is specified, the award goes to the lowest bidder on the brand name that is specified.

There could only be competition in bidding on the Kellogg item.

(Bid received in evidence and marked "Defendant's Exhibit No. 155.")

WITNESS: The next one is a standard Government form of bid, a request for a bid from the supply officer, Naval Air Station, Lakehurst, New Jersey. This calls for delivery to their commissary store and calls for under Item No. 143, Whole Wheat Biscuits, Kellogg's, twenty-four 12½ ounce packages. We have filled in the name Kellogg's Whole Wheat Biscuits on this, indicating the produce we are bidding on. This word "Kellogg" was on there when it came to us. The whole line reads "143 Whole Wheat Biscuit, Kellogg's," that is the way it came originally, and I added on the same line "Whole Wheat" and on the next line below that "Biscuits, twenty-four 12½ ounce packages, Kellogg's," was added to the bid. Both the proposal and the bid have the name "Kellogg's." I added the name Kellogg to the bid and it was right on the proposal when received by us.

One of these requests was for bids of an article specified by brand names for resale in a commissary store. Whenever they call for bids for the general service, they simply call for the type, that is, wheat cereal or corn cereal, and refer to the specification. There is no reference in this proposal, as it was received by us, for the Federal proposal of cereals.

(Received in evidence and marked "Defendant's Exhibit No. 156.")

WITNESS: Here is a proposal calling for bids from the Quartermaster, Selfridge Field, Michigan. This proposal calls for Item No. 57, "Cereal Breakfast, 12 ounce package, National Shredded Wheat."

Under Army purchases, cereals are classed as resale items, or as sales items. They are not issue items.

Kellogg Company has bid on that in the past, but we have since ceased bidding, because the name "National" is specified and regardless of whether our price would be lower, the name of the National Biscuit Company is always accepted.

(Received in evidence and marked "Defendant's Exhibit No. 157.")

WITNESS: I have here a proposal calling for bids from the Quartermaster at West Point, New York. Under Item No. 42, they call for Cereal Shredded Wheat Biscuit, 12 ounce package, National Biscuit Company. We have ceased bidding on this because the business always is awarded to the National Biscuit Company because it is their brand that they desire for resale purposes.

(Received in evidence and marked "Defendant's Exhibit No. 158.")

WITNESS: If we were awarded the item we would have to go to the market and buy National Shredded Wheat.

This is a letter received from the Quartermaster at West Point answering an inquiry of ours which we had made in regard to an item specified as National Shredded Wheat.

I have here a standard Government proposal calling for bids for the Veterans Administration Home, National Military Home, California. Item No. 14 calls for Whole Wheat Biscuit shredded, fresh, and marketable in every respect in individual packages. We bid

on that and it was awarded to the Kellogg Company. Samples were submitted in connection with that bid.

(Received in evidence and marked "Defendant's Exhibit No. 159.")

WITNESS: This is a proposal for bids received from the Veterans Administration at Washington, D. C., calling for various ready-to-eat cereals, and under Item No. 1-0 for delivery f. o. b. Perryville, Maryland, calls for Shredded Wheat, twenty-four 12 ounce packages to the case. Item No. 1-P Shredded Wheat, 60 packages to the case, either 1½ ounce or 2 ounce packages, meaning the individual packages.

This invitation to bid calls for "E-8 Shredded Wheat shall be prepared from sound clean wheat without material removal of the bran; shall be processed with or without added flavoring, drawn into fine shreds, formed and baked in oblong biscuits of uniform size and shape, weighing approximately one ounce each, shall be porous, tender, crisp and of excellent flavor, free from rancid, musty or other undesirable taste or odor, shall contain no dirt, grit or other extraneous matter."

(Received in evidence and marked "Defendant's Exhibit No. 160.")

WITNESS: The next one is from the U. S. Marine Hospital in St. Louis, calling for Item 108, "Wheat, shredded, 24 to the case, 12½ ounce." The word "Kellogg" was typed in. We bid on that and sample was submitted.

(Received in evidence and marked "Defendant's Exhibit No. 161.")

WITNESS: This is from the purchasing and contracting officer, Fort Benjamin Harrison, Indiana, and another Item No. 31 calls for Whole Wheat biscuit, 12½ ounce, Kellogg's. We typed in the words "Kel-

logg's Wheat Biscuit 12½ ounce, Kellogg's 360 packages, .0838," and submitted a bid.

(Received in evidence and marked "Defendant's Exhibit No. 161.")

WITNESS: This is from the purchasing and contracting officer, Fort Benjamin Harrison, Indiana, and another Item No. 31 calls for Whole Wheat biscuit, 12½ ounce, Kellogg's. We typed in the words "Kellogg's Wh. Wh. Biscuit, shredded (24-12-½ ounce pkg) Whole Wheat biscuit, 12½ ounce Kellogg's, 360 packages, .0838," and submitted a bid.

(Received in evidence and marked "Defendant's Exhibit No. 162.")

WITNESS: I have here a proposal from the Quartermaster at Port Hoyle, Maryland, under Item No. 26, calls for Shredded Wheat, Kellogg's, 12½ ounce package.

(Received in evidence and marked "Defendant's Exhibit No. 163.")

WITNESS: Here is one from the U. S. Property of Disbursing Officer, State of New Jersey, Trenton, New Jersey, under Item No. 5, Whole Wheat Biscuits, Kellogg's, one-half ounce package, 60 packages to the case.

(Received in evidence and marked "Defendant's Exhibit No. 164.")

WITNESS: Another one from the Quartermaster of the Army War College at Washington, D. C., under Item No. 102, calling for cereal, Whole Wheat Biscuit, Kellogg's 12½ ounce packages. That is for resale purposes. The Army War College maintains a college store.

(Received in evidence and marked "Defendant's Exhibit No. 165.")

WITNESS: One from the contracting officer at Fort Moultrie, South Carolina, calling for Item No. 14, cereal breakfast, Shredded Wheat biscuits, Kellogg's.

(Received in evidence and marked "Defendant's Exhibit No. 166.")

WITNESS: That is for resale in the commissary store. The purchasing and contract officer at Langley Field, Virginia, under Item No. 43, Shredded Wheat, 12½ ounce Kellogg's.

(Received in evidence and marked "Defendant's Exhibit No. 167.")

WITNESS: Here is one from the Quartermaster at Fort Crook, Nebraska, under Item No. 14, Wheat, Shredded, 12½ ounce, Kellogg's.

(Received in evidence and marked "Defendant's Exhibit No. 168.")

WITNESS: Here is one from the purchasing and contracting officer at Fort McClellan, Alabama, under Item No. 39, Shredded Wheat Biscuit, Kellogg's.

(Received in evidence and marked "Defendant's Exhibit No. 169.")

WITNESS: Here is one from the Quartermaster supply officer, San Francisco General Depot, Fort Mason, San Francisco, California, under Item No. 235, Shredded Wheat, large package, for Fort Winfield Scott, Kellogg's.

The specification number is indicated where there is no brand specified. As you will note, the brand is specified opposite each item, where the brand is desired, where the specification is desired. Where there is no brand, where the name Kellogg does not appear, Specification NC-191.

(Received in evidence and marked "Defendant's Exhibit No. 170.")

WITNESS: Referring now to 171, all of these had the name Kellogg as they came to us, put in by the department.

(Received in evidence and marked "Defendant's Exhibit No. 171.")

WITNESS: This is from the Quartermaster supply officer at Brooklyn, N. Y., calling for delivery at—this is the contracting officer, but it calls for a delivery to be made to the Quartermaster, Port San Juan, Porto Rico. This calls for Item No. 171, cereal breakfast food, Whole Wheat Biscuit, 12½ ounce, wax wrapped packages, Kellogg.

(Received in evidence and marked "Defendant's Exhibit No. 172.")

WITNESS: This is an informal contract received from the Marine Corps, calling for delivery to the Marine Corps, Marine Barracks, Navy Yard, Washington, D. C., and to the Marine Barracks, Naval Ammunition Depot, Dover, New Jersey, under Item No. 45. It calls for delivery to Washington, D. C. It calls for Shredded Wheat, 12½ ounce packages, to be Kellogg's Whole Wheat Biscuit. That is our order. That is the contract that they sent to us after we had placed the bid. The language "48 packages Shredded Wheat, 12½ ounce packages to be Kellogg's Whole Wheat Biscuits per package NC191" was in the order when it came to us.

It is subsistence, and that is why the specifications NC191 was indicated on there; when the proposal came to us, we indicated just Shredded Wheat and specification No. 191. This is the contract. There is another one here calling for delivery to the Naval Ammunition Depot at Dover, New Jersey, on the same sheet. It is also item No. 45, specified forty-eight packages Shredded Wheat 12½-ounce packages to be Kellogg's Whole Wheat Biscuit per package NC191.

Dr. J. H. Kellogg was the head of the Battle Creek Sanitarium at the time of my entry into the Kellogg Company forty years ago, but not at the present time. He was the first Kellogg, so far as I know, in the breakfast food or cereal food business. I remained in association with him in the breakfast food business somewhere between ten and twelve years.

The manufacture and distribution of the foods of the Battle Creek Sanitarium was handled by others. I had something to do with it—I was working for the Battle Creek Sanitarium in a business capacity; was there during those 25 years in all and I was in charge of certain matters pertaining to the food business, but not the selling or distribution. I had something to do with the foods—in preparing them and in suggesting experiments carried on. I did not have much to do with the sale.

Dr. J. H. Kellogg was well known as a physician and the food business developed later. It was developed in a small way—the food business—during that period.

There was a Mr. Brown who was president, I think, less than two years. No, I have to correct that statement—my son was president of the company.

My son was president for two years and Brown was president for a matter of somewhat less than two years.

The carton which you have marked for identification (Plaintiff's Exhibit 261) which you state from information given you was purchased at a store at Kenosha, Wisconsin, known as Bernson's Grocery, on December 24, 1932, appears to be one of my company's products of the character described as Kellogg's Whole Wheat Biscuit.

(The same was marked "Plaintiff's Exhibit 261 for Identification.")

WITNESS: The top layer of the biscuits inside that carton do not seem to be as much browned on one side as the other, but one side is quite distinctly paler than the other. The one that you picked from the next lower layer is just about the same as the first one that you showed me. It might occur that our biscuits do come through a little more brown, as noticeably more brown on one side than the other. The present biscuit, I think, are well browned that you found on the marked day—I think are well browned and that is an old package, some years ago. No, I cannot tell from the character of the package about its vintage.

The package which is Plaintiff's Exhibit 261 for identification is quite similar to Plaintiff's Exhibit 4 to the interrogatories. I have no recollection as to the dates of these packages, or the forms, except what you tell me. There was no time when we baked differently on the two sides—it might have been an error in baking. I am not sufficiently in touch with the daily output to know whether or not biscuits differently browned on the two sides are a part of the regular output of the company, but I have an explanation to make. The instructions were to brown them on both sides, and they are uniformly browned, occasionally they are not.

(Received in evidence and marked "Defendant's Exhibit No. 132.")

WITNESS: Among our advertised products at one time and another there was a cereal substitute for coffee known as Drinket; that was advertised under the Kellogg name. Yes, I see on Defendant's Exhibit 148, an advertisement of Drinket. I cannot state what length of time it was advertised among the Kellogg line; also I cannot state when it ceased to be put out. I have no recollection of the date. We did withdraw it from the market, but it was sold in a small

way for some years after 1920 perhaps, and finally it stopped selling.

There was another product called Wheat Flakes which we manufactured. It was withdrawn after a time for a better product that came later. Corneoka was brought out during the war time as a substitute for other products not obtainable, and when the war ceased we discontinued the product. It was not advertised very extensively.

This was tapioca corn, but the Government asked us to refrain from using the name tapioca and we discontinued. About the early Wheat Biscuit, which was begun about 1910 and continued until the war time, we had by reason of Government requirements to mix in corn and rye with the wheat. We may have changed our names, but I have no definite recollection. I do not recall advertising that we no longer were making a wheat biscuit. It was a fact, however, that we did substitute other grains for wheat.

In the manufacture from the beginning of 1910, we made a dough in which there was some flavoring matter in addition to the wheat itself—sugar and salt and malt.

The advertisement showing a picture of chil or young lady eating it as a cracker says nothing a at eating it as a cracker, but it was eaten as a bread or a substitute for bread, eaten as a cereal, principally as a cereal in a bowl, the same as other cereals. I do not recall the exact words "eaten as a cracker." We issued a great many advertising circulars, booklets, and I am unable to remember the text of all of them. The young lady shown in Defendant's Exhibit 145 was cating the biscuit—shows very plainly. The Krumbles shown in Defendant's Exhibit 130 is fairly shown in the dish, but not absolutely.

In regard to Krumbles the wheat is cooked, shredded in flat shreds, not round shreds. There are

some broken off in the packing of the product. It has been called "ribbons" and the package called Krumbles. Flavor is added. No, I would not say it was sweet. It is slightly sweetened, but not materially sweetened. There is other flavoring added besides the sugar and that flavoring is added before the final cooking of the material. Whatever flavor is added, is added to the material which is shredded. After shredding it is baked in an oven until it is crisp. I am not sure that Defendant's Exhibit 150 is the only one which my company markets at the present time—Wheat Krumbles. There may be another package.

(Same was marked "Plaintiff's Exhibit G for Identification.")

WITNESS: I recognize that as a carton put out by my company. It is in the same colors that we use on all of our packages. It was used for marketing Kellogg's Shredded Wheat Krumbles, some time ago. The date I could not state.

The carton was made in Canada, packed in Canada, sold in Canada, by another company.

I could not say that we did not use such a package as this for Krumbles. I think we probably did. In the United States, yes.

The company controls the Kellogg Company of Canada.

The contents of this package is quite similar to the contents of Defendant's Exhibit 150.

That is correct $50,000,000 has been expended by the Kellogg Company to build up its line of cereal products.

RE-DIRECT EXAMINATION.

WITNESS: My brother, Dr. John H. Kellogg, was a very large stockholder in the Kellogg Toasted Corn Flake Company, for several years. Then he engaged in competitive business and sold his stock in the Kel-

logg Toasted Corn Flake Company. I purchased nearly all of his holdings. I am owner of 60 per cent. of the Kellogg Company stock.

Drinket was a very small seller. It was put out experimentally and improved and doctored and various things happened, and it was finally allowed to dwindle, no push was put back of it, and another product was put in its place.

The name Kellogg on the package will secure distribution for the product very quickly with the grocers and grocer trade, both the retail and the wholesale trade. Consumer advertising and effort, window dressing and newspaper advertising, billboards, are usually found necessary to produce a consumer demand for the product. I think the name Kellogg will induce consumers to give the product a trial in the beginning. It will be helpful. Many people will buy a product with the name Kellogg on it but whether it would be a continued repeat business, it is difficult to state unless it was advertised in addition to being on the shelves.

Unless the product repeats it is not a success. It must repeat in order to make it profitable. I could not say that I have ever marketed any products, which, after they were tried by the public, by being displayed on grocers stands and windows, were found not to be repeating sellers—I do not recall any.

The package that you hand me is a package of Kellogg Wheat Krumbles, whole wheat, shredded and toasted, put out by the Kellogg Company of Battle Creek, Michigan.

(Received and marked "Defendant's Exhibit No. 151 for Identification.")

WITNESS: I think the figure of fifty million dollars is straight advertising and sampling. I do not think it includes the store and window work that has

been done which amounts to a very considerable sum. As to window work coming under some bookkeeping systems as advertising, there will be people here who will be competent to answer that. I can not.

RE-CROSS-EXAMINATION.

The particular package (Exhibit 151 for Identification) marked with the Battle Creek is sold in the United States only, and abroad, I think perhaps a small sale abroad; not including Canada.

The Canadian Company has a very similar package with a different imprint. In London, Ontario, instead of Battle Creek, Michigan. The colors are the same. So far as I am aware the lettering otherwise is the same.

I could not state the date when this package, Exhibit 151—I mean that type of package—was put on the market, but there are people here who can.

As to products found not to be repeat sellers—I cannot answer that directly. I think we have never put out a product, but what has repeated to some extent, but whether it repeated in a satisfactory manner would be another question. I do not think we ever put out a product, but what it did have some repeat, but whether it repeated satisfactorily so it became profitable, is another matter. There were several that were not satisfactory from a profit standpoint.

(Bid Naval Supply Depot of Norfolk, Va., May 3, 1933, received in evidence and marked "Defendant's Exhibit No. 152.")

HAROLD F. MUNTZ, recalled.

DIRECT EXAMINATION (continued).

I am still dealing with Navy Department proposals and bids. I have here the bidders' file copy, which is our file copy of a bid we placed on a proposal

Item No. 6 for the Illinois School for the Deaf, eight cases of biscuits, Whole Wheat, 12 ounce packages.

Item No. 6 for the East Moline State Hospital, five cases of biscuits, Whole Wheat.

Item No. 6 for the Elgin State Hospital, four cases of biscuits, Shredded Wheat.

Under Item No. 6 for the Illinois Eye & Ear Infirmary, one case biscuits, Whole Wheat, 1½ ounce package, individual size.

For the Soldiers and Sailors' Children's School, Item No. 6, 15 cases biscuits, Whole Wheat.

For the State Reformatory for Women, Item No. 6-A, these cases biscuits, Whole Wheat, individual size.

And this last paragraph here on the bid calls for samples. Do you wish me to read that?

On all items requiring samples which are submitted by parcel post, bidders must include sufficient postage stamps for return of said samples. They request samples, however, on the second page, where it states that two samples of each item must accompany bid, except in the case of Items Nos. 12, 13, 17, 18 and 20. On this proposal Item No. 6 is the biscuit, Whole Wheat, and we were required to submit samples.

(Received in evidence and marked "Defendant's Exhibit No. 184.")

WITNESS: We always submit our samples in our regular packages, like this package, when the large sized packages are called for. When the small individual size is called for, we furnish the small individual size package.

(Received in evidence and marked "Defendant's Exhibit No. 185.")

WITNESS: We have never had any goods rejected as not being ordered by the various departments. I do

not see how that could happen because in every instance we always indicate that we are bidding on Kellogg's Whole Wheat Biscuit, and submit samples to show the product that we are bidding, whenever samples are specifically requested, which is most generally the rule.

The samples submitted are always in the regular Kellogg cartons; bearing the name Kellogg's on every side is the standard practice.

We have submitted here proposals showing instances where the plaintiff here, National Biscuit Company, has put on proposals specifying the product to be bid on as Kellogg's.

We have bids of National Biscuit Company in which that product was bid as "Original" Shredded Wheat.

Many dietitians and stewards in institutions prefer the small size biscuit, because there is absolutely no waste to that size. For that reason they specify in ordering the small size biscuit.

By the small size biscuit I mean the Kellogg Whole Wheat Biscuit, and the stewards and dietitians know that is the Kellogg Whole Wheat Biscuit.

In some instances they specify the larger biscuit of National Biscuit Company. As a general rule we have found the dietitians and stewards seem to prefer the small sizes.

Yes, I have something to do with the servicing of restaurants and hotels with Kellogg's Whole Wheat Biscuit. The Kellogg's Whole Wheat Biscuits in the individual packages are distributed to the wholesale grocers, and we have Kellogg salesmen call on restaurants and hotels all over the country to show our package to the restaurants and hotels, and to tell them what we are doing, to create a demand for that product, and to try to get them to handle Kellogg's Whole Wheat Biscuits.

We furnish the restaurants with advertising material relating to Kellogg's Whole Wheat Biscuit. I have here a little restaurant display that was developed very early in 1928, which shows—may I have an individual package to show just how this is displayed. The individual package is displayed in this manner, and very beautifully shows up the Kellogg's Whole Wheat Biscuit package itself and two biscuits in the bowl, showing the two small biscuits and the language that they do fit so well in the cereal bowl.

Restaurants use the displays of the Kellogg product. We have distributed thousands of them around the country. In addition to that, I might mention that we also furnish restaurants and hotels with a menu slip. It also—that is the menu sheets, as well as the menu slips that shows the Kellogg Whole Wheat Biscuit. The menu sheets themselves I do not have with me, nor the menu slips. We furnish these menu slips without charge and they refer to the Kellogg product as "Kellogg Whole Wheat Biscuit. We have distributed many of these menu slips. Those who have their own menu cards, we always ask them to list Kellogg's Whole Wheat Biscuits on their menus, and that is a very general practice of all the Kellogg salesmen.

We have been successful in inducing hotels to list the product as Kellogg's Whole Wheat Biscuit on their menus, as can be shown in two menus that I have here. One is from a railroad, the Chicago, Milwaukee, St. Paul & Pacific, showing Kellogg's Whole Wheat Biscuit as one item, and Shredded Wheat as another.

(Received in evidence and marked "Defendant's Exhibit No. 187.")

WITNESS: Here is one from the Fort Shelby Hotel in Detroit. It calls for Kellogg's Shredded Whole Wheat Biscuits for one item and Shredded Wheat for the other.

(Received in evidence and marked "Defendant's Exhibit No. 188.")

WITNESS: On the Kellogg's Whole Wheat Biscuits approximately 2 per cent. of the total sales of the Whole Wheat Biscuit are sold in the individual packages. Approximately, and as near as I can estimate, 98 or 99 per cent. of our biscuits sold to restaurants are in the individual packages. There is really only a very minute qnantity sold to the restaurants and hotels in the large sized packages.

In my travels about the country on this restaurant and hotel business I have never seen a glass globe the size of Plaintiff's Exhibit 36. I have a smaller one, but it has been quite a long time ago. I do not believe I have seen more than eight or ten of them at the very most.

In my work with the Kellogg salesmen, I call on restaurants and I have called on literally thousands of restaurants since I have been working for the Kellogg Company. I do not believe I have seen more than eight or ten of them in that period of time.

CROSS-EXAMINATION.

WITNESS: I am now 28 years of age and have been with the Kellogg Company a little over six years. I started with the company when I was 22 years of age. That was my first experience in the cereal food business. Before that I had sold groceries in a grocery store, but not for more than two or three days. I have been in the meat business and in the furniture business. I went to school at the University of Illinois. I worked for the Kellogg Company while I was in school. I called on fraternities and sororities at the University of Illinois. At that time I was on a salary. That period is included in the six years I worked for the Kellogg Company.

WITNESS: I first went to Battle Creek in August, 1928. Prior to that I had been at the University of Illinois until March, 1928, at which time my finances were in such shape that it was necessary for me to quit school, so in August, 1928, I became permanently established at Battle Creek with the Kellogg Company. Since that time my employment with them has been continuous. When I first started with them I was in charge of institutional sales directly under the supervision of the general sales manager. There was one man who preceded me, but he was in the department a very short time, as I recall the dates, from March until August. It was a comparatively new department. I took charge of it within four months of its establishment. After a short stay at Battle Creek I started traveling and that has been my occupation since that time.

My time was well divided between institutional selling and visiting restaurants and hotels, with possibly the exception of the first few months I was at Battle Creek at which time I spent a majority of my time on institutional selling.

At that time we were selling some of our products to institutions, but as I recall the figures, the volume was not any very great volume. It was a worth-while business for the company, however, I would imagine. The present volume I would say is a very worth-while volume.

There are three distinct classes over which my jurisdiction extends—the first takes in private institutions such as private sanitariums, orphanages and the like—and hospitals and city jails I would class under that, city institutions. I have always been in the habit of classifying them under those three groups and including city institutions under the privately owned group. The second group are institutions that are owned by the various States. The Federal Government is in-

cluded in a separate classification—the Army bases, Naval bases, and the like, are classified as the third class. Fraternities are under the private colleges and schools and universities.

In the first class, described as private institutions, I met competitive bidding. The purchases of private institutions are always purchased on competition. They ask for prices from the wholesale grocers or they will call a wholesale grocer on the telephone and ask for various prices. Some private institutions do issue proposals, but I would say as far as those who would actually ask for bids on paper, they are very few.

Classes two, consisting of State institutions, and three, consisting of United States Government institutions, may not be wholly distinguished from the first class by the fact that they are required to or do call publicly for bids upon a competitive basis, because many city purchasing departments handle the purchasing for the city hospitals, the city prison and the State sanitariums and the like.

Hotels are not included under the classification of institutions—they are included under the classification of restaurants and hotels. That is entirely apart from the institution business.

The Government and particularly some States buy without competitive bidding; at times.

Institutions buy other competitive products as well as the Kellogg products, and have for many years.

In reference to the Kellogg Company specializing exclusively in institution work, I mean that the Kellogg Company, to my knowledge, was the only cereal company that went in to develop the institutional business in a very specialized way, which is necessary in the development of that particular market.

As to the Shredded Wheat Company selling its cereal products to all these institutions, I know that after I started to work at Battle Creek, that for quite

some time the Kellogg Company was the only cereal company calling on the greatest majority of the institutions in the United States. Prior to the time I took over the work I never saw any specifications or invitations for bidding from institutions—I do not know what they contained.

The Kellogg Whole Wheat Biscuit competes directly in these institutions with Shredded Wheat—the two items are in competition with each other.

When interviewing Mr. Fry of the Department of the Interior he asked me to name a competitive product and I told him the product manufactured by the Shredded Wheat Company; that was early in 1930. The Navy Department until 1928 had never permitted the purchase of cereals for general service—that is to be served to the men on board ship. It did, however, permit their purchase for commissary stores for resale.

I would not say that the change in the specifications for the service was due to my efforts. I was very much surprised to see the specifications—they were mailed to us one day from Washington, D. C.

The first time I called on Mr. Fry was in 1928. The real purpose of my visit at that time was to become acquainted with Mr. Fry, and to talk to him about all of the Kellogg products. It was not until 1930 that we knew sufficiently about the manner in which that business was handled, to ask him to include any additional cereals other than the cereals they were purchasing at that particular time. They were purchasing corn flakes, bran flakes, wheat krumbles and the rice. We started to bid on them. I could not say it was in 1928, because my first experience with the Kellogg business at Battle Creek was in 1928, and that proposal comes out early in the year, each year, and it was in 1929—the early part of 1929, that I made out the first proposal for bids for the Department of the Interior.

I interviewed Mr. Fry, as I recall it, early in 1930, and at that time we showed Mr. Fry two products that we were interested in getting the Department of the Interior to use, Kellogg's All-Bran and Kellogg's Whole Wheat Biscuit. It was necessary for us at that time to take the two packages that we were trying to sell them, to the dietitian for the Department of the Interior, and ask her regarding them. They purchased all of their cereals annually on bids, and at the time I went into Battle Creek, they had not called for Whole Wheat Biscuits or Shredded Wheat on the bids. In calling on the institutions we found out, of course, they were not using Shredded Wheat, because they could not get it through the regular source of supply, and many of the dietitians in the institutions were interested in having a greater variety of cereals, and that is the reason that we approached Mr. Fry regarding the two Kellogg products I have mentioned.

Mr. Fry at that time asked the names of other competitive products and I mentioned the product manufactured by Shredded Wheat Company. It was considered that Kellogg's Whole Wheat Biscuits were in competition with that product at that time.

I did not mention Muffets as a competing product, as it cannot be considered up to the Federal qualification for a Shredded Wheat. The specifications stated it shall be drawn into fine shreds and Muffets is the ribbon shape. Muffets have never been bid. I imagine if they were in competition, Muffets would have been bid on for Shredded Wheat as called for, and it states oblong biscuits.

No, I did not assist Mr. Fry in preparing the specifications he got out. We talked to Mr. Fry early in the year regarding our two products, and it was necessary for us to create a demand in the institutions for that particular product, before he would even consider adding it. The dietitian approved the use of the two prod-

(Received in evidence and marked "Defendant's Exhibit No. 173.")

WITNESS: That is the way we received the order from the Government after we had placed our bid. I have here the bid itself from the Marine Corps. The proposal is not here. I just brought that along to show how the order is received. The proposal would be in our branch office files, and could be produced. This is from the Commonwealth of Pennsylvania for the Pennsylvania Department of Health Tuberculosis Sanitarium No. 2 at Cresson, Pennsylvania, and calls for twenty cases Whole Wheat Biscuits, Kellogg.

(Received in evidence and marked "Defendant's Exhibit No. 174.")

WITNESS: In connection with the last proposal that was offered as evidence, this is the State specification from the Commonwealth of Pennsylvania for cereal breakfast foods, and under type, under the second paragraph B, type, grade and size, the item is listed as Whole Wheat Biscuit and in brackets, "shredded" in cartons 12-ounce weight in cartons 12½-ounce net weight.

That means either 12-ounce net weight or the 12½-ounce. On page No. 4, paragraph G, they give their specification for Whole Wheat Biscuits Shredded.

Paragraph G: "Whole Wheat Biscuits Shredded, shall be prepared from sound, clean wheat, without material removal of the bran, shall be processed with or without added flavoring, drawn into fine shreds, formed and baked in oblong biscuits, of uniform size and shape, weighing approximately 1 to 1.2 ounces, shall be porous, tender, crisp and of excellent flavor, free from rancid, musty or other undesirable taste or odor, shall contain no dirt, grit or other extraneous matter."

That is from the Commonwealth of Pennsylvania. The biscuit of both the plaintiff and defendant meet those specifications.

(Received in evidence and marked "Defendant's Exhibit No. 175.")

WITNESS: I have here a proposal from the State of South Dakota together with a sheet from their specification book. The sheet from the specification book shows one paragraph headed "Shredded Wheat, 12 ounce package, 3 dozen to case," and item No. 1880 Niagara. Item No. 1880½ Kellogg's. That is the extent of the specification. That is a sheet from their specification book.

There is a reference here on page 1 of the proposal for bids, Item No. 11 calls for three cases of No. 1880½ Shredded Wheat, one-half dozen to the case, and the Item No. 1880½ refers to the Kellogg number on the specification sheet. Reading under Shredded Wheat, 12 ounce packages, 3 dozen to the case Niagara is No. 1880, and 1880½ is Kellogg's.

(Received in evidence and marked "Defendant's Exhibit No. 176.")

WITNESS: There is a reference back here, there is one which calls for Item No. 1880, 36 package Shredded Wheat, and the No. 1880 is the Niagara.

I have here a request for bids from the Bureau of Purchases, State House, Augusta, Maine. This calls for Item No. 2 Kellogg's Whole Wheat Biscuit No. 324, 24—12½ ounce, and under that "or equal".

Item No. 9, one case Kellogg's Whole Wheat Biscuit No. 324, which is the number for the Kellogg product, and in brackets, 24—12½ ounce packages or equal. There are several of these items that are just identical to the first two that I have read. If you wish me to read all of them, I will.

Item No. 21, 10 cases Kellogg's Whole Wheat Biscuit, No. 324, 24—12½ ounce or equal.

Item 130, 10 cases Kellogg's Whole Wheat Biscuit No. 324, 24—12½ ounces or equal. Here is one more that I notice, No. 37, 2 cases Kellogg's Whole Wheat Biscuit No. 324, 24—12½ ounce or equal.

(Received in evidence and marked "Defendant's Exhibit No. 177.")

WITNESS: Here is a proposal for furnishing supplies to the Rockland State Hospital at Orangeburg, New York; it calls for Item No. 20 Whole Wheat Biscuits, Kellogg's 24—12½ ounce packages to the case.

(Received in evidence and marked "Defendant's Exhibit No. 178.")

WITNESS: And here is one from the State of Tennessee under Item No. 3 for delivery to the Central State Hospital at Nashville, 6 cases Whole Wheat Biscuits, Kellogg's 12½ ounce 24s, and they asked for the price per dozen.

Under Item No. 41, for delivery to the Tennessee School for the Deaf at Knoxville, one case Kellogg's Whole Wheat Biscuits. I believe that is all in here.

No, here is Item No. 21 for delivery to the Tennessee Vocational School for Girls, one case Shredded Wheat Biscuit.

(Received in evidence and marked "Defendant's Exhibit No. 179.")

WITNESS: I have here a group of orders received by our Syracuse, New York, office from various State institutions in New York. They call for—the first one calls for delivery to the Wassaic State School, Wassaic, New York, Item No. 33, Wheat Biscuits, Kellogg's, 24—12½ ounce packages to the case, 15 biscuits in the package.

(Received in evidence and marked "Defendant's Exhibit No. 180.")

WITNESS: These came all addressed to the Kellogg's Sales Company at our Syracuse office. These are actual shipping orders.

This is the Newark State School, Newark, New York, calls for Item No. 24, Whole Wheat Biscuits, Kellogg's 24, 12½ ounce packages.

(Received in evidence and marked "Defendant's Exhibit No. 181.")

WITNESS: This is from the Great Meadow Prisons, Comstock, New York, calling for Kellogg's Whole Wheat Biscuit, No. 360, individual size.

(Received in evidence and marked "Defendant's Exhibit No. 182.")

WITNESS: And this is from the Willard State Hospital, Willard, New York, Item No. 16, Kellogg's Whole Wheat Biscuits, 24 packages to case.

(Received in evidence and marked "Defendant's Exhibit No. 183.")

WITNESS: This is a proposal for bids from the State of Illinois, from the Division of Purchases and Supplies, the State House, Springfield, Illinois, showing their specifications and their quantities for various deliveries to the institutions requesting bids.

Under their specifications, Item No. 6, they show biscuits, Whole Wheat, 12½ ounce packages, bidder to state number of packages in case. For the Illinois School for the Blind, Item No. 6, eight cases Whole Wheat Biscuits, 12½ ounce packages, 24 to case.

From the Chicago State Hospital, Item No. 6—Item No. 6, by the way, refers to their specifications—five cases Whole Wheat Biscuits.

ucts, but it was necessary for us to call on the institutions, and to send samples of our products, before they would even call for the two particular products that we were trying to sell.

The institutions under the Department of the Interior send in requisitions annually for their requirements, and when the requisitions came along calling for Whole Wheat Biscuits, as a result of our calls and submitting samples, Mr. Fry then drew up a specification, and at the time we called on him, he asked us if our product and the product made by the Shredded Wheat Company, would comply with that specification.

Rippled Wheat really would not meet that specification. It has never been bid where Shredded Wheat is called for. I believe Rippled Wheat has been on the market at least eight months. I am not certain regarding that. Rippled Wheat is a ribboned wheat, and inasmuch as the specification reads: "Shall be drawn into fine shreds and in oblong biscuits," it would not meet the specification.

In regard to specifications being drawn with reference to both products, I might explain that by using an example, if I may. For example, where Shredded Wheat is called for by the Government, and we bid on Kellogg's Whole Wheat Biscuits, as we always show on our bids, if our bid is low, we receive an award just as in the case of where Corn Flakes are called for on the specifications, where Corn Flakes are called for by the Government without a brand name, the product or award is made to the lowest bidder on any brand of Corn Flakes. Both products will meet the Federal specification and each one will claim the Federal specification.

When the proposal calls for Shredded Wheat we do not change the proposal. We simply show that we are bidding on Kellogg's Whole Wheat Biscuits just exactly as when we bid on Corn Flakes. We say Kel-

logg's Corn Flakes. We indicate Kellogg's Whole Wheat Biscuits. There can not be anything added to the proposal itself, because that is made up on a mimeograph form, that is already made up. We show on bids that we indicate that we are bidding on Kellogg's Whole Wheat Biscuits.

When we received a proposal calling for Shredded Wheat, we always fill in the preliminary form indicating that the Kellogg Sales Company is placing the bid and for the item Shredded Wheat, frequently above that we fill in the name Kellogg's Whole Wheat Biscuits, 24—12½ ounce package to the case, if it is the large size package.

THE COURT: Then you do alter the offer of the Government by adding something to it.

WITNESS: We indicate what we are bidding on, and that is general practice in all bidding for the various bidders to show what they are bidding in. We show that we are bidding on Kellogg's Whole Wheat Biscuits.

THE COURT: Would the terms of the contract not be understoood unless you changed the wording of the Government offer?

WITNESS: I do not believe I understand your question.

THE COURT: The bid is the offer?

WITNESS: Yes.

THE COURT: The proposal is a general specification of the subject matter of a contract?

WITNESS: Yes, just exactly like when they call for——

THE COURT: You make an offer, and not the Government.

WITNESS: Yes, we make the offer.

WITNESS: Yes, I know Mr. Lewis, a Kellogg representative at Syracuse.

I have seen similar sheets as that of Exhibit 79. I recognize the two kinds of typewriting on that sheet.

Whenever we receive a proposal calling for Shredded Wheat as is indicated on here, we show that we are bidding on Kellogg's Whole Wheat Biscuits. We send the proposal back to the institutions with our offer, and they open the bids at a certain hour and read that publicly, so that they are always accessible for any one who is interested in finding out the prices, but I would just like to explain here that our general practice is always to fill in the brand as indicated in this column. This column calls for brand and we filled in Kellogg's. It states that bids can not be accepted unless size, kind, brand and if possible, manufacturer of each article is specified.

That proposal is our bid to supply Kellogg's Whole Wheat Biscuit.

It is quite general practice to receive two or three blank copies. I should not say blank, but partially filled in, calling for the items that they desire, and as this particular instance it calls for Corn Flakes and Shredded Wheat. In the item of Corn Flakes, there are undoubtedly six or seven different brands.

THE COURT: And you add those words and transmit the bid.

MR. VILAS: The paper that I handed your Honor, Exhibit 79, in its inception is a proposal or invitation to bid. When it is returned, it is an offer or a bid, upon which with others like it, the contract is awarded.

THE COURT: Is or is not awarded?

MR. VILAS: Yes, it is awarded to some one who bids on that particular form.

WITNESS: The practice as exemplified by Exhibit 79 is typical of the practice of the company under similar circumstances.

Mr. John Hopkins is the district sales manager of the company at Philadelphia.

Defendant's Exhibit 100-A is a proposal asking for a bid from the Government.

It is not a general practice to paste a rider on the bid. Mr. Hopkins does it because he wants to give a very detailed description of the product on which he is bidding, as you will note on the original sheet there is hardly room enough for him to fill in without having the letters very confusing, the fact that each package contains 15 biscuits, net weight of contents of each package is 12½ ounces.

Mr. Hopkins does that with my knowledge and assent. He wants to give a full explanation of the product he is bidding on.

As I have already stated Mr. Hopkins pastes a piece of paper on the proposal referring to Item 28-A-2 100 pounds Shredded Wheat to be Kellogg's Whole Wheat Biscuit package 24 packages to the case. Package containing 15 biscuits, net weight of contents of each package 12½ ounces. He does it to put on a full description of the product on which he is bidding. As you will note, this refers to the Federal specification NC 191, and inasmuch as there is no room to type in here, he has filled in this sheet. He fully explains what he proposes to furnish. The paragraph of the proposal calling for Shredded Wheat is a Federal specification as to the type of product wanted.

I never give approval to any company policy, no. This is not a general practice. Mr. Hopkins does it and with my knowledge, but I have never told him to do it, but I knew he did it. I have never told him not to do it. Mr. Hopkins likes to have all of the purchasing

officers fully acquainted with what he proposes to furnish, if our bid is accepted.

The Kellogg Company does not submit bids on all proposals. Bids are submitted upon proposals of institutions, calling for cereals, by jobbers and other deals; just as they submit bids on all kinds of ready-to-eat service. In other words, Mr. Hopkins does not send bids for the Kellogg Company to the Philadelphia Navy Yard—that is left open to competitive bidding of the jobber.

The type of cereal that is called for on navy yard bids or proposals and other Governmental proposals, is Shredded Wheat.

Plaintiff's Exhibit 227 is a price bulletin issued by a Government institution—it is a bulletin indicating the award of contract. On page 4, under cereals are the words "Shredded Wheat" with reference to the specification—that is the Federal specification. Contract No. 12879, on the first page, is awarded to Price Brothers. To my knowledge they are wholesale grocers in Philadelphia. They carry Kellogg's products as well as all other cereals. I do not know whether they carry the National Biscuit Shredded Wheat. I imagine they do. The price bulletin indicates that a contract was awarded to Price Brothers for Shredded Wheat at a unit price of .118 cents. The price indicates either the Kellogg product or the National Biscuit Company's product. That I might say is just as in the case of Corn Flakes on there. They have not indicated what brand they propose to supply, so they can supply any brand of Corn Flakes. The Price Brothers could have supplied either Whole Wheat Biscuit like Kellogg's or the Shredded Wheat made by National Biscuit Company because they are both up to Federal specifications.

I know very frequently Kellogg's Whole Wheat Biscuit is supplied on a specification where only the

words Shredded Wheat appear, as both are always bid. We get the business sometimes and National Biscuit Company get the business sometimes.

Defendant's Exhibit 173 is a subsistence contract. The specification No. 191 is on that. The invitation or proposal to bid is in our branch office. This is our actual order. The contract is in the files of our New York office—or the bid. I asked our branches, of course, to send us copies of orders.

This can be supplied. It is dated 1933, so I believe we can supply that.

I have never called on the purchasing department of South Dakota myself. The representative of the Kellogg Company from our Minneapolis office calls on the purchasing department there.

I have no information as to the date on which the particular Exhibit 176 was printed or issued.

XQ. 297. Bearing in mind the specification as I just read it to you, namely, "Shredded Wheat, 12-ounce package, three dozen to the case," did the Kellogg Company bid on that particular specification?

A. We did not bid direct for the State of South Dakota. That is handled by the jobbers.

XQ. 298. Please answer the question. Did the Kellogg Company bid on that specification and fill the order?

A. No, the Kellogg Company does not.

XQ. 299. Could it?

A. The Kellogg Company could, because we can indicate the number of packages that we wish to supply in a case.

XQ. 300. Can you bid on a specification calling for a 12-ounce package, three dozen to the case?

A. It is quite a general practice to bid the different sizes.

XQ. 301. Can not you answer the question?

A. We did not bid on thirty-six packages to the case.

XQ. 303. It is a fact, too, is it not, that as you say, a jobber or a wholesaler whom you say fills or does the bidding in South Dakota, could not fill an order for Shredded Wheat, 12-ounce packages, three dozen to the case, with your product?

A. Not with the Kellogg product, but they can bid and indicate on the bid the quantity that they will supply, packed in a different number of packages to the case, and that is quite a general practice in all business.

WITNESS: May I explain this, so that there will be no misunderstanding regarding it? For example, we receive proposals calling for bids, that call for individuals, packed in 100 packages to the case. Outside of one item, we do not pack individuals 100 packages to the case. They are packed 50, with the exception of Whole Wheat biscuits, which are packed 60, and we change the quantity accordingly, cross out the 100, and indicating that we are putting in 50 packages and change the quantity accordingly, so that the contractor will get the proper number of packages which are called for.

RE-DIRECT EXAMINATION.

WITNESS: I do not know of any Federal specifications which would be specified by only a product of a single manufacturer. They are all drawn for competitive bidding, because that is what the Government desires as well as most of the State institutions.

As I indicated in my testimony yesterday, I saw the bids of National Biscuit Company for offering to supply the original Shredded Wheat under a bid or proposal called for by the Department of the Interior. I have seen two such bids that I can recall right at this minute, one for the Department of the Interior, and

the other for the Veterans Administration, both at Washington, D. C.

The proposal referred to under the name of the Department of Interior was opened a week ago last Thursday. I believe that is May 18th. It called for 1072 cases, of biscuits, Whole Wheat, Shredded. It referred to the Federal Specifications for cereals calling for Shredded Wheat, paragraph 2-H.

May I state here that it is the practice in some of the departments of the Government to send only the required number of copies that they require to be returned, and I made the statement that the Marine Corps copy of our proposal or bid is in our New York office. If that was one where every copy was required to be returned to the contractor, we would not have a copy of that in our files. It would be in the files of the Government. I could not state for certain that it would be possible to get that from the Government files, but I rather imagine that it would. At least we can try.

The second bid that I spoke of was at the Veterans' Administration at Washington, D. C. It was last December, 1932, when that bid was opened, as I can recall the dates, and the bid called for Shredded Wheat 24, 12½ ounce packages, and they had indicates that they were bidding on original Shredded Wheat.

SIXTH DAY.

May 31, 1933.

HAROLD F. MUNTZ

resumed the stand on

DIRECT EXAMINATION.

WITNESS: I produce the bids of the Marine Corps and information as to the Price Brothers' bid. This Norfolk bid is a bid dated November 13, 1933, in which the product on the invitation to bid was wheat cereal, Kellogg's Whole Wheat, and the word "Kellogg's Whole" has been struck out by National Biscuit Company, and the word "Shredded" written into the bid, and then the amount of the bid dated March 13, 1933.

(Paper received in evidence and marked "Defendant's Exhibit No. 189.")

WITNESS: The Marine Corps for Washington, D. C., the exhibit referred to by Mr. Vilas on Friday, referred to a bid that we placed for delivery to the Quartermaster of the United States Marine Corps, Washington, D. C., and I have here our file copy of that bid. The proposal for bids came to us reading, "Item No. 45, Wheat Shredded, 12 ounce packages, to be in accordance with Federal Specification No. NC-191". We have offered to deliver or to furnish Kellogg's Whole Wheat Biscuits, packed 12½ ounce packages to the case. We filled in the words "Kellogg's Whole Wheat Biscuit, 12½ ounce packages" and the price at which we were bidding.

THE COURT: In this instance you did what?

THE WITNESS: We filled in the name of Kellogg's Whole Wheat Biscuit, 12½ ounce packages, offering to supply that on this bid.

THE COURT: And transmitted that as part of your bid?

THE WITNESS: We transmitted that as the bid itself. That was the bid itself and was sent to the United States Marine Corps at Washington, D. C.

(Paper received in evidence and marked "Defendant's Exhibit No. 190.")

THE WITNESS: Referring to Defendant's Exhibit 189, in evidence, a bid of the National Biscuit Company, reading "Wheat, Cereal, Kellogg's Whole Wheat Biscuit, 1¼ ounce packages" the defendant company does not strike out any special brand name as Kellogg's, or Original, or Niagara, in returning those bids. When we receive a request for a bid, we always fill in the name of Kellogg's Whole Wheat Biscuit. We do not strike out any printed name. We feel that that is actually altering the bid. In our evidence, we have submitted cases just where it shows the brand name National Shredded Wheat and NBC Shredded Wheat. There are two such examples in at the present time. At the present time we do not bid on them, because when there is a brand name "National", the same as "Kellogg", that means the Navy Department or the Army departments want that particular brand because it is for retail purposes.

THE COURT: When a manufactured product is requested you do not bid?

THE WITNESS: We do not bid. For a while we bid. We soon realized it was futile, because the particular manufacturer's brand is specified and there is no chance of our getting the business as long as the National brand is specified. We say we are not bidding on another's whole wheat biscuit, and in the event we did get the award, it is not filled in the name of Kellogg's Whole Wheat Biscuit. We would have to supply the National Shredded Wheat. We no longer bid on those, because there is a very specific demand for that man-

ufacturer's product, and those are resale articles, and the defendant is permitted to specify brand names for resale articles.

On the Marine Corps order which was referred to on Friday, for which we were requested to supply copies of our bids, there were three orders, one a bid placed at our Boston office, one at Philadelphia and one at New York. The Philadelphia proposal has already gone in, and here is a typed copy of our bid for the Boston office which does not call for any Shredded Wheat Biscuits.

It was necessary for us to return to the Government all of the copies they sent us. We are always in the habit of making some record of what we place a bid on, but in this particular instance, as it was called for on the order, there was no Shredded Wheat Biscuit. The uniform practice is for the Government to send three mimeographed invitations to bid and to ask that all three, or either two or three be returned.

The plaintiff requested us to produce a bid placed by Price Brothers for delivery to the Philadelphia Navy Yard. I do not recall just what date the bid in question was, the date that it was sent out. We went to Price Brothers and we have the latest bid that they have in their file, and they tell us that they always after the award has been made, they destroy copies of their bid.

We have the copy of their bid, however, for May 18, 1933, in which Price Brothers have placed a bid to the supply officer at the Philadelphia Navy Yard, Philadelphia. Price Brothers are wholesale grocers and market our goods as well as other cereals on the market. In making the bid, they are not acting as agents for the Kellogg Company; they buy our products and resell them in the regular course of business transaction. They are acting as principals on their own behalf.

In this bid the reference is to "Shredded Wheat —see detailed requirements of above specification, paragraph E 2-H"—and the quantity to be bid on is one thousand; written under that "In bulk commercial packages." That is the way the bid was received, and then the words written in in pen are "Kellogg's W. Wheat, 12½ ounces", and the figures, the net price, .118, and the total amount $118.

(The paper was received in evidence and marked "Defendant's Exhibit No. 191.")

RE-CROSS-EXAMINATION.

THE WITNESS: Defendant's Exhibit 189 is an invitation to bid and a copy of a bid of the National Biscuit Company. Defendant's Exhibit 173 is not the contract on which that bid was awarded. Defendant's Exhibit 190 relates to the contract Defendant's Exhibit 173, that was our copy.
